Proceedings of SPIE, 0277-786X, v. 7296

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

vii	<i>Symposium Committees</i>
xi	<i>Conference Chairs</i>
xiii	<i>Introduction</i>

PART A MOLECULAR SPECTROSCOPY AND ATMOSPHERIC RADIATIVE PROCESSES

- 7296 02 **Labeling of pure vibrational states of water-like molecules** [7296-01]
O. V. Naumenko, E. R. Polovtseva, Institute of Atmospheric Optics SB RAS (Russian Federation)
- 7296 03 **The theory and calculations of the collision line mixing effects in the rotational spectra of symmetric top molecules** [7296-02]
M. R. Cherkasov, Tomsk Polytechnic Univ. (Russian Federation)
- 7296 04 **Absorption of optical radiation by atmospheric crystals** [7296-03]
O. V. Shefer, Tomsk Polytechnic Univ. (Russian Federation)

PART B OPTICAL RADIATION PROPAGATION IN THE ATMOSPHERE AND OCEAN

- 7296 05 **Low earth orbit identification of space asset threats** [7296-04]
S. M. Chandler, G. W. Lukesh, Nukove Scientific Consulting, LLC (United States)
- 7296 06 **Efficient excitation of whispering gallery modes in a spherical particle illuminated by an ultrashort amplitude-modulated Gaussian laser beam** [7296-05]
Yu. E. Geints, A. A. Zemlyanov, E. K. Panina, Institute of Atmospheric Optics SB RAS (Russian Federation)
- 7296 07 **Numerical modeling of monitoring of atmospheric turbulence and wind speed on basis of Hartman sensor** [7296-06]
L. V. Antoshkin, V. V. Lavrinov, L. N. Lavrinova, V. P. Lukin, Institute of Atmospheric Optics SB RAS (Russian Federation)
- 7296 08 **Repeated testing of under dome astroclimate of AZT-33 telescope** [7296-07]
V. V. Nosov, Institute of Atmospheric Optics SB RAS (Russian Federation); V. M. Grigoriev, P. G. Kovadlo, Institute of Solar-Terrestrial Physics SB RAS (Russian Federation); V. P. Lukin, Institute of Atmospheric Optics SB RAS (Russian Federation); P. G. Papushev, Institute of Solar-Terrestrial Physics SB RAS (Russian Federation); A. V. Torgaev, Institute of Atmospheric Optics SB RAS (Russian Federation)
- 7296 09 **Coherent structures in turbulent atmosphere** [7296-08]
V. V. Nosov, Institute of Atmospheric Optics SB RAS (Russian Federation); V. M. Grigoriev, P. G. Kovadlo, Institute of Solar-Terrestrial Physics SB RAS (Russian Federation); V. P. Lukin, E. V. Nosov, A. V. Torgaev, Institute of Atmospheric Optics SB RAS (Russian Federation)

- 7296 0A **Results of measurements of A. N. Kolmogorov and A. M. Obukhov constants in the Kolmogorov-Obukhov law** [7296-09]
V. V. Nosov, V. P. Lukin, E. V. Nosov, A. V. Torgaev, Institute of Atmospheric Optics SB RAS (Russian Federation)
- 7296 0B **Decrease of the light wave fluctuations in coherent turbulence** [7296-10]
V. V. Nosov, V. P. Lukin, A. V. Torgaev, Institute of Atmospheric Optics SB RAS (Russian Federation)
- 7296 0C **Result of measurements of the astroclimate characteristics of astronomical telescopes in the mountain observatories** [7296-11]
V. V. Nosov, Institute of Atmospheric Optics SB RAS (Russian Federation); V. M. Grigoriev, P. G. Kovadlo, Institute of Solar-Terrestrial Physics SB RAS (Russian Federation); V. P. Lukin, A. V. Torgaev, Institute of Atmospheric Optics SB RAS (Russian Federation)
- 7296 0D **Astroclimate parameters of the surface layer in the Sayan Solar Observatory** [7296-12]
V. V. Nosov, Institute of Atmospheric Optics SB RAS (Russian Federation); V. M. Grigoriev, P. G. Kovadlo, Institute of Solar-Terrestrial Physics SB RAS (Russian Federation); V. P. Lukin, A. V. Torgaev, Institute of Atmospheric Optics SB RAS (Russian Federation)
- 7296 0E **Structure function of temperature fluctuations in coherent turbulence** [7296-13]
V. V. Nosov, V. P. Lukin, A. V. Torgaev, Institute of Atmospheric Optics SB RAS (Russian Federation)
- 7296 0F **Statistical modeling of radiative heat transfer in circumstellar medium** [7296-14]
S. A. Brednikhin, Novosibirsk State Univ. (Russian Federation); B. A. Kargin, Institute of Computational Mathematics and Mathematical Geophysics (Russian Federation)
- 7296 0G **The influence of femtosecond pulses of Ti:sapphire laser on optical materials** [7296-15]
A. A. Zemlyanov, E. E. Bykova, A. M. Kabanov, Institute of Atmospheric Optics SB RAS (Russian Federation); A. N. Stepanov, S. B. Bodrov, Institute of Applied Physics RAS (Russian Federation); N. S. Zakharov, S. V. Kholod, 12 Central Scientific-Research Institute of Ministry of Defense (Russian Federation)
- 7296 0H **Experimental optoelectronic model of ceilometer for cloud base height measurement** [7296-16]
S. V. Zuev, N. P. Krasnenko, Institute for Monitoring of Climatic and Ecological Systems SB RAS (Russian Federation)

PART C OPTICAL INVESTIGATION OF ATMOSPHERE AND OCEAN

- 7296 0I **Extinction in radiative transfer equation for ice atmospheric medium** [7296-17]
O. V. Shefer, Tomsk Polytechnic Univ. (Russian Federation)

PART D ATMOSPHERIC PHYSICS

- 7296 0J **An investigation of the upper atmosphere response to cyclones using ionosonde data in Eastern Siberia and the Far East** [7296-18]
N. P. Perevalova, N. M. Polekh, Institute of Solar-Terrestrial Physics SB RAS (Russian Federation)

- 7296 OK **Morphological features of the atmosphere temperature regime in the south region of East Siberia** [7296-19]
M. A. Chernigovskaya, Institute of Solar-Terrestrial Physics SB RAS (Russian Federation)
- 7296 OL **The analysis of radio sonde measurements at sub-arctic continental aerological stations** [7296-20]
E. V. Batueva, Buryatia Scientific Ctr. SB RAS (Russian Federation)
- 7296 OM **The estimate of the peak density of atomic oxygen between 2000 and 2004 at 52°N** [7296-21]
H. Gao, J. Xu, State Key Lab. of Space Weather (China); A. V. Mikhalev, Institute of Solar-Terrestrial Physics SB RAS (Russian Federation); W. Yuan, State Key Lab. of Space Weather (China); I. V. Medvedeva, Institute of Solar-Terrestrial Physics SB RAS (Russian Federation)
- 7296 ON **Ionospheric and magnetospheric effects of the solar eclipse in northeastern Russia** [7296-22]
I. N. Poddelsky, A. I. Poddelsky, Institute of Cosmophysical Research and Radio Wave Propagation FEB RAS (Russian Federation)

Conference Chairs

Conference A: Molecular Spectroscopy and Atmospheric Radiative Processes

- L. N. Sinitsa**, Institute of Atmospheric Optics SB RAS (Russian Federation)
- S. Civis**, J. Heyrovský Institute of Physical Chemistry, Czech Republic
Academy of Sciences (Czech Republic)
- C. Domingo**, Instituto de Estructura de la Materia, CSIC (Spain)
- L. A. Surin**, University of Cologne (Germany)
- V. I. Perevalov**, Institute of Atmospheric Optics SB RAS (Russian Federation)

Conference B: Optical Radiation Propagation in the Atmosphere and Ocean

- V. P. Lukin**, Institute of Atmospheric Optics SB RAS (Russian Federation)
- V. V. Belov**, Institute of Atmospheric Optics SB RAS (Russian Federation)
- M. A. Vorontsov**, University of Maryland (United States)
- V. P. Budak**, Moscow Power Engineering Institute (Russian Federation)
- R. Sh. Tsvyk**, Institute of Atmospheric Optics SB RAS (Russian Federation)
- A. G. Borovoi**, Institute of Atmospheric Optics SB RAS (Russian Federation)
- V. V. Kolosov**, Institute of Atmospheric Optics SB RAS (Russian Federation)

Conference C: Optical Investigation of Atmosphere and Ocean

- B. D. Belan**, Institute of Atmospheric Optics SB RAS (Russian Federation)
- A. V. Poberovskii**, Saint-Petersburg State University (Russian Federation)
- A. P. Chaikovsky**, Institute of Physics, Belarus National Academy of Sciences (Belarus)
- S. M. Sakerin**, Institute of Atmospheric Optics SB RAS (Russian Federation)
- A. G. Borovoi**, Institute of Atmospheric Optics SB RAS (Russian Federation)
- T. A. Sushkevich**, Keldysh Institute of Applied Mathematics RAS (Russian Federation)
- B. A. Kargin**, Institute of Computational Mathematics and Mathematical Physics SB RAS (Russian Federation)
- A. P. Ivanov**, Institute of Physics, Belarus Academy of Sciences (Belarus)

Conference D: Atmospheric Physics

- A. P. Potekhin**, Institute of Solar-Terrestrial Physics SB RAS (Russian Federation)
- V. I. Kurkin**, Institute of Solar-Terrestrial Physics SB RAS (Russian Federation)

A. F. Kurbatskiy, Novosibirsk State University (Russian Federation)
B. D. Belan, Institute of Atmospheric Optics SB RAS (Russian Federation)
A. G. Kolesnik, Tomsk State University (Russian Federation)
M. Yu. Arshinov, Institute of Atmospheric Optics SB RAS (Russian Federation)
V. E. Kunitsyn, M. Lomonosov Moscow State University (Russian Federation)

Introduction

In accordance with the schedule of meeting and conferences approved by the Presidium of the Siberian Branch of the Russian Academy of Sciences (SB RAS) for 2008, the Institute of Atmospheric Optics SB RAS, Institute of Solar-Terrestrial Physics SB RAS organized the Fifteenth International Symposium titled "Atmospheric and Ocean Optics/Atmospheric Physics," in Krasnoyarsk, Russia, 22–28 June 2008.

We wish to thank our sponsors for their contribution to the success of the symposium: Siberian Branch of the Russian Academy of Sciences, Russian Foundation for Basic Research, and the Optical Society of America.

English and Russian were the working languages of the symposium. All poster presentations were in English and oral presentations were made in English and Russian (using synchronous translation via personal audio-equipment).

We conducted four conferences titled:

- A. Molecular Spectroscopy and Atmospheric Radiative Processes
- B. Optical Radiation Propagation in the Atmosphere and Ocean
- C. Optical Investigation of Atmosphere and Ocean
- D. Atmospheric Physics

The main topics of the Fifteenth International Symposium on Atmospheric and Ocean Optics/Atmospheric Physics included:

- Molecular spectroscopy of atmospheric gases
- Absorption of radiation in atmosphere and ocean
- Radiative regime and climate problems
- Models and data bases for atmospheric optics and physics
- Wave propagation in random inhomogeneous media
- Adaptive optics
- Nonlinear effects at radiation propagation in atmosphere and water media
- Multiple scattering in optical remote sensing
- Image transfer and processing
- Optical and microphysical properties of atmospheric aerosol and suspension in water media
- Transport and transformation of aerosol and gas components in the atmosphere
- Laser and acoustic sounding of atmosphere and ocean
- Diagnostics of state and functioning of plants' bio systems
- Structure and dynamics of the lower and middle atmosphere
- Dynamics of the atmosphere and climate of the Asian region
- Physical processes and phenomena in the atmosphere
- Optic techniques for probing the atmosphere

The program of the symposium included 22 invited and plenary papers, 120 oral presentations, and more than 123 poster presentations during four poster sessions.

History: The symposium is a traditional meeting of atmospheric and ocean optics and atmospheric physics community, which has a long history as a successor of the symposiums on Laser Propagation in Atmosphere and Laser Remote Sensing of Atmosphere beginning with the early seventies and organizing by academician Vladimir Zuev.

A symposium on Atmospheric and Ocean Optics has been held annually since 1994 by the Institute of Atmospheric Optics SB RAS. From 1971 to 2007 the institute organized more than 40 conferences on different scientific topics. Currently the symposium is the only one in Russia where fundamental problems of radiation propagation in inhomogeneous media and the scattering and absorbing of radiation are considered. Very few conferences in the world have such a broad spectrum of interest. It is very attractive for participants from former Soviet countries that the official languages of symposium are Russian and English.

In the field listed here, the Siberian scientific schools are leaders in our country and well known in the world. This fact can be attributed to the interest in this symposium from the scientists of Russia and other countries of the former USSR. The organization experience and the high level of the conference allowed us in 2000–2007 to invite leading scientists working in the field of optics.

Present: The Fifteenth International Symposium “Atmospheric and Ocean Optics/Atmospheric Physics” was successfully held 22–28 June 2008, in Krasnoyarsk, on board the ship “[Aleksandr Matrosov](#)” cruising on the River Yenisei.

In total, 126 participants presented 265 papers and 41 attendees under the age of 33 attended the Symposium. The Symposium included presentations from Russia (Biysk, Bratsk, Chita, Dolgoprudny, Fryazino, Irkutsk, Kazan, Kemerovo, Krasnoyarsk, Khabarovsk, Magadan, Moscow, Murmansk, Nizhny Novgorod, Novosibirsk, Obninsk, Paratunka, Petropavlovsk-Kamchatskii, St. Petersburg, Sarov, Stecolny, Surgut, Tomsk, Troitsk, Tymen, Ulan-Ude, Vladivostok, Volgograd, Voronezh, Yakutsk, Yekaterinburg), Azerbaijan, Belarus, Belgium, Bulgaria, Canada, China, Czech Republic, France, Germany, Hungary, Israel, Japan, Kazakhstan, Korea, Kyrgyz Republic, Norway, Poland, Romania, Spain, UK, Ukraine, USA, and Uzbekistan.

We are grateful to Lavrinova L.N. for her assistance in preparation of the printed Proceedings.
