SPIE

Volume 7461

Proceedings of SPIE, 0277-786X, v. 7461

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Polarization Science and Remote Sensing IV*, edited by Joseph A. Shaw, J. Scott Tyo, Proceedings of SPIE Vol. 7461 (SPIE, Bellingham, WA, 2009) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii *Conference Committee*

SESSION 1 POLARIZATION IN REMOTE SENSING INSTRUMENTS

- 7461 02 **VIIRS polarization sensitivity testing and analysis** [7461-01]
E. C. Fest, Raytheon Co. (United States)
- 7461 03 **CIV polarization measurements using a vacuum ultraviolet Fabry-Pérot Interferometer**
[7461-02]
E. West, NASA Marshall Space Flight Ctr. (United States); G. A. Gary, The Univ. of Alabama in
Huntsville (United States); J. Cirtain, J. Davis, NASA Marshall Space Flight Ctr. (United States);
K. Kobayashi, The Univ. of Alabama in Huntsville (United States); C. Pietraszewski, IC Optical
Systems, Ltd. (United Kingdom)
- 7461 04 **Design and development of the PolZero Time Domain Polarization Scrambler** [7461-03]
R. M. E. Illing, Ball Aerospace & Technologies Corp. (United States)
- 7461 05 **Measured performance for proposed depolarizer for the ocean radiometer for carbon
assessment** [7461-04]
M. A. Quijada, E. Waluschka, M. Wilson, C. R. McClain, NASA Goddard Space Flight Ctr.
(United States)

SESSION 2 ATMOSPHERIC POLARIZATION EFFECTS

- 7461 06 **Aerosol parameter estimation through atmospheric polarization observation with the
different observation angles** [7461-05]
K. Arai, Y. Nishimura, Saga Univ. (Japan)
- 7461 07 **All-sky imaging polarimeter measurements of visible and NIR skylight at Mauna Loa, Hawaii**
[7461-08]
A. R. Dahlberg, N. J. Pust, J. A. Shaw, Montana State Univ. (United States)
- 7461 08 **Reflectance based vicarious calibration of ASTER/VNIR with aerosol refractive index and
size distribution estimation using measured atmospheric polarization irradiance** [7461-42]
K. Arai, Saga Univ. (Japan)

SESSION 3 PHENOMENOLOGY AND MODELING

- 7461 09 **Inferring the orientation of texture from polarization parameters** [7461-09]
H. Noble, W.-S. T. Lam, R. A. Chipman, College of Optical Sciences, The Univ. of Arizona
(United States)

- 7461 0A **Measured comparison of the inversion periods for polarimetric and conventional thermal long-wave IR (LWIR) imagery** [7461-10]
M. Felton, K. P. Gurton, Army Research Lab. (United States); L. E. Roth, U.S. Army Armament Research and Development Engineering Ctr. (United States); J. L. Pezzaniti, D. B. Chenault, Polaris Sensor Technologies, Inc. (United States)
- 7461 0B **How good is a single-scattering model of visible-NIR atmospheric skylight polarization?** [7461-38]
N. J. Pust, J. A. Shaw, Montana State Univ. (United States)

SESSION 4 POLARIZATION IN BIOLOGICAL SYSTEMS

- 7461 0C **Polarization signals in mantis shrimps** [7461-12]
T. W. Cronin, Univ. of Maryland, Baltimore County (United States); T.-H. Chiou, Univ. of Maryland, Baltimore County (United States) and Univ. of Queensland (Australia); R. L. Caldwell, Univ. of California, Berkeley (United States); N. Roberts, Univ. of Manchester (United Kingdom); J. Marshall, Univ. of Queensland (Australia)
- 7461 0D **Depolarization properties of the normal human fovea measured by the GDx-MM** [7461-13]
W.-S. T. Lam, R. A. Chipman, K. M. Twietmeyer, College of Optical Sciences, The Univ. of Arizona (United States); Y. Zhou, Indiana Univ. (United States); K. R. Denninghoff, College of Optical Sciences, The Univ. of Arizona (United States) and The Univ. of Arizona (United States); A. E. Elsner, S. A. Burns, Indiana Univ. (United States)

SESSION 5 IMAGING POLARIMETRY I

- 7461 0F **Initial results and field applications of a polarization imaging camera** [7461-15]
R. C. Olsen, M. Eyler, A. M. Puetz, C. Esterline, Naval Postgraduate School (United States)
- 7461 0G **High-speed imaging acquisition of Stokes linearly polarized components using a single ferroelectric liquid crystal modulator** [7461-16]
L. Gendre, A. Foulonneau, L. Bigué, Univ. de Haute Alsace (France)

SESSION 6 IMAGING POLARIMETRY II

- 7461 0H **Examining IFOV error and demodulation strategies for infrared microgrid polarimeter imagery** [7461-17]
B. M. Ratliff, J. S. Tyo, C. F. LaCasse, W. T. Black, College of Optical Sciences, The Univ. of Arizona (United States)
- 7461 0J **First high-resolution passive polarimetric images of boosting rocket exhaust plumes** [7461-19]
D. W. Tyler, Lockheed Martin Space Systems Co. (United States) and College of Optical Sciences, The Univ. of Arizona (United States); A. M. Phenix, AOptix Technologies, Inc. (United States); A. B. Tietjen, Computer Sciences Corp. (United States); M. Virgen, J. D. Mudge, Lockheed Martin Space Systems Co. (United States); J. S. Stryjewski, Computer Sciences Corp. (United States); J. A. Dank, Lockheed Martin Space Systems Co. (United States)

- 7461 OK **Exploiting motion-based redundancy to enhance microgrid polarimeter imagery** [7461-20]
B. M. Ratliff, J. S. Tyo, W. T. Black, C. F. LaCasse, College of Optical Sciences, The Univ. of Arizona (United States)
- 7461 OL **Near-infrared simultaneous Stokes imaging polarimeter** [7461-39]
J. Mudge, M. Virgen, P. Dean, Lockheed Martin Advanced Technology Ctr. (United States)

SESSION 7 POLARIZATION METROLOGY AND COMPONENTS

- 7461 OM **Axisymmetrical Mueller matrix polarimeter** [7461-22]
T. Wakayama, Saitama Medical Univ. (Japan); Y. Otani, Tokyo Univ. of Agriculture and Technology (Japan); T. Yoshizawa, Saitama Medical Univ. (Japan)
- 7461 ON **Polarization and fold mirrors in application of the Leica Absolute Distance Meter** [7461-23]
D. Sabatke, R. von Handorf, J. Sullivan, Ball Aerospace & Technologies Corp. (United States)
- 7461 OO **Spectroscopic Stokes polarimeter with dual rotating retarder and analyzer for optical rotation measurement** [7461-24]
M. Tanaka, Y. Nakashima, H. Amamiya, Atago Co., Ltd. (Japan); M. Chujo, Y. Otani, Tokyo Univ. of Agriculture and Technology (Japan)
- 7461 OP **Confocal scanning Mueller polarimeter** [7461-25]
A. Lompado, Polaris Sensor Technologies (United States)
- 7461 OQ **Spectroscopic Mueller matrix polarimeter by double liquid crystal phase modulators** [7461-26]
Y. Otani, M. Chujo, Tokyo Univ. of Agriculture and Technology (Japan)
- 7461 OR **PEPPER: polarization-encoding differential photometer and polarimeter** [7461-41]
C. C. Ubach, R. A. Chipman, College of Optical Sciences, The Univ. of Arizona (United States); D. E. Potter, AOptix Technologies (United States)

SESSION 8 CALIBRATION, COMPENSATION, AND OPTIMIZATION

- 7461 OS **Retardance in three-dimensional polarization ray tracing** [7461-29]
G. Yun, R. A. Chipman, College of Optical Sciences, The Univ. of Arizona (United States)
- 7461 OT **Spectro-polarimetric BRDF determination of objects using in-scene calibration materials for polarimetric imagers** [7461-30]
B. Bartlett, C. Devaraj, M. Gartley, C. Salvaggio, J. R. Schott, Rochester Institute of Technology (United States)
- 7461 OV **Designing partial Mueller matrix polarimeters** [7461-32]
J. S. Tyo, S. J. Johnson, Z. Wang, College of Optical Sciences, The Univ. of Arizona (United States); B. G. Hoover, Advanced Optical Technologies (United States)

POSTER SESSION

- 7461 OW **The development and assessment of a flexible inversion algorithm for aerosol property retrieval combining passive multiangle multispectral intensity and polarization measurements** [7461-06]
A. Tsekeri, B. Gross, F. Moshary, S. Ahmed, The City College of New York (United States)
- 7461 OX **Concurrent polarimetric measurements of painted metal and illuminating skylight compared with a microfacet model** [7461-11]
N. J. Pust, J. A. Shaw, A. R. Dahlberg, Montana State Univ., Bozeman (United States)
- 7461 10 **Basic optical properties of the photoelastic modulator part II: residual birefringence in the optical element** [7461-35]
B. Wang, E. Hinds, E. Krivoy, Hinds Instruments, Inc. (United States)
- 7461 12 **Features of inverse problem arise from structure of a general pure Mueller matrix** [7461-37]
S. N. Savenkov, Y. A. Oberemok, V. N. Nikonov, Kiev Taras Shevchenko Univ. (Ukraine)
- 7461 13 **Evaluation of the polarization properties of a Philips-type prism for the construction of imaging polarimeters** [7461-40]
R. Fernandez-Borda, Univ. of Maryland, Baltimore County (United States) and NASA Goddard Space Flight Ctr. (United States); E. Waluschka, NASA Goddard Space Flight Ctr. (United States); S. Pellicori, Pellicori Optical Consultant Inc. (United States); J. V. Martins, Univ. of Maryland, Baltimore County (United States) and NASA Goddard Space Flight Ctr. (United States); L. Ramos-Izquierdo, NASA Goddard Space Flight Ctr. (United States); J. D. Cieslak, Univ. of Maryland, Baltimore County (United States) and NASA Goddard Space Flight Ctr. (United States); P. Thompson, NASA Goddard Space Flight Ctr. (United States)
- 7461 15 **Detection of disturbed earth using passive LWIR polarimetric imaging** [7461-44]
K. P. Gurton, M. Felton, Army Research Lab. (United States)

Author Index

Conference Committee

Conference Chairs

Joseph A. Shaw, Montana State University (United States)
J. Scott Tyo, College of Optical Sciences, The University of Arizona
(United States)

Program Track Chair

Allen H.-L. Huang, University of Wisconsin, Madison (United States)

Program Committee

Alan J. Ames, Ball Aerospace & Technologies Corporation (United States)
David B. Chenault, Polaris Sensor Technologies, Inc. (United States)
Russell A. Chipman, College of Optical Sciences, The University of Arizona (United States)
Aristide C. Dogariu, College of Optics & Photonics, University of Central Florida (United States)
Michael J. Duggin, Air Force Research Laboratory (United States)
Dennis H. Goldstein, Polaris Sensor Technologies, Inc. (United States)
Brian G. Hoover, Advanced Optical Technologies (United States)
Yoav Y. Schechner, Technion-Israel Institute of Technology (Israel)

Session Chairs

- 1 Polarization in Remote Sensing Instruments
Russell A. Chipman, College of Optical Sciences, The University of Arizona (United States)
- 2 Atmospheric Polarization Effects
Joseph A. Shaw, Montana State University (United States)
- 3 Phenomenology and Modeling
David B. Chenault, Polaris Sensor Technologies, Inc. (United States)
- 4 Polarization in Biological Systems
J. Scott Tyo, College of Optical Sciences, The University of Arizona (United States)
- 5 Imaging Polarimetry I
J. Scott Tyo, College of Optical Sciences, The University of Arizona (United States)

- 6 Imaging Polarimetry II
Michael J. Duggin, Air Force Research Laboratory (United States)
- 7 Polarization Metrology and Components
Nathan J. Pust, Montana State University (United States)
- 8 Calibration, Compensation, and Optimization
David B. Chenault, Polaris Sensor Technologies, Inc. (United States)
