Event: ROMOPTO 2006: Eighth Conference on Optics, 2006, Sibiu, Romania

PROCEEDINGS OF SPIE

ROMOPTO 2006:

Eighth Conference on Optics

Valentin I. Vlad

Editor

4–7 September 2006

Sibiu, Romania

Organized by

Romanian Physical Society, Division of Optics and Quantum Electronics • SPIE Romanian Chapter • ROCEP—National Institute for Laser, Plasma and Radiation Physics (Romania) INOE 2000—National Institute for Research and Development for Optoelectronics (Romania) University of Bucharest, Faculty of Physics (Romania) • University Lucian Blaga of Sibiu, Hermann Oberth Faculty of Engineering (Romania)

Cosponsored by

Romanian Academy, Division of Physics • Ministry of Education and Research (Romania) PhOREMOST European Network of Excellence, Nanophotonics to Realise Molecular Scale Technologies • OSA—Optical Society of America • SPIE Europe • EOARD—European Office of Aerospace Research and Development • ICTP—The Abdus Salam International Centre for Theoretical Physics (Italy) • ICO—International Commission for Optics • EOS—European Optical Society • Institute of Atomic Physics (Romania)

SPIE

Volume 6785

Proceedings of SPIE, 0277-786X, v. 6785

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/07/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

xiii	Conference Committees
xv	Introduction
xvii	Organizers and Cosponsors
xix	New optical components based on nano-scale features (Abstract Only) M. J. Soileau, Univ. of Central Florida (USA)
xx	Semiconductor pumped cw solid-state lasers in the visible and UV spectral region (Abstract Only) G. Huber, Institut für Laser-Physik, Univ. Hamburg (Germany)
xxi	Inorganic nanotubes and inorganic fullerene-like materials: state of the art, from concept to applications (Abstract Only) R. Tenne, Weizmann Institute (Israel)
xxii	Advances in mapping and steering of functional organic molecules by nonlinear optics from micron to single molecule scale (Abstract Only) J. Zyss, G. Dutier, S. Brasselet, Molecular Quantum Photonics Lab. and d'Alembert Institute, Ecole Normale Supérieure (France)

PLENARY PAPER

6785 02	Bright new world: a new type of light and its applications (Plenary Paper) [6785-01] N. Kroo, Hungarian Academy of Sciences (Hungary)
---------	---

SESSION 1 LASERS AND RADIATION SOURCES

6785 03	Yb³⁺-doped CaF₂ cubic fluoride crystal: spectroscopic properties, concentration quenching analysis, and laser optimization (Invited Paper) [6785-02] G. Boulon, M. Ito, Y. Guyot, C. Goutaudier, A. Brenier, Claude Bernard/Lyon I Univ., CNRS (France); A. Jouini, H. Sato, T. Fukuda, Tohoku Univ. (Japan)
6785 04	Diode pumped neodymium-based thin disk lasers [6785-03] N. Pavel, Univ. Hamburg (Germany) and National Institute for Laser, Plasma and Radiation Physics (Romania); K. Lünstedt, K. Petermann, G. Huber, Univ. Hamburg (Germany)
6785 05	Modelling and evaluation of some spectroscopic parameters of Er³⁺ and Yb³⁺-doped LiNbO₃ optical waveguide amplifiers [6785-04] G. C. Constantin, N. N. Puscas, I. M. Popescu, Univ. Politehnica of Bucharest (Romania)
6785 06	Nonlinear mirror mode locking operation of edge pumped Yb:YAG/YAG laser [6785-05] T. Dascalu, National Institute for Lasers, Plasma and Radiation Physics (Romania); T. Taira, Institute for Molecular Science (Japan)

- 6785 07 **Generation of a radially polarized Nd:YVO₄ laser beam** [6785-06]
K. Yonezawa, Y. Kozawa, T. Nakamura, S. Sato, Tohoku Univ. (Japan)
- 6785 08 **Single frequency green nanosecond Nd:YAG microlaser-oscillator power-amplifier system** [6785-07]
R. Dabu, C. Blanaru, A. Stratan, O. Pacala, C. Fenic, L. Neagu, L. Rusen, National Institute for Lasers, Plasma and Radiation Physics (Romania); D. Ursu, ProOptica (Romania); V. Tornari, Y. Orphanos, Foundation for Research and Technology, Institute of Electronic Structure and Laser (Greece)
- 6785 09 **Optical studies of the partially disordered crystals langasite (La₃Ga₅SiO₁₄) and langatate (La₃Ga_{5.5}Ta_{0.5}O₁₄) doped with Eu³⁺** [6785-08]
S. Georgescu, O. Toma, A. Achim, A. M. Chinie, L. Gheorghe, A. Stefan, National Institute for Laser, Plasma, and Radiation Physics (Romania)
- 6785 0A **Optical and Mössbauer studies on YAG:Eu nanocrystals synthesized by a sol-gel method** [6785-09]
S. Georgescu, National Institute for Laser, Plasma and Radiation Physics (Romania); S. Constantinescu, National Institute for Materials Physics (Romania); A. M. Chinie, A. S. Stefan, O. Toma, National Institute for Laser, Plasma and Radiation Physics (Romania); I. Bibicu, National Institute for Materials Physics (Romania)
- 6785 0B **High-power lens-shape diode edge-pumped composite laser** [6785-10]
T. Dascalu, National Institute for Lasers, Plasma and Radiation Physics (Romania); C. Dascalu, Univ. Politehnica Bucharest (Romania)
- 6785 0C **Spectroscopic characteristics of RE³⁺: Sc₂O₃ ceramics** [6785-11]
V. Lupei, A. Lupei, C. Gheorghe, Institute of Atomic Physics-INFLPR (Romania); A. Ikesue, Poly-Techno Co., Ltd. (Japan); A. Stefan, Institute of Atomic Physics-INFLPR (Romania); V. Ciupina, A. Prodan, Univ. Ovidius (Romania)
- 6785 0D **A schematic layout of the magnetic field for a two-beam Huygens undulator** [6785-12]
S. Miclos, M. I. Rusu, C. Radu, V. Savu, National Institute of R&D for Optoelectronics (Romania); L. Giurgiu, Univ. of Bucharest (Romania); V. I. R. Niculescu, National Institute of R&D for Lasers, Plasma and Radiation Physics (Romania)

SESSION 2 LASERS IN MATERIAL SCIENCES

- 6785 0E **Thin film synthesis of wurtzite boron nitride by femtosecond pulsed laser deposition (Invited Paper)** [6785-13]
T. Shimizu, T. Nakamura, S. Sato, Tohoku Univ. (Japan)
- 6785 0F **Influence of irradiation conditions on plume expansion induced by femtosecond laser ablation of gold and copper (Invited Paper)** [6785-14]
S. Noël, J. Hermann, LP3, CNRS, Univ. Aix-Marseille II (France)

- 6785 OG **Chemical sensors based on optical sensitivity of metal oxide materials deposited on multimode interference couplers** [6785-15]
T. Mazingue, Univ. Montpellier II (France); R. Kribich, J. Jabbour, S. Gatti, Ctr. d'Electronique et de Micro-optoélectronique de Montpellier, CNRS, Univ. Montpellier II (France); L. Escoubas, Institut Fresnel, CNRS, Domaine Univ. de Saint Jérôme (France); I. Mihailescu, National Institute for Lasers, Plasma and Radiation Physics (Romania); P. Etienne, Univ. Montpellier II (France); Y. Moreau, Ctr. d'Electronique et de Micro-optoélectronique de Montpellier, CNRS, Univ. Montpellier II (France); F. Flory, Institut Fresnel, CNRS, Domaine Univ. de Saint Jérôme (France)
- 6785 OH **Structure and optical properties of pulsed-laser-deposited AlN thin films for optoelectronic applications** [6785-16]
S. Bakalova, A. Szekeres, Institute of Solid State Physics (Bulgaria); A. Cziraki, Eotvos Lorand Univ. (Hungary); S. Grigorescu, G. Socol, E. Axente, I. N. Mihailescu, National Institute for Lasers, Plasma and Radiation Physics (Romania)
- 6785 OI **Triple bound states of the cubic-quintic CGL equation: the "Cis" symmetry** [6785-17]
H. Leblond, A. Komarova, M. Salhi, A. Haboucha, F. Sanchez, Lab. POMA, Univ. d'Angers (France)
- 6785 OJ **Quantum dot-based western blot for sensitive detection of pig serum antibody to *Actinobacillus pleuropneumoniae*** [6785-18]
A. Cişmileanu, Pasteur Institute (Romania); C. Sima, C. Grigoriu, National Institute for Laser, Plasma and Radiation Physics (Romania)
- 6785 OK **Functionalized Si/SiO₂ quantum dots** [6785-19]
C. Sima, C. Viespe, I. Nicolae, C. Grigoriu, National Institute of Laser, Plasma and Radiation Physics (Romania); G. Prodan, V. Ciupina, Ovidius Univ. Constanta (Romania); A. Cismileanu, Pasteur Institute (Romania); C. Nistor, C. Nicolae, D. Donescu, ICECHIM (Romania)
- 6785 OL **Preliminary studies concerning Hadfield steel behavior during laser beam welding in pulsating regime** [6785-20]
I. David, V.-A. Şerban, Univ. Politehnica of Timisoara (Romania)

SESSION 3 NANOPHOTONICS

- 6785 OM **Colloidal nanocrystals: on the way from synthesis to applications (Invited Paper)** [6785-21]
N. Gaponik, A. Eychmüller, Technical Univ. Dresden (Germany)
- 6785 ON **Photosensitive composites based on chalcogenide glasses and organic polymers (Invited Paper)** [6785-22]
A. M. Andries, V. V. Bivol, S. A. Buzurniuc, E. P. Colomeico, M. S. Iovu, A. Iu. Meshalkin, V. I. Verlan, Institute of Applied Physics (Moldova)
- 6785 OO **Controlled deposition of photonic polystyrene-nanosphere films** [6785-23]
A. Kuttesch, C. Farcau, Z. Neda, S. Astilean, Babes-Bolyai Univ. (Romania)

- 6785 OP **Electronic and thermal nonlinear refractive indices of SOI and nano-patterned SOI measured by Z-scan method** [6785-24]
A. Petris, National Institute for Lasers, Plasma and Radiation Physics (Romania); F. Pettazzi, E. Fazio, Univ. La Sapienza (Italy) and INFM (Italy); C. Peroz, Y. Chen, Lab. de Photonique et de Nanostructures, CNRS (France); V. I. Vlad, National Institute for Lasers, Plasma and Radiation Physics (Romania); M. Bertolotti, Univ. La Sapienza (Italy) and INFM (Italy)
- 6785 OQ **The behavior of three quantum radiators in microcavity** [6785-25]
N. Enaki, T. Roşca, Institute of Applied Physics (Moldova)
- 6785 OR **What is a quantum particle?** [6785-26]
A. Lupascu, Politehnica Univ. Bucharest (Romania)
- 6785 OS **Reversibility of quantum states for non-equidistant three-level atom in interaction with bimodal cavity field** [6785-27]
N. A. Enaki, N. Ciobanu, Institute of Applied Physics (Moldova)
- 6785 OT **Confocal microscopy for visualization and characterization of porous silicon samples** [6785-28]
P. Doia, A. Petris, I. Dancus, V. I. Vlad, National Institute for Lasers, Plasma and Radiation Physics (Romania)
- 6785 OU **Laser induced reorientation process in dye-doped nematic systems: role of the azo-dye structure** [6785-29]
N. Eseanu, C. Dascalu, Univ. Politehnica of Bucharest (Romania); I. Palarie, Univ. of Craiova (Romania); C. Uncheselu, Technical Univ. of Civil Engineering (Romania)

SESSION 4 NON-LINEAR AND INFORMATION OPTICS

- 6785 OV **On some physical properties of a new photopolymerisable glass with high refractive index species for holographic data storage (Invited Paper)** [6785-30]
M. L. Calvo, Univ. Complutense de Madrid (Spain); P. Cheben, National Research Council of Canada (Canada); O. Martínez-Matos, J. A. Rodrigo, Univ. Complutense de Madrid (Spain); F. del Monte, Instituto de Ciencia de Materiales de Madrid, CSIC-UAM (Spain)
- 6785 OW **Fourier domain spatio-temporal visualization using image processing methods (Invited Paper)** [6785-31]
A. Peled, N. Mirchin, Holon Institute of Technology (Israel)
- 6785 OX **Transmission of solitary pulses in inhomogeneous nonlinear media: exact solutions (Invited Paper)** [6785-32]
K. W. Chow, Univ. of Hong Kong (Hong Kong China); B. A. Malomed, Tel Aviv Univ. (Israel)
- 6785 OY **Few-cycle solitons in a two-component medium (Invited Paper)** [6785-33]
H. Leblond, Lab. POMA, CNRS, Univ. d'Angers (France); S. V. Sazonov, Russian Research Ctr. Kurchatov Institute (Russia); I. V. Mel'nikov, High Q Labs. Inc. (Canada) and Optolink Ltd. (Russia); D. Mihalache, Horia Hulubei National Institute for Physics and Nuclear Engineering, IFIN-HH (Romania); F. Sanchez, Lab. POMA, CNRS, Univ. d'Angers (France)

- 6785 02 **Soliton dynamics and interactions in dynamically photo-induced lattices (Invited Paper)** [6785-34]
I. Tsopelas, Y. Kominis, K. Hizanidis, N. Efremidis, S. Droulias, L. Halastanis, G. Papazisimos, N. Moshonas, P. Papagiannis, National Technical Univ. of Athens (Greece)
- 6785 10 **Three-dimensional spinning solitons in quasi-two-dimensional optical lattices** [6785-35]
H. Leblond, Lab. POMA, Univ. d'Angers (France); B. A. Malomed, Tel Aviv Univ. (Israel); D. Mihalache, Horia Hulubei National Institute for Physics and Nuclear Engineering, IFIN-HH (Romania)
- 6785 11 **Stable multidimensional dissipative spiral solitons** [6785-36]
D. Mihalache, Horia Hulubei National Institute for Physics and Nuclear Engineering, IFIN-HH (Romania) and Friedrich-Schiller Univ. Jena (Germany)
- 6785 12 **Fast adaptive interferometer based on CdTe crystal and low power radiation** [6785-37]
R. V. Romashko, Y. N. Kulchin, Institute of Automation and Control Processes (Russia); S. Di Gioramo, E. Nippolainen, Univ. of Kuopio (Finland); J. C. Launay, CNRS, Bordeaux Institute of Condensed Matter Chemistry (France); A. A. Kamshilin, Univ. of Kuopio (Finland)
- 6785 13 **Iterative algorithm analysis for phase-only diffractive control access system** [6785-38]
M. Mihailescu, A. Preda, Univ. Politehnica of Bucharest (Romania); D. Cojoc, TASC-NNL-INFM, National Institute for the Physics of Matter (Italy); E. Scarlat, L. Preda, Univ. Politehnica of Bucharest (Romania)
- 6785 14 **Three-dimensional vortex solitons in self-defocusing media** [6785-39]
N. K. Efremidis, National Technical Univ. of Athens (Greece) and Univ. of Crete (Greece); Y. Kominis, N. Moshonnasa, P. Papagiannis, K. Hizanidis, National Technical Univ. of Athens (Greece); B. A. Malomed, Tel Aviv Univ. (Israel); P. Di Trapani, Univ. of Insubria (Italy)
- 6785 15 **Second harmonic generation in self-induced waveguides in lithium niobate** [6785-40]
F. Pettazzi, Univ. La Sapienza e CNISM (Italy) and Univ. de Franche-Comté, Institut FEMTO-ST, CNRS (France); V. Coda, M. Chauvet, Univ. de Franche-Comté, Institut FEMTO-ST, CNRS (France); E. Fazio, Univ. La Sapienza e CNISM (Italy)
- 6785 16 **Theoretical analysis of the spectral gain and noise of single and double pass Er^{3+} -doped Ti:LiNbO_3 straight waveguide amplifiers** [6785-41]
B. Savu, N. N. Puscas, Univ. Politehnica of Bucharest (Romania)
- 6785 17 **Corrugated grating on organic multilayer Bragg reflector** [6785-42]
S. Jaquet, T. Scharf, H. P. Herzig, Univ. of Neuchâtel (Switzerland)
- 6785 18 **Interplay between photonic and plasmonic modes in optical properties of silver-coated two dimensional colloidal crystals** [6785-43]
C. Farcau, A. Kuttisch, Babes-Bolyai Univ. (Romania); T. Petrisor, Technical Univ. Cluj-Napoca (Romania); L. Barbu-Todoran, C. Craciun, S. Astilean, Babes-Bolyai Univ. (Romania)
- 6785 19 **Absorption and photoluminescence of $\text{Ga}_{0.017}\text{Ge}_{0.25}\text{As}_{0.083}\text{S}_{0.65}$ glasses doped with rare-earth ions** [6785-44]
M. S. Iovu, A. M. Andriesh, E. V. Lupan, V. I. Ciornea, N. N. Syrbu, Ctr. of Optoelectronics, IAP (Moldova)

- 6785 1A **Multiple trapping and micromanipulation of dielectric particles with optical tweezers** [6785-45]
M. Nadasan, Laser and Fiber Optics Lab. (Italy); A. Manea, I. Cristea, N. Grosu, O. Iancu, Politehnica Univ. of Bucharest (Romania)
- 6785 1B **Reflection coefficients for photonic crystal waveguides ramifications** [6785-46]
L. Bogdan, P. Sterian, Bucharest Polytechnic Univ. (Romania)
- 6785 1C **Fast photorefractive self-focusing in semiconductors** [6785-47]
C. Dan, N. Khelfaoui, D. Wolfersberger, N. Fressengeas, Lab. Matériaux Optiques, Photonique et Systèmes, CNRS (France); H. Leblond, Lab. Propriétés Optiques des Matériaux et Applications, CNRS (France); M. Chauvet, Institut Femto-ST, CNRS (France)
- 6785 1D **Optical field properties in micro- and nano-structures** [6785-48]
G. Georgescu, National Institute for Lasers, Plasma and Radiation Physics (Romania); V. Babin, National Institute for Optoelectronics (Romania); R. Medianu, National Institute for Lasers, Plasma and Radiation Physics (Romania)
- 6785 1E **Modification of refractive index in amorphous As-Se films induced by composition and illumination** [6785-49]
M. S. Iovu, D. V. Harea, E. P. Colomeico, M. A. Iovu, V. G. Ciorba, Ctr. of Optoelectronics, IAP, ASM (Moldova)
- 6785 1F **Z-Scan measurement of thermal optical nonlinearities** [6785-50]
I. Dancus, A. Petris, P. Doia, National Institute for Lasers, Plasma and Radiation Physics (Romania); E. Fazio, Univ. La Sapienza (Italy); V. I. Vlad, National Institute for Lasers, Plasma and Radiation Physics (Romania)

SESSION 5 BIOPHOTONICS AND OPTICS IN ENVIRONMENT RESEARCH

- 6785 1G **Inorganic and hybrid polymer-inorganic nanostructured materials for optical physicochemical sensing applications (Invited Paper)** [6785-51]
A. Tsigara, The National Hellenic Research Foundation (Greece) and The National Technical Univ. of Athens (Greece); L. Athanasekos, J. Manasis, M. Hands, G. Mousdis, S. Pispas, The National Hellenic Research Foundation (Greece); N. A. Vainos, The National Hellenic Research Foundation (Greece) and Univ. of Patras (Greece)
- 6785 1H **UV-B radiation induced effects on human T-lymphocytes (Invited Paper)** [6785-52]
G. Giubileo, ENEA (Italy); A. Congiu Castellano, S. Gaudenzi, P. Grimaldi, D. Pozzi, Univ. di Roma La Sapienza (Italy); A. Puiu, National Institute for Laser, Plasma and Radiation Physics (Romania)
- 6785 1I **Optical-coherence tomography: extension to imaging of low coherence interferometry (Invited Paper)** [6785-53]
A. Gh. Podoleanu, R. G. Cucu, Univ. of Kent (United Kingdom); J. A. Rogers, J. Pedro, Ophthalmic Technologies Inc. (Canada); G. Dobre, M. Gomez, Univ. of Kent (United Kingdom); H. Liang, Nottingham Trent Univ. (United Kingdom); B. T. Amaechi, The Univ. of Texas Health Sciences Ctr. at San Antonio (USA); S. Higham, Univ. of Liverpool (United Kingdom)

- 6785 1J **Modeling vegetation reflectance from satellite remote sensing data** [6785-54]
M. Zoran, National Institute of R&D for Optoelectronics (Romania)
- 6785 1K **Using RWMCS to test different multiple light scattering phase functions for biological suspensions** [6785-55]
D. Chicea, Univ. Lucian Blaga (Romania)
- 6785 1L **Modeling influences of topography on incoming solar radiation from satellite remote sensing data** [6785-56]
M. Zoran, National Institute of R&D for Optoelectronics (Romania)
- 6785 1M **Influence of laser diode red beams on germination rate of tomato seeds** [6785-57]
P. Niculita, S. Danaila-Guidea, O. Livadariu, M. Popa, USAMV (Romania); M. Ristici, E. Ristici, 4ROPTICS (Romania)
- 6785 1N **High-power LEDs influence on germination rate of tomato seeds** [6785-58]
C. Tudora, National Institute of R&D for Biological Sciences INCDSB (Romania); M. Ristici, E. Ristici, S.C. 4R OPTICS (Romania)
- 6785 1O **Results of sediment motion visualization by a modified LASCA technique** [6785-59]
D. Chicea, Univ. Lucian Blaga (Romania)
- 6785 1P **A special laser device for dielectric breakdown generation used in ophthalmology** [6785-60]
D. Savastu, E. Ristici, M. Mustata, S. Miclos, M. Rusu, V. Savu, C. Radu, D. Tenciu, National Institute of R&D for Optoelectronics (Romania)

SESSION 6 OPTOELECTRONICS AND OPTICAL COMPONENTS

- 6785 1Q **Novel approaches in the designing of the polygon scanners (Invited Paper)** [6785-61]
V.-F. Duma, Aurel Vlaicu Univ. (Romania)
- 6785 1R **Refractive index of micro/nano structured dielectric materials (Invited Paper)** [6785-62]
F. Flory, L. Escoubas, J. J. Simon, P. Torchio, T. Mazingue, T. Mangeat, Univ. Paul Cézanne (France)
- 6785 1S **Thin-film graded optical filters for mini-spectrometers (Invited Paper)** [6785-63]
A. Piegari, J. Bulir, A. Krasilnikova Sytchkova, ENEA (Italy)
- 6785 1T **Study of color centers in optical fibers to be used for ITER plasma diagnostics** [6785-64]
D. G. Sporea, A. Sporea, National Institute for Lasers, Plasma and Radiation Physics (Romania); S. Agnello, L. Nuccio, Univ. of Palermo (Italy)
- 6785 1U **Extracurricular photonics education in Romanian high schools** [6785-65]
D. Sporea, A. Sporea, C. Timus, National Institute for Lasers, Plasma and Radiation Physics (Romania)

- 6785 1V **Characterization of surface relief gratings of submicron period** [6785-66]
P. C. Logofătu, D. Apostol, National Institute for Lasers, Plasma and Radiation Physics (Romania); M.-C. Castex, Lab. de Physique des Lasers, Univ. Paris-Nord (France); I. Apostol, V. Damian, I. Iordache, National Institute for Lasers, Plasma and Radiation Physics (Romania); R. Müller, National Institute in Microtechnologies (Romania)
- 6785 1W **Double-prisms neutral density filters: a comparative approach** [6785-67]
V.-F. Duma, Aurel Vlaicu Univ. (Romania)
- 6785 1X **Optical studies of TiO₂ films deposited on different substrates** [6785-68]
C. Cofirlan, V. Vasile, F. Ungureanu, National Institute of Materials Physics (Romania)
- 6785 1Y **Effect of heat treatment on the structural and optical characteristics of polycrystalline ZnTe thin films** [6785-69]
P. Prepelită, G. G. Rusu, G. I. Rusu, Al. I. Cuza Univ. (Romania)
- 6785 1Z **Ultrasonic waves generated by laser based heat sources in semitransparent solids** [6785-70]
L. Bogdan, A. R. Sterian, D. Nedelcu, Bucharest Polytechnic Univ. (Romania)
- 6785 20 **An Er:YAG blood sampling skin puncher** [6785-71]
D. Savastru, E. Ristici, M. Mustata, S. Miclos, M. Rusu, C. Radu, V. Savu, National Institute of R&D for Optoelectronics (Romania)
- 6785 21 **Static Fourier transform lambdameter** [6785-72]
D. Apostol, A. Sima, P. C. Logofătu, F. Garoi, V. Damian, V. Nascov, I. Iordache, National Institute for Laser, Plasma and Radiation Physics (Romania)
- 6785 22 **Fourier transform digital holography** [6785-73]
D. Apostol, A. Sima, P. C. Logofătu, F. Garoi, V. Damian, V. Nascov, I. Iordache, National Institute for Laser Plasma and Radiation Physics (Romania)
- 6785 23 **Magnetic liquid surface behaviour to external stimulus** [6785-74]
V. Damian, P. C. Logofatu, D. Apostol, National Institute for Laser Plasma and Radiation Physics (Romania); L. Vekas, D. Bica, Ctr. for Fundamental and Advanced Technical Research (Romania); A. Damian, Polytechnic Univ. (Romania); F. Garoi, I. Iordache, A. Sima, M. Bojan, National Institute for Laser Plasma and Radiation Physics (Romania)
- 6785 24 **Radio frequency magnetron sputtering deposition of borate and phosphate glass films** [6785-75]
L. Boroica, I. Boroica, E. Rotiu, B. Sava, National Glass Institute (Romania); R. Medianu, C. Timus, National Institute for Laser, Plasma and Radiation Physics (Romania); D. Hülseberg, Technical Univ. Ilmenau (Germany)
- 6785 25 **Acquisition and applications of 3D images** [6785-76]
P. Sterian, E. Mocanu, Bucharest Polytechnic Univ. (Romania)
- 6785 26 **Study of surface and bulk ultrasonic waves generated in solids numerical analysis** [6785-77]
L. Bogdan, A. R. Sterian, D. Nedelcu, Bucharest Polytechnic Univ. (Romania)

Introduction

The conference on Micro- to Nano-Photonics: ROMOPTO 2006 is the eighth in a series of international conferences dedicated to optics and photonics, held every three years in Romania and initiated by Acad. Prof. Ioan Ursu. The topics of this conference are related to the modern micro- and nano-photonics and reflect the fast evolution of optics and its applications in material science, information science and technology, optoelectronics, biology and medicine, and sensing and metrology. The results in these fields demonstrate the important role of photonics in the progress of the modern society.

The purpose of ROMOPTO 2006 was to provide an opportunity for the optics scientists to share experiences, discuss their newest results, stimulate interdisciplinary research, and consider the perspective of applications. The position of our country, Romania, in the Central-East Europe plays an important role in the promotion of the scientific contacts in this region. We are now integrating into the European Union, NATO, and are actively participating in the EU-R&D Programmes. In the national strategy in R&D, photonics plays an important role both in basic research and in technological platforms. I can add the fact that Sibiu, the host town of the conference, and Luxembourg are European capitals of culture in 2007.

The organization of ROMOPTO 2006 was possible only by the actions and support of several national and international institutions. We have to mention and thank the Romanian Academy, the Romanian Ministry of Education and Research, the Division of Optics and Quantum Electronics of the Romanian Physical Society (which is a Territorial Committee of ICO and EOS), the Romanian Chapter of SPIE, the Institute of Atomic Physics, the National Institute of Laser, Plasma and Radiation Physics (NILPRP), the University "Lucian Blaga" of Sibiu, the National Institute of Optoelectronics (NIOE 2000) and the University of Bucharest.

Thanks are due to the cosponsoring institutions of this conference: European Network of Excellence "Nanophotonics to Realise Molecular Scale Technologies" (PHOREMOST), SPIE Europe, the "Abdus Salam" International Centre for Theoretical Physics (ICTP, Trieste, Italy), ICO—International Commission for Optics, OSA—Optical Society of America, EOS—European Optical Society, and the United States Air Force—European Office of Aerospace Research and Development (EOARD). Particularly, I express my entire gratitude to Prof. Clivia Sotomayor-Torres and Prof. E. Ozbay (PHOREMOST), Prof. J. Billbro and Dr. E. Arthurs (SPIE), Prof. A. Friberg, Prof. G. von Bally, Prof. Maria Calvo and Prof. A. Friesem (ICO), Prof. K.R. Sreenivasan and Prof. Gallieno Denardo (ICTP) for their important support to the conference ROMOPTO 2006 and to our optics community.

By the efforts of the scientific advisory committee, coordinated by Prof. M. Bertolotti and the programme committee, about 170 scientific papers by authors from 19 countries have been selected for presentation at ROMOPTO 2006, in seven plenary lectures, 36 invited lectures, 52 oral presentations and 76 posters. I express my entire gratitude to the members of these committees, referees, to the invited professors, and to all participants for their high level work. Some of these papers, reviewed by an international referee board, are published in this SPIE Proceedings volume, which hopefully will have a wide distribution and a large interest in the scientific world.

The joy of meeting so many friends at ROMOPTO 2006 was shadowed by the passing from this world of one of the strongest supporters of this conference, Professor Herbert Walther, director and founder of MPQ, Garching, at the end of July. He was an outstanding researcher of the physics of light, an exceptional man and friend, an honored member of the Romanian Academy, and a member of the editorial board of *Romanian Reports in Physics*. Prof. N. Kroo evoked Herbert's personality in his plenary talk. Shortly after Easter 2007, Acad. Ioan Ursu, one of the most preeminent Romanian physicists and the initiator of ROMOPTO conferences, passed also from this world. Requiescant in Pace!

I would like to express my thanks to the members of the international scientific advisory committee, programme committee, and organizing committees of ROMOPTO 2006 for their hard work. My gratitude is specially conveyed to Prof. C. Oprean, rector of the University "L. Blaga" of Sibiu, Prof. G. Sofonea, dean of faculty of engineering at "H. Oberth," Prof. I. Isarie, former rector, and to the local organizing team: Prof. V. Petrescu, Prof. Toderita Nemes, Prof. Cl. Isarie, and Mr. V. Fagarasan (University Protocol), all of whom were superb hosts of this conference. Special address and thanks go Dr. R. Medianu, the general director of NILPRP, Dr. Clementina Timus, coordinator of the organizing committee (for her efforts in disseminating information and paper collection), Dr. Adrian Petris (for the important efforts in all steps of conference organization), Dr. Mircea Udrea (for sponsorships of Coherent Inc. and Apel Laser), and to Doina Nicolae and Camelia Talianu (for design and management of the conference web site), and to my students, Petronela Doia, Tatiana Bazaru, I. Dancus, Alexandra Olteanu, and Mariana Buzatu, for their hard work and efforts in support of this conference.

Finally, I hope that the participants in ROMOPTO 2006 enjoyed the scientific sessions, met their friends in Sibiu, and had the opportunity to start new scientific collaborations. Hopefully also, they will remember their visit in Romania, in the Transylvanian county.

Valentin I. Vlad

Organized by:

Romanian Physical Society – Division of Optics and Quantum Electronics – ICO
Territorial Committee

SPIE Romania Chapter

National Institute for Laser, Plasma and Radiation Physics - ROCEP

INOE 2000—National Institute of Research & Development for Optoelectronics

University of Bucharest – Faculty of Physics

University “Lucian Blaga” of Sibiu, Faculty of Engineering “Hermann Oberth”
(Romania)

Cosponsoring Institutions:

Romanian Academy – Division of Physics

Ministry of Education and Research

European Network of Excellence “PHOREMOST”
Nanophotonics to Realise Molecular Scale Technologies

OSA—Optical Society of America

SPIE Europe

EOARD—European Office of Aerospace Research and Development

ICTP—The “Abdus Salam” International Centre for Theoretical Physics

ICO—International Commission for Optics

EOS—European Optical Society (EOS)

Institute of Atomic Physics (Romania)

New Optical Components Based on Nano-scale Features

M. J. Soileau

Distinguished Professor of Optics, ECE, and Physics and Vice President for Research, University of
Central Florida, Orlando, USA

ABSTRACT

In this talk I will review the research at the College of Optics and Photonics/CREOL, which has led to novel approaches in nanophotonics and which is impacting laser devices and applications.

One of the technologies to be reviewed is based on nano-scale features in photo-thermal-refractive (PTR) glass. PTR glass allows for the production of distributed nano-crystals in the bulk of highly transparent optical glass. These 3-D patterns are holographically produced. Among the applications demonstrated are bulk diffraction gratings, which are highly dispersive, cavity mirrors for extreme wavelength selectivity and stability, beam sampling optics, beam sharing optics, and optics which combine imagery and wavelength selectivity.

The PTR elements produced have the additional properties of high laser damage threshold and environmental stability. Manufacturing processes, optical and mechanical properties, and specific results from various applications will be presented.

Semiconductor pumped cw solid-state lasers in the visible and UV spectral region

Guenter Huber

Institut für Laser-Physik, Universität Hamburg, Germany

ABSTRACT

Intracavity frequency conversion of near IR solid-state lasers efficiently yields coherent visible radiation. Furthermore, semiconductor pumped Er-, Yb, Pr- up-conversion lasers and direct pumped Pr- lasers operate on fundamental visible modes offering simple and efficient nonlinear UV-generation.

Inorganic nanotubes and inorganic fullerene-like materials: state of the art (from concept to applications)

Reshef Tenne

Department of Materials and Interfaces, Weizmann Institute, Israel

ABSTRACT

We have proposed in 1992 that nanoparticles of layered compounds will be unstable against folding and close into fullerene-like structures and nanotubes (*IF*). Initially this hypothesis was realized in WS_2 , MoS_2 and the respective diselenides. Subsequently, nanotubes and fullerene-like structures were prepared from numerous compounds with layered and recently also non-layered structure by various groups. Much progress has been achieved in the synthesis of inorganic nanotubes and fullerene-like nanoparticles of WS_2 and MoS_2 and many other metal dichalcogenides over the last few years. Synthetic methods for the production of multiwall WS_2 nanotubes by sulfidizing WO_3 nanoparticles have been described and further progress is underway. A fluidized-bed reactor for the synthesis of up to 100 g/day of fullerene-like WS_2 nanoparticles has been established in our lab, and the scaling-up of the synthesis to 100 kg/day and beyond is under way. The detailed mechanisms for the synthesis of fullerene-like WS_2 and MoS_2 nanoparticles and nanotubes of these compounds have been elucidated.

Substantial progress has been accomplished in the use of such nanoparticles for tribological applications and lately for e.g. impact resilient materials for self-protection. Numerous testing programs have been undertaken jointly with different laboratories and major industrial partners and have clearly indicated the usefulness of the fullerene-like WS_2 (MoS_2) as solid lubricants in various products. These tests indicated that *IF*- MoS_2 and *IF*- WS_2 are heading for large scale applications in the automotive, machining, aerospace, electronics, medical and numerous other kinds of industries. This technology was licensed to "ApNano Materials, Inc." ("NanoMaterials, Ltd."), which is currently involved in many collaborative development programs. Novel applications of inorganic nanotubes and fullerene-like nanoparticles in the fields of catalysis; microelectronics; Li rechargeable batteries; medical and opto-electronics will be presented.

Advances in mapping and steering of functional organic molecules by nonlinear optics from micron to single molecule scale

Joseph Zyss*, Gabriel Dutier, Sophie Brasselet

Molecular Quantum Photonics Laboratory and d'Alembert Institute, Ecole Normale Supérieure
Cachan, France

ABSTRACT

We will report all the way from principles to latest advances, of a new approach to molecular nonlinear optics whereby nonlinear light-molecule interactions are used to encode information in molecular matter, rather than simply probe the nonlinear behaviour of molecular systems. This approach is based on the recognition of the angular dependence of generalized multiphoton interaction selection rules, by virtue of which specific sub-set of molecules in a priori random organization can be selectively addressed. Demonstrations on various molecular systems and states of matter (crystal, polymers with various degrees of orders) at micron and nanoscales will be emphasized.
