SPIE

Volume 7093

Proceedings of SPIE, 0277-786X, v. 7093

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Advanced Wavefront Control: Methods, Devices, and Applications VI*, edited by John D. Gonglewski, Richard A. Carreras, Troy A. Rhoadarmer, Proceedings of SPIE Vol. 7093 (SPIE, Bellingham, WA, 2008) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/08/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v *Conference Committee*

SESSION 1 ADAPTIVE OPTICS AND SYSTEMS

- 7093 02 **Wide-angle nonmechanical beam steering using thin liquid crystal polarization gratings** [7093-01]
J. Kim, C. Oh, M. J. Escuti, North Carolina State Univ. (United States); L. Hosting, S. Serati, Boulder Nonlinear Systems, Inc. (United States)
- 7093 05 **Atmospheric simulator for testing adaptive optics systems** [7093-04]
C. C. Wilcox, T. Martinez, F. Santiago, J. R. Andrews, S. R. Restaino, Naval Research Lab. (United States); S. W. Teare, New Mexico Tech (United States); D. Payne, Narrascope (United States)
- 7093 06 **Modeling of the Thirty-Meter-Telescope matched-filter-based LGS wavefront sensing** [7093-05]
R. Conan, O. Lardière, C. Bradley, Univ. of Victoria (Canada); G. Herriot, NRC-Herzberg Institute of Astrophysics (Canada); K. Jackson, Univ. of Victoria (Canada)
- 7093 07 **Operation of phase-diverse adaptive-optics with extended scenes** [7093-06]
M. W. Warmuth, S. W. Parker, A. J. Wilson, K. W. Gleichman, R. G. Paxman, General Dynamics Advanced Information Systems (United States); B. J. Thelen, Michigan Tech Research Institute (United States); R. J. Murphy, J. D. Hunt, J. W. LeBlanc, General Dynamics Advanced Information Systems (United States)
- 7093 09 **Beam control by means of phase elements iterative control algorithms** [7093-08]
I. V. Ilyina, A. S. Mikryukov, T. Yu. Cherezova, M.V. Lomonosov Moscow State Univ. (Russian Federation)
- 7093 0A **Adaptive optics with the deformable mirror not in pupil: Part I. Experimental results** [7093-09]
M. Mateen, D. Sanchez, Air Force Research Lab. (United States); T. Rhoadarmer, SAIC (United States); L. Arguella, Boeing-LTS (United States); D. W. Oesch, D. Fung, SAIC (United States); R. Petty, Boeing-LTS (United States); P. Kelly, R. A. Vincent, J. Richey, Air Force Research Lab. (United States)

SESSION 2 NOVEL SYSTEMS, ANALYSIS, AND APPLICATIONS

- 7093 0C **Study of local minima in metric adaptive optics** [7093-11]
J. D. Mansell, A. Masino, B. Henderson, Active Optical Systems, LLC (United States)
- 7093 0D **Adaptive wavelets applied to phase-shifting interferometry for wavefront sensing** [7093-12]
K. J. Jones, WBAO (United States)

- 7093 0E **Nonconventional wavefront sensing: point sourced SLODAR, theory and practical examples** [7093-13]
S. O. Galetskiy, T. Yu. Cherezova, M.V. Lomonosov Moscow State Univ. (Russia);
A. V. Kudryashov, Moscow State Open Univ. (Russia)
- 7093 0F **Analysis of non-uniform gain for control of a deformable mirror in an adaptive-optics system** [7093-14]
K. P. Vitayaudom, Air Force Institute of Technology (United States); T. R. Vincent, Air Force Research Lab. (United States); J. D. Schmidt, Air Force Institute of Technology (United States);
D. J. Sanchez, Air Force Research Lab. (United States)
- 7093 0G **Dependence of adaptive cross-correlation algorithm performance on the extended scene image quality** [7093-15]
E. Sidick, Jet Propulsion Lab. (United States)
- 7093 0I **Laser beam shaping with membrane deformable mirrors** [7093-17]
B. G. Henderson, J. D. Mansell, Active Optical Systems, LLC (United States)
- 7093 0J **Limitations of segmented wavefront control devices in emulating optical turbulence** [7093-18]
M. D. Plourde, J. D. Schmidt, Air Force Institute of Technology (United States)

Conference Committee

Conference Chairs

John D. Goglewski, Air Force Research Laboratory (United States)
Richard A. Carreras, Air Force Research Laboratory (United States)
Troy A. Rhoadarmer, Science Applications International Corporation
(United States)

Program Committee

Geoff P. Andersen, U.S. Air Force Academy (United States)
Jeffrey D. Barchers, Nutronics, Inc. (United States)
Charles C. Beckner, Jr., Air Force Research Laboratory (United States)
Thomas G. Bifano, Boston University (United States)
Philip J. Bos, Kent State University (United States)
James M. Brase, Lawrence Livermore National Laboratory
(United States)
Keith A. Bush, AgilOptics, Inc. (United States)
David C. Dayton, Applied Technology Associates (United States)
Lewis F. DeSandre, Office of Naval Research (United States)
Sergey A. Dimakov, S.I. Vavilov State Optical Institute (Russia)
Matthew E. Goda, Air Force Institute of Technology (United States)
Mark T. Gruneisen, Air Force Research Laboratory (United States)
Alexis V. Kudryashov, Moscow State Open University (Russia)
Tanya Cherazova, M.V. Lomonosov Moscow State University (Russia)
Gordon D. Love, Durham University (United Kingdom)
Justin D. Mansell, MZA Associates Corporation (United States)
Dan K. Marker, Air Force Research Laboratory (United States)
Kent L. Miller, Air Force Office of Scientific Research (United States)
Dennis A. Montera, Air Force Research Laboratory (United States)
Scot S. Olivier, Lawrence Livermore National Laboratory
(United States)
Jim F. Riker, Air Force Research Laboratory (United States)
James R. Rotgé, Boeing LTS, Inc. (United States)
Darryl J. Sanchez, The University of New Mexico (United States)
Jason D. Schmidt, Air Force Institute of Technology (United States)
Don D. Seeley, High Energy Laser Joint Technology Office
(United States)
Vladimir Yu. Venediktov, Research Institute for Laser Physics (Russia)

Session Chairs

- 1 Adaptive Optics and Systems
Richard A. Carreras, Air Force Research Laboratory (United States)
Darryl J. Sanchez, The University of New Mexico (United States)
- 2 Novel Systems, Analysis, and Applications
Troy A. Rhoadarmer, Science Applications International Corporation
(United States)
David C. Dayton, Applied Technology Associates (United States)
