SPIE.

Event: Speckle 2010, 2010, Florianapolis, Brazil

PROCEEDINGS OF SPIE

Speckle 2010: Optical Metrology

**Armando Albertazzi Gonçalves, Jr.
Guillermo H. Kaufmann**
Editors

**13–15 September 2010
Florianópolis, Brazil**

Organized by
Universidade Federal de Santa Catarina—Labmetro (Brazil)

Sponsored by
CNPq— Conselho Nacional de Desenvolvimento Científico e Tecnológico (Brazil)
CAPES— Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (Brazil)
FAPESC— Fundação de Apoio à Pesquisa Científica e Tecnológica do Estado de Santa Catarina (Brazil)
Cidepe—Centro Industrial de Equipamentos de Ensino e Pesquisa (Brazil)

Cooperating Organizations
Society for Experimental Mechanics (United States)
Optical Society of America (United States)
EOS—European Optical Society

Published by
SPIE

Volume 7387

Proceedings of SPIE, 0277-786X, v. 7387

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/10/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

xi	<i>Conference Committees</i>
xv	<i>Introduction</i>

SPECKLE AS A TOOL IN SECURITY TECHNIQUES

7387 02	Optimal sampling and quantization of dynamic speckles for object identification [7387-43] T. Okamoto, J. Mizobe, Kyushu Institute of Technology (Japan)
7387 03	Image hiding using optical interference [7387-28] Y. Zhang, W. Wang, Capital Normal Univ. (China)

FRINGE AND DATA ANALYSIS, PHASE EVALUATION, AND UNWRAPPING IN SPECKLE METROLOGY

7387 04	Spatiotemporal 3D Fourier transform evaluation of speckle interferogram sequences in double-pulsed TV holography [7387-54] C. Trillo, A. F. Doval, Univ. de Vigo (Spain)
7387 05	Three-dimensional directional wavelet transform: a new approach for phase retrieval of temporal speckle pattern interferometry signals [7387-01] A. Federico, Instituto Nacional de Tecnología Industrial (Argentina); G. H. Kaufmann, Instituto de Física, Univ. Nacional de Rosario (Argentina)
7387 06	Phase shift error compensation method for digital holography using statistics of speckle field [7387-62] H. Kadono, Ctr. for Environmental Science in Saitama (Japan) and Saitama Univ. (Japan); M. Kataoka, V. D. Madjarova, Saitama Univ. (Japan)
7387 07	Speckle amplitude and phase recovering with bandwidth-extended digital holographic algorithms [7387-31] P. Picart, LAUM, CNRS, Univ. du Maine (France) and ENSIM (France); P. Tankam, LAUM, CNRS, Univ. du Maine (France); Z. Peng, Kunming Univ. of Science and Technology (China); J. C. Li, ENSIM (France) and Kunming Univ. of Science and Technology (China)
7387 08	Multiwavelength non-incremental laser Doppler distance sensor with phase coding for vibration measurements [7387-50] P. Günther, T. Pfister, J. Czarske, Technische Univ. Dresden (Germany)
7387 09	Coping with low modulation in speckle interferometry: a novel approach based on the Delaunay triangulation [7387-08] S. Equis, P. Jacquot, EPFL-STI-NAM, Swiss Federal Institute of Technology Lausanne (Switzerland)

DIGITAL SPECKLE PATTERN INTERFEROMETRY

- 7387 0A **Digital color holography using a stack of photodiodes** [7387-46]
P. Tankam, P. Picart, LAUM, CNRS, Univ. du Maine (France); D. Mounier, LPEC, CNRS, Univ. du Maine (France); J. M. Dese, ONERA (France); J. C. Li, Kunming Univ. of Science and Technology (China)
- 7387 0B **A portable optical DSPI strain sensor with radial sensitivity using an axis-symmetrical DOE** [7387-16]
M. R. Viotti, W. A. Kapp, A. Albertazzi Gonçalves, Jr., LABMETRO, Univ. Federal de Santa Catarina (Brazil)
- 7387 0C **Full-field displacement and strain measurement of small complex bony structures with digital speckle pattern interferometry and shearography** [7387-36]
J. Soons, J. J. J. Dirckx, Univ. of Antwerp (Belgium)
- 7387 0D **Prosthetic clone and natural human tooth comparison by speckle interferometry** [7387-47]
P. Slangen, S. Corn, ISR, LGEL, Ecole des Mines d'Alès (France); M. Fages, J. Raynal, F. J. G. Cuisinier, Univ. Montpellier Sud de France (France)
- 7387 0E **Vibration phase measurements using holographic optical elements based electronic speckle pattern interferometry** [7387-33]
V. Bavigadda, R. Jallapuram, V. Toal, E. Mihaylova, Dublin Institute of Technology (Ireland)
- 7387 0F **Measurement of elasto-plastic deformations by speckle interferometry** [7387-63]
M. Bova, L. Bruno, A. Poggialini, Univ. of Calabria (Italy)
- 7387 0G **Measurement of vegetable growth by laser-speckle correlation** [7387-65]
K. Kobayashi, Toyo Seiki Seisakusho Ltd. (Japan); H. Kadono, Ctr. for Environmental Science in Saitama (Japan); I. Yamaguchi, Toyo Seiki Seisakusho Ltd. (Japan)

NONDESTRUCTIVE TESTING, DAMAGE DETECTION, AND MATERIAL CHARACTERIZATION I

- 7387 0H **Assessment of impact damage in CFRP by combined thermal and speckle methods** [7387-53]
M. Feligiotti, E. Hack, EMPA (Switzerland); G. Lampeas, Univ. of Patras (Greece); T. Siebert, Dantec Dynamics GmbH (Germany); A. Pipino, Ctr. Ricerche Fiat S.C.p.A. (Italy); A. Ihle, High Performance Space Structure Systems GmbH (Germany)
- 7387 0I **Shearographic detection of thermal waves for nondestructive testing** [7387-52]
P. Menner, G. Busse, Univ. Stuttgart (Germany)
- 7387 0J **Defect assessment of bonded joints of composite tubes using shearography** [7387-38]
D. P. Willemann, A. Fantin, A. Albertazzi Gonçalves, Jr., Univ. Federal de Santa Catarina (Brazil)
- 7387 0K **Application of shearography to crack detection in concrete structures subjected to traffic loading** [7387-10]
V. Muzet, CETE de l'Est, LPRC de Strasbourg (France); P. Blain, HOLOLAB, Univ. de Liège (Belgium); D. Przybyla, CETE de l'EST, LPRC de Strasbourg (France)

MICRO-MEASUREMENTS AND INDUSTRIAL APPLICATIONS

- 7387 OL **Speckle metrology in the nanoworld, as it is perceived today, and how it may affect industry** [7387-78]
R. J. Pryputniewicz, Worcester Polytechnic Institute (United States)
- 7387 OM **Smart pixel camera based signal processing in an interferometric test station for massive parallel inspection of MEMS and MOEMS** [7387-69]
A. Styk, Warsaw Univ. of Technology (Poland); P. Lambelet, Heliotis Inc. (Switzerland); A. Røyset, SINTEF (Norway); M. Kujawińska, Institute of Micromechanics and Photonics, Warsaw Univ. of Technology (Poland); K. Gastfinger, SINTEF (Norway)
- 7387 ON **Evaluation of the usage of a fiber optic low-coherence interferometer for surface profile measurements using speckles analysis** [7387-49]
R. Schmitt, Fraunhofer Institute for Production Technology (Germany) and WZL, RWTH Aachen (Germany); G. Mallmann, Fraunhofer Institute for Production Technology (Germany)
- 7387 OO **Speckle characteristics of a laser projector using nonmodal laser emission of a semiconductor laser** [7387-05]
G. M. J. Craggs, Vrije Univ. Brussel (Belgium); F. Riechert, Univ. Karlsruhe (Germany); Y. Meuret, H. Thienpont, J. Danckaert, Vrije Univ. Brussel (Belgium); U. Lemmer, Karlsruhe Institute of Technology (Germany); G. Verschaffelt, Vrije Univ. Brussel (Belgium)

CONVENTIONAL AND DIGITAL HOLOGRAPHY, AND HOLOGRAPHIC INTERFEROMETRY

- 7387 OP **Tunable laser-diode digital holographic interferometry without measuring wavelength differences** [7387-71]
Y. Ishii, K. Yoshida, Tokyo Univ. of Science (Japan)
- 7387 OQ **Doppler phase-shift digital holography and two-wavelength interferometry** [7387-24]
T. Yatagai, D. Barada, Utsunomiya Univ. (Japan)
- 7387 OR **Enhanced interferometric methods for investigation of refractive index distribution changes along tapering structure in photonic crystal fibers** [7387-57]
L. R. Jaroszewicz, Military Univ. of Technology (Poland); M. Kujawińska, Warsaw Univ. of Technology (Poland); K. Stasiewicz, Military Univ. of Technology (Poland); B. Siwicki, S. Wójcik, Warsaw Univ. of Technology (Poland); P. Marć, Military Univ. of Technology (Poland)
- 7387 OS **Digital three-color holographic interferometry devoted to fluid mechanics** [7387-07]
J. M. Dese, ONERA (France); P. Picart, P. Tankam, LAUM-ENSIM, Univ. du Maine (France)
- 7387 OT **Digital holographic measurement system for high-speed three-dimensional deformation measurements** [7387-75]
C. Kohler, M. R. Viotti, A. Albertazzi Gonçalves, Jr., LABMETRO, Univ. Federal de Santa Catarina (Brazil)
- 7387 OU **Dimensionless formulation of the convolution and angular spectrum reconstruction methods in digital holography** [7387-23]
Á. F. Doval, C. Trillo, Univ. de Vigo (Spain)

SPECKLES: THEORY AND FUNDAMENTALS

- 7387 0V **Polarization speckles and generalized Stokes vector wave: a review** [7387-59]
M. Takeda, The Univ. of Electro-Communications (Japan); W. Wang, Heriot-Watt Univ. (United Kingdom); S. G. Hanson, Technical Univ. of Denmark (Denmark)
- 7387 0W **A closer look at dynamic speckles and the use of their fine-structure for object measurements** [7387-61]
S. G. Hanson, Technical Univ. of Denmark (Denmark); T. F. Q. Iversen, OPDI Technologies A/S (Denmark); M. L. Jakobsen, Technical Univ. of Denmark (Denmark)
- 7387 0X **Resolution limit of Mach-Zehnder two-wavelength phase-shifting speckle interferometer** [7387-21]
T. Bodendorfer, A. W. Koch, Technische Univ. München (Germany)
- 7387 0Y **Tilt scanning interferometry: a 3D k-space representation for depth-resolved structure and displacement measurement in scattering materials** [7387-26]
G. E. Galizzi, Loughborough Univ. (United Kingdom) and Instituto de Física Rosario, CONICET-UNR (Argentina); J. M. Coupland, P. D. Ruiz, Loughborough Univ. (United Kingdom)
- 7387 0Z **Finding and measuring extrasolar planets using speckle statistics** [7387-51]
S. Gladysz, N. Yaitskova, European Organisation for Astronomical Research in the Southern Hemisphere (Germany)

NONDESTRUCTIVE TESTING, DAMAGE DETECTION, AND MATERIAL CHARACTERIZATION II

- 7387 10 **In-plane-displacement measurement by speckle interferometry using virtual speckle pattern based on Carré algorithm** [7387-29]
Y. Arai, M. Kikukawa, Kansai Univ. (Japan); S. Yokozeki, Jyouko Applied Optics Lab. (Japan)
- 7387 11 **A speckle-photometry method of measurement of thermal diffusion coefficient of thin multilayer and nanoporous structures** [7387-19]
N. I. Mukhurov, N. A. Khilo, A. G. Maschenko, B.I. Stepanov Institute of Physics (Belarus)

INTELLECTUAL PROPERTY

- 7387 12 **Bringing university invention to the market** [7387-76]
N. Reingand, CeLight, Inc. (United States); W. Osten, Institut für Technische Optik, Univ. Stuttgart (Germany)

LOW COHERENCE AND WHITE SPECKLE INTERFEROMETRY

- 7387 13 **Near-infrared low-coherence speckle interferometry (NIR-LCSI) as a tool for the investigation of silicon in solar cell production** [7387-72]
K. Gastfinger, L. Johnsen, SINTEF ICT (Norway)
- 7387 14 **Portable profilometer based on low coherence interferometry and smart pixel camera** [7387-70]
L. Sałbut, A. Pakuła, S. Tomczewski, A. Styk, Warsaw Univ. of Technology (Poland)

- 7387 15 **Off-axis low coherence interferometry for surface topology measurement** [7387-44]
Y. Delacrétaz, D. Boss, Ecole Polytechnique Fédérale de Lausanne (Switzerland); F. Lang, Ctr. Hospitalier Univ. Vaudois (Switzerland); C. Depeursinge, Ecole Polytechnique Fédérale de Lausanne (Switzerland)

DYNAMIC SPECKLE

- 7387 16 **Dynamic properties of speckled speckles** [7387-60]
S. G. Hanson, T. F. Q. Iversen, Technical Univ. of Denmark (Denmark); R. S. Hansen, Univ. of Southern Denmark (Denmark)
- 7387 17 **Dynamic laser speckle: decision models with computational intelligence techniques** [7387-40]
M. Guzman, G. J. Meschino, A. L. Dai Pra, Univ. Nacional de Mar del Plata (Argentina); M. Trivi, CONICET La Plata-CIC, Univ. Nacional de La Plata (Argentina); L. I. Passoni, Univ. Nacional de Mar del Plata (Argentina); H. Rabal, CONICET La Plata-CIC, Univ. Nacional de La Plata (Argentina)
- 7387 18 **Three-dimensional image contrast using biospeckle** [7387-42]
R. P. Godinho, R. A. Braga, Jr., Univ. Federal de Lavras (Brazil)
- 7387 19 **Liquid blending: an investigation using dynamic speckle interferometry** [7387-45]
P. Slangen, L. Aprin, F. Heymes, ISR, LGEl, Ecole des Mines d'Alès (France); S. Equis, P. Jacquot, Ecole Polytechnique Fédérale de Lausanne (Switzerland)
- 7387 1A **Areas of activity in biofilms through the biospeckle and the spectral domain** [7387-20]
J. K. Marques, R. A. Braga, J. Pereira, Univ. Federal de Lavras (Brazil)
- 7387 1B **Electronic speckle pattern interferometry technique for the measurement of complex mechanical structures for aero-spatial applications** [7387-34]
R. Restrepo, N. Uribe-Patarroyo, D. Garranzo, LINES, Instituto Nacional de Técnica Aeroespacial (Spain); J. M. Pintado, M. Frovel, INTA, Instituto Nacional de Técnica Aeroespacial (Spain); T. Belenguer, LINES, Instituto Nacional de Técnica Aeroespacial (Spain)

BIOMEDICAL RESEARCH AND SPECKLE NOISE REDUCTION

- 7387 1C **Study of tympanic membrane displacements with digital holographic interferometry** [7387-58]
M. d. S. Hernández-Montes, F. Mendoza-Santoyo, S. Muñoz-Solís, Ctr. de Investigaciones en Óptica, A.C. (Mexico)

- 7387 1D **Towards automatic detection of malignant melanoma by laser speckle** [7387-41]
T. K. Lee, Vancouver Coastal Health Research Institute (Canada), The Univ. of British Columbia (Canada), The BC Cancer Agency Research Ctr. (Canada), and Simon Fraser Univ. (Canada); L. Tchvialeva, Vancouver Coastal Health Research Institute (Canada) and The Univ. of British Columbia (Canada); H. Lui, H. Zeng, Vancouver Coastal Health Research Institute (Canada), The Univ. of British Columbia (Canada), and The BC Cancer Agency Research Ctr. (Canada); D. I. McLean, Vancouver Coastal Health Research Institute (Canada) and The Univ. of British Columbia (Canada)
- 7387 1E **Phase errors in speckle reduced laser fringe projection** [7387-15]
S. Rosendahl, Luleå Univ. of Technology (Sweden); E. Hällstig, Optronik (Sweden); P. Gren, M. Sjö Dahl, Luleå Univ. of Technology (Sweden)
- 7387 1F **Polymer-based multiple diffraction modulator for speckle reduction** [7387-18]
G. Ouyang, Z. Tong, W. Gao, K. Wang, M. N. Akram, Vestfold Univ. College (Norway); V. Kartashov, poLight. AS (Norway); X. Y. Chen, Vestfold Univ. College (Norway)

CLOSING LECTURE

- 7387 1G **Optical metrology: from the laboratory to the real world** [7387-77]
W. Osten, E. Garbusi, D. Fleischle, W. Lyda, C. Pruss, R. Reichle, Institut für Technische Optik, Univ. Stuttgart (Germany); C. Falldorf, Bremer Institut für angewandte Strahltechnik (Germany)

POSTER SESSION

- 7387 1H **Statistics of phase singularity of a speckle field in atmospheric turbulence** [7387-06]
R. Rao, Anhui Institute of Optics and Fine Mechanics (China)
- 7387 1I **Characterization of defects in plates by two-dimensional ultrasonic displacement maps: comparison between pulsed TV-holography measurements and finite element method predictions** [7387-56]
P. Rodríguez-Gómez, J. C. López-Vázquez, C. Trillo, Á. F. Doval, J. L. Fernández, Univ. de Vigo (Spain)
- 7387 1J **A combined experiment with simulation approach to calibrated 3D strain measurement using shearography** [7387-32]
D. T. Goto, Delft Univ. of Technology (Netherlands) and Univ. Federal de Santa Catarina (Brazil); R. M. Groves, Delft Univ. of Technology (Netherlands)
- 7387 1K **Biospeckle descriptors: a performance comparison** [7387-39]
G. H. Sendra, Univ. Nacional de Mar del Plata (Argentina) and CONICET La Plata-CIC, Univ. Nacional de La Plata (Argentina); A. L. Dai Pra, L. I. Passoni, Univ. Nacional de Mar del Plata (Argentina); R. Arizaga, H. J. Rabal, M. Trivi, CONICET La Plata-CIC, Univ. Nacional de La Plata (Argentina)
- 7387 1L **Biospeckle laser portable equipment monitoring water behavior at coffee tree leaves** [7387-17]
J. V. L. Botega, Ctr. Federal de Educação Tecnológica de Minas Gerais (Brazil); R. A. Braga, M. P. P. Machado, L. A. Lima, G. F. Rabelo, R. R. Cardoso, Univ. Federal de Lavras (Brazil)

- 7387 1M **Implementation of the direct evaluation of strains in a frequency-based image analysis code for random patterns** [7387-67]
J. Molimard, A. E. Dolinko, Lab. of Tribology and Systems Dynamics, CNRS, Univ. de Lyon (France) and Ecole des Mines de Saint-Étienne (France)
- 7387 1N **Application of dynamic speckle method using in sedimentation process of silver chloride** [7387-09]
X. Li, Y. Tai, Z. Zhen, Q. Chen, L. Li, Henan Univ. of Science and Technology (China)
- 7387 1O **Effect of projection lens numerical aperture and aberrations on speckle reduction in line-scan laser projectors** [7387-13]
M. N. Akram, Vestfold Univ. College (Norway)
- 7387 1P **Speckle reduction in line-scan laser projectors using binary phase codes: theory and experiments** [7387-12]
M. N. Akram, G. Ouyang, W. Gao, Z. Tong, X. Y. Chen, Vestfold Univ. College (Norway)
- 7387 1Q **Speckle suppression in projection displays by using a motionless changing diffuser** [7387-03]
V. Kartashov, polight AS (Norway); M. N. Akram, Vestfold Univ. College (Norway)
- 7387 1R **The matrices used to reduce speckle in laser projector system** [7387-27]
W. Gao, Vestfold Univ. College (Norway) and Beijing Institute of Technology (China); V. Kartashov, polight AS (Norway); G. Ouyang, Z. Tong, M. N. Akram, X. Chen, Vestfold Univ. College (Norway)
- 7387 1S **Simulation of laser speckle reduction by using an array of diffraction gratings** [7387-11]
Z. M. Tong, G. M. Ouyang, W. H. Gao, M. N. Akram, Vestfold Univ. College (Norway); V. Kartashov, polight AS (Norway); K. Y. Wang, X. Y. Chen, Vestfold Univ. College (Norway)
- 7387 1T **Phase retrieval method for multiple wavelength speckle patterns** [7387-68]
N. V. Petrov, V. G. Bespalov, A. A. Gorodetsky, Saint-Petersburg State Univ. of Information Technologies, Mechanics and Optics (Russian Federation)
- 7387 1U **Aspects of speckle contrast metrology** [7387-35]
L. Tchvialeva, I. Markhvida, Vancouver Coastal Health Research Institute (Canada) and The Univ. of British Columbia (Canada); T. K. Lee, Vancouver Coastal Health Research Institute (Canada), The Univ. of British Columbia (Canada), The BC Cancer Agency Research Ctr. (Canada), and Simon Fraser Univ. (Canada)
- 7387 1V **Speckle texture analysis of optical coherence tomography images** [7387-55]
D. K. Kasaragod, Z. Lu, L. E. Smith, S. J. Matcher, Kroto Research Institute (United Kingdom)
- 7387 1W **Method of measure of roughness of paper based in the analysis of the texture of speckle pattern** [7387-14]
A. O. Pino, J. Pladellorens, J. F. Colom, Polytechnic Univ. of Catalonia (Spain)
- 7387 1X **Speckle photo-electromotive-force for the measurement of transverse mechanical vibrations** [7387-37]
R. Kumamoto, J. Frejlich, Univ. Estadual de Campinas (Brazil)

- 7387 1Y **Study of dimensional stability of a thick composite panel submitted to environmental changes** [7387-66]
A. E. Dolinko, J. Molimard, Lab. of Tribology and Systems Dynamics, CNRS, Univ. de Lyon (France) and Ecole des Mines de Saint-Étienne (France); G. H. Kaufmann, CONICET, Instituto de Fisica, Univ. Nacional de Rosario (Argentina)
- 7387 1Z **Depth assessment of defects in composite plates combining shearography and vibration excitation** [7387-64]
J. Schöntag, Univ. Federal de Santa Catarina (Brazil); D. Willemann, A. Albertazzi Gonçalves, Jr., Univ. Federal de Santa Catarina (Brazil)
- 7387 20 **Radial speckle interferometry combined with a microindentation test to analyze coating adhesion** [7387-02]
L. P. Tendela, CONICET, Univ. Nacional de Rosario (Argentina); M. R. Viotti, A. Albertazzi Gonçalves, Jr., Univ. Federal de Santa Catarina (Brazil); G. H. Kaufmann, CONICET, Instituto de Fisica, Univ. Nacional de Rosario (Argentina)

Author Index

Conference Committees

Conference Chair

Armando Albertazzi Gonçalves, Jr., Universidade Federal de Santa Catarina (UFSC)—Labmetro (Brazil)

Honorary Chair

Guillermo H. Kaufmann, Instituto de Física Rosario—IFIR, Univ. Nacional de Rosario (Argentina)

Organizing Committee

Analucia V. Fantin, Universidade Federal de Santa Catarina (UFSC)—Labmetro (Brazil)

Rosana M. Vieira, Universidade Federal de Santa Catarina (UFSC)—Labmetro (Brazil)

Matias R. Vioti, Universidade Federal de Santa Catarina (UFSC)—Labmetro (Brazil)

Daniel P. Willemann, Universidade Federal de Santa Catarina (UFSC)—Labmetro (Brazil)

David P. Willemann, Universidade Federal de Santa Catarina (UFSC)—Labmetro (Brazil)

Scientific Committee

Oleg Angelsky, Chernivtsi University (Ukraine)

Anand Asundi, Nanyang Technological University Singapore (Singapore)

Antonio Baldi, Università degli Studi di Cagliari (Italy)

Christian D. Depeursinge, Ecole Polytechnique Fédérale de Lausanne—EPFL (Switzerland)

Joris J. J. Dirckx, Universiteit Antwerpen (Belgium)

Ángel F. Doval, Universidad de Vigo (Spain)

Pietro Ferraro, Istituto Nazionale di Ottica Applicata (Italy)

Jaime Frejlich, Universidade Estadual de Campinas (Brazil)

Kay Gastinger, SINTEF ICT (Norway)

Emmanuel E. Gdoutos, Democritus University of Thrace (Greece)

Joseph W. Goodman, Stanford University (United States)

Erwin Hack, EMPA (Switzerland)

Klaus Hinsch, Carl von Ossietzky Universität Oldenburg (Germany)

Michael Y. Y. Hung, City University of Hong Kong (Hong Kong)

Jonathan M. Huntley, Loughborough University (United Kingdom)

Pierre Jacquot, Ecole Polytechnique Fédérale de Lausanne—EPFL (Switzerland)

Werner Jüptner, Bremer Institut für Angewandte Strahltechnik—BIAS
(Germany)

Seung-Woo Kim, Korea Advanced Institute of Science and Technology
(Korea, Republic of)

Małgorzata Kujawińska, Warsaw University of Technology (Poland)

Fernando Mendoza Santoyo, Centro de Investigaciones en Óptica,
A.C. (Mexico)

Mikiya Muramatsu, Universidade de São Paulo (Brazil)

Wolfgang Osten, Institut für Technische Optik—ITO, Univ. Stuttgart
(Germany)

Pascal Picart, Université du Maine (France)

Ryszard J. Pryputniewicz, Worcester Polytechnic Institute
(United States)

Juan A. Quiroga, Universidad Complutense de Madrid (Spain)

Pablo D. Ruiz, Loughborough University (United Kingdom)

Joanna Schmit, Veeco Instruments Incorporated (United States)

Chandra Shakher, Indian Institute of Technology Delhi (India)

Mikael Sjö Dahl, Luleå Tekniska Universitet (Sweden)

Pierre Slangen, Ecole des Mines d'Ales (France)

Mitsuo Takeda, The University of Electro-Communications (Japan)

Ralph P. Tatam, Cranfield University (United Kingdom)

Vincent Toal, Dublin Institute of Technology (Ireland)

Luciano Ángel Toro, Universidad EAFIT (Colombia)

Jim Trolinger, Metrolaser (United States)

Steve Vanlanduit, Vrije Universiteit Brussel (Belgium)

Mario Vaz, Universidade do Porto (Portugal)

Ramón Rodríguez-Vera, Centro de Investigaciones en Óptica, A.C.
(Mexico)

Ichirou Yamaguchi, The Institute of Physical and Chemical Research
(Japan)

Toyohiko Yatagai, Utsunomiya University, (Japan)

Yan Zhang, Nankai University (China)

Introduction

The invention of laser has allowed sources of light with a high degree of coherence, and seeing a new effect with a grainy aspect, which appeared when optically rough surfaces were illuminated with a laser light. After the advent of laser sources, this effect, called *speckle*, was considered a mere nuisance mainly for holography techniques. However, important research efforts began in the late 60s and early 70s, focusing on the development of new methods for performing high sensitivity measurements on diffusely reflecting surfaces. Nowadays, speckle metrology is a very rich and growing area, widely used in science and industry.

This volume contains the papers presented during the Speckle 2010, held in Florianópolis, September 13–15, 2010. This successful international conference started in 2000 in Lausanne, Switzerland, then it was held in Trondheim, Norway in 2003 and, finally, it was organized in Nîmes, France in 2006. This is the first time that the “Speckle” leaves Europe and is held in South America, more precisely in Florianópolis, Brazil.

Contributions from 72 papers from all over the world discuss the most recent theories, techniques, and data analysis approaches, as well as the state-of-the-art of different applications of the speckle effect in experimental mechanics, material science, optical testing, and developing of sensor systems.

Papers presented in this event can be grouped in eleven topics:

- Speckle as a tool in security techniques.
- Fringe analysis and data analysis techniques in speckle metrology/Phase evaluation and unwrapping.
- Digital speckle pattern interferometry.
- Nondestructive testing/Material characterization and damage detection/Shearography.
- Micro-measurements and industrial applications.
- Conventional and digital holography/ Holographic interferometry.
- Speckles, theory and fundamentals/Speckle vortices.
- Speckle photography and digital image correlation.
- Low coherence and white speckle interferometry.
- Dynamic speckle.

- Biomedical research and speckle noise reduction.

The editors would like to express their thanks to all the authors who spent a lot of time and efforts in the preparation of their papers, which were decisive for the success of the conference, to the audience for their growing interest in speckle applications and to all sponsors that made possible this event. Finally, our appreciation goes to SPIE for the publication of the proceedings.

Florianópolis, September 2010
