Volume 7304

Proceedings of SPIE, 0277-786X, v. 7304

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

ix	Conference Committee
xi	Introduction

SESSION 1 BIOLOGICAL SENSING I

7304 02	Pathogenic ecology: Where have all the pathogens gone? Anthrax: a classic case (Keynote Paper) [7304-01] J. L. Kiel, W. W. Walker, C. J. Andrews, A. De Los Santos, R. N. Adams, M. W. Bucholz, Air Force Research Lab. (United States); S. D. McBurnett, Conceptual MindWorks, Inc. (United States); V. Fuentes, K. E. Rizner, K. W. Blount, Air Force Research Lab. (United States)
7304 03	Bacterial mixture analysis with Raman chemical imaging microspectroscopy [7304-02] A. Tripathi, R. E. Jabbour, Science Applications International Corp. (United States); J. A. Guicheteau, S. D. Christesen, D. K. Emge, J. L. Jensen, A. P. Snyder, U.S. Army Edgewood Chemical Biological Ctr. (United States)
7304 05	Oxygen flux as an indicator of physiological stress in aquatic organisms: a real-time biomonitoring system of water quality [7304-04] B. C. Sanchez, G. Yale, R. Chatni, H. G. Ochoa-Acuña, D. M. Porterfield, E. S. McIlmore, M. S. Sepúlveda, Purdue Univ. (United States)

SESSION 3 BIOLOGICAL SENSING II

7304 06	Fast detection and identification of bacteria in potable water [7304-05] C. Heller, U. Reidt, A. Helwig, G. Müller, EADS Deutschland GmbH (Germany); L. Meixner, K. Neumeier, Fraunhofer-Institut für Zuverlässigkeit und Mikrointegration (Germany); P. Lindner, R. Molz, H. Wolf, Univ. Regensburg (Germany); N. Zullei-Seibert, G. Preuß, Institut für Wasserforschung GmbH (Germany); A. Friedberger, EADS Deutschland GmbH (Germany)
7304 07	Infrared signatures of <i>Bacillus</i> bacteria: clear IR distinctions between sporulated and vegetative cells with chemical assignments [7304-06] T. J. Johnson, Pacific Northwest National Lab. (United States); S. D. Williams, Appalachian State Univ. (United States); N. B. Valentine, Y.-F. Su, H. W. Kreuzer-Martin, K. Wahl, J. B. Forrester, Pacific Northwest National Lab. (United States)
7304 08	History of biological aerosol standoff detection at the Applied Physics Laboratory [7304-07] P. G. Fuechsel, M. E. Thomas, J. F. Garten, A. K. Carr, C. C. Carter, The Johns Hopkins Univ. Applied Physics Lab. (United States)
7304 0A	Chamber LIDAR measurements of aerosolized biological simulants [7304-09] D. M. Brown, E. P. Thrush, M. E. Thomas, K. M. Siegrist, K. Baldwin, J. Quizon, C. C. Carter, The Johns Hopkins Univ. Applied Physics Lab. (United States)

SESSION 4 BIOLOGICAL SENSING III

- 7304 0C **Water absorption in a refractive index model for bacterial spores** [7304-12]
K. M. Siegrist, E. Thrush, M. Airola, A. K. Carr, D. M. Limsui, N. T. Boggs, M. E. Thomas, C. C. Carter, The Johns Hopkins Univ. Applied Physics Lab. (United States)
- 7304 0E **Detection and classification of atmospheric aerosols using multi-wavelength LWIR LIDAR** [7304-14]
R. E. Warren, EO-Stat, Inc. (United States); R. G. Vanderbeek, U.S. Army Edgewood Chemical Biological Ctr. (United States); J. L. Ahl, JLA Technology Corp. (United States)
- 7304 0G **Lab-on-a-chip PCR in continuous flow: an ultrafast analytical tool for B-agents** [7304-17]
C. Gärtner, H. Becker, microfluidic ChipShop GmbH (Germany); T. Clemens, Clemens GmbH (Germany); R. Klemm, microfluidic ChipShop GmbH (Germany); M. Klotz, Clemens GmbH (Germany); N. Hlawatsch, microfluidic ChipShop GmbH (Germany)

SESSION 5 CHEMICAL SENSING I

- 7304 0H **Modeling the atmospheric chemistry of TICs (Keynote Paper)** [7304-18]
M. V. Henley, Air Force Research Lab. (United States); D. S. Burns, V. Chynwat, W. Moore, A. Plitz, S. D. Rottmann, ENSCO, Inc. (United States); J. D. Hearn, ARA, Inc. (United States)
- 7304 0I **Range test validation cloud tracking system** [7304-19]
B. R. Cosofret, S. Chang, A. Faghfour, M. L. Finson, C. M. Gittins, T. E. Janov, I. M. Konen, D. Konno, W. J. Marinelli, Physical Sciences Inc. (United States); M. J. Levreault, Vtech Engineering Corp. (United States); R. K. Miyashiro, Research Support Instruments, Inc. (United States); J. O. Jensen, U.S. Army Edgewood Chemical Biological Ctr. (United States)
- 7304 0J **Imaging Fourier transform spectrometry of chemical plumes** [7304-20]
K. C. Bradley, K. C. Gross, G. P. Perram, Air Force Institute of Technology (United States)
- 7304 0K **Development of a MEMS-scale photoacoustic chemical sensor for trace vapor detection** [7304-21]
E. L. Holthoff, P. M. Pellegrino, Army Research Lab. (United States)
- 7304 0L **A new generation of dual input beam spectroradiometers for the standoff detection of chemicals** [7304-22]
L. Moreau, C. Roy, C. Vallières, L. Levesque, M.-A. Soucy, ABB Inc. (Canada); E. Puckrin, H. Lavoie, J.-M. Thériault, Defence Research and Development Canada, Valcartier (Canada)
- 7304 0M **The noncontact detection of nerve agent simulants on U.S. military CARC** [7304-23]
M. W. P. Petryk, Defence Research and Development Canada, Suffield (Canada)

SESSION 6 CHEMICAL SENSING II

- 7304 0N **Dwell time considerations for large area cold plasma decontamination** [7304-24]
G. Konesky, K-Plasma, Ltd. (United States)

- 7304 OP **Imaging open-path Fourier transform infrared spectrometer for 3D cloud profiling** [7304-26]
J. Rentz Dupuis, D. J. Mansur, R. Vaillancourt, D. Carlson, T. Evans, E. Schundler, OPTRA, Inc. (United States); L. Todd, K. Mottus, The Univ. of North Carolina at Chapel Hill (United States)
- 7304 OR **Covalent modification of carbon nanotubes with ferrocene-lysine derivative for electrochemical sensors** [7304-28]
Y. Xiao, The Univ. of Western Ontario (Canada); M. Petryk, Defence Research and Development Canada, Suffield (Canada); P. M. Diakowski, The Univ. Western Ontario (Canada); H.-B. Kraatz, The Univ. of Western Ontario (Canada)

SESSION 7 CHEMICAL SENSING III

- 7304 OS **Compact low-power gas detector for chemical alarms** [7304-29]
D. R. Adkins, P. R. Lewis, Defiant Technologies, Inc. (United States)
- 7304 OT **Sensing with mid-infrared frequency combs: a novel modality for ultrasensitive detection of hazardous materials** [7304-30]
K. Vodopyanov, Stanford Univ. (United States)
- 7304 OU **Picosecond multiphoton STIRAP detection of gas phase species: a test with sodium** [7304-31]
J. B. Johnson, S. Allen, D. R. Britton, J. Burdin, J. L. Hicks, K. Lyon, W. D. Murry, Arkansas State Univ. (United States)
- 7304 OV **Spectroscopic material determination via LIBS and CRDS** [7304-32]
S. T. Griffin, The Univ. of Memphis (United States)

SESSION 8 CURRENT INDUSTRIAL TRENDS IN CBRNE SENSING

- 7304 OW **CBRN mobile laboratories in Italy** [7304-33]
G. Mari, Italian National Institute for Safety and Health (Italy); G. Giraudi, M. Bellino, M. Paziienza, Italian Army 7° NBC Regiment (Italy); C. Garibaldi, Dept. of Fire and Rescue Service and Civil Defense (Italy); C. Lancia, Biotrace Microsafe (Italy)
- 7304 OY **AIRIS standoff multispectral sensor** [7304-35]
B. R. Cosofret, S. Chang, M. L. Finson, C. M. Gittins, T. E. Janov, D. Konno, W. J. Marinelli, Physical Sciences Inc. (United States); M. J. Levreault, Vtech Engineering Corp. (United States); R. K. Miyashiro, Research Support Instruments, Inc. (United States)
- 7304 OZ **Performance status of a small robot-mounted or hand-held, solar-blind, standoff chemical, biological, and explosives (CBE) sensor** [7304-36]
W. F. Hug, R. D. Reid, Photon Systems, Inc. (United States); R. Bhartia, A. L. Lane, Jet Propulsion Lab. (United States)
- 7304 IO **Ultraviolet degradation study of photomultiplier tubes at SURF III** [7304-37]
L. Hum, Naval Surface Warfare Ctr. (United States); P.-S. Shaw, Z. Li, K. R. Lykke, National Institute of Standards and Technology (United States); M. L. Bishop, Naval Surface Warfare Ctr. (United States)

- 7304 11 **Integrated amplification and passivation nanolayers for ultra-high-sensitivity photodetector arrays: application for laser-induced breakdown spectroscopy (LIBS) and Raman spectroscopy** [7304-38]
P. Gardner, Western Carolina Univ. (United States); J. Yao, S. Wang, J. Zhou, K. Li, I. Mokina, B&W Tek, Inc. (United States); M. Lange, Dolce Technologies, LLC (United States); W. Yang, Western Carolina Univ. (United States); L. Peltz, R. Frampton, J. H. Hunt, The Boeing Co. (United States); J. Becker, Cambridge NanoTech, Inc. (United States)

SESSION 9 EXPLOSIVES SENSING I

- 7304 13 **Optimal dynamic detection of explosives (Keynote Paper)** [7304-40]
D. S. Moore, Los Alamos National Lab. (United States); H. Rabitz, Princeton Univ. (United States); S. D. McGrane, M. Greenfield, R. J. Scharff, Los Alamos National Lab. (United States); V. Beltrani, J. Roslund, Princeton Univ. (United States)
- 7304 14 **Remote detection of explosives with multispectral imaging** [7304-41]
H. C. Schau, Meridian Systems LLC (United States)
- 7304 16 **Characterizing and overcoming spectral artifacts in imaging Fourier-transform spectroscopy of turbulent exhaust plumes** [7304-43]
E. A. Moore, K. C. Gross, S. J. Bowen, G. P. Perram, Air Force Institute of Technology (United States); M. Chamberland, V. Farley, J.-P. Gagnon, P. Lagueux, A. Villemaire, Telops, Inc. (Canada)
- 7304 18 **Stand-off detection of trace explosives by infrared photothermal imaging** [7304-45]
M. R. Papantonakis, C. Kendziora, Naval Research Lab. (United States); R. Furstenberg, Naval Research Lab. (United States) and National Research Council (United States); S. V. Stepnowski, Naval Research Lab. (United States); M. Rake, J. Stepnowski, Nova Research, Inc. (United States); R. A. McGill, Naval Research Lab. (United States)

SESSION 10 EXPLOSIVES SENSING II

- 7304 19 **Optical detection of explosives: spectral signatures for the explosive bouquet** [7304-46]
T. Osborn, S. Kaimal, J. Causey, W. Burns, S. Reeve, Arkansas State Univ. (United States)
- 7304 1A **Smart dust infrared sensors for standoff explosives detection** [7304-47]
A. E. Kovalev, M. G. Bray, E. A. Hernandez-Pagan, T. S. Mayer, D. H. Werner, The Pennsylvania State Univ. (United States)
- 7304 1B **Results of a UV TEPS-Raman energetic detection system (TREDs-2) for standoff detection** [7304-48]
R. D. Waterbury, A. R. Ford, J. B. Rose, E. L. Dottery, Alaka'i Consulting & Engineering, Inc. (United States)
- 7304 1C **Standoff detection of hazardous materials using a novel dual-laser pulse technique: theory and experiments** [7304-49]
A. Ford, R. D. Waterbury, J. B. Rose, E. L. Dottery, Alaka'i Consulting & Engineering, Inc. (United States)

SESSION 11 EXPLOSIVES SENSING III

- 7304 1D **Atmosphere issues in detection of explosives and organic residues** [7304-50]
C. G. Brown, M. Baudalet, C. Bridge, M. K. Fisher, College of Optics & Photonics, Univ. of Central Florida (United States); M. Sigman, Univ. of Central Florida (United States); P. J. Dagdigan, The Johns Hopkins Univ. (United States); M. Richardson, College of Optics & Photonics, Univ. of Central Florida (United States)
- 7304 1E **HME powder detection using space sampling and electrochemical sensors** [7304-51]
A. Cagan, Arizona State Univ. (United States); J. Wang, K. Cizek, Univ. of California, San Diego (United States); D. Lu, J. La Belle, Arizona State Univ. (United States)
- 7304 1G **Molecular signal as a signature for detection of energetic materials in filament-induced breakdown spectroscopy** [7304-53]
M. Weidman, M. Baudalet, M. Fisher, C. Bridge, C. Brown, College of Optics & Photonics, Univ. of Central Florida (United States); M. Sigman, Univ. of Central Florida (United States); P. J. Dagdigan, The Johns Hopkins Univ. (United States); M. Richardson, College of Optics & Photonics, Univ. of Central Florida (United States)
- 7304 1H **Detection and classification of explosive compounds utilizing laser ion mobility spectrometry** [7304-54]
A. Langmeier, W. Heep, C. Oberhuettinger, H. Oberpriller, M. Kessler, J. Goebel, G. Mueller, EADS Deutschland GmbH (Germany)

SESSION 12 RADIOLOGICAL AND NUCLEAR SENSING

- 7304 1I **Current trends in nuclear and radiation sensing (Keynote Paper)** [7304-55]
H. R. McHugh, W. Quam, National Security Technologies, LLC (United States)
- 7304 1J **Current status of AWE programmes into stand-off detection of special nuclear material (SNM)** [7304-56]
J. O'Malley, A. Jones, J. Threadgold, P. Adsley, S. Quillin, S. Robertson, M. Owen, G. Weston, L. Cox, A. Thandi, S. Cullen, I. D. Smith, Atomic Weapons Establishment (United Kingdom)
- 7304 1K **AWE development of active interrogation techniques for the detection of SNM** [7304-58]
M. Owen, G. Weston, J. O'Malley, Atomic Weapons Establishment (United Kingdom)
- 7304 1N **Lead-iodide-based nanoscintillators for detection of ionizing radiation** [7304-61]
N. J. Withers, B. A. Akins, A. C. Rivera, J. B. Plumley, G. A. Smolyakov, M. Osiński, CHTM, The Univ. of New Mexico (United States)

Introduction

This year we held our tenth annual conference for Chemical, Biological, Radiological, Nuclear and Explosives (CBRNE) sensing at the SPIE Defense, Security and Sensing (DSS) Symposium in Orlando, Florida. In celebration of our tenth anniversary we had a topical keynote address to open each of the sensing domains.

Johnathan Kiel, of the Air Force Research Laboratory, gave a wonderful talk titled "Pathogenic ecology: Where have all the pathogens gone? Anthrax: a classic case", giving new insight into the lifecycle of natural anthrax outbreaks. Michael V. Henley, also of the Air Force Research Laboratory, discussed advances in modeling the atmospheric chemistry of TICs for chemical sensing. David S. Moore, of Los Alamos National Laboratory, elegantly described new advanced spectroscopic techniques and their application for the optimal dynamic detection of explosives at standoff. And finally, Harold R. McHugh, Department of Energy, discussed the current trends in radiation and nuclear sensing. While over the past decade we have seen continuous advancement in capabilities for the detection and identification of threat agents, these keynote talks point toward the advances we hope to see in the next decade.

Through the CBRNE Sensing Conference, we have seen exciting and promising technologies for point and standoff detection of CBRNE agents. For point detection, there are a variety of classical and emerging technologies, some of which promise affordability and reliability for combined CBE detection. For standoff detection, new sources like tunable quantum cascade lasers and non-linear spectroscopies offer the potential for greater standoff detection. However, the detection and identification of explosives at operationally-significant ranges continues to be a difficult problem to solve.

The strength and importance of the SPIE DSS Symposium is that it provides an unprecedented international forum for authors from government, industry, and academia to gather and address a wide variety of sensing issues and technologies. The authors in these conference proceedings represent nearly an equal one-third partition among those groups and are leaders in each of their respective fields. We want to take this time to particularly thank the members of the program committee for helping us plan, organize, and orchestrate this year's conference. They each work behind scenes all year long to make this conference not only possible, but truly a first rate affair. Whether they come from government laboratories, industry, or academia they bring a tremendous amount of energy and professionalism to help run this conference and make it successful.

We hope that each of you will find value in the proceedings from this year's conference.

Augustus W. Fountain III
Patrick J. Gardner
