Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v	Conference Committee
vii	Introduction

SELF-ORGANIZING, COLLABORATIVE, UNMANNED ISR ROBOTIC TEAMS: JOINT SESSION WITH CONFERENCE 7332

7350 02	Using multiple unmanned systems for a site security task [7350-25] M. O. Anderson, C. W. Nielsen, M. D. McKay, D. C. Wadsworth, R. C. Hruska, J. A. Koudelka, Idaho National Lab. (United States)
---------	---

NET CENTRIC ARCHITECTURES AND SYSTEMS

7350 05	Six net-enabling concepts [7350-02] M. Sevening, The Boeing Co. (United States); B. Marshall, Lockheed Martin (United States)
7350 06	Semantic policy and adversarial modeling for cyber threat identification and avoidance [7350-03] A. DeFrancesco, B. McQueary, Securborator Inc. (United States)
7350 08	Routing architecture and security for airborne networks [7350-05] H. Deng, P. Xie, J. Li, R. Xu, R. Levy, Intelligent Automation, Inc. (United States)
7350 0A	Implementation of an integrated network of various ISR-systems [7350-07] D. Böker, IABG (Germany)
7350 0B	Net-centric transformation to empower the war-fighter through enhanced enterprise data services: exploring the SOA approaches [7350-08] D. L. Farroha, Dept. of Defense (United States); B. S. Farroha, Northrop Grumman Information Systems (United States)
7350 0C	Enabling information sharing through cross domain solutions: architecting the enterprise [7350-09] B. S. Farroha, Northrop Grumman Information Systems (United States); M. M. Whitfield, D. L. Farroha, Dept. of Defense (United States)

SENSORS AND SENSOR NETWORK SYSTEMS

7350 0F	Transitioning mine warfare to network-centric sensor analysis: future PMA technologies and capabilities [7350-13] J. R. Stack, Office of Naval Research (United States); R. S. Guthrie, M. A. Cramer, U.S. Navy (United States)
---------	---

- 7350 OG **On the influence of problem definition in sensor placement optimization** [7350-14]
C. L. Pettit, Naval Academy (United States); S. N. Vecherin, New Mexico State Univ. (United States) and Army Cold Region Research and Engineering Lab. (United States); D. K. Wilson, Army Cold Region Research and Engineering Lab. (United States)
- 7350 OH **WISER: realistic and scalable wireless mobile IP network emulator** [7350-15]
M. A. Kaplan, A. Cichocki, S. Demers, M. A. Fecko, I. Hokelek, S. Samtani, J. W. Unger, M. U. Uyar, Telcordia Technologies, Inc. (United States); B. Greear, Candela Technologies, Inc. (United States)
- 7350 OI **Radar coordination and resource management in a distributed sensor network using emergent control** [7350-17]
B. S. Weir, T. M. Sokol, Johns Hopkins Univ. (United States)
- 7350 OJ **Modeling situational awareness in network centric systems** [7350-18]
E. E. Santos, A. Ojha, J. Korah, Virginia Polytechnic Institute and State Univ. (United States)

INFORMATION MANAGEMENT SERVICES

- 7350 OK **Need-to-know vs. need-to-share: the net-centric dilemma** [7350-19]
R. Levy, M. Lyell, Intelligent Automation, Inc. (United States)
- 7350 OL **Semantic service-oriented architecture for range operations: evolving the role of semantics in the enterprise** [7350-20]
R. Hull, Modus Operandi, Inc. (United States); K. Bimson, Bimson Consulting (United States); R. Hyle, R. Thiebauth, Air Force Research Lab. (United States)
- 7350 OM **QoS enabled dissemination of managed information objects in a publish-subscribe-query information broker** [7350-21]
J. P. Loyall, BBN Technologies (United States); M. Carvalho, Institute for Human and Machine Cognition (United States); A. Martignoni III, The Boeing Co. (United States); D. Schmidt, Vanderbilt Univ. (United States); A. Sinclair, Air Force Research Lab. (United States); M. Gillen, BBN Technologies (United States); J. Edmondson, Vanderbilt Univ. (United States); L. Bunch, Institute for Human and Machine Cognition (United States); D. Corman, The Boeing Co. (United States)
- 7350 ON **Enabling information management systems in tactical network environments** [7350-22]
M. Carvalho, A. Uszok, N. Suri, J. M. Bradshaw, Institute for Human and Machine Cognition (United States); P. J. Ceccio, Northrop Grumman Corp. (United States); J. P. Hanna, A. Sinclair, Air Force Research Lab. (United States)
- 7350 OO **DEBON-air: design, execution and benchmarking of operational networks, airborne** [7350-23]
D. Van Brackle, K. Spivey, C. Hein, Z. Horiatis, P. Rosenfeld, Lockheed Martin Advanced Technology Labs. (United States); A. Sinclair, Air Force Research Lab. (United States)
- 7350 OP **Phoenix: SOA based information management services** [7350-24]
R. Grant, V. Combs, J. Hanna, Air Force Research Lab. (United States); B. Lipa, J. Reilly, Rome Research Corp. (United States)

- 6 Information Management Services
Robert G. Hillman, Air Force Research Laboratory (United States)
Guy Vézina, Defence Research and Development Canada, Valcartier (Canada)

Introduction

These are the Proceedings of the fourteenth Defense Transformation and Net-centric Systems conference. The papers presented at the conference strongly reflect the inexorable trend towards net-centric systems and service oriented architectures. The conference included the following special sessions:

- Self-Organizing Collaborative Unmanned ISR Robotic Teams, held jointly with the Unmanned Systems Technology conference. Collaborative autonomous systems portend the increasing use of autonomic sensor and shooter platforms to perform the D3 (Dirty, Dull and Dangerous) missions in an era of declining force structures.
- Information Management Services, highlighting the research being performed at AFRL.

Looking ahead, we expect net-centric systems to be increasingly deployed in the field as C4ISR systems undergo their own "revolution". We expect to focus in the future on the networking of sensors and shooters from space to the mud, as well as distributed collaborative teams of robotic platforms.

It was gratifying to see the high level of audience interest in this conference. My sincere thanks to the distinguished invited speakers, authors, attendees, and my associates on the program committee for another successful conference.

Raja Suresh
