Proceedings of SPIE, 1605-7422, v. 6917

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 1605-7422/08/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

ix	Conference Committee
xi	Introduction
xiii	In Memoriam: Sam Dwyer (1932–2008)

SESSION 1 KEYNOTE AND EYE MOVEMENT

- 6917 03 **Performance changes in lung nodule detection following perceptual feedback of eye movements** [6917-02]
T. Donovan, D. J. Manning, Univ. of Cumbria (United Kingdom); T. Crawford, Lancaster Univ. (United Kingdom)
- 6917 04 **How much agreement is there in the visual search strategy of experts reading mammograms?** [6917-03]
C. Mello-Thoms, Univ. of Pittsburgh (USA)

SESSION 2 TECHNOLOGY ASSESSMENT

- 6917 05 **Comprehensive evaluation of an image segmentation technique for measuring tumor volume from CT images** [6917-04]
X. Deng, H. Huang, L. Zhu, G. Du, X. Xu, Siemens Ltd. China (China); Y. Sun, C. Xu, M.-P. Jolly, Siemens Corporate Research (USA); J. Chen, J. Xiao, R. Merges, Siemens Ltd. China (China); M. Suehling, D. Rinck, Siemens Medical Solutions (Germany); L. Song, Z. Jin, Peking Union Medical College Hospital (China); Z. Jiang, B. Wu, X. Wang, S. Zhang, W. Peng, FuDan Univ. Cancer Hospital (China)
- 6917 06 **Performance study of a globally elastic locally rigid matching algorithm for follow-up chest CT** [6917-05]
R. Wiemker, Philips Research Europe (Germany); B. de Hoop, Univ. Medical Ctr. Utrecht (Netherlands); S. Kabus, Philips Research Europe (Germany); H. Gietema, Univ. Medical Ctr. Utrecht (Netherlands); R. Opfer, Philips Research Europe (Germany); E. Dharaiya, Philips Medical Systems CT (USA)
- 6917 07 **PET/CT detectability and classification of simulated pulmonary lesions using an SUV correction scheme** [6917-06]
A. N. Morrow, K. L. Matthews II, Louisiana State Univ. (USA); S. Bujenovic, Our Lady of the Lake Regional Medical Ctr. (USA)
- 6917 08 **Comparing signal-based and case-based methodologies for CAD assessment in a detection task** [6917-07]
S. Paquerault, F. W. Samuelson, N. Petrick, K. J. Myers, NIBIB/CDRH Lab. for the Assessment of Medical Imaging Systems, FDA (USA)

- 6917 09 **Performance evaluation of image processing algorithms in digital mammography** [6917-08]
F. Zanca, C. Van Ongeval, J. Jacobs, H. Pauwels, G. Marchal, H. Bosmans, Leuven Univ. Ctr. of Medical Physics in Radiology (Belgium)

SESSION 3 ROC AND ITS VARIANTS

- 6917 0B **A novel partial area index of receiver operating characteristic (ROC) curve** [6917-10]
T. Wu, H. Huang, G. Du, Siemens Ltd. China (China); Y. Sun, Siemens Corporate Research (USA)
- 6917 0C **Investigation of methods for analyzing location specific observer performance data** [6917-11]
D. P. Chakraborty, H.-J. Yoon, Univ. of Pittsburgh (USA)
- 6917 0D **Comparing agreement measures** [6917-12]
W. Liu, Univ. of Maryland Baltimore County (USA) and NIBIB/CDRH Lab. for the Assessment of Medical Imaging Systems, FDA (USA); B. D. Gallas, NIBIB/CDRH Lab. for the Assessment of Medical Imaging Systems, FDA (USA)
- 6917 0E **Three-class ROC analysis: a sequential decision model developed for the diagnostic task rest-stress myocardial perfusion SPECT imaging** [6917-13]
X. He, E. C. Frey, Johns Hopkins School of Medicine (USA)
- 6917 0F **Optimality of a utility-based performance metric for ROC analysis** [6917-14]
D. C. Edwards, C. E. Metz, The Univ. of Chicago (USA)

SESSION 4 IMAGE PERCEPTION AND QUALITY

- 6917 0G **Individualised training to address variability of radiologists' performance** [6917-15]
S. Sun, P. Taylor, Univ. College London (United Kingdom); L. Wilkinson, L. Khoo, St. George's NHS Trust (United Kingdom)
- 6917 0H **Image perception by expert readers as a function of patient skin entrance dose levels in digital radiography** [6917-16]
T. Lehnert, H. Korkusuz, F. Khan, T. J. Vogl, M. G. Mack, Univ. Hospital Johann Wolfgang Goethe-Univ., Frankfurt am Main (Germany)
- 6917 0I **Toward perceptually driven image retrieval in mammography: a pilot observer study to assess visual similarity of masses** [6917-17]
M. A. Mazurowski, Univ. of Louisville (USA); B. P. Harrawood, Duke Univ. Medical Ctr. (USA); J. M. Zurada, Univ. of Louisville (USA); G. D. Tourassi, Duke Univ. Medical Ctr. (USA)
- 6917 0J **Existence and perception of textural information predictive of atypical nevi - preliminary insights** [6917-18]
P. Wighton, T. K. Lee, Simon Fraser Univ. (Canada), BC Cancer Research Ctr. (Canada), and Univ. of British Columbia and Vancouver Coastal Health Research Institute (Canada); D. McLean, H. Lui, BC Cancer Research Ctr. (Canada) and Univ. of British Columbia and Vancouver Coastal Health Research Institute (Canada); M. S. Atkins, Simon Fraser Univ. (Canada)

6917 OK **Mass detection on mammograms: signal variations and performance changes for human and model observers** [6917-19]
C. Castella, Univ. Institute for Radiation Physics and Univ. of Lausanne (Switzerland) and Ecole Polytechnique Fédérale de Lausanne (Switzerland); K. Kinkel, Clinique des Grangettes (Switzerland); M. P. Eckstein, C. K. Abbey, Univ. of California/Santa Barbara (USA); F. R. Verdun, Univ. Institute for Radiation Physics and Univ. of Lausanne (Switzerland); R. S. Saunders, E. Samei, Duke Univ. (USA); F. O. Bochud, Univ. Institute for Radiation Physics and Univ. of Lausanne (Switzerland)

6917 OL **Weighted perceptual difference model (case-PDM) for MR image quality evaluation** [6917-20]
J. Miao, W. C. K. Wong, Case Western Reserve Univ. (USA); D. L. Wilson, Case Western Reserve Univ. (USA) and Univ. Hospitals of Cleveland (USA)

SESSION 5 IMAGE DISPLAY

6917 OM **Image splitting techniques for a dual layer high dynamic range LCD display** [6917-21]
G. Guarnieri, Univ. of Trieste (Italy); L. Albani, FIMI-Philips (Italy); G. Ramponi, Univ. of Trieste (Italy)

6917 ON **Detection of low contrast test patterns on an LCD with different luminance and illuminance settings** [6917-22]
P. Sund, M. Båth, L. G. Månsson, Sahlgrenska Univ. Hospital (Sweden) and Göteborg Univ. (Sweden)

6917 OO **Visual adaptation: softcopy image contribution to the observer's field of view** [6917-23]
R. J. Toomey, K. Curran, C. D'Heft, M. B. Joyce, J. Stowe, J. T. Ryan, M. F. McEntee, Univ. College Dublin School of Medicine and Medical Science (Ireland); D. J. Manning, Univ. of Cumbria (United Kingdom); P. C. Brennan, Univ. College Dublin School of Medicine and Medical Science (Ireland)

6917 OP **Achieving consistent color and grayscale presentation on medial color displays** [6917-24]
J. Fan, GE Healthcare (USA); H. Roehrig, W. Dallas, College of Optical Sciences, The Univ. of Arizona (USA) and The Univ. of Arizona (USA); E. A. Krupinski, The Univ. of Arizona (USA)

6917 OQ **Assessment of temporal display using observers** [6917-25]
H. Liang, A. Badano, CDRH/FDA (USA)

SESSION 6 MODEL OBSERVERS

6917 OR **Model observers to predict human performance in LROC studies of SPECT reconstruction using anatomical priors** [6917-26]
A. Lehovitch, H. C. Gifford, M. A. King, Univ. of Massachusetts Medical School (USA)

6917 OS **Optimizing breast-tomosynthesis acquisition parameters with scanning model observers** [6917-27]
H. C. Gifford, Univ. of Massachusetts Medical School (USA); C. S. Didier, Univ. of Massachusetts Medical School (USA) and Univ. of Massachusetts-Lowell (USA); M. Das, S. J. Glick, Univ. of Massachusetts Medical School (USA)

- 6917 OT **Markov-chain Monte Carlo for the performance of a channelized-ideal observer in detection tasks with non-Gaussian lumpy backgrounds** [6917-28]
S. Park, NIBIB/CDRH Lab. for the Assessment of Medical Imaging Systems, FDA(USA); E. Clarkson, The Univ. of Arizona (USA)
- 6917 OU **Singular vectors of a linear imaging system as efficient channels for the ideal observer in detection tasks involving non-Gaussian distributed lumpy images** [6917-29]
J. M. Witten, Univ. of Maryland, College Park (USA); S. Park, K. J. Myers, NIBIB/CDRH Lab. for the Assessment of Medical Imaging Systems, FDA (USA)
- 6917 OV **Comparison of variable and fixed focal length cone beam CT in diagnostic imaging** [6917-30]
S. J. LaRoque, J. Bian, E. Y. Sidky, X. Pan, The Univ. of Chicago (USA)
- 6917 OW **Accurate computation of the Hotelling template for SKE/BKE detection tasks** [6917-31]
E. Y. Sidky, S. J. LaRoque, X. Pan, Univ. of Chicago (USA)

POSTER SESSION

- 6917 OX **VGC analysis: application of the ROC methodology to visual grading tasks** [6917-32]
M. Båth, Sahlgrenska Univ. Hospital (Sweden) and Univ. of Gothenburg (Sweden); S. Zachrisson, Univ. of Gothenburg (Sweden); L. G. Månsson, Sahlgrenska Univ. Hospital (Sweden) and Univ. of Gothenburg (Sweden)
- 6917 OY **A method of ROC analysis by applying item response theory (IRT) to results of 1/0 judgments on the presence or absence of abnormal findings in CT image readings** [6917-33]
T. Matsumoto, National Institute of Radiological Sciences (Japan) and Fukui Univ. (Japan); A. Furukawa, K. Nisizawa, National Institute of Radiological Sciences (Japan); K. Muraö, Fujitsu Ltd. (Japan); K. Hanai, Tochigi National Hospital (Japan); S. Yamamoto, Chukyo Univ. (Japan); S. Wada, Niigata Univ. (Japan); S. Sone, JA Azumi General Hospital (Japan)
- 6917 OZ **Relations between physical properties of local and global image-based elements and the performance of human observers in lung nodule detection** [6917-34]
M. W. Pietrzyk, Univ. of Cumbria (United Kingdom) and Lancaster Univ. (United Kingdom); D. J. Manning, Univ. of Cumbria (United Kingdom); A. Dix, Lancaster Univ. (United Kingdom); T. Donovan, Univ. of Cumbria (United Kingdom)
- 6917 10 **Reconstruction filters and contrast detail curves in CT** [6917-35]
W. Huda, MUSC (USA); K. M. Ogden, SUNY Upstate Medical Univ. (USA); E. Samei, Duke Univ. (USA); E. M. Scalzetti, R. L. Lavalée, M. L. Roskopf, G. E. Groat, SUNY Upstate Medical Univ. (USA)
- 6917 11 **Inter-reader variability in alternate forced choice studies** [6917-36]
W. Huda, MUSC (USA); K. M. Ogden, SUNY Upstate Medical Univ. (USA); E. Samei, Duke Univ. (USA); E. M. Scalzetti, R. L. Lavalée, M. L. Roskopf, SUNY Upstate Medical Univ. (USA)
- 6917 12 **Mammographic interpretation training: how useful is handheld technology?** [6917-37]
Y. Chen, A. G. Gale, H. Scott, Loughborough Univ. (United Kingdom)

- 6917 13 **How are false negative cases perceived by mammographers? Which abnormalities are misinterpreted and which go undetected?** [6917-38]
H. J. Scott, A. G. Gale, S. Hill, Loughborough Univ. (United Kingdom)
- 6917 14 **Measurement of visual strain in radiologists** [6917-39]
E. A. Krupinski, A. Johns, Univ. of Arizona (USA); K. S. Berbaum, Univ. of Iowa (USA)
- 6917 15 **Learning from others: effects of viewing another person's eye movements while searching for chest nodules (Honorable Mention Poster Award)** [6917-40]
D. Litchfield, L. J. Ball, Lancaster Univ. (United Kingdom); T. Donovan, D. J. Manning, Cumbria Univ. (United Kingdom); T. Crawford, Lancaster Univ. (United Kingdom)
- 6917 16 **Assembling a prototype resonance electrical impedance spectroscopy system for breast tissue signal detection: preliminary assessment** [6917-41]
J. Sumkin, B. Zheng, M. Gruss, J. Drescher, J. Leader, W. Good, A. Lu, C. Cohen, R. Shah, M. Zuley, D. Gur, Univ. of Pittsburgh (USA)
- 6917 17 **Perceptual assessment of multiple stent deployment (Cum Laude Poster Award)** [6917-42]
C. K. Abbey, Univ. of California, Santa Barbara (USA) and Univ. of California, Davis (USA); A. Teymoorian, W. Schoonveld, Univ. of California, Santa Barbara (USA); X. Da, Cedars-Sinai Medical Ctr. (USA); S. Zhang, Univ. of California, Santa Barbara (USA); J. S. Whiting, Cedars-Sinai Medical Ctr. (USA); M. P. Eckstein, Univ. of California, Santa Barbara (USA)
- 6917 18 **An automated system for the analysis of peri-prosthetic osteolysis progression** [6917-43]
J. Tamez-Pena, M. Barbu-McInnis, S. K. Pakin, VirtualScopics, Inc. (USA); B. Castaneda, Univ. of Rochester (USA); S. Totterman, VirtualScopics, Inc. (USA); R. J. Looney, Univ. of Rochester, School of Medicine (USA)
- 6917 19 **Performance assessment of multi-frequency processing of ICU chest images for enhanced visualization of tubes and catheters** [6917-44]
X. Wang, M. E. Couwenhoven, D. H. Foos, J. Doran, Carestream Health, Inc. (USA); D. F. Yankelevitz, C. I. Henschke, Weill Cornell Medical College (USA)
- 6917 1A **Steady-state sweep visual evoked potential processing denoised by wavelet transform** [6917-45]
H. A. Weiderpass, Univ. of São Paulo (Brazil) and Santo André Foundation (Brazil); J. F. Yamamoto, Academic Network Support Ctr. - NARA (Brazil); S. R. Salomão, A. Berezovsky, J. M. Pereira, P. Y. Sacai, Federal Univ. of São Paulo (Brazil); J. P. de Oliveira, M. A. Costa, M. N. Burattini, Univ. of São Paulo (Brazil)
- 6917 1B **A strategy to optimize CT pediatric dose with a visual discrimination model** [6917-46]
D. Gutierrez, F. Gudinchet, L. T. Alamo-Maestre, F. O. Bochud, F. R. Verdun, Ctr. Hospitalier Universitaire Vaudois and Univ. of Lausanne (Switzerland)
- 6917 1C **Assessment of scanning model observers with hybrid SPECT images** [6917-47]
H. C. Gifford, P. H. Pretorius, M. A. King, Univ. of Massachusetts Medical School (USA)
- 6917 1D **SPECT image system optimization using ideal observer for detection and localization** [6917-48]
L. Zhou, G. Gindi, Stony Brook Univ. (USA)

- 6917 1F **Noise reduction effect in super-high resolution LCDs using independent sub-pixel driving technology** [6917-50]
K. Ichikawa, Kanazawa Univ. (Japan); Y. Nishi, S. Hayashi, M. Hasegawa, Totoku Electric Co., Ltd. (Japan); Y. Koderu, Nagoya Univ. (Japan)
- 6917 1G **Mammography workstation design: effect on mammographer behaviour and the risk of musculoskeletal disorders** [6917-51]
S. Taylor-Phillips, Loughborough Univ. (United Kingdom); M. G. Wallis, Addenbrookes Hospital (United Kingdom); A. G. Gale, Loughborough Univ. (United Kingdom)
- 6917 1H **Influence of monitor characteristics on the signals detection present in the mammographic phantom image** [6917-52]
S. R. Pires, R. B. Medeiros, Univ. Federal de São Paulo (Brazil)
- 6917 1I **Radiological image presentation requires consideration of human adaptation characteristics** [6917-53]
N. M. O'Connell, R. J. Toomey, M. McEntee, J. Ryan, J. Stowe, A. Adams, P. C. Brennan, UCD School of Medicine and Medical Science (Ireland)

Introduction

As part of the symposium of SPIE Medical Imaging 2008, the Image Perception, Observer Performance, and Technology Assessment Conference was held February 19 through 21, 2008, in San Diego, California.

The conference opened with the annual Harold L. Kundel Honorary Lecture and the keynote speaker this year was Arthur E. Burgess, Ph.D., from Harvard Medical School. Before his lecture, Elizabeth A. Krupinski, Ph.D., University of Arizona, presented Dr. Burgess with a plaque that recognized his outstanding contributions to the field of medical image perception. Dr. Burgess' keynote speech was entitled "An unexpected research career: How a short project became long". The speech contained an excellent mix of scientific discussion from Dr. Burgess' research career and personal anecdotes. Dr. Burgess advised younger researchers to keep laboratory notebooks, record the research process on paper, not on a computer, because as the years pass computer media changes and one may not be able to access old data using current computers. He stressed that he could not have prepared his keynote speech without his laboratory notebooks, and he proved so by graphing data collected more than 20 years ago. His outstanding speech indeed demonstrated how important those notes are, and how relevant many of those research topics are today.

There were 30 contributed oral presentations organized in six sessions: Eye movement; technology assessment; ROC and its variants; image perception and quality; image display; and model observers. The poster session had 23 posters covering essentially all topics discussed at the conference. The Cum Laude Award for Best Poster went to Craig K. Abbey, Arian Teymorian, Univ. of California/Santa Barbara; Xiaolin Da, Cedars Sinai Medical Center; Binh Pham, Univ. of California/Santa Barbara; James Whiting, Cedars Sinai Health System; and Miguel Eckstein, Univ. of California/Santa Barbara; for their paper entitled "Perceptual assessment of multiple stent deployment." The Honorable Mention Poster Award went to Damien Litchfield, Linden Ball, Lancaster University; Tim Donovan, David Manning, University of Cumbria; and Trevor Crawford, Lancaster University; for their paper entitled "Learning from others: effects of viewing another person's eye movements while searching for chest nodules."

The workshop for the conference was entitled "Recent Developments in ROC Analysis," and it was moderated by Kevin Berbaum, Ph.D., Univ. of Iowa and Berkman Sahiner, Ph.D., Univ. of Michigan. Five experts gave 10-minute presentations and then joined in a panel discussion. The panelists were Stephen L. Hillis, Ph.D., Univ. of Iowa; Brandon Gallas, Ph.D., US Food and Drug Administration; Philip F. Judy, Ph.D., Harvard Medical School and Brigham and Women's Hospital; Dev P. Chakraborty, Ph.D., Univ. of Pittsburgh; and Darrin C. Edwards, Ph.D., Univ. of Chicago. The panelists brought fresh perspectives from their individual areas to

the question of how medical imaging techniques can best be evaluated using Receiver Operating Characteristic-type of analysis. Discussion touched on a wide range of topics from how to best analyze or interpret multiple-reader, multiple-case data to new methods for free-response data analysis and how to conduct multi-class ROC analysis. The workshop was successful in highlighting the developments that have taken place since the early days of application of signal detection theory to evaluate diagnostic performance in radiology. There was particular emphasis on the importance of data collected from human subjects in image perception research, and scientists were encouraged to share their findings in collaborative ventures to improve our understanding of the topic. With increased emphasis on performance evaluation for medical imaging techniques, this area will likely be the focus of growing interest in the near future.

We are grateful to the conference program committee for their important contributions in all aspects of conference planning and organization, and for providing suggestions for future conferences. We would also like to thank the SPIE staff for their excellent work in organizing the symposium. The preparation for the 2009 Image Perception, Observer Performance, and Technology Assessment Conference is now under way. As always, on behalf of the conference program committee, we would like to encourage attendants to contact us with ideas for improving this conference. We are committed to organizing a conference that is educational, stimulating, and a friendly forum for scientific exchange and debate.

Berkman Sahiner
David Manning

In Memoriam

Sam Dwyer

1932–2008

Inspirational planner for SPIE Medical Imaging symposia and chair of 15 conferences from 1983 to 1996

Sam Dwyer was a leading light in the swift growth of the field of medical imaging. At this 2008 Medical Imaging symposium, several colleagues expressed their appreciation of his professional achievements and the legacy of his contributions.

Andre Duerinckx recalls Sam's first big step into the limelight. "Sam chaired the Second International PACS meeting sponsored by SPIE in 1983. He stepped in when my professional direction shifted and I could not continue. Over the following years Sam became a leading force in the development of this new science and technology as the conferences developed and grew."

"He had an ability to predict important technology trends in medical imaging," says Steven Horii, a long-time SPIE Medical Imaging contributor and past conference chair.

Another past Medical Imaging conference chair with years of experience, Roger Schneider elaborates, "The growth of the initial conferences was phenomenal. They quickly expanded and outgrew several facilities. Topic areas increased. For example, we had been dealing with perception in sessions on image statistics. Sam first suggested that the field of perception theory and experiment was expanding so rapidly that it deserved its own conference. We also added conferences on image processing hardware, display, functional imaging, and special topics in ultrasound transducers."

"Sam was a true pioneer in our field," continues Schneider. "He was one of the first to envision the impact of digital technology on the storage, retrieval, communication, and

display of medical images, and one of the most active early explorers of the possibilities. He led the PACS conference into the merger with SPIE's image science conference to form the current Medical Imaging Symposium which many consider to be the premiere technical program on medical imaging in the world."

Murray Loew, another past conference chair, adds his observation, "Sam's academic, industrial, and clinical experience provided the perspective that enabled him to set priorities and give advice that helped many of us to make our own contributions. We all benefited greatly from his insights and his practical approach."

Schneider agrees. "Through all, Sam was an excellent partner and leader, calm, gentle yet persuasive, always congenially nudging everyone toward a better future. His ambitions were not for himself, but for the mutual enterprise. He was a very enthusiastic mentor and supporter of students and researchers new to the field without any concern for the possibility that their work might compete with his and was himself a superbly competent contributor."

An example of this is illustrated by John Strauss." Already well accomplished at the time of our first meeting, Sam made the time to take an eager but inexperienced student under his wing. I was not an 'assigned' grad student or research assistant from the University to which he had an obligation. I was a product manager from a vendor-partner. Over the years, from answering technical questions in an understandable way, to providing unassuming career guidance, as well as a sympathetic ear to the challenges of fatherhood or life's many challenges and struggles, Sam was always there for me."

"There are many things about Sam Dwyer that I recall with great fondness, like his always friendly and enthusiastic manner. His advice led me to my years of satisfying work on the ACR-NEMA Committee," adds Horii.

All agree that Sam had many other admirable traits. His wit and sense of humor were legendary, as one of Schneider's favorite memories illustrates. "At the opening of one conference Sam announced, from the podium, that it was the birthday of an important attendee. He said SPIE had requested that the Blue Angels do a flyover—but they already had something scheduled. As a substitute birthday recognition, Sam suggested we take our morning coffee break out on the terrace and watch the landscaping crew circle the flagpole on their riding lawnmowers."

Strauss describes the footprint left by Sam, "While Sam left a legacy through his professional accomplishments, perhaps more lasting is the heritage of leadership he has left behind. He felt it his obligation to pass on his knowledge and wisdom to the next generation, and I was blessed as a recipient. I have and will continue to honor Sam by sharing with those that come after me."

Sam Dwyer was a person of rare quality who will be sorely missed. His name has a permanent place in the annals of medical imaging, and his contributions continue in the flourishing growth of knowledge presented and discussed in the annual Medical Imaging conferences.
