Proceedings of SPIE, 0277-786X, v. 7293

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

ix	<i>Symposium Committee</i>
xi	<i>Conference Committee</i>
xiii	<i>Introduction</i>
xv	<i>Paleoaerodynamic exploration of the evolution of nature's flyers and man's aircraft and options for future technology innovations (Plenary Paper) [7288-104]*</i> B. M. Kulfan, The Boeing Co. (United States) *This is an abridged version of Brenda Kulfan's plenary paper. A full-length version, including figures, is published in volume 7288. The CID number is 728803.
xxxv	<i>NDE simulations: critical tools in the integration of NDE and SHM (Plenary Paper) [7294-49]</i> R. B. Thompson, Iowa State Univ. (United States)

SESSION 1 FIBER BRAGG GRATING SENSORS I

7293 02	Calibration of fiber Bragg gratings for optical sensing (FIBOS) for an aerospace application (Invited Paper) [7293-01] R. L. Heredero, M. Frovel, H. Laguna, T. Belenguer-Dávila, Instituto Nacional de Técnica Aeroespacial (Spain)
7293 03	FBG spectral sensor networks for damage identification in composites [7293-02] A. Propst, R. Garrett, C. Park, K. Peters, M. Zikry, North Carolina State Univ. (United States)
7293 04	High repetition-rate full-spectrum interrogation of FGB sensors for dynamic measurements in composite laminates [7293-03] W. Kunzler, Z. Zhu, M. Wirthlin, R. Selfridge, S. Schultz, Brigham Young Univ. (United States); A. Propst, K. Peters, M. Zikry, North Carolina State Univ. (United States)

SESSION 2 FIBER BRAGG GRATING SENSORS II

7293 06	Temperature and humidity dependent performance of FBG-strain sensors embedded in carbon/epoxy composites [7293-05] M. Frövel, G. Carrión, C. Gutiérrez, C. Moravec, J. M. Pintado, Instituto Nacional de Técnica Aeroespacial (Spain)
7293 07	Application of the embedded optical fiber Bragg grating sensors in curing monitoring of Gr/epoxy laminated composites [7293-06] L. Tsai, T.-C. Cheng, National Kaohsiung Univ. of Applied Sciences (Taiwan); C.-L. Lin, Central Taiwan Univ. of Science and Technology (Taiwan); C.-C. Chiang, National Kaohsiung Univ. of Applied Sciences (Taiwan)

- 7293 08 **Smart FBG-based steel tie rod with self-monitoring functionality** [7293-07]
J. He, Harbin Institute of Technology (China); Z. Zhou, Harbin Institute of Technology (China) and Missouri Univ. of Science and Technology (United States); G. Chen, Missouri Univ. of Science and Technology (United States); J. Ou, Harbin Institute of Technology (China) and Dalian Univ. of Technology (China)

SESSION 3 FIBER BRAGG GRATING SENSOR APPLICATIONS

- 7293 0A **Fiber Bragg grating optochemical sensor basing on evanescent-field interaction with surface plasmon waves** [7293-09]
W. Ecke, K. Schroeder, IPHT Jena (Germany)
- 7293 0B **Measurement accuracy improvement of Brillouin signal using wavelet denoising method** [7293-46]
J. He, Harbin Institute of Technology (China); Z. Zhou, Harbin Institute of Technology (China) and Missouri Univ. of Science and Technology (United States); G. Chen, Missouri Univ. of Science and Technology (United States); J. Ou, Harbin Institute of Technology (China) and Dalian Univ. of Technology (China)
- 7293 0C **A novel multifunctional fibre optic sensor** [7293-11]
R. S. Mahendran, V. R. Machavaram, L. Wang, J. M. Burns, D. Harris, S. N. Kukureka, G. F. Fernando, The Univ. of Birmingham (United Kingdom)
- 7293 0D **Reconstruction of temperature and displacement fields in satellite sandwich panels based on integrated fiber optic sensors** [7293-12]
S. Rapp, H. Baier, Technische Univ. München (Germany)
- 7293 0F **Research and development of plastic optical fiber based smart transparent concrete** [7293-14]
Z. Zhou, Harbin Institute of Technology (China) and Missouri Univ. of Science and Technology (United States); G. Ou, Harbin Institute of Technology (China); Y. Hang, G. Chen, Missouri Univ. of Science and Technology (United States); J. Ou, Harbin Institute of Technology (China) and Dalian Univ. of Technology (China)

SESSION 4 SENSOR NETWORKS I

- 7293 0G **Hierarchical structural health monitoring system combining a fiber optic spinal cord network and distributed nerve cell devices** [7293-15]
S. Minakuchi, H. Tsukamoto, N. Takeda, The Univ. of Tokyo (Japan)
- 7293 0H **Simulation of self-writing sensors** [7293-16]
A. Anderson, K. Peters, North Carolina State Univ. (United States)

SESSION 5 SENSOR NETWORKS II

- 7293 0J **Low power sensor network for wireless condition monitoring** [7293-18]
C. Richter, B. Frankenstein, L. Schubert, B. Weihnacht, Fraunhofer-Institut für Zerstörungsfreie Prüfverfahren (Germany); H. Friedmann, C. Ebert, Wölfel Beratende Ingenieure GmbH & Co. (Germany)

- 7293 OK **Artificial immune pattern recognition for damage detection in structural health monitoring sensor networks** [7293-19]
B. Chen, Michigan Technological Univ. (United States); C. Zang, Michigan Technological Univ. (United States) and Shenyang Institute of Automation (China)
- 7293 OL **A new kind of smart cable with functionality of full scale monitoring using BOTDR technique** [7293-47]
Z. Zhou, J. He, Harbin Institute of Technology (China); G. Chen, Missouri Univ. of Science and Technology (United States); J. Ou, Harbin Institute of Technology (China) and Dalian Univ. of Technology (China)
- 7293 OM **Wireless sensing system for bridge condition assessment and health monitoring** [7293-21]
M. V. Gangone, M. J. Whelan, K. D. Janoyan, Clarkson Univ. (United States)

SESSION 6 SMART SENSORS I

- 7293 OO **Chemically activated nanodiamonds for aluminum alloy corrosion protection and monitoring** [7293-23]
I. Hannstein, A.-K. Adler, Fraunhofer-Institut für Zerstörungsfreie Prüfverfahren (Germany); V. Lapina, V. Osipov, Institute of Physics (Belarus); J. Opitz, J. Schreiber, N. Meyendorf, Fraunhofer-Institut für Zerstörungsfreie Prüfverfahren (Germany)
- 7293 OP **Self-sensing, self-healing, and crack-arrestor composites** [7293-24]
D. Harris, R. S. Mahendran, D. Brooks, F. A. A. Al-Khodairi, V. R. Machavaram, P. Reynolds, L. Wang, S. D. Pandita, M. Paget, J. Wedderburn, S. A. Malik, S. O. Ojo, S. N. Kukureka, G. F. Fernando, The Univ. of Birmingham (United Kingdom)
- 7293 OQ **Verification of the impact damage detection system for airframe structures using optical fiber sensors** [7293-25]
N. Hirano, H. Tsutsui, J. Kimoto, T. Akatsuka, H. Sashikuma, Kawasaki Heavy Industries, Ltd. (Japan); N. Takeda, The Univ. of Tokyo (Japan); Y. Koshioka, R&D Institute of Metals and Composites for Future Industries (Japan)
- 7293 OR **Spatially distributed damage detection in CMC thermal protection materials using thin-film piezoelectric sensors** [7293-26]
S. J. Kuhr, Univ. of Dayton Research Institute (United States); J. L. Blackshire, Air Force Research Lab. (United States); J. K. Na, Univ. of Dayton Research Institute (United States)

SESSION 7 SMART SENSORS II

- 7293 OS **High frequency eddy current device for near surface material characterizations** [7293-27]
S. Hillmann, H. Heuer, N. Meyendorf, Fraunhofer-Institut für Zerstörungsfreie Prüfverfahren (Germany)
- 7293 OT **Development of carbon fiber-based piezoresistive linear sensing technique** [7293-28]
C. Yang, Southeast Univ. (China); Z. Wu, Southeast Univ. (China) and Ibaraki Univ. (Japan); H. Huang, Ibaraki Univ (Japan)

- 7293 OU **A system approach for temperature dependency of impedance-based structural health monitoring** [7293-29]
D. Zhou, J. K. Kim, D. S. Ha, J. D. Quesenberry, D. J. Inman, Virginia Polytechnic Institute and State Univ. (United States)
- 7293 OV **Influence of the excitation frequency in the electromechanical impedance method for SHM applications** [7293-30]
V. G. M. Annamdas, P. Rizzo, Univ. of Pittsburgh (United States)
- 7293 OW **SPICE modeling of a precise two-dimensional MOS magnetic sensor** [7293-31]
A. Abou-Elmour, O. Abo-Elmor, Ajman Univ. of Science & Technology (United Arab Emirates); E. Mohamed, Omm Al-Qura Univ. (Saudi Arabia); M. Ibrahim, Ain-Shams Univ. (Egypt)

SESSION 8 ULTRASOUND

- 7293 OX **Monitoring system of wind turbine rotor blades** [7293-32]
B. Frankenstein, L. Schubert, N. Meyendorf, Fraunhofer-Institut für Zerstörungsfreie Prüfverfahren (Germany); H. Friedmann, C. Ebert, Wölfel Beratende Ingenieure GmbH & Co KG (Germany)
- 7293 OY **CW laser generated ultrasound techniques for microstructure material properties evaluation** [7293-33]
G. Thursby, B. Culshaw, G. Pierce, A. Cleary, C. McKee, I. Veres, Univ. of Strathclyde (United Kingdom)
- 7293 OZ **Gas-leak localization using distributed ultrasonic sensors** [7293-34]
J. Huseynov, Univ. of California, Irvine (United States) and General Monitors Transnational (United States); S. Baliga, General Monitors Transnational (United States); M. Dillencourt, L. Bic, N. Bagherzadeh, Univ. of California, Irvine (United States)

SESSION 9 OPTICAL SENSORS I

- 7293 12 **Specialty fibers for discrete and distributed sensing application** [7293-37]
J. Koh, K. Bennett, R. Bennett, X. Chen, C. K. Chien, M.-J. Li, D. Nolan, Corning Inc. (United States)

SESSION 10 OPTICAL SENSORS II

- 7293 14 **Shape reconstruction of composite structures with monitoring of modeling changes using Brillouin scattering based distributed optical fiber strain sensor network** [7293-39]
M. Nishio, N. Takeda, The Univ. of Tokyo (Japan)
- 7293 15 **A new optical fiber sensor with improved strain sensitivity based on distributed optical fiber sensing technique** [7293-40]
S. Shen, Southeast Univ. (China); Z. Wu, Southeast Univ. (China) and Ibaraki Univ. (China); C. Yang, Y. Tang, G. Wu, W. Hong, Southeast Univ. (China)
- 7293 16 **BOTDA road-embedded strain sensing system for landslide boundary localization** [7293-41]
M. Iten, A. M. Puzrin, ETH Zürich (Switzerland)

- 7293 17 **Development of self-sensing BFRP bars with distributed optic fiber sensors** [7293-42]
Y. Tang, Southeast Univ. (China); Z. Wu, Southeast Univ. (China) and Ibaraki Univ. (Japan);
C. Yang, S. Shen, G. Wu, W. Hong, Southeast Univ. (China)
- 7293 18 **Electric field sensor array from cavity resonance between optical D-fiber and multiple slab waveguides** [7293-44]
R. Gibson, R. Selfridge, S. Schultz, Brigham Young Univ. (United States)
- 7293 19 **Monitoring and modeling the diffusion profile in a thermosetting resin** [7293-45]
R. S. Mahendran, R. Chen, S. N. Kukureka, G. F. Fernando, The Univ. of Birmingham (United Kingdom)

POSTER SESSION

- 7293 1A **A novel embedded fiber optic acoustic emission sensor and its applications for monitoring failures of composite laminates** [7293-43]
T. Fu, Q. Li, Y. Liu, J. Leng, Harbin Institute of Technology (China)
- 7293 1E **Carbon monoxide sensitivity detection by PEDOT-PSS/zeolite composites gas sensing materials** [7293-51]
P. Chanthaanont, A. Sirivat, Chulalongkorn Univ. (Thailand)

Introduction

This volume is a collection of technical papers presented at the 2009 SPIE conference held in San Diego, California: the 16th International Symposium on Smart Structures and Materials & Nondestructive Evaluation and Health Monitoring. These collected papers were given in the technical conference of Smart Sensor Phenomena, Technology, Networks, and Systems.

These contributions are unique in this emerging area because of their multidisciplinary representations in the field of optical and ultrasound sensors and applications, sensor networks, and different smart sensors for various applications like aerospace, mechanical engineering, and material characterization. Participants came from more than 12 countries in regions all over the world. As you'll find in the roster, members of the program committee represent the various fields of nondestructive evaluation, health monitoring, and smart sensors.

The technical conference included two excellent invited presentations:

"Calibration of fiber Bragg gratings for optical sensing (FIBOS) for an aerospace application" by Raquel L. López Heredero, Instituto Nacional de Técnica Aeroespacial (Spain), and

"Health monitoring network using smart sensor of elasticoluminescence" by Chaonan Xu, National Institute of Advanced Industrial Science and Technology (Japan)

The technical conference was divided into 10 topical sessions and one poster session. The papers in these sessions covered a wide range of topics: fiber Bragg grating sensors and applications, other optical sensors, sensor networks, smart sensors and ultrasound sensors.

We would like to thank authors and presenters of this year's conference for their contributions. The outstanding conference program was put together by the fine effort of the program committee and we are thankful to the members of the program committee for their contributions.

We are sure that readers will find this proceedings volume useful and informative.
