Volume 7232

Proceedings of SPIE, 0277-786X, v. 7232

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Committee
ix	Introduction

SESSION 1 FLEXIBLE AND e-PAPER DISPLAYS

- 7232 02 **Current progress and technical challenges of flexible liquid crystal displays (Invited Paper)** [7232-01]
H. Fujikake, H. Sato, NHK Science and Technical Research Labs. (Japan)
- 7232 03 **Novel flexible Reflex displays (Invited Paper)** [7232-02]
E. Montbach, D. J. Davis, A. Khan, T. Schneider, D. Marhefka, O. Pishnyak, T. Ernst, N. Miller, J. W. Doane, Kent Displays, Inc. (United States)
- 7232 04 **Fast-switching electro-optical films based on polymer encapsulated liquid crystal, carbon nanotube, and dye (Invited Paper)** [7232-03]
L. Lu, S.-Y. Lu, L.-C. Chien, Kent State Univ. (United States)

SESSION 2 NOVEL MATERIALS AND EFFECTS

- 7232 05 **Blue phases come of age: a review (Invited Paper)** [7232-04]
H.-S. Kitzerow, Univ. of Paderborn (Germany)
- 7232 06 **Effects of dielectric relaxation in electrooptics of nematic cells (Invited Paper)** [7232-05]
O. D. Lavrentovich, H. A. Wonderly, M. Gu, S. V. Shiyankovskii, Kent State Univ. (United States)

SESSION 3 HOLOGRAPHY

- 7232 07 **Two-dimensional holographic polarization grating formed on azo-dye-doped PVA films (Invited Paper)** [7232-07]
A. Y.-G. Fuh, W. Y. Wu, M. S. Li, H. C. Lin, National Cheng Kung Univ. (Taiwan)
- 7232 08 **Non-contact optical control of multiple particles and defects using holographic optical trapping with phase-only liquid crystal spatial light modulator (Invited Paper)** [7232-08]
S. Anand, Univ. of Colorado at Boulder (United States) and Amity Univ. (India); R. P. Trivedi, G. Stockdale, I. I. Smalyukh, Univ. of Colorado at Boulder (United States)
- 7232 09 **Photoresponsive behavior of azotolane liquid crystals** [7232-09]
K. Okano, T. Ikeda, Tokyo Institute of Technology (Japan)

SESSION 4 POLYMER AND LIQUID CRYSTAL COMPOSITES	
7232 0B	Photorefractive effect of polymer-stabilized ferroelectric liquid crystals (Invited Paper) [7232-11] T. Sasaki, A. Katsuragi, H. Hazato, Y. Nakazawa, Tokyo Univ. of Science (Japan)
7232 0C	Synthesis and characterization of pitch tunable cholesteric liquid crystalline polymers (Invited Paper) [7232-12] J.-H. Liu, F.-M. Hsieh, National Cheng Kung Univ. (Taiwan)
SESSION 5 DISPLAY MATERIALS AND BACK LIGHT UNITS	
7232 0E	Molecular dynamics simulation of the liquid crystalline semiconductor: 8-TTP-8 (Invited Paper) [7232-13] M. Yoneya, Nanotechnology Research Institute, Advanced Industrial Science and Technology (Japan) and Japan Science and Technology Agency (Japan); M. Funahashi, The Univ. of Tokyo (Japan); H. Yokoyama, Nanotechnology Research Institute, Advanced Industrial Science and Technology (Japan) and Japan Science and Technology Agency (Japan)
7232 0F	Novel bonding technologies for flexible LCDs with mechanical stability under the pressing and bending deformation (Invited Paper) [7232-14] K.-S. Bae, B.-S. Ban, J.-H. Kim, Hanyang Univ. (Korea, Republic of)
7232 0G	An innovative color LCD using three color bank scrolling backlights [7232-15] J.-C. Wang, J.-L. Lin, National Taipei Univ. of Technology (Taiwan)
SESSION 6 LASERS	
7232 0K	Lasing of pyrromethene 597 in 2D holographic polymer dispersed liquid crystals: influence of columnar conformation (Invited Paper) [7232-19] R. Jakubiak, Air Force Research Lab. (United States); V. P. Tondiglia, L. V. Natarajan, Air Force Research Lab. (United States) and Science Applications International Corp. (United States); P. F. Lloyd, Air Force Research Lab. (United States) and UES, Inc. (United States); R. Sutherland, Air Force Research Lab. (United States) and Science Applications International Corp. (United States); R. A. Vaia, T. J. Bunning, Air Force Research Lab. (United States)
7232 0L	Multi-wavelength cholesteric liquid crystal laser (Invited Paper) [7232-20] C.-T. Wang, T.-H. Lin, National Sun Yat-Sen Univ. (Taiwan)
SESSION 7 OPTICAL FILMS AND LENSES	
7232 0M	Low-cost PRINT manufacturing of patterned films with nano-precision (Invited Paper) [7232-21] G. Rothrock, D. Mar, X. Meng, Z. Zhou, Liquidia Technologies (United States)
7232 0N	Liquid crystal quantized GRIN lens and its application to AF systems [7232-22] N. Hashimoto, M. Kurihara, Citizen Holdings Co., Ltd. (Japan)

SESSION 8 SWITCHES AND FILTERS

- 7232 0P **Liquid crystal applications in photonics (Invited Paper)** [7232-24]
V. G. Chigrinov, Hong Kong Univ. of Science and Technology (Hong Kong, China)
- 7232 0Q **Security applications of liquid crystal film with plural latent images (Invited Paper)** [7232-25]
R. Yamaguchi, Akita Univ. (Japan)
- 7232 0S **Ray-tracing simulations and applications of liquid crystal beam control devices** [7232-27]
M. Sluijter, D. K. G. de Boer, Philips Research Europe (Netherlands); H. P. Urbach, Delft Univ. of Technology (Netherlands); J. Strömer, G. Cennini, Philips Research Europe (Netherlands)

SESSION 9 NOVEL TECHNOLOGY FOR PROJECTION DISPLAYS

- 7232 0T **Opportunities for new era projectors** [7232-28]
W. L. Cogshall, Pacific Media Associates (United States)
- 7232 0U **Parabolic transition region curve for a wedge projection display** [7232-29]
K. W. Chen, A. Travis, S. Y. Tan, T. Wilkinson, Cambridge Univ. (United Kingdom)
- 7232 0V **A new type of holographic display based on a wedge-shaped waveguide and its keystone predistortion** [7232-30]
S. Tan, K. W. Chen, A. Travis, T. Wilkinson, Cambridge Univ. (United Kingdom)

SESSION 10 ADVANCED LIGHT SOURCE, LASER PROJECTION, AND RELATED TECHNOLOGIES

- 7232 0W **Laser speckle contrast reduction measurement using diffractive diffusers** [7232-32]
W. Thomas, C. Middlebrook, Michigan Technological Univ. (United States); J. Smith, MEMS Optical (United States)
- 7232 0X **Double side lenslet array for illumination optics of laser projector** [7232-33]
P.-C. Chen, C.-C. Chen, P.-H. Yao, C.-H. Chen, National Tsing Hua Univ. (Taiwan)
- 7232 0Y **Future prospects of high-end laser projectors** [7232-34]
P. Janssens, K. Malfait, Barco Technology Ctr. (Belgium)

POSTER SESSION

- 7232 0Z **Effect of pendant chiral groups on the induction of cholesteric liquid crystalline phases** [7232-35]
J.-H. Liu, F.-M. Hsieh, National Cheng Kung Univ. (Taiwan)
- 7232 11 **Development of luminaires using high power color LEDs and application to lighting system for color hologram** [7232-37]
M. Wakaki, T. Shibuya, J. Baba, Tokai Univ. (Japan); H. Asakawa, Marumo Electric Co., Ltd. (Japan)
- 7232 12 **Phase optimization for phase contrast projection display** [7232-38]
M.-L. Piao, J.-H. Park, N. Kim, H.-S. Kang, Chungbuk National Univ. (Korea, Republic of)

Author Index

Conference Committee

Symposium Chair

James G. Grote, Air Force Research Laboratory (United States)

Symposium Cochair

E. Fred Schubert, Rensselaer Polytechnic Institute (United States)

Program Track Chair

Liang-Chy Chien, Kent State University (United States)

Conference Chair

Liang-Chy Chien, Kent State University (United States)

Conference Cochair

Ming Hsien Wu, Hamamatsu Corporation (United States)

Program Committee

Dick J. Broer, Technische Universiteit Eindhoven (Netherlands)

Vladimir G. Chigrinov, Hong Kong University of Science and
Technology (Hong Kong China)

Harry James Coles, University of Cambridge (United Kingdom)

Gregory P. Crawford, University of Notre Dame (United States)

Andy Y. Fuh, National Cheng Kung University (Taiwan)

Otto Wolfgang Haase, Technische Universität Darmstadt (Germany)

Jun-ichi Hanna, Tokyo Institute of Technology (Japan)

Heinz-Siegfried Kitzerow, Universität Paderborn (Germany)

Shunsuke Kobayashi, Tokyo University of Science (Japan)

Seung Hee Lee, Chonbuk National University (Korea, Republic of)

Akihiro Mochizuki, Nano Loa, Inc. (United States)

Ci-Ling Pan, National Chiao Tung University (Taiwan)

Richard L. Sutherland, Science Applications International Corporation
(United States)

Shin-Tson Wu, College of Optics & Photonics, University of Central
Florida (United States)

Session Chairs

- 1 Flexible and e-Paper Displays
Liang-Chy Chien, Kent State University (United States)
- 2 Novel Materials and Effects
Ivan I. Smalyukh, University of Colorado at Boulder (United States)
- 3 Holography
Harry James Coles, University of Cambridge (United Kingdom)
- 4 Polymer and Liquid Crystal Composites
Heinz-Siegfried Kitzerow, Universität Paderborn (Germany)
- 5 Display Materials and Back Light Units
Jun-ichi Hanna, Tokyo Institute of Technology (Japan)
- 6 Lasers
Andy Y. Fuh, National Cheng Kung University (Taiwan)
- 7 Optical Films and Lenses
Vladimir G. Chigrinov, Hong Kong University of Science and Technology (Hong Kong, China)
- 8 Switches and Filters
Masanori Ozaki, Osaka University (Japan)
- 9 Novel Technology for Projection Displays
Vladimir G. Chigrinov, Hong Kong University of Science and Technology (Hong Kong, China)
- 10 Advanced Light Source, Laser Projection, and Related Technologies
Ming Hsien Wu, Hamamatsu Corporation (United States)

Introduction

The Photonics West 2009 conference on Emerging Liquid Crystal Technologies IV addressed current issues in liquid crystal materials, displays, devices, and applications. The scope of the conference was extremely broad, including the latest electro-optical liquid crystal and composite materials and effects, optical films, display materials, backlights, flexible and e-paper displays, and projection displays. Furthermore, cutting-edge research on liquid crystals in photonic systems such as lasers, lens, switches, and filters represents a unique feature of the conference.

This conference provides a platform for leading principle investigators to present their unpublished or latest important results in a broad spectrum with enlightening discussions and an exchange of ideas on issues still in debate. The conference is particularly programmed and scheduled with ample time for presentation and discussion, as well as poster presentations. Invited speakers representing both academia and industry are from a wide range of disciplines including materials science, chemistry, physics, and engineering. In addition, the group of participants also includes a good number of contributed oral presentations and poster papers, which fosters the excitement of brain storming.
