PROCEEDINGS OF SPIE

Geoinformatics 2007

Cartographic Theory and Models

Manchun Li
Jiechen Wang
Editors

25–27 May 2007
Nanjing, China

Organized by
Nanjing University (China)

Sponsored by
Nanjing University (China)
CPGIS—The International Association of Chinese Professionals in Geographic
Information Sciences
Cartography Committee, AAG (USA)
GIS Committee, AAG (USA)
Cartography and GIS Committee, The Geographical Society of China (China)
Cartography and GIS Committee, Chinese Society for Geodesy, Photogrammetry
and Cartography (China)

Cosponsored by
State Key Laboratory of Remote Sensing Science, Jointly Sponsored by the Institute of Remote
Sensing Applications of Chinese Academy of Sciences and Beijing Normal University (China)
Jiangsu Provincial Bureau of Surveying and Mapping (China)

Volume 6751

Proceedings of SPIE, 0277-786X, v. 6751

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

The CCC fee code is 0277-786X/07/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE
Digital Library

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

xiii	Introduction

CARTOGRAPHIC THEORY AND MODELS

6751 02	Efficient implementation of adaptive view-dependent mesh simplification [6751-01] Y. Wang, Y. Sheng, K. Zhang, P. Tian, G. Lu, Nanjing Normal Univ. (China)
6751 03	Research on automatic generalization methods of geographical spatial data [6751-02] Y. Huang, Institute of Remote Sensing Applications (China) and Graduate Univ. of the Chinese Academy of Sciences (China); Z. Zhao, Jiujiang Univ. (China)
6751 04	Color on emergency mapping [6751-03] L. Jiang, Institute of Geographical Sciences and Natural Resources Research (China) and Graduate School of the Chinese Academy of Sciences (China); Q. Qi, Institute of Geographical Sciences and Natural Resources Research (China); A. Zhang, Institute of Geographical Sciences and Natural Resources Research (China) and Graduate School of the Chinese Academy of Sciences (China)
6751 05	Cell-based representation and analysis of social-economic data in grid-city construction [6751-04] X. Liu, China Univ. of Geosciences (China); F. Huang, P. Wang, Northeast Normal Univ. (China)
6751 06	Theories, methods, and practice on the National Atlases of China [6751-05] Q. Qi, Institute of Geographical Sciences and Natural Resources Research (China)
6751 07	3D triangulation of terrestrial laser scanning data based on spherical projection [6751-06] X. Wang, X. Huang, F. Bian, J. Sun, Wuhan Univ. (China)
6751 08	Generalized linear models for mapping land cover using satellite measurement and digital terrain data [6751-07] X. Rao, J. Zhang, Wuhan Univ. (China); B. M. Steele, R. L. Redmond, Univ. of Montana (USA)
6751 09	Establishing a neurocognition-based taxonomy of graphical variables for attention-guiding geovisualisation [6751-08] O. Swienty, M. Zhang, Technical Univ. of Munich (Germany); T. Reichenbacher, Univ. of Zurich (Switzerland); L. Meng, Technical Univ. of Munich (Germany)
6751 0A	Schematic road network map progressive generalization based on spatial cognition [6751-09] W. Dong, Wuhan Univ. (China) and Chinese Academy of Surveying and Mapping (China); Q. Guo, Wuhan Univ. (China); J. Liu, Chinese Academy of Surveying and Mapping (China)

- 6751 OB **A new compound algorithm study for Delaunay triangulation construction** [6751-10]
Y. Rui, J. Wang, C. Qian, J. Liu, X. Li, Nanjing Univ. (China)
- 6751 OC **The research of object selection method based on rough set in map generalization** [6751-11]
W. Li, Wuhan Univ. of Science and Technology (China); Y. Long, Nanjing Normal Univ. (China); Z. Lin, Wuhan Univ. (China)
- 6751 OD **An algorithm for matching multiscale linear objects based on Hausdorff distance** [6751-12]
L. Zhang, Q. Guo, Wuhan Univ. (China); Y. Sun, The Chinese People's Liberation Army (China)
- 6751 OE **A progressive approach to the generalization of an urban street network** [6751-13]
J. Tian, Q. Guo, Wuhan Univ. (China)
- 6751 OF **Research of the digital map symbolization control based on knowledge** [6751-14]
Z. Zhou, Q. Sun, H. Liu, S. Li, Q. Xu, Information Engineering Univ. (China)
- 6751 OG **Generalizing drainages with density differences based on river length and the amount of tributaries** [6751-15]
Q. Zhang, M. Tang, Sun Yat-Sen Univ. (China)
- 6751 OH **The solutions to two technical problems in digital land use mapping** [6751-16]
X. Hu, Wuhan Univ. (China) and Hainan Bureau of Surveying and Mapping (China); G. Niu, Land Resources Administration Bureau of Wuhu City (China); W. An, Hainan Univ. (China)
- 6751 OI **Research on self-organizing clustering of spatial points** [6751-17]
L. Jiao, Y. Liu, Wuhan Univ. (China)
- 6751 OJ **Integrative model of urban pipeline-road-stratum and its spatial distance analysis** [6751-18]
C. Wang, H. Zhu, X. Li, Tongji Univ. (China)
- 6751 OK **A discriminant space-based framework for scalable area-class mapping** [6751-19]
J. Zhang, Wuhan Univ. (China); M. F. Goodchild, Univ. of California, Santa Barbara (USA); B. M. Steele, Univ. of Montana (USA); R. Redmond, MT Cooperative Wildlife research Unit, Univ. of Montana (USA)
- 6751 OL **Research on fine resolution representation of digital terrain information** [6751-20]
W. Zhao, Nanjing Normal Univ. (China) and Hefei Univ. of Technology (China); G. Tang, Nanjing Normal Univ. (China)
- 6751 OM **The research about the quick algorithm of subtracting the DTM** [6751-21]
T. Chian, Y. Li, J. Geng, Nanjing Univ. (China)
- 6751 ON **An automated framework of digital cartography system** [6751-22]
X. Ji, H. Liu, S. Li, Information Engineering Univ. (China)
- 6751 OO **An adaptive method to record the track of a vehicle using map-matching result and quantitative fuzzy description** [6751-23]
X. Zhang, X. Guan, L. Zhang, Motorola Software Group (China)

- 6751 OP **Cartographic symbol library considering symbol relations based on anti-aliasing graphic library** [6751-24]
Y. Mei, L. Li, Wuhan Univ. (China)
- 6751 OQ **The digital section system of digital mapping techniques** [6751-25]
K. Zhang, China Univ. of Geosciences (China); Z. Sun, Jilin Normal Univ. (China); C. Li, Q. Yu, China Geological Survey Bureau (China); Y. Zhu, China Univ. of Geosciences (China); Z. Zhang, China Geological Survey Bureau (China); X. Kou, China Univ. of Geosciences (China)
- 6751 OR **A raster-based method to forecast the distribution of the planned settlements** [6751-26]
J. She, Nanjing Univ. (China) and Univ. of Stuttgart (Germany); J. Ju, H.-G. Schwarz-von Raumer, Univ. Stuttgart (Germany); X. Feng, Nanjing Univ. (China); P. Treuner, Univ. Stuttgart (Germany); B. Liu, Nanjing Univ. (China) and Univ. of Stuttgart (Germany); P. Xiao, Nanjing Univ. (China)
- 6751 OS **Analog/digital map conversion and cartographic information content changes** [6751-27]
H. Liu, X. Wang, J. Xiao, S. Li, Institute of Surveying and Mapping (China)
- 6751 OT **Chinese chart publishing data updating technique and application** [6751-28]
G. H. Liu, R. C. Peng, Y. Chen, W. J. Gao, L. X. Guo, Y. D. Zheng, Dalian Naval Academy (China)
- 6751 OU **A spatial data generalization method for online vector data 3D visualization** [6751-29]
M. Sun, Peking Univ. (China); Z. Wang, China Univ. of Mining and Technology, Beijing (China); D. Yin, H. Wu, Peking Univ. (China)
- 6751 OV **Extracting the information of coastline shape and its multiple representations** [6751-30]
Y. Liu, Dalian Naval Academy (China); S. Li, Dalian Naval Academy (China) and Dalian Maritime Univ. (China); Z. Tian, H. Chen, Dalian Naval Academy (China)
- 6751 OW **Cartographic generalization of cultivated land in hilly areas based on skeleton algorithm** [6751-31]
M. Su, M. Li, S. Wang, M. Zhang, Nanjing Univ. (China)
- 6751 OX **An automatic method to determine the size of sliding window for metafractal dimension curve and its application** [6751-32]
L. Wang, Y. Long, Nanjing Normal Univ. (China); T. Zhou, Nanjing Normal Univ. (China) and Nantong Univ. (China); S. Cui, Nanjing Normal Univ. (China)
- 6751 OY **Polarization transformation as an algorithm for automatic generalization and quality assessment** [6751-33]
H. Qian, Technical Univ. of Munich (Germany); L. Meng, Information Engineering Univ. (China)
- 6751 OZ **Automatic cartographic generalization for urban buildings based on least squares adjustment** [6751-34]
C. Yuan, Henan Polytechnic Univ. (China); J. Zhang, Taiyuan Univ. of Technology (China); Z. Xiong, Y. Liu, Henan Polytechnic Univ. (China)

- 6751 10 **An area balance method for the cartographic generalization of the land utilization status quo database** [6751-35]
Y. Fan, D. Zhu, X. Zhang, J. Li, China Agricultural Univ. (China)
- 6751 11 **Constraints of displacement and their satisfaction with finite element method** [6751-36]
J. Mao, Ministry of Land and Resources (China), Shanghai Univ. (China), and Jiangxi Normal Univ. (China); T. He, Ministry of Land and Resources (China); X. Li, X. Liu, Q. Zeng, Jiangxi Normal Univ. (China)
- 6751 12 **Resolution of spatial conflict between road networks based on the improved snake model** [6751-37]
X. Wu, L. Miao, Y. Hu, South China Agricultural Univ. (China); Q. Du, Wuhan Univ. (China); Z. Xu, Bureau of Urban Utilities and Landscaping of Guangzhou Municipality (China)
- 6751 13 **Automatic recognition of point symbols on topographic maps** [6751-38]
F. Chen, P. Hu, X. Wang, Q. Fan, Wuhan Univ. (China)
- 6751 14 **The design of a map database** [6751-39]
J. Xiao, H. Liu, X. Luan, Z. Zhou, Institute of Surveying and Mapping (China)
- 6751 15 **COM-based expert system for map projection selection** [6751-40]
H. Zhao, H. Zhu, L. Li, Wuhan Univ. (China); Y. Xing, Jiangsu Provincial Bureau of Surveying and Mapping (China)
- 6751 16 **Vector map geo-location using GPS tracks** [6751-41]
Y. Bao, H. Xu, Z. Liu, Univ. of Science and Technology of China (China)
- 6751 17 **Quantitative measurement of electric map information based on visual perception** [6751-42]
F. Jia, X. You, Information Engineering Univ. (China)
- 6751 18 **The research on automatically created contour's algorithm based on DEM** [6751-43]
A. Xu, Wuhan Univ. (China) and Zhejiang Forestry Univ. (China); Q. Li, Wuhan Univ. (China)
- 6751 19 **The application of GDI+ in electronic map visualization** [6751-44]
S. Che, S. Li, H. Liu, Q. Xu, Mapping and Surveying Institute (China)
- 6751 1A **Cognitive distortions based on MDS configuration and sketch mapping: a case study in Beijing** [6751-45]
S. Shen, L. Xue, L. Wu, Y. Liu, Peking Univ. (China)
- 6751 1B **Handling the relationship between features in automatic mapping** [6751-46]
H. Wang, L. Li, X. Zhang, X. Zheng, Wuhan Univ. (China)
- 6751 1C **Research on thematic mapping intellectualized design model based on geosciences and cartographic mapping knowledge** [6751-47]
D. Yu, Wuhan Univ. (China) and Qingdao Univ. (China); R. Huang, Y. Guan, Wuhan Univ. (China)

- 6751 1D **Landform classification based on adjacency index of feature lines** [6751-48]
M. Luo, Institute of Mountain Hazards and Environment (China), Nanjing Normal Univ. (China), and Graduate Univ. of Chinese Academy of Sciences (China); G. Tang, J. Zhou, Nanjing Normal Univ. (China)
- 6751 1E **Building extraction using local surface normal angle transformation** [6751-49]
Y. Li, T. Qian, Nanjing Univ. (China)
- 6751 1F **Automatic placement of annotation in area feature by map spatial geometry information measurement** [6751-50]
L. Li, Wuhan Univ. (China) and Key Lab. of Geographic Information System (China); B. Li, Z. Wu, D. Gao, M. Xia, Wuhan Univ. (China)
- 6751 1G **Compiling of thematic map in historical geography studies for Jiankang in the period of the Six Dynasties (220~589 A.D.)** [6751-51]
G. Chen, M. Li, D. Chen, Nanjing Univ. (China)
- 6751 1H **An extended arc data structure and its applications** [6751-52]
J. Wang, Y. Li, C. Qian, Nanjing Univ. (China)

Introduction

We are pleased to present the proceedings from the 15th International Conference on Geoinformatics in 2007 (Geoinformatics 2007).

Since its inception in 1992, the International Association of Chinese Professionals in Geographic Information Sciences (CPGIS) has sponsored a series of international conferences on geoinformatics, which encourages academic exchange and fosters friendship and collaboration among professionals and practitioners worldwide. After successful Geoinformatics meetings in 2006 (Wuhan, China), and in 2005 (Toronto, Canada), Geoinformatics 2007, held in Nanjing, China, was also highly successful. This year's meeting was organized by the Department of Geographic Information Science and International Institute of Earth System Science at Nanjing University.

Geoinformatics 2007 was also part of the celebrations of the 50th anniversary of the cartography specialization at Nanjing University and the 15th anniversary of CPGIS. The meeting covered a wide range of topics in theories, techniques, and applications of geoinformatics, as well as new philosophical views on the future development of this discipline. Over 500 participants from more than 10 countries and regions made Geoinformatics 2007 an exciting event.

The conference theme of Geoinformatics 2007 was "Cartography, Spatial Analysis and Visualization for Harmonious Society," which emphasizes the roles of geospatial information sciences in promoting harmony in societies through informed land use decision making, effective visualization and analysis of spatial information in various sectors of a society, and developing new tools for integrated assessments involving multiple spatial information sources for various stakeholders, etc. This year we received 805 abstracts, accepted 605 abstracts, and accepted 454 full papers for publication after a peer-review process. In total, 215 oral and 294 poster presentations were delivered at the conference. Through these presentations and various forums, the participants showcased their recent achievements and exchanged scientific ideas and technical skills in the field of geospatial information science.

On behalf of the conference technical and local organizing committees, I would like to thank all participants in the conference and contributors to these proceedings. Your support made this year's conference a highly successful and memorable event. We sincerely hope that this momentum will continue into the future, and we will count on your continued support.

Jingming Chen
