Volume 7217

Proceedings of SPIE, 0277-786X, v. 7217

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v	Conference Committee
vii	Introduction

ZNO NANO BASED DEVICES I

7217 07	Low operation voltage UV-light emitting device based on ZnO nanoparticles [7217-06] E. Neshataeva, T. Kuemmel, Univ. Duisburg-Essen (Germany); A. Ebberts, Evonik Degussa GmbH (Germany); G. Bacher, Univ. Duisburg-Essen (Germany)
7217 08	Fabrication of nanostructured heterojunction LEDs using self-forming moth eye type arrays of n-ZnO nanocones grown on p-si (111) substrates by pulsed laser deposition [7217-07] D. J. Rogers, Nanovation SARL (France); V. E. Sandana, Nanovation SARL (France), Northwestern Univ. (United States), and École Polytechnique (France); F. Hosseini Teherani, Nanovation SARL (France); M. Razeghi, Northwestern Univ. (United States); H.-J. Drouhin, École Polytechnique (France)

ZNO PROPERTIES

7217 0B	Zinc oxide and related compounds: order within the disorder (Invited Paper) [7217-10] R. Martins, L. Pereira, P. Barquinha, I. Ferreira, R. Prabakaran, G. Gonçalves, A. Gonçalves, E. Fortunato, New Univ. of Lisbon (Portugal)
---------	--

ZNO SUBSTRATES AND DEVICES PREPARATION

7217 0F	Characterization of ZnO thin films grown on c-sapphire by pulsed laser deposition as templates for regrowth of ZnO by metal organic chemical vapor deposition [7217-14] D. J. Rogers, F. Hosseini Teherani, Nanovation SARL (France); C. Sartet, V. Sallet, F. Jomard, P. Galtier, GEMAC, CNRS, Univ. de Versailles St. Quentin (France); M. Razeghi, Northwestern Univ. (United States)
---------	--

ZNO NANO BASED DEVICES II

7217 0I	Electrochemical growth of ZnO nanocolumn arrays and ZnO mesoporous films [7217-17] T. Pauporté, Lab. d'Électrochimie et Chimie Analytique, ENSCP, Univ. Paris 6 (France)
---------	--

ZNO THIN FILMS AND DEVICES PREPARATION

7217 0K	Paper field effect transistor (Invited Paper) [7217-19] E. Fortunato, N. Correia, P. Barquinha, New Univ. of Lisbon (Portugal); C. Costa, New Univ. of Lisbon (Portugal) and YDreams (Portugal); L. Pereira, G. Gonçalves, R. Martins, New Univ. of Lisbon (Portugal)
---------	---

ZNO HOMOEPITAXY AND THIN FILMS DEVICES

- 7217 ON **MgZnO:P homoepitaxy by pulsed laser deposition: pseudomorphic layer-by-layer growth and high electron mobility (Invited Paper)** [7217-23]
M. Lorenz, M. Brandt, G. Wagner, H. Hochmuth, G. Zimmermann, H. von Wenckstern, M. Grundmann, Univ. Leipzig (Germany)
- 7217 OP **Hybrid green LEDs based on n-ZnO/(InGaN/GaN) multi-quantum-wells/p-GaN** [7217-26]
C. Bayram, Northwestern Univ. (United States); F. Hosseini Teherani, D. J. Rogers, Nanovation SARL (France); M. Razeghi, Northwestern Univ. (United States)

ZNO DOPING AND DEVICES PREPARATION

- 7217 OQ **ICP etching of ZnO in BCl₃/SF₆ gas mixtures (Invited Paper)** [7217-22]
K. J. Nordheden, B. A. Pathak, J. L. Alexander, The Univ. of Kansas (United States)

POSTER SESSION

- 7217 OV **Properties of organic-inorganic hybrid thin film transistors with ZnO active layer on PES substrates** [7217-29]
S. C. Gong, B. C. Yoo, I. S. Shin, Dankook Univ. (Korea, Republic of); H. Jeon, Hanyang Univ. (Korea, Republic of); H.-H. Park, Yonsei Univ. (Korea, Republic of); H. J. Chang, Dankook Univ. (Korea, Republic of)
- 7217 OW **Characteristics of ZnO thin films modified by various additives** [7217-30]
J. J. Joo, Y. H. Kim, Univ. of Suwon (Korea, Republic of); D. S. Paik, Korea Univ. (Korea, Republic of); D. H. Kang, Univ. of Suwon (Korea, Republic of)
- 7217 OX **Effect of thermal annealing on Cu-related green luminescence in ZnO** [7217-31]
V. Avrutin, M. A. Reshchikov, N. Izyumskaya, R. Shimada, Virginia Commonwealth Univ. (United States); S. W. Novak, Evans Analytical Group (United States); H. Morkoç, Virginia Commonwealth Univ. (United States)

Conference Committee

Symposium Chair

James G. Grote, Air Force Research Laboratory (United States)

Symposium Cochair

E. Fred Schubert, Rensselaer Polytechnic Institute (United States)

Program Track Chair

James G. Grote, Air Force Research Laboratory (United States)

Conference Chairs

Ferechteh Hosseini Teherani, Nanovation SARL (France)

Cole W. Litton, Air Force Research Laboratory, Retired (United States)

David J. Rogers, Nanovation SARL (France)

Program Committee

Emilio Bellingeri, Consiglio Nazionale delle Ricerche (Italy)

Jean-Jacques Delaunay, The University of Tokyo (Japan)

Elvira M. C. Fortunato, Universidade Nova de Lisboa (Portugal)

Hiroshi Fujioka, The University of Tokyo (Japan)

Fritz Henneberger, Humboldt-Universität zu Berlin (Germany)

Masashi Kawasaki, Tohoku University (Japan)

Jianlin Liu, University of California, Riverside (United States)

David C. Look, Wright State University (United States)

Rodrigo Ferrão de Paiva Martins, UNINOVA/CEMOP (Portugal)

Tatsuo Okada, Kyushu University (Japan)

Thierry Pauporté, Ecole Nationale Supérieure de Chimie de Paris
(France)

Manijeh Razeghi, Northwestern University (United States)

Donald J. Silversmith, Air Force Office of Scientific Research (United
States)

Jin-Joo Song, University of California, San Diego (United States)

Severin Waldis, Carl Zeiss AG (Germany)

Zhonglin L. Wang, Georgia Institute of Technology (United States)

Session Chairs

ZnO Emitting Devices

Naoki Ohashi, National Institute for Materials Science (Japan)

David C. Look, Wright State University (United States)

ZnO Nano Based Devices I

Jianlin Liu, University of California, Riverside (United States)

Cole W. Litton, Air Force Research Laboratory, Retired (United States)

ZnO Properties

Axel G. Hoffmann, Technische Universität Berlin (Germany)

Elvira M. C. Fortunato, Universidade Nova de Lisboa (Portugal)

ZnO Substrates and Devices Preparation

Masashi Kawasaki, Tohoku University (Japan)

David J. Rogers, Nanovation SARL (France)

ZnO Nano Based Devices II

Jose Luis Pau Vizcaino, Northwestern University (United States)

Michael Lorenz, Universität Leipzig (Germany)

ZnO Thin Films and Devices Preparation

Rodrigo Ferrão de Paiva Martins, UNINOVA/CEMOP (Portugal)

Karen J. Nordheden, The University of Kansas (United States)

ZnO Homoepitaxy and Thin Films Devices

Jean-Jacques Delaunay, The University of Tokyo (Japan)

David J. Rogers, Nanovation SARL (France)

ZnO Doping and Devices Preparation

David J. Rogers, Nanovation SARL (France)

Emilio Bellingeri, Consiglio Nazionale delle Ricerche (Italy)

Introduction

The year 2008 was a remarkable year for progress in the ZnO field. Over 5000 ZnO-related publications were recorded, including more papers than GaN in Applied Physics Letters and more papers than carbon nanotubes or nano-silicon in Nanoletters. The fourth Zinc Oxide Materials and Devices conference at Photonics West was another resounding success with a quality of results that reflected this extremely high level of research activity. We were treated to a choice selection of excellent contributions from many of the world's leading ZnO groups. Among the numerous highlights, we were able to catch up with the development of novel homojunction UV LEDs, novel hybrid green LEDs, highly efficient ZnO based photovoltaics, the latest breakthroughs in ZnO based transparent electronics and the emergence of a new kind of electronics based on ZnO nanopiezotronics and nanogenerators—to mention but a few! The organisers would like to take this opportunity to say a big thank you to all those who participated and to extend the invitation to join us in 2010, in San Francisco, for the next exciting chapter in the ZnO story...

We, the Chairs of this conference, Ferechteh Teherani, David Rogers, and Cole Litton, would like to extend our sincere thanks to Dr. David Look of Wright State University for his expertise and valuable help in organizing and running his topical conference on ZnO materials and devices.

Ferechteh Hosseini Teherani
