SPIE

Volume 7200

Proceedings of SPIE, 0277-786X, v. 7200

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Atmospheric Propagation of Electromagnetic Waves III*, edited by Olga Korotkova, Proceedings of SPIE Vol. 7200 (SPIE, Bellingham, WA, 2009) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v Conference Committee

SESSION 1 BEAM PROPAGATION IN THE ATMOSPHERE: THEORY

- 7200 02 **Effect of beam types on the scintillations: a review (Invited Paper)** [7200-01]
Y. Baykal, H. T. Eyyuboglu, Çankaya Univ. (Turkey); Y. Cai, Univ. of Erlangen (Germany)
- 7200 04 **Propagation of scalar and vector vortex beams through turbulent atmosphere** [7200-03]
W. Cheng, J. W. Haus, Q. Zhan, Univ. of Dayton (United States)
- 7200 05 **Fluctuations in the instantaneous Stokes parameters of stochastic electromagnetic beams propagating in the turbulent atmosphere** [7200-04]
S. Sahin, O. Korotkova, Univ. of Miami (United States)
- 7200 06 **Average received intensity for optical beam of arbitrary field profile after propagation in turbulent atmosphere** [7200-05]
Ç. Arpalı, Y. Baykal, Çankaya Univ. (Turkey)

SESSION 2 CHARACTERIZATION AND MODELING OF TURBULENCE AND GENERAL ASPECTS OF EM WAVE PROPAGATION IN THE ATMOSPHERE

- 7200 07 **Remarks on polarimetric-radiative transfer of the atmosphere involving ground reflections** [7200-07]
S. Mudaliar, Air Force Research Lab. (United States)
- 7200 0A **Cirrus cloud diagnosis using numerical weather-prediction model and a comparison with observations** [7200-10]
A. Mahalov, Arizona State Univ. (United States); R. Lefevre, ATK Mission Research and Technical Services (United States); S. Cocks, Kirtland AFB (United States)
- 7200 0B **Estimation of the measurement error of coordinates of a tracking object in the atmosphere under joint effect of thermal blooming and turbulence** [7200-27]
G. A. Filimonov, V. V. Dudorov, V. V. Kolosov, Institute of Atmospheric Optics (Russian Federation)

SESSION 3 BEAM PROPAGATION IN THE ATMOSPHERE: SIMULATIONS AND EXPERIMENTS

- 7200 0C **A brief review of spatially partially coherent beams for FSO communications (Invited Paper)** [7200-11]
D. Voelz, X. Xiao, New Mexico State Univ. (United States)
- 7200 0D **Analysis and simulation of a fiber bundle method for creating a partially spatially coherent beam** [7200-12]
X. Xiao, J. Aluguri, D. Voelz, New Mexico State Univ. (United States)

- 7200 OG **Production and propagation of a modulated optical vortex through atmospheric turbulence** [7200-15]
R. K. Tyson, M. Scipioni, G. Gbur, The Univ. of North Carolina at Charlotte (United States);
J. Viegas, INESC Porto (Portugal)

SESSION 4 MITIGATION OF ATMOSPHERIC EFFECTS IN LASERCOM AND LASER RADAR SYSTEMS

- 7200 OH **Suppression of scintillations and beam wandering in free space gigabit rate optical communication based on spectral encoding of a partially coherent beam (Invited Paper)** [7200-16]
G. P. Berman, A. R. Bishop, B. M. Chernobrod, Los Alamos National Lab. (United States);
A. A. Chumak, V. N. Gorshkov, Los Alamos National Lab. (United States) and Institute of
Physics (Ukraine)
- 7200 OI **Integrated approach to free-space optical communication (Invited Paper)** [7200-17]
J. D. Schmidt, J. A. Louthain, Air Force Institute of Technology (United States)
- 7200 OJ **Mitigation of atmospheric effects by adaptive optics for free-space optical communications** [7200-18]
N. H. Schwartz, N. Védrenne, V. Michau, M.-T. Velluet, ONERA (France); F. Chazallet,
Shaktiware (France)
- 7200 OK **Wave optics simulation study of multiple Gaussian beam transmitters for free space optical transmission through turbulence** [7200-19]
X. Xiao, J. Aluguri, D. Voelz, New Mexico State Univ. (United States)

POSTER SESSION

- 7200 OQ **Speckle-field simulator characterization** [7200-24]
J. Cordray, Ladar and Optical Communications Institute (United States); E. Watson, Air Force
Research Lab. (United States); I. Anisimov, Ladar and Optical Communications Institute
(United States); O. Korotkova, Univ. of Miami (United States)

Author Index

Conference Committee

Symposium Chairs

Donald J. Harter, IMRA America, Inc. (United States)
Peter R. Herman, University of Toronto (Canada)

Symposium Cochairs

Henry Helvajian, The Aerospace Corporation (United States)
Friedrich G. Bachmann, ROFIN-SINAR Laser GmbH (Germany)

Conference Chair

Olga Korotkova, University of Miami (United States)

Program Committee

Larry C. Andrews, University of Central Florida (United States)
Yahya K. Baykal, Çankaya University (Turkey)
Aristide C. Dogariu, College of Optics & Photonics/University of Central Florida (United States)
Frank D. Eaton, Air Force Research Laboratory (United States)
Greg Gbur, The University of North Carolina at Charlotte (United States)
Alex S. Mahalov, Arizona State University (United States)
Ronald L. Phillips, University of Central Florida (United States)
Jixiong Pu, Hua Qiao University (China)
Robert K. Tyson, The University of North Carolina at Charlotte (United States)
Daomu Zhao, Zhejiang University (China)

Session Chairs

- 1 Beam Propagation in the Atmosphere: Theory
Olga Korotkova, University of Miami (United States)
- 2 Characterization and Modeling of Turbulence and General Aspects of EM Wave Propagation in the Atmosphere
Olga Korotkova, University of Miami (United States)
- 3 Beam Propagation in the Atmosphere: Simulations and Experiments
Olga Korotkova, University of Miami (United States)
- 4 Mitigation of Atmospheric Effects in Lasercom and Laser Radar Systems
Olga Korotkova, University of Miami (United States)
