Volume 6773

Proceedings of SPIE, 0277-786X, v. 6773

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Next-Generation Communication and Sensor Networks 2007*, edited by Sergey I. Balandin, Proceedings of SPIE Vol. 6773 (SPIE, Bellingham, WA, 2007) Article CID Number.

The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/07/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Committee
ix	Introduction

ADVANCES IN WIRELESS BROADBAND ACCESS AND SENSOR NETWORKS

- 6773 02 **Modeling of handover counting and location management for wireless mobile networks (Invited Paper)** [6773-01]
R. M. Rodríguez-Dagnino, Tecnológico de Monterrey, Ctr. de Electrónica y Telecomunicaciones (Mexico); H. Takagi, Univ. of Tsukuba (Japan)
- 6773 03 **Cross-layer design for intrusion detection and data security in wireless ad hoc sensor networks** [6773-02]
W. S. Hortos, Associates in Communications Engineering Research and Technology (USA)

ADVANCES IN SENSOR NETWORK MANAGEMENT

- 6773 04 **New route classification method for networks with static routing** [6773-03]
E. Balandina, S. Balandin, Nokia Research Ctr. (Finland)
- 6773 05 **A novel PON based UMTS broadband wireless access network architecture with an algorithm to guarantee end to end QoS** [6773-04]
A. Sana, S. Hussain, M. A. Ali, S. Ahmed, The City Univ. of New York (USA)
- 6773 06 **Transformation of legacy network management system to service oriented architecture** [6773-05]
J. Sathyan, K. Shenoy, Infosys Technologies, Ltd. (India)

HYBRID BROADBAND ACCESS AND SENSOR NETWORK TECHNOLOGIES

- 6773 07 **Wireless connections of sensor network using RF and free space optical links** [6773-06]
S. Deng, J. Liao, Z. R. Huang, M. Hella, K. Connor, Rensselaer Polytechnic Institute (USA)

BROADBAND ACCESS DEVICES AND INDUSTRIAL SENSOR NETWORKS

- 6773 08 **Implementation of NFC technology for industrial applications: case flexible production** [6773-07]
M. Sallinen, E. Strömmer, A. Ylisaukko-oja, VTT (Finland)

POSTER SESSION

- 6773 0B **A new flow-level load balance in MPLS network based on distributable traffic** [6773-10]
K. Hao, Z. Jin, Y. Shu, L. Yu, Tianjin Univ. (China)

- 6773 0C **The study of the energy consumption model for an IEEE 802.11 network interface** [6773-11]
Y. Bao, Y. Shu, X. Wang, L. Yu, Tianjin Univ. (China)
- 6773 0D **An empirical analysis of aggregate WLAN traffic characteristic** [6773-12]
H. Feng, Northwest Normal Univ. (China); Y. Shu, L. Yu, Tianjin Univ. (China)
- 6773 0E **A peer-to-peer music sharing system based on query-by-humming** [6773-13]
J. Wang, X. Chang, Z. Zhao, Y. Zhang, Q. Shi, Tianjin Univ. (China)
- 6773 0F **RENEW: a real-time and effective network emulator of Windows for IPv6** [6773-14]
B. Zhao, Z. Jin, Y. Shu, Y. Li, D. Cen, Tianjin Univ. (China)
- 6773 0G **A tree-index routing structure in a peer-to-peer system** [6773-15]
M. Yu, Z. Zhao, J. Yu, Z. Zhao, Q. Shi, Tianjin Univ. (China)
- 6773 0I **Reliable energy-aware routing with unreliable links in ad hoc networks** [6773-17]
Y. Bao, Y. Shu, X. Wang, L. Yu, Tianjin Univ. (China)
- 6773 0J **An adaptive PID neuron network controller for congestion control** [6773-18]
L. Yu, Z. Shi, Y. Shu, Tianjin Univ. (China)
- 6773 0K **Designing a robust PID congestion controller supporting TCP flows based on H_∞ optimal control theory** [6773-19]
L. Yu, Z. Shi, K. Chen, Y. Shu, Tianjin Univ. (China)
- 6773 0L **Dependence topology optimization in a dynamic peer-to-peer database network** [6773-20]
Z. Zhao, Z. Zhao, Q. Shi, Tianjin Univ. (China)
- 6773 0M **A distributed incentive compatible pricing mechanism for P2P networks** [6773-21]
J. Zhang, Z. Zhao, X. Xiong, Q. Shi, Tianjin Univ. (China)
- 6773 0N **A micro-payment architecture for P2P networks** [6773-22]
J. Zhang, Z. Zhao, X. Xiong, Q. Shi, Tianjin Univ. (China)
- 6773 0O **A density-based approach to node clustering in decentralized peer-to-peer networks** [6773-23]
Q. Shi, Tianjin Univ. (China) and Liaoning Technical Univ. (China); Z. Zhao, Tianjin Univ. (China); H. Bao, Tianjin Univ. (China) and Naval Aeronautical Engineering Institute (China)
- 6773 0P **A suffix arrays based approach to semantic search in P2P systems** [6773-24]
Q. Shi, Tianjin Univ. (China) and Liaoning Technical Univ. (China); Z. Zhao, Tianjin Univ. (China); H. Bao, Tianjin Univ. (China) and Naval Aeronautical Engineering Institute (China)
- 6773 0Q **Research on the DHT algorithm chord** [6773-25]
M. Yu, Z. Zhao, J. Yu, J. Wang, Q. Shi, Tianjin Univ. (China)
- 6773 0R **A fully distributed clustering algorithm based on fractal dimension** [6773-26]
X. Xiong, J. Zhang, Q. Shi, Tianjin Univ. (China)

- 6773 OS **Intrusion detection using pattern recognition methods** [6773-27]
N. Jiang, L. Yu, Tianjin Univ. (China)
- 6773 OT **An efficient fractal dimension based clustering algorithm** [6773-28]
X. Xiong, J. Zhang, Q. Shi, Tianjin Univ. (China)

Halid Hrasnica, Eurescom GmbH (Germany)

Session Chairs

Advances in Wireless Broadband Access and Sensor Networks

Raj Jain, Washington University in St. Louis (USA)
Sergey I. Balandin, Nokia Research Center (Finland)

Advances in Sensor Network Management

Sergey I. Balandin, Nokia Research Center (Finland)

Hybrid Broadband Access and Sensor Network Technologies

Katsutoshi Tsukamoto, Osaka University (Japan)
Sergey I. Balandin, Nokia Research Center (Finland)

Broadband Access Devices and Industrial Sensor Networks

Sergey I. Balandin, Nokia Research Center (Finland)
Katsutoshi Tsukamoto, Osaka University (Japan)

Introduction

Welcome to the ITCOM conference Next-Generation Communication and Sensor Networks 2007. This year our conference is done in close cooperation with the conference Broadband Access Communication Technologies II. The conferences strongly overlap the addressed research areas, and alignment of the conferences' schedules is done for the benefit of the conference attendees.

This year we have accepted 28 high quality technical papers, from which 9 papers are selected for 5 joint sessions with the Broadband Access Communication Technologies II conference. Also, both conferences are strongly presented in the poster session, which results in a very strong technical program representing the state of the art in the field.

Analysis of the last few years shows significant research interest in next-generation communication and sensor networks. The network services have evolved from basic telephone and data offerings to advanced integrated services over high-speed networks, wireless networks, sensor networks, and the Internet. This evolution has raised the need for new and more sophisticated solutions in the development of networking technologies and the underlying infrastructure.

This conference, fifth in a series, aims to promote discussion on the development of performance evaluation techniques, traffic control principles, and traffic engineering methods and practices, as well as to explore future directions in enhancing the Internet to address the above-mentioned challenges. The specific focus areas of this year's conference are next-generation communication and sensor networks. Also, this year we start looking to a new area of embedded networks, which to a large extent has the same limitations as sensor networks. To support all of these discussions, we have selected a number of relevant papers that are presented at the conference.

We appreciate the time and expertise of the program committee members in reviewing the submissions, and the session chairs for helping with the sessions. We also thank the SPIE staff for their help in processing the submissions on the Web and in organizing the conference.

Thank you for joining us at the ITCOM Next-Generation Communication and Sensor Networks 2007 conference.

Sergey I. Balandin
