The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

---

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.
## Contents

vii Conference Committee

### SESSION 1  MODELING I

<table>
<thead>
<tr>
<th>6941 02</th>
<th>What causes sampling artifacts? (Invited Paper) [6941-01]</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>G. C. Holst, JCD Publishing Co. (USA)</td>
</tr>
</tbody>
</table>

### SESSION 2  MODELING II

<table>
<thead>
<tr>
<th>6941 05</th>
<th>Modeling the benefit of color in target acquisition: characterizing color vision [6941-04]</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>R. Vollmerhausen, Consultant (USA); J. T. Olson, J. P. Reynolds, U.S. Army Night Vision and Electronic Sensors Directorate (USA)</td>
</tr>

SESSION 4  MODELING IV

6941 0F  Effect of image bit depth on target acquisition modeling [6941-14]

6941 0G  Human activity discrimination for maritime application [6941-15]
E. Boettcher, DCS Corp. (USA); D. M. Deaver, U.S. Army Night Vision and Electronic Sensors Directorate (USA); K. Krapels, Office of Naval Research (USA)

6941 0H  The application of Compressive Sensing technique on a stationary surveillance camera system [6941-16]
J. Zheng, E. Jacobs, Univ. of Memphis (USA)

6941 0I  Optical and radiometry analysis for a passive infrared sparse sensor detection system [6941-17]
K. K. Klett, Jr., R. Sartain, T. Alexander, K. Aliberti, Army Research Lab. (USA)

6941 0J  Thermal signatures of personnel in urban environments [6941-18]
J. M. Cathcart, B. Kocher, K. Camann, Georgia Institute of Technology (USA)

6941 0K  Modeling the effects of contrast enhancement on target acquisition performance [6941-19]
T. W. Du Bosq, J. D. Fanning, U.S. Army Night Vision and Electronic Sensors Directorate (USA)

6941 0L  The impact of spatio-temporal focal plane array nonuniformity noise on target search and identification performance [6941-20]

SESSION 5  MODELING V

6941 0M  Calculating incoherent diffraction MTF [6941-21]
M. Friedman, J. Vizgaitis, U.S. Army Night Vision and Electronic Sensors Directorate (USA)

6941 0N  Target identification performance of superresolution versus dither [6941-22]
J. D. Fanning, J. P. Reynolds, U.S. Army Night Vision and Electronic Sensors Directorate (USA)

6941 0O  Development principles for evolving performance models [6941-23]
J. A. Atwell, B. P. Canova, J. B. Chapman, Ball Aerospace and Technologies Corp. (USA)

6941 0P  Effect of image magnification on target acquisition performance [6941-24]
B. P. Teaney, J. Fanning, U.S. Army Night Vision and Electronic Sensors Directorate (USA)

6941 0Q  MWIR persistent surveillance performance for human and vehicle backtracking as a function of ground sample distance and revisit rate [6941-25]
R. Driggers, S. Aghera, P. Richardson, B. Miller, J. Doe, U.S. Army Night Vision and Electronic Sensors Directorate (USA); A. Robinson, Univ. of Memphis (USA); K. Krapels, Office of Naval Research (USA); S. Murrill, Army Research Lab. (USA)
Airborne tracking resolution requirements for urban vehicles [6941-26]
A. L. Robinson, B. Miller, P. Richardson, C. Ra, Univ. of Memphis (USA) and U.S. Army Night Vision and Electronic Sensors Directorate (USA)

SESSION 6 ATMOSPHERIC EFFECTS

Analysis of image distortions by atmospheric turbulence and computer simulation of turbulence effects [6941-27]
E. Repasi, R. Weiss, FGAN Research Institute for Optronics and Pattern Recognition (Germany)

Perception range prediction for IR pilot sight [6941-28]
A. R. Weiss, P. Großmann, E. Repasi, G. Ritt, W. Wittenstein, FGAN Research Institute for Optronics and Pattern Recognition (Germany)

Dew, dust, and wind influencing thermal signatures of objects [6941-29]
A. Reinov, Y. Bushlin, A. Lessin, Institute for Advanced Research and Development (Israel); D. Clement, FGAN Research Institute for Optronics and Pattern Recognition (Germany)

CACAMO—computer-aided camouflage assessment of moving objects [6941-30]
T. Müller, M. Müller, Fraunhofer Institute IIIB (Germany)

SESSION 7 SYSTEMS AND TESTING I

Modulation transfer function measurement on QWIP focal plane array [6941-32]
S. B. Rafol, E. Cho, Diversified Electronic Corp. (USA)

Comparison of Fourier transform methods for calculating MTF [6941-33]
J. D. LaVeigne, Santa Barbara Infrared, Inc. (USA); S. D. Burks, U.S. Army Night Vision and Electronic Sensors Directorate (USA); B. Nehring, Santa Barbara Infrared, Inc. (USA)

Edge response revisited [6941-34]
S. Lashansky, S. Mansbach, M. Berger, Elbit Systems Electro-Optics Elop, Ltd. (Israel); T. Karasik, M. Bin-Nun, Machon Tal, Jerusalem Institute of Technology (Israel)

Infrared lens characterization using common undersampled systems [6941-35]
C. A. Nichols, StingRay Optics (USA)

A means for calculating the optics MTF of an under-sampled IR imaging system [6941-36]
S. Burks, J. Olson, J. Stevens, U.S. Army Night Vision and Electronic Sensors Directorate (USA)

SESSION 8 SYSTEMS AND TESTING II

Measurement of effective temperature range of fire service thermal imaging cameras [6941-38]
F. Amon, N. Bryner, National Institute of Standards and Technology (USA)

Measurement of the nonuniformity of first responder thermal imaging cameras [6941-39]
A. Lock, F. Amon, National Institute of Standards and Technology (USA)

Conference Committee

Symposium Chair

Larry B. Stotts, Defense Advanced Research Projects Agency (USA)

Symposium Cochair

Ray O. Johnson, Lockheed Martin Corp. (USA)

Program Track Chair

Gabor F. Fulop, Maxtech International, Inc. (USA)

Conference Chair

Gerald C. Holst, JCD Publishing (USA)

Program Committee

Piet Bijl, TNO Human Factors (Netherlands)
Dieter Clement, Forschungsgesellschaft für Angewandte Naturwissenschaften e.V. (Germany)
Ronald G. Driggers, U.S. Army Night Vision and Electronic Sensors Directorate (USA)
David P. Forrai, L-3 Communications Cincinnati Electronics, Inc. (USA)
Alan Irwin, Santa Barbara Infrared, Inc. (USA)
Keith A. Krapels, Office of Naval Research (USA)
Terrence S. Lomheim, The Aerospace Corp. (USA)
Luanne P. Obert, U.S. Army Night Vision and Electronic Sensors Directorate (USA)
Hector M. Reyes, Raytheon Co. (USA)
Endre Repasi, Forschungsgesellschaft für Angewandte Naturwissenschaften e.V. (Germany)
Joseph P. Reynolds, U.S. Army Night Vision and Electronic Sensors Directorate (USA)
Ronald B. Sartain, Army Research Laboratory (USA)
Michael A. Soel, FLIR Systems, Inc. (USA)
Marija Strojnik, Centro de Investigaciones en Óptica, A.C. (Mexico)
Curtis M. Webb, Northrop Grumman Corporation (USA)

Session Chairs

1 Modeling I
Maarten A. Hogervorst, TNO Human Factors (Netherlands)
Ronald G. Driggers, U.S. Army Night Vision and Electronic Sensors Directorate (USA)
David P. Forrai, L-3 Communications Cincinnati Electronics, Inc. (USA)
2 Modeling II
Maarten A. Hogervorst, TNO Human Factors (Netherlands)
Ronald G. Driggers, U.S. Army Night Vision and Electronic Sensors Directorate (USA)
David P. Forrai, L-3 Communications Cincinnati Electronics, Inc. (USA)

3 Modeling III
Keith A. Krapels, Office of Naval Research (USA)
Hector M. Reyes, Raytheon Co. (USA)
Marija Strojnik, Centro de Investigaciones en Óptica, A.C. (USA)

4 Modeling IV
Keith A. Krapels, Office of Naval Research (USA)
Luanne P. Obert, U.S. Army Night Vision and Electronic Sensors Directorate (USA)
Ronald B. Sartain, Army Research Laboratory (USA)

5 Modeling V
Ronald G. Driggers, U.S. Army Night Vision and Electronic Sensors Directorate (USA)
Terrence S. Lomheim, The Aerospace Corporation (USA)
Joseph P. Reynolds, U.S. Army Night Vision and Electronic Sensors Directorate (USA)

6 Atmospheric Effects
Dieter Clement, Forschungsgesellschaft für Angewandte Naturwissenschaften e.V. (Germany)
Endre Repasi, Forschungsgesellschaft für Angewandte Naturwissenschaften e.V. (Germany)
Marija Strojnik, Centro de Investigaciones en Óptica, A.C. (Mexico)

7 Systems and Testing I
Alan Irwin, Santa Barbara Infrared, Inc. (USA)
Michael A. Soel, FLIR Systems, Inc. (USA)
Curtis M. Webb, Northrop Grumman Corporation (USA)

8 Systems and Testing II
Alan Irwin, Santa Barbara Infrared, Inc. (USA)
Michael A. Soel, FLIR Systems, Inc. (USA)
Curtis M. Webb, Northrop Grumman Corporation (USA)
