Event: SPIE Solar Energy + Technology, 2009, San Diego, California, United States

PROCEEDINGS OF SPIE

High and Low Concentrator Systems for Solar Electric Applications IV

Lori E. Greene
Editor

3–5 August 2009
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 7407

Proceedings of SPIE, 0277-786X, v. 7407

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *High and Low Concentrator Systems for Solar Electric Applications IV*, edited by Lori E. Greene, Proceedings of SPIE Vol. 7407 (SPIE, Bellingham, WA, 2009) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

- vii Conference Committee
- ix *Recent progress in photocatalysts for overall water splitting under visible light (Plenary Paper) [7408-103]*
T. Hisatomi, K. Domen, The Univ. of Tokyo (Japan)
- xxi *Photovoltaic-reliability R&D toward a solar-powered world (Plenary Paper) [7412-104]*
S. Kurtz, National Renewable Energy Lab. (United States); J. Granata, M. Quintana, Sandia National Labs. (United States)

PLENARY SESSION

- 7407 02 **Concentrating solar energy for utility scale applications (Plenary Paper) [7407-106]**
R. Sherif, eSolar Inc. (United States)

SESSION 1 HIGH-CONCENTRATION SYSTEMS

- 7407 03 **Performance of Amonix multijunction arrays (Keynote Paper) [7407-01]**
V. Garboushian, G. S. Kinsey, K. Stone, C. Crawford, R. Gordon, Amonix Inc. (United States)
- 7407 04 **High performance concentrating photovoltaic module designs for utility scale power generation (Keynote Paper) [7407-02]**
A. Plesniak, The Boeing Co. (United States); R. Jones, Spectrolab, Inc. (United States); J. Schwartz, G. Martins, J. Hall, A. Narayanan, D. Whelan, The Boeing Co. (United States); P. Benítez, J. C. Miñano, Light Prescriptions Innovators, LLC (United States) and Univ. Politécnica de Madrid (Spain); A. Cvetkovic, Univ. Politécnica de Madrid (Spain); M. Hernandez, O. Dross, R. Alvarez, Light Prescriptions Innovators, LLC (United States)
- 7407 06 **Soliant energy concentrator module performance and comparison to silicon flat panel performance [7407-24]**
N. Fromer, R. Johnson, S. Missirian, J. Bobruk, Soliant Energy, Inc. (United States)
- 7407 07 **Field tests on CPV ISFOC plants [7407-05]**
F. Rubio, M. Martínez, J. Perea, D. Sánchez, P. Banda, Instituto de Sistemas Fotovoltaicos de Concentración (Spain)

SESSION 2 LOW-CONCENTRATION SYSTEMS AND CPV CELLS

- 7407 08 **High gain solar photovoltaics (Invited Paper) [7407-06]**
B. MacDonald, M. Finot, B. Heiken, T. Trowbridge, H. Ackler, L. Leonard, E. Johnson, B. Chang, T. Keating, Skyline Solar, Inc. (United States)

- 7407 09 **Thermal characteristics of a medium-level concentration photovoltaic unit with evaporation cooling** [7407-07]
Y. V. Kokotov, M. A. Reyz, Y. Fisher, Solaris Synergy (Israel)
- 7407 0B **Light weight low cost InGaP/GaAs dual-junction solar cells on 4" epitaxial liftoff (ELO) wafers** [7407-09]
R. Tatavarti, G. Hillier, C. Youtsey, D. McCallum, G. Martin, A. Wibowo, R. Navaratnarajah, F. Tuminello, D. Hertkorn, M. Disabb, N. Pan, MicroLink Devices, Inc. (United States)
- 7407 0C **Fundamentally new aspects of tunnel diode transitions in multi-junction photovoltaics** [7407-10]
A. Braun, B. Hirsch, E. A. Katz, J. M. Gordon, Ben-Gurion Univ. of the Negev (Israel); W. Guter, A. W. Bett, Fraunhofer-Institut für Solare Energiesysteme (Germany)

SESSION 3 CONCENTRATOR OPTICS

- 7407 0D **Planar micro-optic solar concentration using multiple imaging lenses into a common slab waveguide** [7407-11]
J. H. Karp, J. E. Ford, Univ. of California, San Diego (United States)
- 7407 0E **Holographic elements in solar concentrator and collection systems** [7407-13]
R. K. Kostuk, The Univ. of Arizona (United States) and College of Optical Sciences, The Univ. of Arizona (United States); J. Castro, The Univ. of Arizona (United States); B. Myer, College of Optical Sciences, The Univ. of Arizona (United States); D. Zhang, The Univ. of Arizona (United States); G. Rosenberg, Prism Solar Technologies, Inc. (United States)
- 7407 0F **Optical modeling of spectrally selective reflectors based on TiO₂:Nb transparent conducting oxide films for silicon solar cell applications** [7407-15]
C. M. Maghanga, G. A. Niklasson, C. G. Granqvist, Uppsala Univ. (Sweden); M. Mwamburi, Moi Univ. (Kenya)

SESSION 4 RELIABILITY OF CONCENTRATOR OPTICS: JOINT SESSION WITH CONFERENCE 7412

- 7407 0G **Analysis of transmitted optical spectrum enabling accelerated testing of CPV designs** [7407-16]
D. C. Miller, M. D. Kempe, C. E. Kennedy, S. R. Kurtz, National Renewable Energy Lab. (United States)
- 7407 0H **Empirical and analytical predictive models for a novel medium-concentration CPV system** [7407-17]
M. Finot, M. Kilkenny, M. Roosta, E. Johnson, K. Do, Skyline Solar, Inc. (United States)

POSTER SESSION

- 7407 0I **New concentrator multifocal Fresnel lens for improved uniformity: design and characterization** [7407-12]
D. Vázquez-Moliní, A. Á. Fernández-Balbuena, E. Bernabeu, J. Muñoz de Luna Clemente, A. Domingo-Marique, Univ. Complutense de Madrid (Spain); Á. García-Botella, Univ. Politécnica de Madrid (Spain)

7407 0M **Improved boost mirror for low-concentration photovoltaic solar power systems** [7407-23]
D. N. Wells, Consultant (United States)

Author Index

Conference Committee

Symposium Chair

Martha Symko-Davies, National Renewable Energy Laboratory (United States)

Conference Chair

Lori E. Greene, National Renewable Energy Laboratory (United States) and University of California, Irvine (United States)

Program Committee

Vahan Garboushian, Amonix Inc. (United States)
Scott A. McHugo, Skyline Solar, Inc. (United States)
Noren Pan, MicroLink Devices (United States)
Adam Plesniak, The Boeing Company (United States)
Raed A. Sherif, eSolar Inc. (United States)
Martha Symko-Davies, National Renewable Energy Laboratory (United States)

Session Chairs

Plenary Session

Martha Symko-Davies, National Renewable Energy Laboratory (United States)

- 1 High-Concentration Systems
Scott A. McHugo, Skyline Solar, Inc. (United States)
- 2 Low-Concentration Systems and CPV Cells
Kaitlyn VanSant, National Renewable Energy Laboratory (United States)
- 3 Concentrator Optics
John Hall, The Boeing Company (United States)
- 4 Reliability of Concentrator Optics: Joint Session with Conference 7412
Dan T. Ton, U.S. Department of Energy (United States)
