### SESSION 1 CZT DETECTORS I

**7449 02** CZT device with improved sensitivity for medical imaging and homeland security applications (Invited Paper) [7449-01]

**7449 04** Dual anode contact geometries for x-ray and gamma-ray spectroscopy and 3D localization [7449-03]
- J.W. Martin, A. B. Garson III, Q. Li, K. Lee, Washington Univ. in St. Louis (United States); M. Groza, V. Buliga, A. Burger, Fisk Univ. (United States); H. Krawczynski, Washington Univ. in St. Louis (United States)

**7449 05** Front-end ASIC for pixilated wide bandgap detectors [7449-04]
- E. Vernon, G. De Geronimo, J. Fried, Brookhaven National Lab. (United States); C. Herman, F. Zhang, Z. He, Univ. of Michigan, Ann Arbor (United States)

### SESSION 2 CZT CHARACTERIZATION I

**7449 08** Uniformity of charge collection efficiency in Frisch collar spectrometer with THM grown CdZnTe crystals [7449-07]
- A. Kargar, A. C. Brooks, Kansas State Univ. (United States); M. J. Harrison, Univ. of Florida (United States); H. Chen, S. Awadalla, G. Bindley, B. Redden, Redlen Technologies (Canada); D. S. McGregor, Kansas State Univ. (United States)

### SESSION 3 CZT DETECTORS II

**7449 09** Characterization of a 15-mm-long virtual Frisch-grid CZT detector array (Invited Paper) [7449-08]
- A. E. Bolotnikov, Brookhaven National Lab. (United States); S. Babalola, Fisk Univ. (United States) and Vanderbilt Univ. (United States); G. S. Camarda, Y. Cui, Brookhaven National Lab. (United States); S. U. Egarievwe, Fisk Univ. (United States); P. M. Fochuk, Chernivtsi National Univ. (Ukraine); M. Hirt, Univ. of Michigan (United States); A. Hossain, K. Kim, Brookhaven National Lab. (United States); O. V. Kopach, Chernivtsi National Univ. (Ukraine); N. D. Sferrazza, Brookhaven National Lab. (United States); J. Sturgess, Vanderbilt Univ. (United States); K. Polack, Univ. of Michigan (United States); B. Raghothamachar, Stony Brook Univ. (United States); G. Yang, R. B. James, Brookhaven National Lab. (United States)
Simulation of electric field profile in semi insulating Au/CdZnTe/Au detector under flux (Invited Paper) [7449-09]
J. Franc, R. Grill, Charles Univ. in Prague (Czech Republic); R. James, Brookhaven National Lab. (United States); J. Kubat, E. Belas, P. Hoschl, P. Moravec, P. Praus, Charles Univ. in Prague (Czech Republic)

Electric field distribution of cadmium zinc telluride (CZT) detectors [7449-11]
G. Yang, A. E. Bolotnikov, G. S. Camarda, Y. Cui, A. Hossain, K. Kim, R. B. James, Brookhaven National Lab. (United States)

SESSION 4 SCINTILLATORS I

Dual gamma neutron detection with Cs2LiLaCl6 [7449-13]
J. Glodo, R. Hawrami, E. van Loeff, W. Higgins, U. Shirwadkar, K. S. Shah, Radiation Monitoring Devices, Inc. (United States)

SrI2 scintillator for gamma ray spectroscopy [7449-14]

Angular resolution obtained with a LaBr3-based rotational modulator [7449-15]
B. S. Budden, G. L. Case, M. L. Cherry, Louisiana State Univ. (United States)

SESSION 5 CDTE

Development of a novel energy-resolved photon-counting detector for gamma ray imaging applications [7449-17]
L.-J. Meng, J. W. Tan, Univ. of Illinois at Urbana-Champaign (United States); K. Spartiotis, T. Schulman, Oy AJAT Ltd. (Finland)

High-speed photon counting processing for CdTe detector [7449-18]
B. Shinomiya, A. Koike, H. Morii, T. Okunoyama, Y. Neo, H. Mimura, T. Aoki, Shizuoka Univ. (Japan)

Far-IR reflectance spectra analysis of CdZnTe and related materials [7449-20]
T.-R. Yang, S.-H. Jhang, Y.-H. Shih, National Taiwan Normal Univ. (Taiwan); F.-C. Hou, Y.-C. Yang, National Taiwan Univ. (Taiwan); P. Becla, Massachusetts Institute of Technology (United Kingdom); D.-C. Tien, National Taipei Univ. of Technology (Taiwan); Z. C. Feng, National Taiwan Univ. (Taiwan)
SESSION 6  
CZT CHARACTERIZATION II

7449 ON  Characterization of secondary phases in modified vertical Bridgman growth CZT (Invited Paper) [7449-22]
M. C. Duff, Savannah River National Lab. (United States); K. G. Lynn, K. Jones, Washington State Univ. (United States); Z. R. Dai, J. P. Bradley, N. Teslich, Lawrence Livermore National Lab. (United States)

7449 OQ  Synchrotron radiation x-ray absorption fine-structure and Raman studies on CdZnTe ternary alloys [7449-25]
Y. L. Wu, Y.-T. Chen, Z. C. Feng, National Taiwan Univ. (Taiwan); J.-F. Lee, National Synchrotron Radiation Research Ctr. (Taiwan); P. Becla, Francis Bitter National Magnet Lab., MIT (United States); W. Lu, Fisk Univ. (United States)

SESSION 7  
CRYSTAL GROWTH

7449 OU  Unseeded growth of CdZnTe:In by THM technique [7449-29]
U. N. Roy, S. Weiller, J. Stein, A. Gueorguiev, ICX Radiation (United States)

SESSION 8  
IMAGING APPLICATIONS

7449 OX  The ECLAIRs telescope onboard the SVOM mission for gamma-ray burst studies [7449-32]
H.-E. Triou, B. Cordier, D. Gotz, S. Schanne, T. Tourrette, CEA, Saclay (France); P. Mandrou, R. Pons, O. Godet, N. Remoué, D. Barret, Ctr. d'Etude Spatiales des Rayonnements, CNRS, UPS (France); J. Atteia, LAIT (France); M. Jouret, Ctr. National d'Études Spatiales, CST (France)

7449 OY  A quantum-limited CMOS-sensor-based high-speed imaging system for time-resolved x-ray scattering [7449-33]
B. Rodricks, B. Fowler, C. Liu, J. Lowes, Fairchild Imaging (United States); L. J. Koerner, M. W. Tate, Cornell Univ. (United States); S. M. Gruner, Cornell Univ. (United States) and Cornell High Energy Synchrotron Source (United States)

7449 OZ  Characterisation of an asymmetric AGATA detector [7449-34]

SESSION 9  
NEUTRON DETECTORS

7449 10  Neutron detector based on TimePix pixel device with micrometer spatial resolution (Invited Paper) [7449-35]
J. Jakubek, S. Pospisil, Czech Technical Univ. in Prague (Czech Republic); J. Uher, Czech Technical Univ. in Prague (Czech Republic) and CSIRO Minerals (Australia)

7449 11  Neutron detection with single crystal organic scintillators (Invited Paper) [7449-36]
7449 12  Praseodymium activation detector for measuring bursts of 14MeV neutrons [7449-37]
B. T. Meehan, E. C. Hagen, National Security Technologies, LLC (United States); C. L. Ruiz,
G. W. Cooper, Sandia National Labs. (United States)

7449 13  Neutron energy measurements in emergency response applications [7449-38]
Lab. (United States)

7449 14  Multi-element neutron energy spectrometer [7449-39]
S. Mukhopadhyay, R. Maurer, R. Wolff, S. Mitchell, A. Reed, Remote Sensing Lab., National
Security Technologies, LLC (United States)

SESSION 10  CHALCOGENIDE DETECTORS

7449 18  Properties of layered crystals for radiation detectors: TlGaSe2 system [7449-43]
D. J. Knuteson, N. B. Singh, D. Kahler, B. Wagner, A. Berghmans, S. McLaughlin, K. Schwartz,
Northrop Grumman Corp. (United States)

SESSION 11  CMT AND TIBR

7449 1A  Effect of Te inclusions on internal electric field of CdMnTe gamma-ray detector [7449-45]
O. S. Babalola, Vanderbilt Univ. (United States), Fisk Univ. (United States), and Brookhaven
National Lab. (United States); A. E. Bolotnikov, S. U. Egarievwe, A. M. Hossain, Brookhaven
National Lab. (United States); A. Burger, Fisk Univ. (United States); R. B. James, Brookhaven
National Lab. (United States)

SESSION 12  SCINTILLATORS II

7449 1E  Rare-earth tri-halides methanol-adduct single-crystal scintillators for gamma ray and
neutron detection (Invited Paper) [7449-49]
L. A. Boatner, D. J. Wisniewski, J. S. Neal, Z. W. Bell, J. O. Ramey, J. A. Kolopus,
B. C. Chakoumakos, R. Custelcean, M. Wisniewska, K. E. Pena, Oak Ridge National Lab.
(United States)

SESSION 13  OTHER NOVEL DETECTOR MATERIALS

7449 1H  Semiconducting material property relationships: trends and their impact on design of
radiation detection materials [7449-53]
States); D. M. Jones, Proximate Technologies, LLC (United States)
Flexible radiation dosimeters incorporating semiconducting polymer thick films [7449-54]
C. A. Mills, A. Intaniwet, M. Shkunov, J. L. Keddie, P. J. Sellin, Univ. of Surrey (United Kingdom)

Bismuth tri-iodide radiation detector development [7449-58]
A. T. Lintereur, W. Qiu, J. C. Nino, J. E. Baciak, Univ. of Florida (United States)

Comparison of neutron sensitive scintillators for use with a solid-state optical detector [7449-61]

Generic materials property data storage and retrieval for the semiconducting materials knowledge base [7449-63]
D. M. Jones, Proximate Technologies, LLC (United States); K. F. Ferris, B.-J. M. Webb-Robertson, Pacific Northwest National Lab. (United States); J. T. Muellerleile, Proximate Technologies, LLC (United States); R. W. Hyatt, Battelle Memorial Institute (United States)

HgS: a rugged, stable semiconductor radiation detector material [7449-66]
M. R. Squillante, W. M. Higgins, H. Kim, L. Cirignano, G. Ciampi, A. Churilov, K. Shah, Radiation Monitoring Devices, Inc. (United States)

Design and modeling of a lateral a-Se MSM photoconductor as indirect conversion x-ray imager [7449-68]
K. Wang, Univ. of Waterloo (Canada) and Thunder Bay Regional Research Institute (Canada); F. Chen, Univ. of Waterloo (Canada); G. Belev, S. O. Kasap, Univ. of Saskatchewan (Canada); K. S. Karim, Univ. of Waterloo (Canada)

Session Chairs

1. CZT Detectors I
   Michael R. Squillante, Radiation Monitoring Devices, Inc. (United States)

2. CZT Characterization I
   Robert D. McLaren, Consultant (United States)

3. CZT Detectors II
   Kevin Gutierrez, U.S. Department of Homeland Security (United States)

4. Scintillators I
   Henry Chen, Redlen Technologies (Canada)

5. CdTe
   Michael Fiederle, Albert-Ludwigs-Universität Freiburg (Germany)

6. CZT Characterization II
   Kelvin G. Lynn, Washington State University (United States)

7. Crystal Growth
   Robert D. McLaren, Consultant (United States)

8. Imaging Applications
   Henry Chen, Redlen Technologies (Canada)
9 Neutron Detectors
Zane W. Bell, Oak Ridge National Laboratory (United States)

10 Chalcogenide Detectors
Paul J. Sellin, University of Surrey (United Kingdom)

11 CMT and TIBr
Keitaro Hitomi, Tohoku Institute of Technology (Japan)

12 Scintillators II
Larry A. Franks, U. S. Department of Energy (United States)

13 Other Novel Detector Materials
Giuseppe S. Camarda, Brookhaven National Laboratory
(United States)
Introduction

This book contains the proceedings of the SPIE Conference on Hard X-Ray, Gamma-Ray, and Neutron Detector Physics XI. The conference was held on August 3–6, 2009 in San Diego, California. The conference was organized into technical sessions on cadmium zinc telluride (CZT), cadmium telluride, scintillators, crystal growth, neutron detectors, chalcogenide materials, CMT and TlBr, imaging, and novel semiconductor detector materials. A plenary presentation and a poster session were also provided.

The purpose of the conference was to provide a forum for scientists and engineers from the detector development and user communities to present and evaluate the most recent results on X-ray, gamma-ray, and neutron detectors and to discuss the requirements for a variety of radiation-sensing and imaging applications. The primary theme of the conference was on development of improved semiconductor and scintillator radiation detectors and imaging arrays, which combine the advantages of room-temperature operation with the ability to spectrally resolve the energies of emitted X- and gamma-rays. By eliminating the cryogen, new radiation-sensing instruments, such as spectrometers, gamma cameras, and radiographic systems, can be manufactured that are portable, lightweight, easy to operate, and relatively maintenance-free. Recent research and development on detectors have resulted in measurable progress in the availability of single detectors and imaging arrays. In addition, recent reports of the material properties limiting the performance of semiconductor and scintillator detectors have provided new insights and directions to address deficiencies in the crystals and devices.

Despite the limitations on efficiency and relatively high cost of current room-temperature semiconductor detectors, they have been increasingly deployed in systems useful for medical diagnostics, space applications, safeguarding of nuclear materials, material identification, baggage scanning, position sensing, and gamma-ray spectroscopy. Although significant progress has occurred over recent years, there is still a pressing need to lower the cost of the detectors and to increase the efficiency of room-temperature semiconductor detectors without degrading their spectral performance.

A total of 61 presentations, oral and poster, were given at the conference. Although the number of attendees varied with the session and day of week, the attendance averaged approximately 70 people with a substantial fraction of those in attendance representing organizations outside of the United States. The plenary session drew over 200 attendees.

This book provides detailed documentation describing a portion of the presentations. The editors hope that it will serve as an important record of the
meeting, provide an update on the status of X-ray, gamma-ray, and neutron
detector technology, and serve as a useful source of information for those
working in the field.

The conference chairs would like to thank the session chairs and members of the
conference program committees, who offered their time to enlist the involvement
of many researchers working in the field.
