SPIE

Volume 6850

Proceedings of SPIE, 1605-7422, v. 6850

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 1605-7422/08/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Committee
ix	Introduction

SESSION 1 ADVANCES IN SPECTROSCOPIC IMAGING AND MICROSCOPY

- 6850 02 **NIRS evaluates the thinking process of Mushi-kuizan task** [6850-01]
H. Eda, Graduate School for the Creation of New Photonics Industries (Japan); Y. Kuroda, Bukkyo Univ. (Japan); N. Okamoto, T. Maesako, Osaka Univ. (Japan)
- 6850 03 **Fluorescence lifetime estimation of multiple near-infrared dyes in mice** [6850-02]
G. Ma, S. Fortier, M. Jean-Jacques, N. Mincu, F. Leblond, Z. Ichalalene, A. Benyamin-Seeyar, M. Khayat, ART Advanced Research Technologies Inc. (Canada)
- 6850 05 **Characterization of natural fluorescence in mice** [6850-04]
S. Djeziri, G. Ma, N. Mincu, A. Benyamin Seeyar, M. Khayat, Advanced Research Technologies Inc. (Canada)

SESSION 2 ANALYSIS AND RECONSTRUCTION TECHNIQUES

- 6850 08 **Data analysis and statistical tests for near-infrared functional studies of the brain** [6850-07]
A. Sassaroli, Y. Tong, Tufts Univ. (USA); C. Beneš, Brooklyn College (USA); S. Fantini, Tufts Univ. (USA)
- 6850 0A **Accelerated DOT reconstruction using multiple sub-volumes** [6850-09]
R. Ziegler, Philips Research Europe - Hamburg (Germany) and Free Univ. of Berlin (Germany); T. Nielsen, Philips Research Europe - Hamburg (Germany); D. Grosenick, O. Steinkellner, A. Hagen, R. Macdonald, Physikalisch-Technische Bundesanstalt (Germany); H. Rinneberg, Free Univ. of Berlin (Germany) and Physikalisch-Technische Bundesanstalt (Germany)
- 6850 0B **Discretization error analysis for fluorescence diffuse optical tomography** [6850-10]
L. Reilly-Raska, M. Guven, B. Yazici, Rensselaer Polytechnic Institute (USA)

SESSION 3 MULTIMODALITY IMAGING

- 6850 0C **Diffuse optical-MRI fusion and applications (Invited Paper)** [6850-11]
F. Lesage, L. Gagnon, M. Dehaes, École Polytechnique de Montréal (Canada)
- 6850 0E **Approach of trans-rectal NIR optical tomography probing for the imaging of prostate with trans-rectal ultrasound correlation (Invited Paper)** [6850-13]
D. Piao, Z. Jiang, G. Xu, C. Musgrove, C. F. Bunting, Oklahoma State Univ. (USA)

- 6850 OG **Multi-parameter optical image interpretations based on self-organizing mapping** [6850-15]
C. D. Klose, A. K. Klose, Columbia Univ. (USA); U. Netz, Charité - Universitätsmedizin Berlin (Germany); A. Scheel, George-August-Univ. Göttingen (Germany); J. Beuthan, Charité - Universitätsmedizin Berlin (Germany); A. H. Hielscher, Columbia Univ. (USA)

SESSION 4 NETWORK FOR TRANSLATIONAL RESEARCH IN OPTICAL IMAGING: BREAST CANCER DIFFUSE OPTICAL IMAGING

- 6850 OH **System design for spectrally encoded video-rate near infrared tomography during magnetic resonance imaging of the breast (Invited Paper)** [6850-16]
B. W. Pogue, Z. Li, C. Carpenter, A. Laughney, V. Krishnaswamy, S. C. Davis, S. Jiang, K. D. Paulsen, Dartmouth College (USA)
- 6850 OK **MRI-coupled spectrally resolved fluorescence tomography for in vivo imaging** [6850-19]
S. C. Davis, S. L. Gibbs-Strauss, S. B. Tuttle, S. Jiang, R. Springett, Dartmouth College (USA); H. Dehghani, Dartmouth College (USA) and Univ. of Exeter (United Kingdom); B. W. Pogue, K. D. Paulsen, Dartmouth College (USA)

POSTER SESSION

- 6850 OM **An analytic reflection method for time-domain fluorescence diffuse optical tomography based on a generalized pulse spectrum technique** [6850-21]
H. He, L. Zhang, F. Gao, Z. Ma, H. Zhao, J. Jiang, Tianjin Univ. (China)
- 6850 ON **A self-normalized full time-resolved scheme for fluorescence diffuse optical tomography** [6850-22]
F. Gao, L. Zhang, H. He, H. Zhao, J. Jiang, Tianjin Univ. (China); Y. Tanikawa, National Institute of Advanced Industrial Science and Technology (Japan); A. Marjono, Y. Yamada, Univ. of Electro-Communications (Japan)
- 6850 OO **Implementation of a VIS/NIR 3D hyperspectral instrument for in vivo imaging** [6850-23]
H. Erives, S. W. Teare, N. B. Targhetta, New Mexico Tech (USA)
- 6850 OP **Improvement of performances in time-domain breast DOT by the aid of image segmentation** [6850-24]
Y. Ma, S. Gong, F. Gao, F. Yang, H. Zhao, J. Jiang, Tianjin Univ. (China)
- 6850 OR **Feasibility study of enhanced total internal reflection fluorescence imaging using dielectric films** [6850-26]
K. Kim, E.-J. Cho, Y.-M. Huh, D. Kim, Yonsei Univ. (South Korea)
- 6850 OS **Remote simultaneous dual wavelength imaging photoplethysmography: a further step towards 3-D mapping of skin blood microcirculation** [6850-27]
J. Zheng, S. Hu, V. Azorin-Peris, A. Echiadis, V. Chouliaras, R. Summers, Loughborough Univ. (United Kingdom)
- 6850 OT **NIRS-SPM: statistical parametric mapping for near infrared spectroscopy** [6850-28]
S. Tak, K. E. Jang, J. Jung, J. Jang, Y. Jeong, J. C. Ye, Korea Advanced Institute of Science and Technology (South Korea)

- 6850 0U **Second order inverse born approximation for diffuse optical tomography** [6850-29]
K. Kwon, B.-M. Kim, Yonsei Univ. (South Korea)
- 6850 0W **Effect of discretization on the accuracy of diffuse optical imaging** [6850-31]
M. Guven, B. Yazici, Rensselaer Polytechnic Institute (USA)
- 6850 0X **Hyperspectral small animal fluorescence imaging: spectral selection imaging** [6850-33]
S. Leavesley, Y. Jiang, V. Patsekin, Purdue Univ. (USA); H. Hall, D. Vizard, Carestream Health, Inc. (USA); J. P. Robinson, Purdue Univ. (USA)
- 6850 0Y **Wavelet-MDL based detrending method for near infrared spectroscopy (NIRS)** [6850-34]
K. E. Jang, S. Tak, J. Jang, J. Jung, J. C. Ye, Korea Advanced Institute of Science and Technology (South Korea)
- 6850 0Z **Fluorescence diffuse optical tomography with structural *a priori* information** [6850-35]
Y. Lin, O. Nalcioglu, G. Gulsen, Univ. of California/Irvine (USA)
- 6850 10 **Correction for source decay in bioluminescence tomography** [6850-36]
M. Burcin Unlu, G. Gulsen, Univ. of California/Irvine (USA)
- 6850 11 **Numerical simulation of thermography for breast tumor detection** [6850-38]
H. Yang, Q. Lin, Fujian Normal Univ. (China); Z. Ye, S. Chen, Fujian Medical Univ. (China); S. Xie, Fujian Normal Univ. (China)

Author Index

Conference Committee

Symposium Chairs

James Fujimoto, Massachusetts Institute of Technology (USA)
R. Rox Anderson, Wellman Center for Photomedicine, Massachusetts General Hospital (USA) and Harvard School of Medicine (USA)

Program Track Chairs

Tuan Vo-Dinh, Duke University (USA)
Anita Mahadevan-Jansen, Vanderbilt University (USA)

Conference Chairs

Fred S. Azar, Siemens Corporate Research (USA)
Xavier Intes, Rensselaer Polytechnic Institute (USA)

Program Committee

Mostafa Analoui, Pfizer Inc. (USA)
Nicholas Ayache, Institut National de Recherche en Informatique et en Automatique (France)
David A. Boas, Massachusetts General Hospital (USA)
Nada N. Boustany, Rutgers University (USA)
Britton Chance, University of Pennsylvania (USA)
Larry Clarke, National Cancer Institute (USA)
Sergio Fantini, Tufts University (USA)
Keyvan Farahani, National Institutes of Health (USA)
Gultekin Gulsen, University of California/Irvine (USA)
Mario Khayat, ART Advanced Research Technologies Inc. (Canada)
Sacha Loiseau, Mauna Kea Technologies (France)
Dimitris N. Metaxas, Rutgers University (USA)
Nassir Navab, Technische Universität München (Germany)
Tim Nielsen, Philips Research Europe - Hamburg (Germany)
Vasilis Ntziachristos, Massachusetts General Hospital (USA)
Brian W. Pogue, Dartmouth College (USA)
Yanjun Wu, GlaxoSmithKline (USA)
Birsen Yazici, Rensselaer Polytechnic Institute (USA)
Arjun G. Yodh, University of Pennsylvania (USA)
Yantian Zhang, National Institutes of Health (USA)

Session Chairs

- 1 Advances in Spectroscopic Imaging and Microscopy
Daqing Piao, Oklahoma State University (USA)
Fred S. Azar, Siemens Corporate Research (USA)
- 2 Analysis and Reconstruction Techniques
Xavier Intes, Rensselaer Polytechnic Institute (USA)
Marjolein van der Voort, Philips Research Laboratories (Netherlands)
- 3 Multimodality Imaging
Gultekin Gulsen, University of California/Irvine (USA)
Xavier Intes, Rensselaer Polytechnic Institute (USA)
- 4 Network for Translational Research in Optical Imaging: Breast Cancer
Diffuse Optical Imaging
Brian W. Pogue, Dartmouth College (USA)
Fred S. Azar, Siemens Corporate Research (USA)

Poster Session

Fred S. Azar, Siemens Corporate Research (USA)

Introduction

Data generated by novel imaging technologies such as optical tomography are complex to analyze, due to the inherent scattering of light through anatomical systems. Cross validation and direct comparison with established methods in other imaging modalities are especially challenging. There is critical need for new computational techniques to provide rapid, accurate, and cost-effective means for quantification and characterization of such data, either independently or integrated with other modalities. These computational methods will enable faster acceptance of novel imaging modalities into viable clinical and/or pre-clinical systems. The applications are diverse and range from imaging at the cellular level to the whole body, while incorporating molecular, functional, and anatomical information. The conference objectives are to provide a forum (1) to review and share recent developments in novel multimodal imaging techniques, (2) to report development of novel computational methods, and (3) to bring together the optical imaging and image analysis communities.

Topics include, but are not limited to:

- multimodal imaging integrating structural, molecular and functional information,
- 2D, 3D, 4D, tomographic and/or multi-spectral imaging,
- imaging analysis and/or image processing techniques applied to optical imaging (e.g. visualization, segmentation, registration),
- detection and diagnostic analysis techniques which may provide better quantitative and/or diagnostic insight into clinical & pre-clinical imaging (e.g. methods for quantitative measurements, computer-assisted diagnosis...),
- imaging analysis and/or image processing techniques used to combine optical imaging with other imaging modalities (e.g. MR, X-Ray, PET...),
- image analysis, computational methods and reconstruction approaches which may help bring optical imaging into the clinic (visual rendering of complex data set, novel algorithms for assisted optical reconstruction ...),
- Clinical evaluation of these new technologies (Physiological and functional interpretation of image data, visual perception and observer performances, validation of quantitative assessment of optical signatures *in-vivo*...).
