Volume 7431

Proceedings of SPIE, 0277-786X, v. 7431

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Time and Frequency Metrology II*, edited by Tetsuya Ido, Derryck T. Reid, Proceedings of SPIE Vol. 7431 (SPIE, Bellingham, WA, 2009) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

- v Conference Committee
- vii *Optical design dependence on technology development (Plenary Paper) [7428-01]*
I. A. Neil, ScotOptix (Switzerland)

SESSION 1 FREQUENCY COMB AND LASER SOURCES

- 7431 03 **Coherent synthesis of visible-region optical pulses by using an optical parametric oscillator and a laser [7431-02]**
J. Sun, D. T. Reid, Heriot-Watt Univ. (United Kingdom)

SESSION 2 CLOCK STABILITY AND COMPARISON

- 7431 07 **Preparation of reduced-quantum-uncertainty input states for an atomic clock (Invited Paper) [7431-06]**
M. H. Schleier-Smith, I. D. Leroux, V. Vuletić, MIT-Harvard Ctr. for Ultracold Atoms (United States) and Massachusetts Institute of Technology (United States)
- 7431 08 **Frequency measurement of the $^{40}\text{Ca}^+$ clock transition using a LD-based clock laser and UTC(NICT) [7431-07]**
K. Matsubara, Y. Li, S. Nagano, H. Ito, M. Kajita, R. Kojima, K. Hayasaka, M. Hosokawa, Y. Hanado, National Institute of Information and Communications Technology (Japan)

SESSION 3 FIBER TRANSFER OF PRECISION OPTICAL FREQUENCIES

- 7431 0A **Ultrastable lasers: new developments and applications (Invited Paper) [7431-09]**
U. Sterr, T. Legero, T. Kessler, H. Schnatz, G. Grosche, O. Terra, F. Riehle, Physikalisch-Technische Bundesanstalt (Germany)
- 7431 0B **Telecommunication fiber link for the remote characterization of a magnesium optical frequency standard (Invited Paper) [7431-10]**
O. Terra, G. Grosche, Physikalisch-Technische Bundesanstalt (Germany); W. Ertmer, Leibniz Univ. Hannover (Germany); T. Feldmann, Physikalisch-Technische Bundesanstalt (Germany); J. Friebe, Leibniz Univ. Hannover (Germany); T. Legero, B. Lipphardt, Physikalisch-Technische Bundesanstalt (Germany); A. Pape, Leibniz Univ. Hannover (Germany); K. Predehl, Physikalisch-Technische Bundesanstalt (Germany) and Max-Planck-Institut for Quantum Optics (Germany); E. Rasel, M. Riedmann, Leibniz Univ. Hannover (Germany); U. Sterr, Physikalisch-Technische Bundesanstalt (Germany); T. Wübbena, Leibniz Univ. Hannover (Germany); H. Schnatz, Physikalisch-Technische Bundesanstalt (Germany)
- 7431 0C **Long distance frequency transfer through an optical carrier (Invited Paper) [7431-11]**
P. A. Williams, W. C. Swann, N. R. Newbury, National Institute of Standards and Technology (United States)

- 7431 0D **Long-distance ultrastable frequency transfer over urban fiber link: toward a European network (Invited Paper)** [7431-12]
F. Kéfélian, Lab. de Physique des Lasers, CNRS, Univ. Paris 13 (France); H. Jiang, LNE-SYRTE, Observatoire de Paris, CNRS and UPMC (France); O. Lopez, C. Chardonnet, A. Amy-Klein, Lab. de Physique des Lasers, CNRS, Univ. Paris 13 (France); G. Santarelli, LNE-SYRTE, Observatoire de Paris, CNRS and UPMC

SESSION 4 LATTICE CLOCKS

- 7431 0F **Background gas induced collision shift for a Sr spin-forbidden transition** [7431-14]
T. Ido, National Institute of Information and Communications Technology (Japan) and Japan Science and Technology Agency (Japan); N. Shiga, Y. Li, H. Ito, S. Nagano, A. Yamaguchi, M. Koide, H. Ishijima, M. Hosokawa, National Institute of Information and Communications Technology (Japan); K. Bielska, R. Ciuryło, Nicolaus Copernicus Univ. (Poland)
- 7431 0G **Development of an Yb optical lattice clock using a fermionic isotope** [7431-15]
M. Yasuda, National Institute of Advanced Industrial Science and Technology (Japan) and Japan Science and Technology Agency (Japan); T. Kohno, Japan Science and Technology Agency (Japan); K. Hosaka, H. Inaba, National Institute of Advanced Industrial Science and Technology (Japan) and Japan Science and Technology Agency (Japan); Y. Nakajima, A. Onae, National Institute of Advanced Industrial Science and Technology (Japan); H. Katori, The Univ. of Tokyo (Japan) and Japan Science and Technology Agency (Japan); F.-L. Hong, National Institute of Advanced Industrial Science and Technology (Japan) and Japan Science and Technology Agency (Japan)
- 7431 0I **Optical lattice clocks toward 10^{-17} uncertainty (Invited Paper)** [7431-17]
M. Takamoto, T. Akatsuka, The Univ. of Tokyo (Japan) and Japan Science and Technology Agency (Japan); H. Hachisu, Japan Science and Technology Agency (Japan); H. Katori, The Univ. of Tokyo (Japan) and Japan Science and Technology Agency (Japan)

Author Index

Conference Committee

Program Track Chair

Katherine Creath, Optinerring (United States) and College of Optical Sciences, The University of Arizona (United States)

Conference Chairs

Tetsuya Ido, National Institute of Information and Communications Technology (Japan)

Derryck T. Reid, Heriot-Watt University (United Kingdom)

Program Committee

James C. Bergquist, National Institute of Standards and Technology (United States)

André Clairon, Observatoire de Paris (France)

Patrick Gill, National Physical Laboratory (United Kingdom)

Feng-Lei Hong, National Institute of Advanced Industrial Science and Technology (Japan)

R. Jason Jones, College of Optical Sciences, The University of Arizona (United States)

Ekkehard Peik, Physikalisch-Technische Bundesanstalt (Germany)

John D. Prestage, Jet Propulsion Laboratory (United States)

Jun Ye, JILA, NIST, University of Colorado (United States)

Session Chairs

- 1 Frequency Comb and Laser Sources
Derryck T. Reid, Heriot-Watt University (United Kingdom)
- 2 Clock Stability and Comparison
Tetsuya Ido, National Institute of Information and Communications Technology (Japan)
- 3 Fiber Transfer of Precision Optical Frequencies
Tara M. Fortier, National Institute of Standards and Technology (United States)
- 4 Lattice Clocks
Uwe Sterr, Physikalisch-Technische Bundesanstalt (Germany)
