Volume 7291

Proceedings of SPIE, 0277-786X, v. 7291

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

- vii *Symposium Committee*
- ix *Conference Committee*
- xi *Introduction*
- xiii *Paleoerodynamic exploration of the evolution of nature's flyers and man's aircraft and options for future technology innovations (Plenary Paper) [7288-104]**
B. M. Kulfan, The Boeing Co. (United States)

**This is an abridged version of Brenda Kulfan's plenary paper. A full-length version, including figures, is published in volume 7288. The CID number is 728803.*

KEYNOTE PRESENTATION

- 7291 02 **Nano-based chemical sensor array systems for uninhabited ground and airborne vehicles** [7291-01]
C. Brantley, P. B. Ruffin, E. Edwards, U.S. Army Research, Development, and Engineering Command (United States)

NANOMATERIALS

- 7291 03 **Tubular nanostructured materials for bioapplications** [7291-02]
J. Xie, L. Chen, Univ. of Arkansas (United States); M. Srivatsan, Arkansas State Univ. (United States); V. K. Varadan, Univ. of Arkansas (United States)
- 7291 04 **Europium doped Gd₂O₃ and FeCo nanoparticles for biomedical application (Invited Paper)** [7291-03]
K. Zhang, T. Holloway, M. Bahoura, A. K. Pradhan, R. Prabakaran, J. Pradhan, S. Smith, J. C. Hall, G. T. Ramesh, Norfolk State Univ. (United States); D. R. Sahu, J.-L. Huang, National Cheng Kung Univ. (Taiwan)

KEYNOTE PRESENTATION

- 7291 06 **Wireless nanosensors and systems (WiNS)** [7291-05]
G. McClure, Arkansas Science and Technology (United States); V. K. Varadan, Univ. of Arkansas (United States)

NANOWIRE, NANOTUBES, AND NANOSTRUCTURES

- 7291 07 **New materials for old problems: What can nanomaterials do for biology and neuroscience?** [7291-06]
M. Srivatsan, M. P. Badanavalu, J. Yancey, Arkansas State Univ. (United States); J. Xie, L. Chen, P. T. Hankins, H. Yoon, V. K. Varadan, Univ. of Arkansas (United States)

- 7291 08 **Magnetic nanoparticles and nanotubes for biomedical applications** [7291-07]
L. Chen, J. Xie, Univ. of Arkansas (United States); J. Yancey, M. Srivatsan, Arkansas State Univ. (United States); V. K. Varadan, Univ. of Arkansas (United States)
- 7291 09 **Design and fabrication of nanowire electrodes on a flexible substrate for detection of myocardial ischemia** [7291-08]
V. Ramachandran, H. Yoon, V. K. Varadan, Univ. of Arkansas (United States)

NANO DEVICES I

- 7291 0A **Nanodevices for biosensing applications** [7291-09]
H. Yoon, D. C. Deshpande, V. Ramachandran, P. T. Hankins, V. K. Varadan, Univ. of Arkansas (United States)
- 7291 0B **Implantable blood pressure sensor for analyzing elasticity in arteries** [7291-10]
M. Franco-Ayala, F. Martínez-Piñón, Ctr. de Investigación e Innovación Tecnológica (Mexico); A. Reyes-Barranca, Ctr. de Investigación y Estudios Avanzados (Mexico); S. Sánchez de la Peña, Escuela Nacional de Medicina y Homeopatía (Mexico); J. A. Álvarez-Chavez, Ctr. de Investigación e Innovación Tecnológica (Mexico)
- 7291 0D **Droplet interface bilayer characteristics formed over a synthetic porous substrate** [7291-12]
M. A. Creasy, D. J. Leo, Virginia Polytechnic Institute and State Univ. (United States)
- 7291 0E **High quality factor integrated passive devices for microwave and millimeter wave applications** [7291-13]
T. Vähä-Heikkilä, VTT Technical Research Ctr. of Finland (Finland)

NANO DEVICES II

- 7291 0G **Wireless integration, design, modeling, and analysis of nanosensors, networks, and systems: a systems engineering approach** [7291-15]
S. Mohan, H. M. Al-Rizzo, R. Babiceanu, T. Elwi, R. Ghimire, G. Huang, D. Rucker, R. Seker, F. Song, Univ. of Arkansas at Little Rock (United States); V. Varadan, Univ. of Arkansas (United States); S. Vimalathithan, M. Al, K. Yoshigoe, Univ. of Arkansas at Little Rock (United States)

ORGANIC ELECTRONICS AND NANODEVICES

- 7291 0H **Characterization for organic ion-sensitive field effect transistor response for measurement of physiological potassium ion-concentration measurement** [7291-16]
P. Rai, S. Jung, T. Ji, V. K. Varadan, Univ. of Arkansas (United States)
- 7291 0I **Transient behavior of integrated carbon nanotube field effect transistor circuits and bio-sensing applications** [7291-17]
Y. Xu, A. Srivastava, Louisiana State Univ. (United States)
- 7291 0J **Transport mechanisms in polymer and TiO₂ Schottky diode** [7291-18]
K. H. Yoo, K. S. Kang, Y. Chen, K. J. Han, J. Kim, Inha Univ. (Korea, Republic of)

KEYNOTE PRESENTATION

- 7291 OL **Nano-bio quantum technology for device-specific materials** [7291-20]
S. H. Choi, NASA Langley Research Ctr. (United States)

SENSORS

- 7291 OM **Transport powder and liquid samples by surface acoustic waves (Invited Paper)** [7291-21]
X. Bao, Y. Bar-Cohen, S. Sherit, M. Badescu, Jet Propulsion Lab. (United States); S. Louyeh, The Pennsylvania State Univ. (United States)
- 7291 ON **Bio/chemical sensors heterogeneously integrated with Si-CMOS circuitry (Invited Paper)** [7291-23]
F. Williams, M. George, O. Yasar, D. Geddis, Norfolk State Univ. (United States); Z. Hao, Old Dominion Univ. (United States)
- 7291 OO **Electrical and magneto-resistance of Co/CNT/Epoxy thin film for strain and magnetic field sensing** [7291-24]
S. V. Anand, Indian Institute of Science (India); R. Isaac, National Institute of Technology Karnataka (India); D. Roy Mahapatra, Indian Institute of Science (India)

SYSTEMS

- 7291 OP **Error compensation algorithm for patient positioning robotics system** [7291-25]
P. V. Murty, West Texas A&M Univ. (United States); I. Talpasanu, Wentworth Institute of Technology (United States); M. A. Roz, Hellenic College (United States)
- 7291 OQ **Effects of annealing temperature on the performance of the Schottky diode fabricated with TiO₂ sol-gel** [7291-26]
Y. Chen, K. H. Yoo, K. S. Kang, J. Kim, Inha Univ. (Korea, Republic of)
- 7291 OR **Design and fabrication of inverted rib waveguide Bragg grating** [7291-27]
C.-S. Huang, W.-C. Wang, Univ. of Washington (United States)
- 7291 OT **Neuroelectronics and modeling of electrical signals for monitoring and control of Parkinson's disease** [7291-38]
R. R. Chintakuntla, J. K. Abraham, V. K. Varadan, Univ. of Arkansas (United States)

SENSORS AND SYSTEMS

- 7291 OU **Chitosan blended bacterial cellulose as a smart material for biomedical application** [7291-29]
Z. Cai, H.-J. Jin, J. Kim, Inha Univ. (Korea, Republic of)
- 7291 OV **Piezoelectric sensor characteristics of electro-active paper** [7291-30]
H. C. Lee, H. S. Kim, Catholic Univ. of Daegu (Korea, Republic of); G. Y. Yun, J. Kim, Inha Univ. (Korea, Republic of)

- 7291 0W **Surface acoustic wave (SAW) device using piezoelectric cellulose EAPap: fabrication and characterization** [7291-31]
J.-H. Kim, G.-Y. Yun, S.-D. Jang, M.-H. Lee, J. Kim, Inha Univ. (Korea, Republic of)

WIRELESS SYSTEM AND NETWORK

- 7291 0X **Wireless power transmission for medical applications (Invited Paper)** [7291-32]
J. Payne, Massachusetts Institute of Technology (United States); K. D. Song, Norfolk State Univ. (United States); S. Y. Yang, J. Kim, Inha Univ. (Korea, Republic of); Y. Park, S. H. Choi, NASA Langley Research Ctr. (United States)
- 7291 0Y **Performance modeling and analysis of consumer classes in large scale systems** [7291-33]
S. Al-Shukri, R. B. Lenin, S. Ramaswamy, Univ. of Arkansas at Little Rock (United States); A. Anand, Politecnico di Torino (Italy); V. L. Narasimhan, East Carolina Univ. (United States); J. Abraham, V. Varadan, Univ. of Arkansas (United States)
- 7291 10 **Analysis and design of ferroelectric-based smart antenna structures** [7291-35]
P. Ramesh, G. N. Washington, The Ohio State Univ. (United States)
- 7291 11 **Wireless nanosensor network system** [7291-36]
S. Oh, H. Kwon, L. Kegley, H. Yoon, V. K. Varadan, Univ. of Arkansas (United States)

POSTER SESSION

- 7291 12 **Low temperature deposition of carbon nanotubes** [7291-37]
K.-N. Kang, Y. Jin, P. K. Ajmera, S. Park, Louisiana State Univ. (United States)

Author Index

Symposium Committee

Symposium Chairs

Alison B. Flatau, University of Maryland, College Park (United States)
George Y. Baaklini, NASA Glenn Research Center (United States)
Donald J. Leo, Virginia Polytechnic Institute and State University (United States)
Kara J. Peters, North Carolina State University (United States)

Executive Committee

Mehdi Ahmadian, Virginia Polytechnic Institute and State University (United States)
Yoseph Bar-Cohen, Jet Propulsion Laboratory (United States)

Introduction

This conference for Nano-, Bio, and Info-Tech Sensors and Systems was held as a part of SPIE's 16th Annual International Symposium on Smart Structures and Materials & Nondestructive Evaluation and Health Monitoring at San Diego, United States, March 8–12, 2009. The purpose of this conference is to address the contemporary and emerging scientific and technological issues that are essential for the development of devices and systems in the frontier fields of Nanotechnology, Biotechnology and Information Technology.

35 presentations representing 6 countries were offered in 8 sessions, aimed at bringing together scientists and engineers from multidisciplinary areas and presenting the most up-to-date status in their selected and focused fields. We wish to convey our sincere thanks to the authors and speakers for their excellent contributions to the program and the archival proceedings containing the full text papers.

We are very grateful to the members of Program Committee and the chairs of the technical sessions for their efforts and contribution to the successful program. We also give thanks to the SPIE staff for their skillful editing job. We would like to express also our sincere thanks to the National Science Foundation for allowing dissemination of Arkansas's Wireless Nanosensors and Systems Center (WiNS) program in this conference. WiNS Center is supported by NSF and Arkansas Science and Technology Authority under the project EPS-0701890 and CFDA #47.080.

Finally, our heartfelt appreciation should go to all of the participants for their effort in helping organize and plan this conference: Their enthusiastic dedication and contributions made this year's meeting a most productive and thought-provoking event.

Vijay K. Varadan
