Part One of Two Parts

Volume 7295

Proceedings of SPIE, 0277-786X, v. 7295

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

Part One

- xiii Symposium Committee
- xv Conference Committee
- xix Introduction
- xxi *Paleoaerodynamic exploration of the evolution of nature's flyers and man's aircraft and options for future technology innovations (Plenary Paper) [7288-104]**
B. M. Kulfan, The Boeing Co. (United States)
**This is an abridged version of Brenda Kulfan's plenary paper. A full-length version, including figures, is published in volume 7288. The CID number is 728803.*
- xli *NDE simulations: critical tools in the integration of NDE and SHM (Plenary Paper) [7294-49]*
R. B. Thompson, Iowa State Univ. (United States)

SESSION 1 SHM FOR AEROSPACE APPLICATIONS I: COMPLEX STRUCTURES

- 7295 03 **SHM in complex structural components** [7295-02]
A. J. Croxford, P. D. Wilcox, C. R. P. Courtney, B. W. Drinkwater, Univ. of Bristol (United Kingdom)
- 7295 04 **Sensitivity analysis of a transmission line model for damage characterization in complex structures** [7295-03]
D. Francoeur, P. Masson, P. Micheau, Univ. de Sherbrooke (Canada)
- 7295 05 **NDE using sensor-based approach to propulsion health monitoring of a turbine engine disk** [7295-04]
A. Abdul-Aziz, M. R. Woike, NASA Glenn Research Ctr. (United States); G. Abumeri, AlphaSTAR Corp. (United States); J. D. Lekki, G. Y. Baaklini, NASA Glenn Research Ctr. (United States)

SESSION 2 SHM FOR AEROSPACE APPLICATIONS II: SENSOR SYSTEM NETWORK AND RELATED ISSUES

- 7295 06 **SmartComposite system for impact damage detection on composite structures** [7295-09]
X. P. Qing, S. J. Beard, Acellent Technologies, Inc. (United States); J. Pinsonnault, Bombardier Aerospace (Canada); S. Banerjee, Acellent Technologies, Inc. (United States)
- 7295 07 **Neural network approach of active ultrasonic signals for structural health monitoring analysis** [7295-10]
Z. Kral, W. Horn, J. Steck, Wichita State Univ. (United States)
- 7295 08 **Ultrasonic assessment of satellite structural components and joints** [7295-11]
A. Zagrai, D. Doyle, T. Barnes, New Mexico Institute of Mining and Technology (United States)

- 7295 09 **Modeling of energy transmission by piezoelectric wafer active sensors through Gaussian contact** [7295-12]
S. Banerjee, The Univ. of Arizona (United States) and Acellent Technologies Inc. (United States); T. Kundu, The Univ. of Arizona (United States)
- 7295 0A **PZT behavior in cyclic strain environments** [7295-13]
J. D. Kuhn, E. D. Swenson, S. R. Soni, Air Force Institute of Technology (United States)
- 7295 0B **First Deminsys (high-speed FBG interrogator) flight** [7295-110]
T. J. van Els, Technobis Fibre Technologies (Netherlands)

SESSION 3 SHM FOR AEROSPACE APPLICATIONS III: DAMAGE DETECTION BY OPTICAL AND ULTRASONIC TECHNIQUES

- 7295 0C **Characterization and birefringence effect on embedded optical fiber Bragg gratings** [7295-19]
M. C. Emmons, G. P. Carman, K. P. Mohanchandra, Univ. of California, Los Angeles (United States); W. L. Richards, NASA Dryden Flight Research Ctr. (United States)
- 7295 0D **Curvature methods of damage detection using digital image correlation** [7295-20]
M. N. Helfrick, C. Niezrecki, P. Avitabile, Univ. of Massachusetts Lowell (United States)
- 7295 0F **Active sensing of fatigue damage using embedded ultrasonics** [7295-22]
A. Zagrai, W. A. Kruse, V. Gigineishvili, New Mexico Institute of Mining and Technology (United States)
- 7295 0G **Detection of surface breaking fatigue crack on a complex aircraft structure with Rayleigh surface waves** [7295-23]
J. K. Na, Univ. of Dayton Research Institute (United States); J. L. Blackshire, Air Force Research Lab. (United States); S. J. Kuhr, Univ. of Dayton Research Institute (United States)
- 7295 0H **Dynamic-based damage detection in composite structures** [7295-24]
S. Banerjee, Indian Institute of Technology, Bombay (India); F. Ricci, Univ. degli Studi di Napoli Federico II (Italy); H. Baid, A. K. Mal, Univ. of California, Los Angeles (United States)

SESSION 4 NOVEL INSTRUMENTATION AND SENSING FOR SHM I

- 7295 0I **A fiber Bragg grating based tunable laser source for quasi-static and dynamic strain monitoring** [7295-32]
O. Balogun, S. Krishnaswamy, Northwestern Univ. (United States)
- 7295 0J **Structural damage detection using ultrasonic wave modulation with low-profile piezoceramic transducers** [7295-33]
M. Simondi, W. J. Staszewski, R. B. Jenal, The Univ. of Sheffield (United Kingdom)
- 7295 0K **Recent innovations using magnetostrictive sensors for nondestructive evaluation** [7295-34]
A. Puchot, C. Duffer, A. Cobb, G. Light, Southwest Research Institute (United States)

SESSION 5 GUIDED WAVES FOR SHM I: METAL WAVEGUIDES AND TEMPERATURE EFFECT

- 7295 0M **Nondestructive inspection of reinforced concrete structures** [7295-38]
T. H. Miller, T. Yanagita, T. Kundu, The Univ. of Arizona (United States); J. Grill, RWTH Aachen (Germany); W. Grill, Univ. Leipzig (Germany)
- 7295 0N **Influence of temperature on in-situ guided wave inspection and health monitoring of a rectangular bar specimen** [7295-39]
M. J. Guers, B. R. Tittmann, The Pennsylvania State Univ. (United States)
- 7295 0O **Temperature effects in Lamb-wave structural health monitoring systems** [7295-40]
S. Salamone, F. Lanza di Scalea, I. Bartoli, Univ. of California, San Diego (United States)

SESSION 6 GUIDED WAVES FOR SHM II: FATIGUE DAMAGE AND CRACK DETECTION

- 7295 0Q **A comparative study of fatigue damage sensing in aluminum alloys using electrical impedance and laser ultrasonic methods** [7295-46]
L. Channels, The Johns Hopkins Univ. (United States); D. Chakraborty, Arizona State Univ. (United States); B. Butrym, Virginia Polytechnic Institute and State Univ. (United States); N. Kovvali, Arizona State Univ. (United States); J. Spicer, The Johns Hopkins Univ. (United States); A. Papandreou-Suppappola, Arizona State Univ. (United States); M. Afshari, D. Inman, Virginia Polytechnic Institute and State Univ. (United States); A. Chattopadhyay, Arizona State Univ. (United States)
- 7295 0R **Fatigue crack detection in a multi-riveted strap joint aluminium panel** [7295-47]
F. Stolze, W. J. Staszewski, G. Manson, K. Worden, The Univ. of Sheffield (United Kingdom)
- 7295 0S **Outlier analysis and principal component analysis to detect fatigue cracks in waveguides** [7295-48]
P. Rizzo, M. Cammarata, Univ. of Pittsburgh (United States); D. Dutta, Carnegie Mellon Univ. (United States); H. Sohn, Korea Advanced Institute of Science and Technology (Korea, Republic of)
- 7295 0T **Crack detection diagnostics using ultrasonic insonification and pattern recognition** [7295-49]
G. J. S. Jarmer, M. D. Todd, Univ. of California, San Diego (United States)

SESSION 7 GUIDED WAVES FOR SHM III: NEW CONCEPTS AND APPLICATIONS

- 7295 0V **Controlling acoustic-wave propagation through material anisotropy** [7295-56]
A. Tehranian, A. V. Amirkhizi, J. Irion, J. Isaacs, S. Nemat-Nasser, Univ. of California, San Diego (United States)
- 7295 0W **High resolution guided wave pipe inspection** [7295-57]
A. Velichko, P. D. Wilcox, Univ. of Bristol (United Kingdom)
- 7295 0X **Using diffuse field interferometry for structural and material characterization in complex aircraft structures** [7295-58]
A. Duroux, J. Ayers, K. G. Sabra, M. Ruzzene, Georgia Institute of Technology (United States)

- 7295 0Y **Development of an optic-based guided wave excitation technique** [7295-59]
H.-J. Park, H. Sohn, Korea Advanced Institute of Science and Technology (Korea, Republic of); I.-B. Kwon, Korea Research Institute of Standards and Science (Korea, Republic of); C.-B. Yun, Korea Advanced Institute of Science and Technology (Korea, Republic of)
- 7295 0Z **A new warped frequency transformation (WFT) for guided waves characterization** [7295-60]
L. De Marchi, A. Marzani, S. Caporale, N. Speciale, Univ. degli Studi di Bologna (Italy)
- 7295 10 **Elastic wave propagation in hexagonal honeycomb sandwich composite by using piezoelectric actuators/sensors** [7295-109]
G. L. Huang, F. Song, J. Kim, Univ. of Arkansas at Little Rock (United States)

SESSION 8 GUIDED WAVES FOR SHM IV: AEROSPACE APPLICATIONS

- 7295 11 **Damage state evaluation of adhesive composite joints using chaotic ultrasonic waves** [7295-69]
T. R. Fasel, M. D. Todd, Univ. of California, San Diego (United States); G. Park, Los Alamos National Lab. (United States)
- 7295 12 **A structural health monitoring system for self-repairing** [7295-100]
J. K. Kim, D. Zhou, D. S. Ha, D. Inman, Virginia Polytechnic Institute and State Univ. (United States)
- 7295 13 **Frequency-wavenumber domain methods for analysis of incident and scattered guided wave fields** [7295-71]
T. E. Michaels, M. Ruzzene, J. E. Michaels, Georgia Institute of Technology (United States)

SESSION 9 GUIDED WAVES FOR SHM V: SENSOR ARRAY

- 7295 14 **Directivity profiles of ultrasonic guided wave phased arrays for multilayer composite plates** [7295-72]
F. Yan, C. J. Lissenden, J. L. Rose, The Pennsylvania State Univ. (United States)
- 7295 15 **Adaptive imaging of damage from changes in guided wave signals recorded from spatially distributed arrays** [7295-73]
J. E. Michaels, J. S. Hall, T. E. Michaels, Georgia Institute of Technology (United States)
- 7295 16 **Lamb wave dispersion compensation in piezoelectric wafer active sensor phased-array applications** [7295-74]
B. Xu, L. Yu, V. Giurgiutiu, Univ. of South Carolina (United States)
- 7295 17 **Structural health monitoring of plates with surface features using guided ultrasonic waves** [7295-75]
P. Fromme, Univ. College London (United Kingdom)

SESSION 10 GUIDED WAVES FOR SHM VI: NONLINEAR, TIME REVERSAL, AND OTHER NOVEL TECHNIQUES

- 7295 18 **Stress detection with guided acoustic ultrasonic waves by nonlinear elastic and geometric effects** [7295-76]
K. S. Tarar, R. Meier, U. Amjad, W. Grill, Univ. Leipzig (Germany)
- 7295 19 **On the existence of antisymmetric or symmetric Lamb waves at nonlinear higher harmonics** [7295-77]
A. Srivastava, F. Lanza di Scalea, Univ. of California, San Diego (United States)
- 7295 1B **Frequency domain reference-free crack detection using transfer impedances in plate structures** [7295-79]
S. Park, Sungkyunkwan Univ. (Korea, Republic of); C. Lee, H. Sohn, Korea Advanced Institute of Science and Technology (Korea, Republic of)
- 7295 1C **Lamb wave based identification and parameter estimation of corrosion in metallic plate structure using a circular PWAS array** [7295-80]
V. T. Rathod, D. Roy Mahapatra, S. Gopalakrishnan, Indian Institute of Science (India)

Part Two

SESSION 11 MODELING AND SIMULATION FOR SHM I

- 7295 1D **Efficient finite element modeling of elastodynamic scattering** [7295-81]
P. D. Wilcox, A. Velichko, Univ. of Bristol (United Kingdom)
- 7295 1E **Micro interferometric acoustic lens: mesh-free modeling with experimental verification** [7295-82]
T. Kundu, The Univ. of Arizona (United States); D. Placko, Ecole Normale Supérieure de Cachan (France); T. Yanagita, The Univ. of Arizona (United States); S. Sathish, Univ. of Dayton Research Institute (United States)
- 7295 1F **Numerical modeling of frictional heating based vibrothermography** [7295-84]
F. Mabrouki, National Research Council Canada (Canada) and Ecole de Technologie Supérieure (Canada); M. Thomas, Ecole de Technologie Supérieure (Canada); M. Genest, A. Fahr, National Research Council Canada (Canada)
- 7295 1H **Quantification of sensor geometry performance for guided wave SHM** [7295-86]
A. J. Croxford, P. D. Wilcox, B. W. Drinkwater, Univ. of Bristol (United Kingdom)

SESSION 12 BIO-INSPIRED FLAPPING SYSTEM FOR SHM

- 7295 1I **Bio-inspired flapping UAV design: a university perspective (Keynote Paper)** [7295-35]
J.-H. Han, J.-S. Lee, Korea Advanced Institute of Science and Technology (Korea, Republic of); D.-K. Kim, Korea Aerospace Research Institute (Korea, Republic of)
- 7295 1J **Evaluation of flexible flapping wing concept** [7295-36]
T. Rakotomamonjy, T. Le Moing, B. Danet, X. Gadoullet, D. Osmont, M. Dupont, ONERA (France)

SESSION 13 SIGNAL PROCESSING FOR SHM

- 7295 1K **An efficient signal processing tool for impedance-based structural health monitoring** [7295-05]
M. K. O'Brien, S. G. Taylor, K. M. Farinholt, G. Park, C. R. Farrar, Los Alamos National Lab. (United States)
- 7295 1L **Online three-point frequency tracking method for structural health monitoring** [7295-06]
P. F. Pai, A. Rosengren, Univ. of Missouri (United States)
- 7295 1M **A novel dimensional reduction approach for structural damage diagnosis using feature similarity** [7295-07]
I. Lopez, N. Sarigul-Klijn, Univ. of California, Davis (United States)
- 7295 1N **Bivariate regressive adaptive index for structural health monitoring: performance assessment and experimental verification** [7295-08]
S. Su, T. Kijewski-Correa, Univ. of Notre Dame (United States); J. F. Pando Balandra, Univ. Popular Autónoma del Estado de Puebla (Mexico)

SESSION 14 SHM FOR BIOMEDICAL APPLICATIONS

- 7295 1O **Designing an optical bendloss sensor for clinical force measurement** [7295-14]
D. R. Linders, W. Wang, Univ. of Washington (United States); D. J. Nuckley, Univ. of Minnesota (United States)
- 7295 1P **Improvements in medical CT image reconstruction accuracy in the presence of metal objects by using x-rays up to 1 MeV** [7295-15]
J. Clayton, G. Virshup, Varian Medical Systems (United States); M. Yang, R. Mohan, L. Dong, M.D. Anderson Cancer Ctr. Houston (United States)
- 7295 1Q **Monitoring of variations in the speed of sound in contracting and relaxing muscle** [7295-16]
M. Z. Hossain, H. Voigt, W. Grill, Univ. Leipzig (Germany)
- 7295 1S **PZR transducer for monitoring blood pressure** [7295-18]
A. Sotelo-Aguilar, F. Martínez-Piñón, J. A. Álvarez-Chávez, Ctr. de Investigación e Innovación Tecnológica (Mexico)

SESSION 15 NOVEL INSTRUMENTATION AND SENSING FOR SHM II

- 7295 1T **Layer-by-layer carbon nanotube bio-templates for in situ monitoring of the metabolic activity of nitrifying bacteria** [7295-25]
K. J. Loh, Univ. of California, Davis (United States); J. S. Guest, G. Ho, J. P. Lynch, N. G. Love, Univ. of Michigan (United States)
- 7295 1U **Non-inertial ultra-wideband acoustic transducers** [7295-26]
U. Amjad, K. Hahn, T. G. Tang, W. Grill, Univ. Leipzig (Germany)
- 7295 1V **A diamagnetic levitating generator system** [7295-27]
J. N. Ho, W.-C. Wang, Univ. of Washington (United States)

- 7295 1W **A conformal ultrasound transducer array featuring microfabricated polyimide joints** [7295-28]
D. B. Bennett, Univ. of California, Los Angeles (United States); M. O. Culjat, Univ. of California, Los Angeles (United States) and Univ. of California, Santa Barbara (United States); B. P. Cox, A. E. Dann, Univ. of California, Los Angeles (United States); K. Williams, Univ. of California, Santa Barbara (United States); H. Lee, E. R. Brown, Univ. of California, Los Angeles (United States) and Univ. of California, Santa Barbara (United States); W. S. Grundfest, Univ. of California, Los Angeles (United States); R. S. Singh, Univ. of California, Los Angeles (United States) and Univ. of California, Santa Barbara (United States)
- 7295 1X **Nonlinear piezoelectric impedance modulation and its application to crack detection** [7295-29]
A. Masuda, T. Shinagawa, D. Iba, A. Sone, Kyoto Institute of Technology (Japan)
- 7295 1Z **Optical viscosity sensor** [7295-31]
C.-L. Chang, J. Peyroux, A. Perez, C.-L. Tsui, W.-C. Wang, Univ. of Washington (United States)

SESSION 16 SIGNAL PROCESSING AND DAMAGE DETECTION FOR SHM

- 7295 20 **Structural intensity in dual-mode propagation for damage characterization** [7295-87]
P. Masson, Univ. de Sherbrooke (Canada); C. R. Halkyard, The Univ. of Auckland (New Zealand)
- 7295 21 **An examination of the ARX as a residual generator for damage detection** [7295-88]
D. Bernal, Northeastern Univ. (United States); D. Zonta, M. Pozzi, Univ. degli Studi di Trento (Italy)

SESSION 17 EMERGING AND FUTURISTIC TECHNIQUES AND ISSUES

- 7295 23 **Energy scavenging from ambient sources based on ferroelectric materials (Keynote Paper)** [7295-90]
D. Guyomar, M. Lallart, Univ. de Lyon (France)
- 7295 24 **The study on analysis of temperature effect of FBG optical fiber sensor introduced for long-term monitoring system** [7295-62]
B. C. Joo, K. T. Park, Y. K. Hwang, C. H. Lee, Korea Institute of Construction Technology (Korea, Republic of)
- 7295 25 **A two-stage neural-network-based method for cycle slip correction of GPS measurements** [7295-101]
T. Yi, Dalian Univ. of Technology (China) and Tongji Univ. (China); H. Li, Dalian Univ. of Technology (China); M. Gu, Tongji Univ. (China)

SESSION 18 MODELING AND SIMULATION FOR SHM II

- 7295 26 **Two-dimensional periodic actuators for frequency-based beam steering** [7295-93]
M. Romanoni, Politecnico di Torino (Italy); N. Apetre, M. Ruzzene, Georgia Institute of Technology (United States); S. Gonella, Northwestern Univ. (United States)

SESSION 19 SHM FOR CIVIL AND INFRASTRUCTURE ENGINEERING

- 7295 2A **Receptance-based structural health monitoring approach for bridge structures** [7295-61]
S. A. Jang, B. F. Spencer, Jr., Univ. of Illinois at Urbana-Champaign (United States)
- 7295 2B **Output-only modal analysis approach for time-unsynchronization signals in wireless sensor network** [7295-63]
J.-H. Park, J.-T. Kim, W.-B. Na, J. Woo, Pukyong National Univ. (Korea, Republic of)
- 7295 2C **Monitoring and evaluation of the anomalous vibration of a cable in a stayed bridge** [7295-66]
R. A. Cárdenas, Univ. Autónoma de Querétaro (Mexico) and Tecnológico de Monterrey Campus Querétaro (Mexico); F. J. Carrión Viramontes, Univ. Autónoma de Querétaro (Mexico) and Instituto Mexicano del Transporte (Mexico); J. A. López López, J. C. Toledano Andrade, Instituto Mexicano del Transporte (Mexico)

SESSION 20 DESIGN OF SMART STRUCTURES AND RELATED ISSUES

- 7295 2D **Operational load estimation of a smart wind turbine rotor blade** [7295-41]
J. R. White, D. E. Adams, Purdue Univ. (United States); M. A. Rumsey, Sandia National Labs. (United States)
- 7295 2E **Intelligent tires for improved tire safety based on strain measurements** [7295-42]
R. Matsuzaki, A. Todoroki, Tokyo Institute of Technology (Japan)
- 7295 2F **Microsecond structural health monitoring in impact loaded structures** [7295-43]
J. C. Dodson, Virginia Polytechnic Institute and State Univ. (United States) and Air Force Research Lab. (United States); D. J. Inman, Virginia Polytechnic Institute and State Univ. (United States); J. R. Foley, Air Force Research Lab. (United States)
- 7295 2G **Structural damage identification using feedback control with principal component analysis** [7295-44]
J.-S. Lew, Tennessee State Univ. (United States)

SESSION 21 SHM OF COMPOSITE MATERIALS

- 7295 2H **Ultrasonic camera automatic image depth and stitching modifications for monitoring aerospace composites** [7295-50]
B. Regez, G. Kirikera, Northwestern Univ. (United States); M. T. H. Yuen, The National Univ. of Singapore (Singapore); S. Krishnaswamy, Northwestern Univ. (United States); B. Lasser, Imperium, Inc. (United States)
- 7295 2I **Damage detection in sandwich composite materials using laser vibrometry in conjunction with nonlinear system identification** [7295-51]
S. Underwood, D. Koester, D. E. Adams, Purdue Univ. (United States)
- 7295 2J **On the delamination detection in composite beams with active piezoelectric sensors using nonlinear ultrasonics** [7295-52]
N. A. Chrysochoidis, A. K. Barouni, D. A. Saravanos, Univ. of Patras (Greece)

- 7295 2L **Continuous health monitoring of carbon fiber reinforced polymer plates by smart material actuation** [7295-54]
A. Dantele, J. Korak, T. Rittenschober, Profactor GmbH (Austria)

SESSION 22 SHM OF BRIDGE STRUCTURES

- 7295 2M **Health monitoring data analysis and comparison of prototype and laboratorial model for long-span cable-stayed bridge** [7295-67]
O. Yang, Harbin Institute of Technology (China); J. Ou, Harbin Institute of Technology (China) and Dalian Univ. of Technology (China)
- 7295 2N **Separating temperature effect from state monitoring of concrete bridges** [7295-68]
Z. Liang, Chongqing Jiaotong Univ. (China); J. Zhang, Chongqing Univ. (China); J. Cao, J. Zhou, Chongqing Jiaotong Univ. (China)
- 7295 2O **Damage identification method based on structural dynamic characteristics and strain measurements** [7295-111]
J. Teng, W. Lu, Harbin Institute of Technology (China)

POSTER SESSION

- 7295 2P **SAR measurement in MRI: an improved method** [7295-98]
R. Romano, F. Acernese, Univ. degli Studi di Salerno (Italy) and Istituto Nazionale di Fisica Nucleare (Italy); P. L. Indovina, Univ. degli Studi di Napoli Federico II (Italy); F. Barone, Univ. degli Studi di Salerno (Italy) and Istituto Nazionale di Fisica Nucleare (Italy)
- 7295 2Q **Fractional volume integration in two-dimensional NMR spectra: CAKE, a Monte Carlo approach** [7295-99]
R. Romano, F. Acernese, Univ. degli Studi di Salerno (Italy) and Istituto Nazionale di Fisica Nucleare (Italy); D. Paris, A. Motta, Istituto Nazionale di Chimica Biomolecolare, CNR (Italy); F. Barone, Univ. degli Studi di Salerno (Italy) and Istituto Nazionale di Fisica Nucleare (Italy)
- 7295 2R **Weekend effect of temperature variation in the Yangtze River delta of China** [7295-102]
L. Ma, Z. Jiang, C. Duan, Q. Miao, Y. Wang, Nanjing Univ. of Information Science & Technology (China)
- 7295 2V **Biomedical imaging with radio-frequency radiometry** [7295-107]
A. Nguyen, Univ. of California, Irvine (United States)
- 7295 2W **Wireless non-contact measurement of human heartbeat and bloodflow with microwave interferometry** [7295-108]
A. Nguyen, Univ. of California, Irvine (United States)

Author Index

Symposium Committee

Symposium Chairs

Alison B. Flatau, University of Maryland, College Park (United States)
George Y. Baaklini, NASA Glenn Research Center (United States)
Donald J. Leo, Virginia Polytechnic Institute and State University
(United States)
Kara J. Peters, North Carolina State University (United States)

Executive Committee

Mehdi Ahmadian, Virginia Polytechnic Institute and State University
(United States)
Yoseph Bar-Cohen, Jet Propulsion Laboratory (United States)
Jung-Chih Chiao, The University of Texas at Arlington (United States)
Aaron A. Diaz, Pacific Northwest National Laboratory (United States)
Wolfgang Ecke, Institut für Physikalische Hochtechnologie e.V. (Germany)
Mehrdad N. Ghasemi-Nejhad, University of Hawai'i at Manoa
(United States)
Victor Giurgiutiu, University of South Carolina (United States)
Benjamin K. Henderson, Air Force Research Laboratory (United States)
Kumar V. Jata, Air Force Research Laboratory (United States)
Tribikram Kundu, The University of Arizona (United States)
Jiangyu Li, University of Washington (United States)
Douglas K. Lindner, Virginia Polytechnic Institute and State University
(United States)
M. Brett McMickell, Honeywell, Inc. (United States)
Norbert Meyendorf, University of Dayton (United States)
Zoubeida Ounaies, Texas A&M University (United States)
Peter J. Shull, The Pennsylvania State University (United States)
Kyo D. Song, Norfolk State University (United States)
Masayoshi Tomizuka, University of California, Berkeley (United States)
Vijay K. Varadan, University of Arkansas (United States)
Dietmar W. Vogel, Fraunhofer-Institut für Zuverlässigkeit und
Mikrointegration (Germany)
Thomas Wallmersperger, Universität Stuttgart (Germany)
H. Felix Wu, National Institute of Standards and Technology
(United States)
Chung-Bang Yun, Korea Advanced Institute of Science and Technology
(Korea, Republic of)

Conference Committee

Conference Chair

Tribikram Kundu, The University of Arizona (United States)

Conference Cochair

Kumar V. Jata, Air Force Research Laboratory (United States)

Program Committee

Douglas E. Adams, Purdue University (United States)
Sauvik Banerjee, Indian Institute of Technology (India)
Sourav Banerjee, The University of Arizona (United States) and Acellent Technologies Inc. (United States)
Yoseph Bar-Cohen, Jet Propulsion Laboratory (United States)
Fu-Kuo Chang, Stanford University (United States)
Victor Giurgiutiu, University of South Carolina (United States)
Wolfgang Grill, Universität Leipzig (Germany)
Olivier Giraudo, ONERA (France)
Shivan Haran, Arkansas State University (United States)
Sridhar Krishnaswamy, Northwestern University (United States)
Francesco Lanza di Scalea, University of California, San Diego (United States)
Jerome P. Lynch, University of Michigan (United States)
Jennifer E. Michaels, Georgia Institute of Technology (United States)
Won-Bae Na, Pukyong National University (Korea, Republic of)
Paul D. Panetta, Luna Innovations Inc. (United States)
Perngjin F. Pai, University of Missouri, Columbia (United States)
Dominique Placko, École Normale Supérieure de Cachan (France)
Hoon Sohn, Korea Advanced Institute of Science and Technology (Korea, Republic of)
Michael D. Todd, University of California, San Diego (United States)
Wei-Chih Wang, University of Washington (United States)
Paul D. Wilcox, University of Bristol (United Kingdom)
Hwai-Chung Wu, Wayne State University (United States)
Andrei N. Zagrai, New Mexico Institute of Mining and Technology (United States)
George Zentai, Varian Medical Systems, Inc. (United States)

Session Chairs

- 1 SHM for Aerospace Applications I: Complex Structures
Tribikram Kundu, The University of Arizona (United States)
Wolfgang Grill, Universität Leipzig (Germany)
- 2 SHM for Aerospace Applications II: Sensor System Network and Related Issues
Victor Giurgiutiu, University of South Carolina (United States)
Jennifer E. Michaels, Georgia Institute of Technology (United States)
- 3 SHM for Aerospace Applications III: Damage Detection by Optical and Ultrasonic Techniques
Michael D. Todd, University of California, San Diego (United States)
Jonathan R. White, Purdue University (United States)
- 4 Novel Instrumentation and Sensing for SHM I
George Zentai, Varian Medical Systems, Inc. (United States)
Wolfgang Grill, Universität Leipzig (Germany)
- 5 Guided Waves for SHM I: Metal Waveguides and Temperature Effect
Francesco Lanza di Scalea, University of California, San Diego (United States)
Hoon Sohn, Korea Advanced Institute of Science and Technology (Korea, Republic of)
- 6 Guided Waves for SHM II: Fatigue Damage and Crack Detection
Hoon Sohn, Korea Advanced Institute of Science and Technology (Korea, Republic of)
Francesco Lanza di Scalea, University of California, San Diego (United States)
- 7 Guided Waves for SHM III: New Concepts and Applications
Francesco Lanza di Scalea, University of California, San Diego (United States)
Hoon Sohn, Korea Advanced Institute of Science and Technology (Korea, Republic of)
- 8 Guided Waves for SHM IV: Aerospace Applications
Sourav Banerjee, The University of Arizona (United States) and Acellent Technologies Inc. (United States)
Guoliang Huang, University of Arkansas at Little Rock (United States)
- 9 Guided Waves for SHM V: Sensor Array
Jennifer E. Michaels, Georgia Institute of Technology (United States)
Paul D. Wilcox, University of Bristol (United Kingdom)

- 10 Guided Waves for SHM VI: Nonlinear, Time Reversal, and Other Novel Techniques
Paul D. Wilcox, University of Bristol (United Kingdom)
Jennifer E. Michaels, Georgia Institute of Technology (United States)
- 11 Modeling and Simulation for SHM I
Jennifer E. Michaels, Georgia Institute of Technology (United States)
- 12 Bio-Inspired Flapping System for SHM
Sourav Banerjee, The University of Arizona (United States) and Acellent Technologies Inc. (United States)
Olivier Giraudo, ONERA (France)
- 13 Signal Processing for SHM
Wei-Chih Wang, University of Washington (United States)
Jerome P. Lynch, University of Michigan (United States)
- 14 SHM for Biomedical Applications
Paul D. Panetta, Luna Innovations Inc. (United States)
Won-Bae Na, Pukyong National University (Korea, Republic of)
- 15 Novel Instrumentation and Sensing for SHM II
Wolfgang Grill, Universität Leipzig (Germany)
Paul D. Panetta, Luna Innovations Inc. (United States)
- 16 Signal Processing and Damage Detection for SHM
Perngjin F. Pai, University of Missouri, Columbia (United States)
Sourav Banerjee, The University of Arizona (United States) and Acellent Technologies Inc. (United States)
- 17 Emerging and Futuristic Techniques and Issues
Olivier Giraudo, ONERA (France)
Wolfgang Grill, Universität Leipzig (Germany)
- 18 Modeling and Simulation for SHM II
George Zentai, Varian Medical Systems, Inc. (United States)
- 19 SHM for Civil and Infrastructure Engineering
Won-Bae Na, Pukyong National University (Korea, Republic of)
Olivier Giraudo, ONERA (France)
- 20 Design of Smart Structures and Related Issues
Andrei N. Zagrai, New Mexico Institute of Mining and Technology (United States)
Perngjin F. Pai, University of Missouri, Columbia (United States)

- 21 SHM of Composite Materials
Sridhar Krishnaswamy, Northwestern University (United States)
Andrei N. Zagrai, New Mexico Institute of Mining and Technology
(United States)
- 22 SHM of Bridge Structures
Jerome P. Lynch, University of Michigan (United States)
Won-Bae Na, Pukyong National University (Korea, Republic of)

Introduction

In 2001 the SPIE conference 4335 on health monitoring of structural and biological systems brought engineers, materials scientists, medical doctors, and biologists together to exchange their ideas on this important issue. After having a positive experience at that conference, yearly conferences have been organized on the same topic and the next one has been planned for 2010. This proceedings volume 7295 contains papers presented at the 2009 conference. Papers presented in the earlier conferences can be found in proceedings volume 4335 for 2001 papers, vol. 4702 for 2002, vol. 5047 for 2003, vol. 5394 for 2004, vol. 5768 for 2005, vol. 6177 for 2006, vol. 6532 for 2007, and vol. 6935 for 2008 papers.

The emphasis of this conference is to recognize that nondestructive evaluation is an integral part of health monitoring for both structural and biological systems. I believe that biological and physical science communities are learning from each other by coming to this conference and exchanging ideas. Some of the recent advances in the science and technology of health monitoring techniques that go beyond the traditional nondestructive imaging of internal defects are presented in these proceedings. New diagnosis, prognosis and rehabilitation techniques applied to engineering structures made of metal, concrete, and composites, as well as biological systems are presented. The papers published here cover a wide range of technologies. It is hoped that this conference will stimulate further interactions between physical and life science communities resulting in newer development of more innovative techniques for health monitoring applications.

I am thankful to the conference co-chair, program committee members, authors, session chairs, and SPIE staff for putting together this excellent conference.

Tribikram Kundu
