Volume 7085

Proceedings of SPIE, 0277-786X, v. 7085

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Atmospheric and Environmental Remote Sensing Data Processing and Utilization IV: Readiness for GEOSS II*, edited by Mitchell D. Goldberg, Hal J. Bloom, Philip E. Ardanuy, Allen H.-L. Huang, Proceedings of SPIE Vol. 7085 (SPIE, Bellingham, WA, 2008) Article CID Number.

ISSN 0277-786X

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/08/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

- vii *Conference Committee*
- ix *Measurement science for climate remote sensing (Plenary Paper) [7081-53]*
G. T. Fraser, S. W. Brown, R. U. Datta, B. C. Johnson, K. R. Lykke, J. P. Rice, National Institute of Standards and Technology (United States)

CLIMATE AND SATELLITE CALIBRATION

- 7085 03 **Recent activities and achievements of the Global Space-based Inter-Calibration System (GSICS) research working group (Invited Paper) [7085-02]**
X. Wu, M. Goldberg, NOAA/NESDIS (United States)
- 7085 04 **Using AIRS and IASI data to evaluate absolute radiometric accuracy and stability for climate applications [7085-03]**
H. H. Aumann, T. S. Pagano, Jet Propulsion Lab. (United States)
- 7085 05 **Using IASI observations to resolve HIRS spectral response function induced intersatellite biases [7085-05]**
C. Cao, M. Goldberg, NOAA/NESDIS (United States); L. Wang, Perot System Government Service (United States)
- 7085 06 **Intercalibration of microwave sounding unit with short overlaps [7085-06]**
C.-Z. Zou, NOAA/NESDIS (United States)
- 7085 08 **Evaluating a system of systems approach for integrated global weather, climate, and hazard monitoring [7085-08]**
R. Birk, B. Baldauf, R. Ohlemacher, L. Andreoli, Northrop Grumman Space Technology (United States)
- 7085 09 **McIDAS-V: a powerful data analysis and visualization tool for multi and hyperspectral environmental satellite data [7085-09]**
T. Achtor, T. Rink, T. Whittaker, D. Parker, D. Santek, Univ. of Wisconsin, Madison (United States)

GEOSTATIONARY SYSTEMS

- 7085 0F **GOES-R/ABI legacy profile algorithm evaluation using MSG/SEVIRI and AMSR-E [7085-14]**
X. Jin, J. Li, Univ. of Wisconsin, Madison (United States); T. J. Schmit, NOAA/NESDIS (United States); J. Li, A. Huang, Univ. of Wisconsin, Madison (United States); M. D. Goldberg, NOAA/NESDIS (United States)
- 7085 0G **Linking water vapor channels of GOES-11 and GOES-12 imagers using IASI hyperspectral observations [7085-15]**
L. Wang, Perot System Government Service (United States); C. Cao, NOAA/NESDIS (United States)

LAND PROPERTY REMOTE SENSING

- 7085 OH **Soil Moisture Active/Passive (SMAP) Mission concept** [7085-19]
D. Entekhabi, Massachusetts Institute of Technology (United States); T. J. Jackson, U.S. Dept. of Agriculture (United States); E. Njoku, Jet Propulsion Lab. (United States); P. O'Neill, NASA Goddard Space Flight Ctr. (United States); J. Entin, NASA Headquarters (United States)
- 7085 OI **Soil moisture retrieval from WindSat using the single channel algorithm toward a blended global soil moisture product from multiple microwave sensors** [7085-16]
J. Liu, X. Zhan, NOAA/NESDIS (United States); T. J. Jackson, U.S. Dept. of Agriculture (United States)
- 7085 OJ **A study on microwave drought indices in Hebei Province of China using AMSR-E observations** [7085-17]
Y. Zheng, Nanjing Univ. of Information Science & Technology (China); F. Guan, Ecological Environment Monitoring Lab. of Hebei Province (China) and Institute of Hebei Province Meteorological Science (China); F. Xu, Nanjing Univ. of Information Science & Technology (China); X. Zhan, NOAA/NESDIS (United States); B. Yang, Ecological Environment Monitoring Lab. of Hebei Province (China) and Institute of Hebei Province Meteorological Science (China); R. Wu, Nanjing Univ. of Information Science & Technology (China)
- 7085 OK **Implementation of a global-scale operational data assimilation system for satellite-based soil moisture retrievals** [7085-18]
J. Bolten, W. Crow, U.S. Dept. of Agriculture (United States); X. Zhan, NOAA/NESDIS (United States); C. Reynolds, U.S. Dept. of Agriculture (United States)

EOS AND GEOSS JOINT SESSION

- 7085 OL **Evaluation of satellite land surface temperatures using ground measurements from surface radiation budget network** [7085-20]
Y. Yu, NOAA/NESDIS (United States); D. Tarpley, Short and Associates, Inc. (United States); M. K. R. Varma Raja, I. M. Systems Group, Inc. (United States); K. Vinnikov, Univ. of Maryland, College Park (United States); M. D. Goldberg, NOAA/NESDIS (United States)
- 7085 ON **Improvements of numerical weather predictions using a new AVHRR green vegetation fraction dataset** [7085-24]
Y. Tian, C.-Z. Zou, K. E. Mitchell, V. Wong, F. N. Kogan, L. Jiang, X. Zhan, NOAA/NESDIS (United States)

DATA ASSIMILATION I

- 7085 OR **Assimilation of small scale observations with a nested adjoint model** [7085-28]
C. Amerault, J. Doyle, Naval Research Lab. (United States)
- 7085 OS **Initial error growth in a simulated supercell storm** [7085-29]
J. Min, Y. Qi, N. Du, Nanjing Univ. of Information Science & Technology (China); F. Kong, The Univ. of Oklahoma (United States)

DATA ASSIMILATION II

- 7085 0V **The precipitation products generation chain for the EUMETSAT Hydrological Satellite Application Facility at C.N.M.C.A.** [7085-35]
D. Biron, D. Melfi, F. Zauli, Ctr. Nazionale di Meteorologia e Climatologia Aeronautica (Italy)

DATA ASSIMILATION III

- 7085 0Y **Synergistic use of high spectral sounder and high spatial imager radiance measurements for atmospheric profiling** [7085-39]
C.-Y. Liu, J. Li, E. Weisz, Univ. of Wisconsin, Madison (United States); T. J. Schmit, NOAA/NESDIS (United States); A. Huang, Univ. of Wisconsin, Madison (United States)

POSTER SESSION

- 7085 18 **Accuracy assessment on the crop area estimating method based on RS sampling at a national scale: a case study of China's rice area estimation assessment** [7085-52]
Y. Qian, China Meteorological Administration (China); B. Yang, X. Jiao, Z. Pei, Chinese Academy of Agricultural Engineering (China); X. Li, China Meteorological Administration (China)
- 7085 1B **Circulation background of the extremely heavy rain causing severe floods in Huaihe River valley in 2003 and its relationship to the apparent heating** [7085-55]
L. Wang, Z. Guan, C. Shi, L. Jin, Nanjing Univ. of Information Science & Technology (China); J. Ma, Lishui Meteorological Bureau (China)
- 7085 1C **Interannual variation in rainfall and atmospheric heat sources over the Tibetan Plateau** [7085-56]
S. Zhong, J. He, Z. Guan, C. Shi, Nanjing Univ. of Information Science & Technology (China)
- 7085 1F **Intercalibration of GOES-11 imagers with AIRS and IASI data** [7085-58]
Y. Li, X. Wu, NOAA/NESDIS (United States); S. Sohn, Korea Meteorological Administration (South Korea)
- 7085 1G **A comparison between two different stratospheric ozone datasets of HALOE observations and ERA-40 reanalysis** [7085-33]
C. Shi, Nanjing Univ. of Information Science & Technology (China) and Institute of Atmospheric Physics (China); B. Zheng, China Meteorological Administration (China); H. Li, Nanjing Univ. of Information Science & Technology (China)
- 7085 1H **The 3-D moisture structure of quasi-biweekly mode revealed by AIRS** [7085-44]
L. Tao, Nanjing Univ. of Information Science & Technology (China); X. Fu, Univ. of Hawaii at Manoa (United States); C. Shi, Nanjing Univ. of Information Science & Technology (China)
- 7085 1I **An influence of quasi-biennial oscillation on the water vapor in tropic stratosphere** [7085-41]
C. Shi, Nanjing Univ. of Information Science & Technology (China) and Institute of Atmospheric Physics (China); B. Zheng, China Meteorological Administration (China); Y. Chen, R. Zhou, Univ. of Science and Technology of China (China)
