SPIE

Volume 7434

Proceedings of SPIE, 0277-786X, v. 7434

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Optical Technologies for Arming, Safing, Fuzing, and Firing V*, edited by Fred M. Dickey, Richard A. Beyer, Proceedings of SPIE Vol. 7434 (SPIE, Bellingham, WA, 2009) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

- v Conference Committee
- vii *Optical design dependence on technology development (Plenary Paper) [7428-01]*
I. A. Neil, ScotOptix (Switzerland)

SESSION 1 LASER IGNITION/INITIATION SYSTEMS

- 7434 02 **An evaluation of the T-6A Texan (JPATS) initial functional performance of the CFIS laser assemblies (Invited Paper) [7434-01]**
T. J. Blachowski, G. Eccard, T. Thom, Naval Surface Warfare Ctr. (United States)
- 7434 03 **Optimisation of laser-driven flyer velocity using photonic Doppler velocimetry [7434-02]**
M. D. Bowden, S. L. Knowles, Atomic Weapons Establishment (United Kingdom)
- 7434 04 **Reliability assessment of GaAs- and InP-based diode lasers for high-energy single-pulse operation [7434-03]**
M. Maiorov, Akela Laser Corp. (United States); D. Damm, Sandia National Labs. (United States); I. Trofimov, V. Zeidel, R. Sellers, Akela Laser Corp. (United States)
- 7434 05 **Assembly and characterization of a prototype laser-optical firing system [7434-04]**
G. L. Morelli, NNSA's Kansas City Plant (United States)
- 7434 06 **Waveguide sensor for detection of HNS degradation [7434-05]**
M. K. Alam, L. Martin, T. E. Beechem, R. L. Schmitt, G. A. Ten Eyck, Sandia National Labs. (United States)
- 7434 08 **Enhanced functionality and reliability testing of laser-initiated systems (Invited Paper) [7434-21]**
C. F. Hand, A. Petrowski, F. Brunet, Alfalight, Inc. (United States)

SESSION 2 RADIATION EFFECTS

- 7434 0A **The effect of high dose rate transient gamma radiation on high-energy optical fibers [7434-08]**
A. Akinci, Los Alamos National Lab. (United States); M. D. Bowden, M. C. Cheeseman, S. L. Knowles, Atomic Weapons Establishment (United Kingdom); D. C. Meister, S. N. Pecak, Sandia National Labs. (United States); K. Simmons Potter, Univ. of Arizona (United States)
- 7434 0B **Dynamics of the optical response of Nd:YAG to ionizing radiation: testing for radiation hardness using UV laser radiation [7434-09]**
B. L. Glebov, K. Simmons-Potter, Univ. of Arizona (United States); D. C. Meister, Sandia National Labs. (United States)

- 7434 0C **Gamma-radiation-induced photodarkening in actively pumped Yb³⁺-doped optical fiber and investigation of post-irradiation transmittance recovery** [7434-10]
B. P. Fox, K. Simmons-Potter, The Univ. of Arizona (United States); S. W. Moore, Sandia National Labs. (United States); J. H. Fisher, GH Systems (United States); D. C. Meister, Sandia National Labs. (United States)

SESSION 3 LASER/FIBER ADVANCES

- 7434 0D **Q-switching technologies: limitations and opportunities: finding the right Q-switch (Invited Paper)** [7434-21]
G. C. Catella, Gooch and Housego (United States)

SESSION 4 NOVEL APPLICATIONS

- 7434 0G **Extracting ballistic forensic intelligence: microstamped firearms deliver data for illegal firearm traffic mapping: technology, implementation, and applications** [7434-16]
O. P. Ohar, T. E. Lizotte, Pivotal Development, LLC (United States)
- 7434 0I **New midwave infrared laser sources for defense and security needs** [7434-18]
A. Lyakh, R. Maulini, R. Go, A. Tsekoun, C. K. N. Patel, Pranalytica, Inc. (United States)
- 7434 0J **Compact, rapid, and rugged detector of military and improvised explosives based on external grating cavity quantum cascade lasers** [7434-19]
A. Tsekoun, I. Dunayevskiy, R. Maulini, R. Barron-Jimenez, A. Lyakh, C. K. N. Patel, Pranalytica, Inc. (United States)

Author Index

Conference Committee

Program Track Chair

Jose M. Sasian, College of Optical Sciences, The University of Arizona
(United States)

Conference Chairs

Fred M. Dickey, FMD Consulting LLC (United States) and Drury University
(United States)

Richard A. Beyer, Army Research Laboratory (United States)

Program Committee

Adrian A. Akinci, Los Alamos National Laboratory (United States)

Ron Bechtold, Alfalight, Inc. (United States)

Thomas J. Blachowski, Naval Surface Warfare Center (United States)

David P. Bour, Photodigm, Inc. (United States)

Michael D. Bowden, Atomic Weapons Establishment (United Kingdom)

Gary C. Catella, Gooch & Housego, Cleveland (United States)

David W. Ewick, Ensign-Bickford Aerospace & Defense Company
(United States)

Andrew Forbes, Council for Scientific and Industrial Research
(South Africa)

Everett S. Hafenrichter, Sandia National Laboratories (United States)

Scott J. Hamlin, MegaWatt Lasers, Inc. (United States)

Christopher R. Hardy, Kigre, Inc. (United States)

Keren K. Jobbins, Atomic Weapons Establishment (United Kingdom)

Stephen R. Lerner, Tyco Electronics Corporation (United States)

Keith L. Lewis, Electro Magnetic Remote Sensing Defence Technology
Center (United Kingdom)

Todd E. Lizotte, Hitachi Via Mechanics (USA), Inc. (United States)

Mikhail A. Maiorov, Akela Laser Corporation (United States)

Robert V. McDaniel, Kollsman, Inc. (United States)

Gregg L. Morelli, Honeywell Federal Manufacturing & Technologies,
LLC (United States)

Barry T. Neyer, PerkinElmer Optoelectronics (United States)

Adam Parker, QinetiQ Ltd. (United Kingdom)

Alex Rosiewicz, EM4, Inc. (United States)

Raymond J. Silva, BAE Systems (United States)

Kelly Simmons-Potter, The University of Arizona (United States)

Bolesh J. Skutnik, CeramOptec Industries, Inc. (United States)

Gabriel L. Smith, United States Army Research, Development and
Engineering Command (United States)
Donald R. Snyder, Air Force Research Laboratory (United States)

Session Chairs

- 1 Laser Ignition/Initiation Systems
Michael D. Bowden, Atomic Weapons Establishment (United Kingdom)
- 2 Radiation Effects
Mikhail A. Maiorov, Akela Laser Corporation (United States)
- 3 Laser/Fiber Advances
Scott J. Hamlin, MegaWatt Lasers, Inc. (United States)
- 4 Novel Applications
Gary C. Catella, Gooch & Housego, Cleveland (United States)
