Proceedings of SPIE, 0277-786X, v. 6774

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Optical Transmission Systems and Equipment for Networking VI*, edited by Werner Weiershausen, Benjamin B. Dingel, Achyut Kumar Dutta, Ken-ichi Sato, Proceedings of SPIE Vol. 6774 (SPIE, Bellingham, WA, 2007) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/07/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v	Conference Committee
vii	Introduction

SESSION 1 PHOTONIC NETWORKS

6774 02	Photonics technologies toward next generation broadband networks (Keynote Paper) [6774-10] H. Kuwahara, Fujitsu Labs., Ltd. (Japan)
---------	---

SESSION 2 PART I: OVERVIEW HIGH SPEED AND CHALLENGES

6774 06	Interface options for 100 GbE from a physical layer perspective (Invited Paper) [6774-01] P. M. Krummrich, S. Pachnicke, M. Windmann, Univ. of Dortmund (Germany)
6774 09	LDPC-coded modulation for beyond 100-Gb/s optical transmission (Invited Paper) [6774-04] I. B. Djordjevic, The Univ. of Arizona (USA)

SESSION 3 PART II: OPTIONS AND MIGRATION

6774 0B	Can 100Gb/s wavelengths be deployed using 10Gb/s engineering rules? (Invited Paper) [6774-06] R. Saunders, StrataLight Communications Inc. (USA); G. Nicholl, K. Wollenweber, Cisco Systems, Inc. (USA); T. Schmidt, StrataLight Communications Inc. (USA)
---------	--

SESSION 4 TRANSMISSION IMPAIRMENTS AND EQUALIZATION

6774 0F	PMD tolerance testing of optical interfaces (Invited Paper) [6774-14] H. Rosenfeldt, Agilent Technologies (Germany)
6774 0G	PMD compensation using coherent detection and linear equalization principles (Invited Paper) [6774-21] D. Goelz, S. Boehm, K. Schumacher, P. Meissner, Technische Univ. Darmstadt (Germany)
6774 0H	Temperature induced dispersion variation and equalization in 107Gb/s transmission systems [6774-16] D. Fritzsche, D. Breuer, T-Systems Enterprise Services GmbH (Germany)
6774 0I	Performance of line codes in optical heterodyne continuous phase frequency shift keying transmission system impaired by polarization mode dispersion [6774-15] M. S. Islam, S. P. Majumder, Bangladesh Univ. of Engineering and Technology (Bangladesh)

SESSION 5 ADVANCED WDM SOLUTIONS

- 6774 0J **Roadmap for low-cost optical regeneration (Invited Paper) [6774-17]**
T. von Lerber, LuxDyne Ltd. (Finland); S. Honkanen, Helsinki Univ. of Technology (Finland);
F. Kueppers, College of Optical Sciences, The Univ. of Arizona (USA)
- 6774 0K **The influence of bit pattern effects on clock recovery in phase shift keyed fiber-optic
transmission systems [6774-18]**
E. Parsons, Q. Wang, College of Optical Sciences, The Univ. of Arizona (USA); S. Honkanen,
Helsinki Univ. of Technology (Finland); T. von Lerber, LuxDyne Ltd. (Finland); F. Kueppers,
College of Optical Sciences, The Univ. of Arizona (USA)
- 6774 0L **Increasing the transmission distance by dispersion scheme optimization for terrestrial ultra-
high-bitrate long-haul transmission systems [6774-19]**
S. Vorbeck, M. Schneiders, W. Weiershausen, T-Systems Enterprise Services GmbH
(Germany)

POSTER SESSION

- 6774 0M **Study on optimization of resource allocation in OBS networks [6774-22]**
J. Wang, D. Man, Y. Song, Xiamen Univ. (China)

Achyut Kumar Dutta, Banpil Photonics, Inc. (USA)
Ken-ichi Sato, Nagoya University (Japan)

Program Committee

Soichiro Araki, NEC Corporation (Japan)
Kwok-Wai Cheung, The Chinese University of Hong Kong (Hong Kong China)
Niloy K. Dutta, University of Connecticut (USA)
Tarek S. El-Bawab, Jackson State University (USA)
Ronald Freund, Heinrich-Hertz-Institut für Nachrichtentechnik Berlin GmbH (Germany)
Weisheng Hu, Shanghai Jiao Tong University (China)
Raj Jain, Washington University in St. Louis (USA)
Bongtae Kim, Electronics and Telecommunications Research Institute (South Korea)
Franko Kueppers, College of Optical Sciences, The University of Arizona (USA)
Hideo Kuwahara, Fujitsu Laboratories, Ltd. (Japan)
Ralph Leppla, T-Systems Enterprise Services GmbH (Germany)
Ming-Jun Li, Corning Inc. (USA)
Hiroji Masuda, Nippon Telegraph and Telephone Corporation (Japan)
Muriel Medard, Massachusetts Institute of Technology (USA)
Yoshiaki Nakano, The University of Tokyo (Japan)
Christian Schäffer, Technische Universität Dresden (Germany)
Ernst-Dieter Schmidt, Siemens AG (Germany)
Masahi Usami, KDD R&D Laboratories (Japan)
Sascha Vorbeck, T-Systems Enterprise Services GmbH (Germany)
Richard E. Wagner, Corning Inc. (USA)
Winston I. Way, OpVista, Inc. (USA)
Chris Xu, Cornell University (USA)

Session Chairs

- 1 Photonic Networks
 Franko Kueppers, College of Optical Sciences, The University of
 Arizona (USA)
 Werner Weiershausen, T-Systems Enterprise Services GmbH (Germany)
- 2 Part I: Overview High Speed and Challenges
 Atul Kumar Srivastava, OneTerabit (USA)
 Werner Weiershausen, T-Systems Enterprise Services GmbH (Germany)
 Achyut Kumar Dutta, Banpil Photonics, Inc. (USA)
- 3 Part II: Options and Migration
 Atul Kumar Srivastava, OneTerabit (USA)
 Werner Weiershausen, T-Systems Enterprise Services GmbH (Germany)
 Achyut Kumar Dutta, Banpil Photonics, Inc. (USA)
- 4 Transmission Impairments and Equalization
 Winston I. Way, OpVista, Inc. (USA)
 Achyut Kumar Dutta, Banpil Photonics, Inc. (USA)
- 5 Advanced WDM Solutions
 Hideo Kuwahara, Fujitsu Laboratories, Ltd. (Japan)
 Benjamin B. Dingel, Nasfine Photonics, Inc. (USA)

Introduction

It is our distinct pleasure to welcome you to Optics East 2007 Conference on Optical Transmission Systems and Equipment for Networking VI. This conference provides a cross-section of important activities in the field of optical networks and optical transmission systems. It features progress and significant developments in various aspects of deployable technologies for broadband optical aggregation, metropolitan, and core networks.

The main topics discussed this year are photonic networks and their building blocks, high-speed and broadband transmission, overcoming physical impairments by means of equalization and robust system design, and further advanced WDM technology solutions. Contributions to other ITCom conferences in the symposium complement this conference, especially papers from Broadband Access Communication Technologies II and Active and Passive Optical Components for Communications VII.

This year, besides several path-breaking contributed, invited, and keynote papers, a special invited session entitled 100Gbps Ethernet and Ultra-High Speed Systems has been brought into being within the framework of this conference.

100Gbps Ethernet has become one of the most interest-arousing topics currently discussed in the WDM community. On the one hand, advances in technology allow for new steps in high-speed WDM; on the other hand, telecommunication operators have to carefully study market demands for future 100Gbps Ethernet deployment, and examine the suitability of their fiber infrastructure for high-speed transport. Alternative 100GE transport approaches like serial high-baudrate transmission, multi-level modulation format, or inverse WDM multiplexing schemes are to be discussed.

We expect this important conference to continue as a leading venue in sharing new technical advances and bringing innovative, integrated approaches that address key issues in WDM transmission systems and optical networks.

Finally, we express our strong appreciation to the authors of all the contributed and invited papers, the Technical Program Committee members, the session and workshop supporting professionals, and the SPIE staff who made this conference possible and enriching. The success of this conference is strongly due to them.

Thank you for joining us at the Optical Transmission Systems and Equipment for Networking Conference of SPIE Optics East/ITCom.
