Front Matter: Volume 7224

, "Front Matter: Volume 7224," Proc. SPIE 7224, Quantum Dots, Particles, and Nanoclusters VI, 722401 (12 March 2009); doi: 10.1117/12.828371

SPIE.

Event: SPIE OPTO: Integrated Optoelectronic Devices, 2009, San Jose, California, United States

PROCEEDINGS OF SPIE

Quantum Dots, Particles, and Nanoclusters VI

**Kurt G. Eyink
Frank Szmulowicz
Diana L. Huffaker**
Editors

**25–28 January 2009
San Jose, California, United States**

Sponsored and Published by
SPIE

Volume 7224

Proceedings of SPIE, 0277-786X, v. 7224

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Quantum Dots, Particles, and Nanoclusters VI*, edited by Kurt G. Eyink, Frank Szmulowicz, Diana L. Huffaker, Proceedings of SPIE Vol. 7224 (SPIE, Bellingham, WA, 2009) Article CID Number.

ISSN 0277-786X

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii *Conference Committee*

QUANTUM DOT GROWTH

- 7224 05 **Surface energy effects on the self-assembly of epitaxial quantum dots (Invited Paper)** [7224-04]
L. H. Friedman, The Pennsylvania State Univ. (United States)
- 7224 06 **Three-dimensional InAs/GaAs quantum-dot islands size and density study using kinetic Monte Carlo simulation (Invited Paper)** [7224-05]
M. Sun, E. Pan, Univ. of Akron (United States); P. W. Chung, Army Research Lab. (United States)
- 7224 07 **Selective MOCVD growth of InGaAs/GaAs and InGaAs/InP quantum dots employing diblock copolymer nanopatterning (Invited Paper)** [7224-06]
L. J. Mawst, J. H. Park, M. K. Rathi, T. F. Kuech, Univ. of Wisconsin, Madison (United States); V. B. Verma, J. J. Coleman, Univ. of Illinois at Urbana-Champaign (United States)
- 7224 08 **Morphological change in tip based nano-patterned planar InAs** [7224-07]
K. G. Eyink, Air Force Research Lab. (United States); L. Grazulis, Univ. of Dayton Research Institute (United States); K. Mahalingam, Universal Technology Corp. (United States); J. R. Shoaf, Air Force Research Lab. (United States)
- 7224 09 **Photoluminescence investigation of InAs quantum dots incorporating DWELL structures on patterned and planar GaAs (100) substrate** [7224-08]
B. L. Liang, P. S. Wong, Univ. of California, Los Angeles (United States); B. V. G. Dorogan, Univ. of Arkansas (United States); J. Tatebayashi, Univ. of California, Los Angeles (United States); A. R. Albrecht, H. Xiang, Ctr. for High Technology Materials, Univ. of New Mexico (United States); Yu. I. Mazur, G. J. Salamo, Univ. of Arkansas (United States); S. R. J. Brueck, Ctr. for High Technology Materials, Univ. of New Mexico (United States); D. L. Huffaker, Univ. of California, Los Angeles (United States)
- 7224 0B **InSb quantum dots and quantum rings in a narrow-gap InAsSbP matrix** [7224-10]
K. D. Moiseev, M. P. Mikhailova, Ya. A. Parkhomenko, E. V. Gushchina, S. S. Kizhaev, E. V. Ivanov, N. A. Bert, Yu. P. Yakovlev, A.F. Ioffe Physico-Technical Institute (Russian Federation)

NANOWIRES I

- 7224 0C **Growth kinetics of Si and Ge nanowires (Invited Paper)** [7224-11]
S. Kodambaka, Univ. of California, Los Angeles (United States); J. Tersoff, M. C. Reuter, F. M. Ross, IBM Thomas J. Watson Research Ctr. (United States)

- 7224 0E   **Heterostructures in GaP-based free-standing nanowires on Si substrates (Invited Paper)**
[7224-13]

K. Tateno, G. Zhang, H. Nakano, NTT Basic Research Labs. (Japan)

NANOWIRES II

- 7224 0G   **Electrical and optical characterization of individual GaSb nanowires (Invited Paper)**
[7224-16]

W. Xu, Arizona State Univ. (United States); A. Chin, L. Ye, NASA Ames Research Ctr. (United States); C.-Z. Ning, Arizona State Univ. (United States) and NASA Ames Research Ctr. (United States); H. Yu, Arizona State Univ. (United States)

CQD II

- 7224 0L   **Engineered nanostructures exhibiting enhanced optical nonlinearity (Invited Paper)**
[7224-19]

M. J. Potasek, Simphotek, Inc. (United States)

NANODEVICES

- 7224 0P   **Quantum dot insertions in VCSELs from 840 to 1300 nm: growth, characterization, and device performance (Invited Paper)** [7224-23]

N. N. Ledentsov, VI Systems GmbH (Germany); J. A. Lott, VI Systems GmbH (Germany) and Technische Univ. Berlin (Germany); V. A. Shchukin, H. Quast, VI Systems GmbH (Germany); F. Hopfer, G. Fiol, A. Mutig, P. Moser, T. Germann, A. Strittmatter, Technische Univ. Berlin (Germany); L. Y. Karachinsky, Abraham F. Ioffe Physical Technical Institute (Russian Federation) and St. Petersburg Physics and Technology Ctr. for Research and Education (Russian Federation); S. A. Blokhin, St. Petersburg Physics and Technology Ctr. for Research and Education (Russian Federation); I. I. Novikov, A. M. Nadtochi, Abraham F. Ioffe Physical Technical Institute (Russian Federation); N. D. Zakharov, P. Werner, Max-Planck-Institut für Mikrostrukturphysik (Germany); D. Bimberg, Technische Univ. Berlin (Germany)

- 7224 0Q   **Photonic emitters and circuits based on colloidal quantum dot composites (Invited Paper)**
[7224-24]

V. M. Menon, S. Husaini, N. Valappil, M. Luberto, Queens College/CUNY (United States)

- 7224 0R   **Spatial hole burning and optical power in a quantum dot laser** [7224-25]

L. Jiang, L. V. Asryan, Virginia Polytechnic Institute and State Univ. (United States)

- 7224 0S   **The spectral analysis and mode structure of ultrabroad InAs/InAlGaAs quantum dash laser**
[7224-26]

C. L. Tan, Y. H. Ding, C. E. Dimas, Lehigh Univ. (United States); H. S. Djie, JDS Uniphase Corp. (United States); Y. Wang, OptiComp Corp. (United States); V. Hongpinyo, C. Chen, B. S. Ooi, Lehigh Univ. (United States)

- 7224 0T   **QD VCSELs with InAs/InGaAs short period superlattice QW injector** [7224-27]

V. Tokranov, M. Yakimov, S. Oktyabrsky, Univ. at Albany/SUNY (United States)

- 7224 0U **A CdSe quantum dot in a ZnSe nanowire as an efficient high-temperature single-photon source** [7224-28]
T. Aichele, CEA, CNRS, Univ. Joseph Fourier (France) and Institut für Physik, Humboldt-Univ. zu Berlin (Germany); A. Tribu, G. Sallen, C. Bougerol, R. André, J. Bocquel, E. Bellet-Almeric, F. Donatini, L. S. Dang, J.-P. Poizat, K. Kheng, S. Tatarenko, CEA, CNRS, Univ. Joseph Fourier (France)
- 7224 0V **Quantum dot in a well infrared photodetectors for high operating temperature focal plane arrays** [7224-29]
S. Tsao, T. Yamanaka, S. Abdollahi Pour, I.-K. Park, B. Movaghar, M. Razeghi, Northwestern Univ. (United States)
- 7224 0W **A voltage-tunable multi-spectral 320x256 InAs/GaAs quantum-dot infrared focal plane array (FPA)** [7224-30]
J. Vaillancourt, P. Vasinajindakaw, X. Lu, Univ. of Massachusetts, Lowell (United States)

POSTER SESSION

- 7224 0X **Generation of identical photons using an electrically driven single-photon source** [7224-31]
R. B. Patel, Cambridge Univ. (United Kingdom) and Toshiba Research Europe Ltd. (United Kingdom); A. J. Bennett, Toshiba Research Europe Ltd. (United Kingdom); K. Cooper, P. Atkinson, C. A. Nicoll, D. A. Ritchie, Cambridge Univ. (United Kingdom); A. J. Shields, Toshiba Research Europe Ltd. (United Kingdom)
- 7224 0Z **One-pot overgrowth of gold nanorods: a spectroscopic investigation** [7224-33]
F. Ratto, P. Matteini, F. Rossi, R. Pini, Istituto di Fisica Applicata, CNR (Italy)
- 7224 10 **One-photon spectra of CdSe quantum dots calculated using time-dependent density functional theory** [7224-34]
K. A. Nguyen, Air Force Research Lab. (United States) and UES, Inc. (United States); P. N. Day, Air Force Research Lab. (United States) and General Dynamics Information Technology, Inc. (United States); R. V. Belosludov, Y. Kawazoe, Tohoku Univ. (Japan); R. Pachter, Air Force Research Lab. (United States)
- 7224 11 **Near-field distribution of localized SP coupling in isolated and collective metal nanoparticle arrays** [7224-35]
C.-H. Huang, H.-Y. Lin, C.-H. Chang, H.-C. Chui, National Cheng Kung Univ. (Taiwan)
- 7224 12 **The phase distribution of near-field optical enhancement in a metal nanoparticle** [7224-36]
H.-Y. Lin, C.-H. Chang, C.-H. Huang, H.-C. Chui, National Cheng Kung Univ. (Taiwan)
- 7224 13 **A passive mode-locked InAs/InP quantum dot laser with pulse duration of less than 300 fs** [7224-37]
Z. G. Lu, J. R. Liu, P. J. Poole, P. J. Barrios, D. Poitras, S. Raymond, G. Pakulski, National Research Council Canada (Canada)

- 7224 14   **Fabrication of metallic nanodot structures using focused ion beam (FIB) and electron beam-induced deposition for plasmonic waveguides** [7224-38]
A. Dhawan, M. Gerhold, U.S. Army Research Office (United States) and Fitzpatrick Institute for Photonics, Duke Univ. (United States); P. Russell, Appalachian State Univ. (United States); T. Vo-Dinh, Fitzpatrick Institute for Photonics, Duke Univ. (United States); D. Leonard, Appalachian State Univ. (United States)
- 7224 15   **Single-mode light source fabrication based on colloidal quantum dots** [7224-39]
J. Xu, New Span Opto-Technology Inc. (United States); B. Chen, S. Baig, M. R. Wang, Univ. of Miami (United States)
- 7224 17   **Effect of silver nanoisland-embedded grating for surface plasmon based total internal reflection fluorescence imaging** [7224-41]
K. Kim, D. J. Kim, D. Kim, Yonsei Univ. (Korea, Republic of)
- 7224 18   **Modeling the optical properties of small gold nanoclusters using time-dependent density functional theory** [7224-42]
P. N. Day, Air Force Research Lab. (United States) and General Dynamics Information Technology, Inc. (United States); K. A. Nguyen, Air Force Research Lab. (United States) and UES, Inc. (United States); R. Pachter, Air Force Research Lab. (United States)

Author Index

Conference Committee

Symposium Chair

James G. Grote, Air Force Research Laboratory (United States)

Symposium Cochair

E. Fred Schubert, Rensselaer Polytechnic Institute (United States)

Program Track Chair

Ali Adibi, Georgia Institute of Technology (United States)

Conference Chairs

Kurt G. Eyink, Air Force Research Laboratory (United States)

Frank Szmulowicz, University of Dayton Research Institute (United States)

Diana L. Huffaker, University of California, Los Angeles (United States)

Program Committee

Pallab K. Bhattacharya, University of Michigan (United States)

C. Jeffrey Brinker, Sandia National Laboratory (United States)

Dennis G. Deppe, The University of Texas at Austin (United States)

Alfred W. B. Forchel, Universität Würzburg (Germany)

L. Jay Guo, University of Michigan (United States)

Axel G. Hoffmann, Technische Universität Berlin (Germany)

Yong-Hee Lee, Korea Advanced Institute of Science and Technology (Korea, Republic of)

Luke F. Lester, The University of New Mexico (United States)

James A. Lott, Technische Universität Berlin (United States)

Manijeh Razeghi, Northwestern University (United States)

Kevin L. Silverman, National Institute of Standards and Technology (United States)

Jian Xu, The Pennsylvania State University (United States)

Session Chairs

1 CQD I
Jian Xu, The Pennsylvania State University (United States)

2 Quantum Dot Growth
Lawrence H. Friedman, The Pennsylvania State University (United States)

- 3   Nanowires I
      Diana L. Huffaker, University of California, Los Angeles (United States)
- 4   Nanowires II
      Diana L. Huffaker, University of California, Los Angeles (United States)
- 5   CQD II
      Michael D. Gerhold, U.S. Army Research Office (United States)
- 6   Nanodevices
      James A. Loff, VI Systems GmbH (Germany)
