Volume 7368

Proceedings of SPIE-OSA Biomedical Optics, 1605-7422, v. 7368

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Paper Numbering: Proceedings of SPIE-OSA Biomedical Optics follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. In this six-digit CID article numbering system:

- The first four digits correspond to the volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

ix	Conference Committee
xi	Introduction

OPHTHALMOLOGY/CARDIOLOGY

7368 02	Clinical results of fluorescence lifetime imaging in ophthalmology [7368-76] D. Schweitzer, S. Quick, Univ. of Jena (Germany); M. Klemm, Institute of Biomedical Engineering and Informatics, Technical Univ. Ilmenau (Germany); M. Hammer, S. Jentsch, J. Dawczynski, Univ. of Jena (Germany); W. Becker, Becker/Hickl GmbH (Germany)
7368 04	Method for simultaneous detection of functionality and tomography [7368-14] D. Schweitzer, Univ. of Jena (Germany); M. Klemm, Institute of Biomedical Engineering and Informatics, Technical Univ. Ilmenau (Germany); M. Hammer, S. Jentsch, Univ. of Jena (Germany); F. Schweitzer, Thueringenklinik Poessneck (Germany)
7368 05	Spectroscopic imaging of the retinal vessels using a new dual-wavelength [7368-82] S. H. Rasta, Tabriz Univ. of Medical Sciences (Iran, Islamic Republic of) and Univ. of Aberdeen (United Kingdom); A. Manivannan, P. F. Sharp, Univ. of Aberdeen (United Kingdom)
7368 08	Hyperspectral characterization of atherosclerotic plaques [7368-71] L. L. Randeberg, E. L. P. Larsen, A. Aksnes, O. A. Haugen, L. O. Svaasand, Norwegian Univ. of Science and Technology (Norway)

SKIN DIAGNOSTICS II

7368 0C	Correction of Raman signals for tissue optical properties [7368-42] C. Reble, Laser und Medizin Technologie Gmbh, Berlin (Germany) and Technical Univ. Berlin (Germany); I. Gersonde, J. Helfmann, Laser und Medizin Technologie Gmbh, Berlin (Germany); S. Andree, Laser und Medizin Technologie Gmbh, Berlin (Germany) and Technical Univ. Berlin (Germany); G. Illing, Laser und Medizin Technologie Gmbh, Berlin (Germany)
7368 0D	Multispectral dermoscope [7368-12] D. Kapsokalyvas, LENS, Univ. of Florence (Italy); N. Bruscino, G. Cannarozzo, V. de Giorgi, T. Lotti, Univ. of Florence (Italy); F. S. Pavone, LENS, Univ. of Florence (Italy)
7368 0F	Spatially resolved bimodal spectroscopy for classification/evaluation of mouse skin inflammatory and pre-cancerous stages [7368-75] G. Díaz-Ayil, M. Amouroux, F. Clanché, Y. Granjon, W. C. P. M. Blondel, Ctr. de Recherche en Automatique de Nancy, CNRS, Nancy-Univ. (France)

- 7368 0I **Spatially resolved reflectance used to deduce absorption and reduced scattering coefficients** [7368-48]
S. Andree, C. Reble, Laser- und Medizin-Technologie GmbH, Berlin (Germany) and Institut für Optik und Atomare Physik der Technischen Univ. Berlin (Germany); J. Helfmann, I. Gersonde, G. Illing, Laser- und Medizin-Technologie GmbH, Berlin (Germany)

BIOSPECTROSCOPY AND POINT-OF-CARE DIAGNOSTICS I

- 7368 0P **Multiplexed diagnostics and spectroscopic ruler applications with terbium to quantum dots FRET** [7368-78]
D. Geißler, Univ. Potsdam (Germany); N. G. Butlin, Lumiphore Inc. (United States); D. Hill, H.-G. Löhmannsröben, Univ. Potsdam (Germany); N. Hildebrandt, Fraunhofer Institute for Applied Polymer Research (Germany)
- 7368 0Q **A membrane-associated FRET sensor for detection of apoptosis** [7368-18]
H. Schneckenburger, M. Wagner, P. Weber, T. Bruns, Hochschule Aalen, Institut für Angewandte Forschung (Germany); H. Steuer, B. Angres, Naturwissenschaftliches und Medizinisches Institut an der Univ. Tübingen (Germany)

BIOSPECTROSCOPY AND POINT-OF-CARE DIAGNOSTICS II

- 7368 0R **The implementation of an isotope-edited internal standard for quantification of lowest drug concentrations using surface enhanced Raman spectroscopy (SERS) in a lab on a chip device** [7368-66]
A. März, P. Rösch, Friedrich-Schiller-Univ. Jena (Germany); T. Henkel, Institute of Photonic Technology (Germany); J. Popp, Friedrich-Schiller-Univ. Jena (Germany) and Institute of Photonic Technology (Germany)
- 7368 0U **UTI diagnosis and antibiogram using Raman spectroscopy** [7368-67]
E. Kastanos, Univ. of Nicosia (Cyprus); A. Kyriakides, K. Hadjigeorgiou, C. Pitris, Univ. of Cyprus (Cyprus)
- 7368 0W **Microinjection based 3-dimensional imaging of subcellular structures with digital holographic microscopy** [7368-10]
C. Rommel, S. Przibilla, C. Dierker, G. von Bally, B. Kemper, J. Schneckenburger, Univ. of Muenster (Germany)

MINIMALLY INVASIVE DIAGNOSTICS II

- 7368 10 **Design and testing of diffuse reflectance sensor for continuous monitoring of cutaneous blood perfusion** [7368-25]
P. Zakharov, M. S. Talary, A. Caduff, Solianis Monitoring AG (Switzerland)
- 7368 11 **Investigation of optimum wavelengths for oximetry** [7368-50]
A. K. C. Huong, I. M. Stockford, J. A. Crowe, S. P. Morgan, Univ. of Nottingham (United Kingdom)

- 7368 12 **Using Pd-porphyrin phosphorescence and photodynamic oxygen consumption to study oxygen diffusion in cells** [7368-23]
M. A. Weston, M. S. Patterson, Juravinski Cancer Ctr. (Canada) and McMaster Univ. (Canada)
- 7368 13 **Imaging of cortical haemoglobin concentration with RGB reflectometry** [7368-30]
A. Steimers, M. Gramer, B. Ebert, Univ. of Applied Sciences Koblenz (Germany); M. Fächtemeier, G. Royle, C. Leithner, J. P. Dreier, Neurologische Klinik, Charité Universitätsmedizin Berlin (Germany); U. Lindauer, Neurologische Klinik, Charité Universitätsmedizin Berlin (Germany) and Technische Univ. München (Germany); M. Kohl-Bareis, Univ. of Applied Sciences Koblenz (Germany)
- 7368 14 **Using broadband spatially resolved NIRS to assess muscle oxygenation during altered running protocols** [7368-73]
G. Koukourakis, M. Vafiadou, A. Steimers, D. Geraskin, Univ. of Applied Sciences Koblenz (Germany); P. Neary, Univ. of Regina (Canada); M. Kohl-Bareis, Univ. of Applied Sciences Koblenz (Germany)
- 7368 15 **A compact time-resolved system for NIR spectroscopy** [7368-57]
R. Re, D. Contini, M. Caffini, Politecnico di Milano (Italy); L. Spinelli, IFN-CNR, Istituto di Fotonica e Nanotecnologie (Italy); R. Cubeddu, Politecnico di Milano (Italy), ULTRAS-INFM-CNR, National Lab. for Ultrafast and Ultraintense Optical Science (Italy), and IFN-CNR, Istituto di Fotonica e Nanotecnologie (Italy); A. Torricelli, Politecnico di Milano (Italy)
- 7368 16 **Tissue oxygenation during exercise measured with NIRS: a quality control study** [7368-58]
E. Gerz, D. Geraskin, Univ. of Applied Sciences Koblenz (Germany); P. Neary, Univ. of Regina (Canada); J. Franke, P. Platen, Ruhr Univ. Bochum (Germany) and German Sport Univ. (Germany); M. Kohl-Bareis, Univ. of Applied Sciences Koblenz (Germany)
- 7368 17 **Quantitative analysis of arterial tissue with optical coherence tomography** [7368-64]
C. Flueraru, D. P. Popescu, Y. Mao, S. Chang, M. G. Sowa, National Research Council Canada (Canada)

CLINICAL AND PRECLINICAL TISSUE CHARACTERIZATION I

- 7368 18 **Time-resolved transmittance spectroscopy of breast in vivo up to 1100 nm: test on 10 volunteers** [7368-16]
P. Taroni, Istituto di Fotonica e Nanotecnologie, CNR (Italy) and Politecnico di Milano (Italy); A. Bassi, National Lab. for Ultrafast and Ultraintense Optical Science, CNR (Italy) and Politecnico di Milano (Italy); D. Comelli, Istituto di Fotonica e Nanotecnologie, CNR (Italy); R. Cubeddu, A. Pifferi, National Lab. for Ultrafast and Ultraintense Optical Science, CNR (Italy) and Politecnico di Milano (Italy)

- 7368 1C **Automated interpretation of scatter signatures aimed at tissue morphology identification** [7368-09]
P. B. Garcia-Allende, Univ. of Cantabria (Spain); V. Krishnaswamy, K. S. Samkoe, Dartmouth College (United States); P. J. Hoopes, B. W. Pogue, Dartmouth College (United States) and Dartmouth Medical School (United States); O. M. Conde, J. M. López-Higuera, Univ. of Cantabria (Spain)
- 7368 1E **Fractal processing of pathological changed muscular tissue images** [7368-56]
V. P. Ungurian, O. Ya. Wanchuliak, Bukovinian State Medical Univ. (Ukraine)

CLINICAL AND PRECLINICAL TISSUE CHARACTERIZATION II

- 7368 1G **Optical spectroscopy for clinical detection of pancreatic cancer** [7368-80]
M. Chandra, R. H. Wilson, Univ. of Michigan (United States); J. Scheiman, D. Simeone, B. McKenna, J. Purdy, Univ. of Michigan Medical School (United States); M.-A. Mycek, Univ. of Michigan (United States) and Univ. of Michigan Medical School (United States)
- 7368 1I **Bladder cancer detection by fluorescence imaging with Hexvix: optimization of the excitation light during high magnification cystoscopy** [7368-13]
B. Lovisa, Swiss Federal Institute of Technology, EPFL-ISIC (Switzerland); P. Jichlinski, D. Aymon, CHUV Univ. Hospital (Switzerland); B.-C. Weber, Richard Wolf GmbH (Germany); H. van den Bergh, G. Wagnières, Swiss Federal Institute of Technology, EPFL-ISIC (Switzerland)
- 7368 1J **New approach in prostate Gleason grading using fluorescence microscopic imaging** [7368-31]
E. Alexandratou, D. Yova, D. Gorpas, National Technical Univ. of Athens (Greece)

POSTER SESSION

- 7368 1N **Time-resolved diffuse optical spectroscopy: a differential absorption approach** [7368-05]
P. Taroni, Istituto di Fotonica e Nanotecnologie, CNR (Italy) and Politecnico di Milano (Italy); A. Bassi, National Lab. for Ultrafast and Ultraintense Optical Science, CNR (Italy) and Politecnico di Milano (Italy); L. Spinelli, Istituto di Fotonica e Nanotecnologie, CNR (Italy); R. Cubeddu, A. Pifferi, National Lab. for Ultrafast and Ultraintense Optical Science, CNR (Italy), Istituto Italiano di Tecnologia (Italy), and Politecnico di Milano (Italy)
- 7368 1Q **Correlation and fractal structure of Jones matrices of human bile secret** [7368-07]
A. G. Ushenko, Chernivtsi National Univ. (Ukraine); A. I. Fediv, Yu. F. Marchuk, Bukovinian State Medical Univ. (Ukraine)
- 7368 1S **Singular structure of polarization images of bile secret in diagnostics of human physiological state** [7368-08]
A. G. Ushenko, Chernivtsi National Univ. (Ukraine); A. I. Fediv, Yu. F. Marchuk, Bukovinian State Medical Univ. (Ukraine)
- 7368 1T **Angular remission and reflection from rough turbid biological media** [7368-41]
F. Foschum, R. Michels, A. Kienle, Institut für Lasertechnologien in der Medizin und Meßtechnik (Germany)

- 7368 1U **Determination of the optical properties of anisotropic turbid media using an integrating sphere** [7368-40]
M. T. Heine, F. Foschum, A. Kienle, Institut für Lasertechnologien in der Medizin und Meßtechnik (Germany)
- 7368 1V **Fluorescence lifetime correlation spectroscopy for precise concentration detection in vivo by background subtraction** [7368-19]
M. Gärtner, J. Mütze, T. Ohrt, P. Schwille, BIOTEC, Dresden Univ. of Technology (Germany)
- 7368 1W **Darkfield scattering spectroscopic microscopy evaluation using polystyrene beads** [7368-38]
M. Schmitz, R. Michels, A. Kienle, Institut für Lasertechnologien in der Medizin und Meßtechnik (Germany)
- 7368 1X **Flexible ATR probe for endoscopic FT-IR measurement using hollow optical fiber** [7368-47]
Y. Matsuura, S. Kino, Tohoku Univ. (Japan)
- 7368 1Y **Multifunctional laser noninvasive spectroscopic system for medical diagnostics and some metrological provisions for that** [7368-49]
D. A. Rogatkin, L. G. Lapaeva, E. N. Petritskaya, The M. Vladimirsky Moscow Regional Research and Clinical Institute (Russian Federation); V. V. Sidorov, LAZMA, Ltd. (Russian Federation); V. I. Shumskiy, The M. Vladimirsky Moscow Regional Research and Clinical Institute (Russian Federation)
- 7368 1Z **IR analysis of CaOx kidney calculi** [7368-79]
O. M. Bordun, O. Z. Drobchak, Ivan Franko National Univ. of Lviv (Ukraine)
- 7368 20 **Development of a modified transillumination breast spectroscopy (TIBS) system for population-wide screening** [7368-35]
E. J. Walter, L. Lothar, Univ. Health Network (Canada) and Univ. of Toronto (Canada)
- 7368 21 **Soft tissue differentiation by diffuse reflectance spectroscopy** [7368-63]
A. Zam, F. Stelzle, E. Nkenke, Friedrich-Alexander-Univ. of Erlangen-Nuremberg (Germany); K. Tangermann-Gerk, M. Schmidt, Bavarian Laser Ctr. (Germany); W. Adler, A. Douplik, Friedrich-Alexander-Univ. of Erlangen-Nuremberg (Germany)
- 7368 22 **Interaction of sunscreen TiO₂ nanoparticles with skin and UV light: penetration, protection, phototoxicity** [7368-20]
A. Popov, Univ. of Oulu (Finland) and Lomonosov Moscow State Univ. (Russian Federation); J. Lademann, Humboldt Univ. Berlin (Germany); A. Priezzhev, Lomonosov Moscow State Univ. (Russian Federation); R. Myllylä, Univ. of Oulu (Finland)
- 7368 23 **Multispectral autofluorescence diagnosis of non-melanoma cutaneous tumors** [7368-11]
E. Borisova, Institute of Electronics (Bulgaria); D. Dogandjiiska, Institute of Electronics (Bulgaria) and Sofia Univ. (Bulgaria); I. Bliznakova, L. Avramov, Institute of Electronics (Bulgaria); E. Pavlova, National Oncological Ctr. (Bulgaria) and Univ. Hospital for Active Treatment in Oncology (Bulgaria); P. Troyanova, Univ. Hospital for Active Treatment in Oncology (Bulgaria)

- 7368 24 **5-ALA/PpIX fluorescence detection of gastrointestinal neoplasia** [7368-51]
E. G. Borisova, Institute of Electronics (Bulgaria); B. Vladimirov, I. Terziev, Univ. Hospital Queen Giovanna (Bulgaria); R. Ivanova, Univ. Hospital Queen Giovanna (Bulgaria) and Univ. Hospital of Endocrinology (Bulgaria); L. Avramov, Institute of Electronics (Bulgaria)
- 7368 28 **Efficiency of fluorescence coupling into planar waveguides** [7368-26]
R. Bäumner, K. Bodensiek, A. Selle, T. Fricke-Begemann, J. Ihlemann, G. Marowsky, Laser-Lab. Göttingen e.V. (Germany)
- 7368 29 **Discrimination of microorganisms and cells in tissue engineering by Raman spectroscopy** [7368-46]
S. Koch, M. Dreiling, M. Gutekunst, Fraunhofer Institute for Interfacial Engineering and Biotechnology (Germany); C. Bolwien, Fraunhofer Institute for Physical Measurement Techniques (Germany); H. Thielecke, Fraunhofer Institute for Biomedical Engineering (Germany); H. Mertsching, Fraunhofer Institute for Interfacial Engineering and Biotechnology (Germany)
- 7368 2A **A method for determining nutritional facts with Raman spectroscopy** [7368-17]
C. Moustakas, C. Pitris, Univ. of Cyprus (Cyprus)
- 7368 2C **Changes in scalp and cortical blood flow during hyperventilation measured with diffusing-wave spectroscopy** [7368-22]
J. Li, M. Ninck, T. Gisler, Univ. of Konstanz (Germany)
- 7368 2D **Sleep apnea termination decreases cerebral blood volume: a near-infrared spectroscopy case study** [7368-34]
J. Virtanen, Helsinki Univ. of Technology (Finland) and BioMag Lab., HUSLAB, Helsinki Univ. Hospital (Finland); T. Noponen, Turku PET Ctr., Turku Univ. Hospital (Finland); T. Salmi, J. Toppila, Helsinki Univ. Hospital (Finland); P. Meriläinen, Helsinki Univ. of Technology (Finland)
- 7368 2F **Investigation of arterial inflow and venous capacitance in human skin by use of RGB images** [7368-32]
I. Nishidate, H. Kaneko, Tokyo Univ. of Agriculture and Technology (Japan); T. Maeda, Y. Aizu, Muroran Institute of Technology (Japan); T. Yuasa, K. Niizeki, Yamagata Univ. (Japan)

Clinical and Preclinical Tissue Characterization I
Katarina Svanberg, Lund University Medical Laser Center (Sweden)

Clinical and Preclinical Tissue Characterization II
Katarina Svanberg, Lund University Medical Laser Center (Sweden)

Introduction

In recent years spectroscopy has gained further importance in the field of biophotonics and has become a very helpful tool for biomedical research. The advancement of the techniques have opened the door for a variety of most valuable clinical applications, e.g. for ophthalmology, skin, point of care and minimally invasive diagnostics as well as for the characterization of tissue. Spectroscopic methods provide detailed structural and functional information on organs, tissues, and body liquids. Starting from basic biomedical applications to achieve a full understanding of the principles of cellular and even sub-cellular processes, a full picture on the molecular level can be gained to comprehend the interplay which leads to the transformation of normal to diseased tissue, e.g. the development of malignant tumors. Such an understanding of the genesis of diseases will eventually lead to the development of new and more effective treatment modalities. This will require an interdisciplinary platform for physicians, physicists, biologists, chemists, and related researchers. Such a platform is provided by the conference on Clinical and Biomedical Spectroscopy.

The conference in the framework of the European Conferences on Biomedical Optics (ECBO) consisted this year of 80 presentations, 5 of which were invited talks, the invitation of which was supported by the European Network of Excellence Photonics4Life. Niek van Hulst from the ICFO-the Institute of Photonic Sciences, Barcelona, gave a presentation on the preparation and properties of nanoantennas, which allow the detection of single fluorescent molecules and promise applications in nano-scale optical microscopy. Roberto Pini from the Institute of Applied Physics, Florence, introduced the surgical technique of laser welding employed for ocular tissues and presented a microscopic analysis especially of the modifications induced in collagen by the laser welding. Paul French from Imperial College, London presented a multitude of clinical applications of multi-dimensional fluorescence imaging including rapid fluorescence lifetime imaging. Francesco Pavone from the University of Florence presented examples where the use of second harmonic generation imaging is able to furnish information about the order of structures and the structural dynamics of molecules up to the atomic scale. Finally, Nimmi Ramanujam from Duke University, Durham, gave an overview of photonics based tools that can provide insights into the metabolic, physiologic, and morphological properties of breast tissue for translational applications in breast cancer.

The conference started with a session about the application of spectroscopic techniques for ophthalmology and cardiology including fluorescence lifetime imaging, e.g. for the differentiation of healthy tissue from that suffering from age-related macular degeneration, multimodal multiphoton imaging techniques for imaging the anterior segment of intact eye tissue and software evaluation methods for the hyperspectral characterization of atherosclerotic plaques. This session was followed by two sessions focusing on skin diagnostics. The presentations in these sessions were centered on the investigation of skin

cancer and precancerous stages employing multiphoton tomography, elastic scattering spectroscopy, diffuse reflectance, and fluorescence spectroscopy. Other presentations reported about the age determination of bruises and blood stains. The skin diagnostic sessions were followed by two sessions on biospectroscopy and point-of-care diagnostics. The first of these sessions concentrated on biochips and sensors for a variety of different applications, e.g. cardiac marker detection, detection of specific proinflammatory substances and the detection of apoptosis, but also fundamental aspects were covered like the optimal fabrication and tailoring of gold nano- and microstructures for the generation and employment of surface plasmon resonances for imaging applications. The second session was focused on different Raman spectroscopic techniques for such diverse applications as lowest drug concentration determination, localization and identification of bacteria and the investigation of biomaterials on a nanometer scale employing tip enhanced Raman spectroscopy. The minimally invasive diagnostics sessions were as diverse concerning the applications as with regard to applications. One main topic that could be identified was concerned with investigations of blood and blood oxygenation mostly with near infrared spectroscopy but also by employing the visible part of the spectrum. The two final sessions of the conference consisted of presentations about spectroscopy for clinical and preclinical tissue characterization. In the focus of most of the presentations was again cancer, especially breast cancer and a variety of other cancer types like pancreatic, cervix, and bladder cancer, to name just a few. The spectroscopic methods were applied for screening, biopsy as well as for tumor border delineation.

A majority of the presenters at the clinical and biomedical spectroscopy subconference of the ECBO submitted manuscripts which can be found on the subsequent pages. We hope that they will stimulate the reader to make her or his own contribution to this exciting and growing field within biophotonics.
