Volume 7364

Proceedings of SPIE, 0277-786X, v. 7364

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Nanotechnology IV*, edited by Achim Wixforth, Axel Lorke, Friedrich C. Simmel, Proceedings of SPIE Vol. 7364 (SPIE, Bellingham, WA, 2009) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Committee
ix	Introduction

SESSION 1 CHARACTERISATION

7364 02	Electronic and excitonic properties of self-assembled semiconductor quantum rings (Invited Paper) [7364-01] V. M. Fomin, Univ. Duisburg-Essen (Germany), Univ. Antwerpen (Belgium), Technische Univ. Eindhoven (Netherlands), and State Univ. of Moldova (Moldova); V. N. Gladilin, Univ. Antwerpen (Belgium) and State Univ. of Moldova (Moldova); J. T. Devreese, Univ. Antwerpen (Belgium) and Technische Univ. Eindhoven (Netherlands); J. H. Blokland, P. C. M. Christianen, J. C. Maan, Radboud Univ. Nijmegen (Netherlands); A. G. Taboada, D. Granados, J. M. García, Instituto de Microelectrónica de Madrid (Spain); N. A. J. M. Kleemans, H. C. M. van Genuchten, M. Bozkurt, P. M. Koenraad, Technische Univ. Eindhoven (Netherlands)
7364 03	Characterization of nano-thin films and membranes by use of atomic force acoustic microscopy methods [7364-03] M. Kopycinska-Müller, A. Striegler, Technische Univ. Dresden (Germany) and Fraunhofer-Institut für Zerstörungsfreie Prüfverfahren (Germany); B. Köhler, N. Meyendorf, Fraunhofer-Institut für Zerstörungsfreie Prüfverfahren (Germany); K.-J. Wolter, Technische Univ. Dresden (Germany)

SESSION 2 FABRICATION I

7364 05	Local charge storage and decay mechanism in silica [7364-05] H. Graaf, C. Maedler, C. von Borczyskowski, Chemnitz Univ. of Technology (Germany)
7364 06	Spin-dependent transport in hard superparamagnetic C:Ni nanocomposites [7364-06] S. Zhou, G. Abrasonis, A. Mücklich, K. Potzger, J. Fassbender, M. Helm, H. Schmidt, Forschungszentrum Dresden-Rossendorf (Germany)

SESSION 3 SELF-ASSEMBLY AND NANOTEMPLATES

7364 09	Nanostructure formation driven by local protonation of polymer thin films [7364-09] C. Maedler, H. Graaf, Chemnitz Univ. of Technology (Germany); S. Chada, M. Yan, A. La Rosa, Portland State Univ. (United States)
7364 0A	Creation of functionalized nanostructures on alkyl terminated silicon by selective binding of dye molecules [7364-10] T. Baumgärtel, H. Graaf, C. von Borczyskowski, Chemnitz Univ. of Technology (Germany)

SESSION 4 NOVEL DEVICES

- 7364 0B **Programmable lab-on-a-chip system for single cell analysis (Invited Paper)** [7364-11]
S. Thalhammer, Helmholtz Zentrum München, GmbH (Germany)
- 7364 0C **Attainability of negative differential conductance in tunnel Schottky structures with 2D channels: theory and experiment** [7364-12]
M. N. Feiginov, Technische Univ. Darmstadt (Germany); I. N. Kotel'nikov, Institute of Radioengineering and Electronics (Russian Federation)
- 7364 0D **Bio-mimicking rotary nanomotors** [7364-13]
A. Smirnov, The Institute of Physical and Chemical Research (RIKEN) (Japan) and The Univ. of Michigan (United States); L. Mourokh, Queens College, CUNY (United States); S. Savel'ev, The Institute of Physical and Chemical Research (RIKEN) (Japan) and Loughborough Univ. (United Kingdom); F. Nori, The Institute of Physical and Chemical Research (RIKEN) (Japan) and Univ. of Michigan (United States)

SESSION 5 HYBRID NANOSYSTEMS

- 7364 0F **Surface reactions of (sub)monolayers of small organic species on oxidized silicon** [7364-15]
N. Salingue, D. Lingenfelter, P. Prunici, P. Hess, Univ. of Heidelberg (Germany)
- 7364 0G **Luminescence and photovoltaic effect of multilayer structures based on CdSe and CdSe/ZnS nanoparticles embedded into organic semiconductors** [7364-16]
A. A. Chistyakov, S. V. Dayneko, Moscow Engineering Physics Institute (Russian Federation); V. A. Oleinikov, Shemyakin and Ovchinnikov Institute of Bioorganic Chemistry (Russian Federation); A. R. Tameev, M. G. Tedoradze, Institute of Physical Chemistry and Electrochemistry (Russian Federation); K. V. Zakharchenko, Moscow Engineering Physics Institute (Russian Federation); V. I. Zolotarevskiy, Institute of Physical Chemistry and Electrochemistry (Russian Federation)

SESSION 6 FABRICATION II

- 7364 0I **Patterning of Si substrates for Ge/Si(001) islands grown by low-energy plasma enhanced CVD** [7364-18]
M. Bollani, CNISM-CNR (Italy), L-Ness (Italy), and Univ. Milano Bicocca (Italy); D. Chrastina, L-NESS (Italy) and Politecnico di Milano (Italy); A. Fedorov, CNISM-CNR (Italy), L-NESS (Italy), and Politecnico di Milano (Italy); G. Isella, R. Sordan, L-NESS (Italy) and Politecnico di Milano (Italy)
- 7364 0K **Mesoscale honeycomb films for templating inorganic nanomaterials and microspheres** [7364-20]
K. Kon, O. Karthaus, Chitose Institute of Science and Technology (Japan)
- 7364 0L **Heterojunction solar cell fabricated by spin-coating of a CNT/PEDOT:PSS heteroemitter on top of a crystalline silicon absorber** [7364-21]
H.-C. Neitzert, Salerno Univ. (Italy); S. Schwertheim, K. Meusinger, M. Leinhos, W. R. Fahrner, Hagen Univ. (Germany)

SESSION 7 NANOPARTICLES/NANOPATTERNS

- 7364 0N **Nanoparticle contamination control for EUVL-technology: especially for photomasks in carriers and scanners** [7364-23]
H. Fissan, C. Asbach, T. A. J. Kuhlbusch, Institute of Energy and Environmental Technology e.V. (Germany); J. Wang, D. Y. H. Pui, Univ. of Minnesota (United States); S.-J. Yook, Hanyang Univ. (Korea, Republic of); J. H. Kim, The Univ. of Seoul (Korea, Republic of)
- 7364 0O **Scanning probe measurements of CuI doped single-walled carbon nanotubes** [7364-24]
A. A. Zhukov, V. K. Gartman, Institute of Solid State Physics (Russian Federation); A. A. Eliseev, Lomonosov Moscow State Univ. (Russian Federation)
- 7364 0P **Vortex dynamics in high- T_c superconducting films with arrays of antidots** [7364-25]
V. M. Fomin, Univ. Duisburg-Essen (Germany) and Forschungszentrum Jülich GmbH (Germany); R. Wördenweber, Forschungszentrum Jülich GmbH (Germany)

SESSION 8 NANOSCALE TRANSPORT

- 7364 0Q **Experimental realization of a Fabry-Perot-type interferometer by co-propagating edge states in the integer and fractional quantum Hall effect regimes (Invited Paper)** [7364-26]
E. V. Deviatov, Institute of Solid State Physics (Russian Federation); B. Marquardt, A. Lorke, Univ. Duisburg-Essen (Germany); G. Biasiol, Lab. Nazionale TASC, INFN-CNR (Italy); L. Sorba, Lab. Nazionale TASC, INFN-CNR (Italy) and Scuola Normale Superiore di Pisa (Italy)

Author Index

Conference Committee

Symposium Chair

Thomas Becker, EADS Deutschland GmbH (Germany)

Symposium Cochairs

Gerhard Krötz, Hochschule Kempten (Germany)

José López Feliciano, Universidad de Las Palmas de Gran Canaria (Spain)

Conference Chair

Achim Wixforth, Universität Augsburg (Germany)

Conference Cochairs

Axel Lorke, Universität Duisburg-Essen (Germany)

Friedrich C. Simmel, Technische Universität München (Germany)

Program Committee

Robert H. Blick, University of Wisconsin, Madison (United States)

V. G. Dolgoplov, Institute of Semiconductor Physics (Russian Federation)

Klaus Ensslin, ETH Zürich (Switzerland)

Alfred Gold, Centre d'Elaboration de Matériaux et d'Etudes Structurales (France)

Alexander O. Govorov, Ohio University (United States)

Kenji Ikushima, The University of Tokyo (Japan)

Poul E. Lindelof, Nano-Science Center (Denmark)

Joerg K. N. Lindner, Universität Augsburg (Germany)

Harri K. Lipsanen, Helsinki University of Technology (Finland)

Paolo Lugli, Technische Universität München (Germany)

Pierre M. Petroff, University of California/Santa Barbara (United States)

Mansour Shayegan, Princeton University (United States)

Anatoly Sidorenko, University Chisinau (Moldova)

Martin Stutzmann, Technische Universität München (Germany)

Richard J. Warburton, Heriot-Watt University (United Kingdom)

Andreas D. Wieck, Ruhr-Universität Bochum (Germany)

Session Chairs

- 1 Characterisation
Achim Wixforth, Universität Augsburg (Germany)
- 2 Fabrication I
Achim Wixforth, Universität Augsburg (Germany)
- 3 Self-assembly and Nanotemplates
Axel Lorke, Universität Duisburg-Essen (Germany)
- 4 Novel Devices
Axel Lorke, Universität Duisburg-Essen (Germany)
- 5 Hybrid Nanosystems
Vladimir M. Fomin, Universiteit Antwerpen (Belgium)
- 6 Fabrication II
Alexey E. Zhukov, Ioffe Physico-Technical Institute (Russian Federation)
- 7 Nanoparticles/Nanopatterns
Eduard V. Deviatov, Institute of Solid State Physics (Russian Federation)
- 8 Nanoscale Transport
Heinz J. Fissan, Institut für Energie- und Umwelttechnik e.V. (Germany)

Introduction

A conference entitled 'Microtechnologies for the next Millennium' must include a focus on nanotechnology, a field which has certainly matured beyond its infancy. Novel fabrication techniques and hybridization of different materials reveal a wealth of new applications and experimental findings that could not have been envisioned a few years ago.

The SPIE Europe Nanotechnology conference 2009 brought together research scientists, engineers, and visionaries from this exciting field. In view of the fact that nanotechnology was not represented by a single headline, six different sessions were set up which gave special emphasis to technologies and techniques that are serving to bridge the fields of electronics, mechanics, photonics, and biology (soft matter, generally).

The following selection of papers nicely reflects the state of nanotechnology and nanoscience in general. I personally wish to thank all the attendees and authors for their great mix of theories, mature scientific results, and visionary ideas which made the conference a true 'must attend' event for players in the field.

Achim Wixforth
