, "Front Matter: Volume 7470," Proc. SPIE 7470, 25th European Mask and Lithography Conference, 747001 (12 June 2009); doi: 10.1117/12.834189

SPIE.

Event: 25th European Mask and Lithography Conference, 2009, Dresden, Germany

PROCEEDINGS OF SPIE

25th European Mask and Lithography Conference

Uwe F. W. Behringer
Editor

**12–15 January 2009
Dresden, Germany**

Organized by
VDE/VDI GMM—The Society for Microelectronics,
Micro- and Precision Engineering (Germany)

Cooperating Organizations
BACUS
Photomask Japan (Japan)
SEMI
SPIE
UBC Microelectronics (Germany)

SPIE

Volume 7470

Proceedings of SPIE, 0277-786X, v. 7470

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

ix	Conference Committees
xiii	Foreword
xvii	Cooperating Partners of EMLC 2009
xix	Best Paper from PMJ 2008 <i>Effects of mask absorber thickness on printability in EUV lithography with high resolution resist (Invited Paper) [7028-62]</i> T. Kamo, H. Aoyama, T. Tanaka, O. Suga, MIRAI Semiconductor Leading Edge Technologies, Inc. (Japan)
xxxi	Best Poster from BACUS 2008 <i>Deflection unit for multi-beam mask making (Invited Paper) [7122-114]</i> F. Letzkus, J. Butschke, M. Irmischer, M. Jurisch, W. Klingler, IMS Chips (Germany); E. Platzgummer, C. Klein, H. Loeschner, R. Springer, IMS Nanofabrication AG (Austria)

PLENARY SESSION I

7470 02	Lithography development and research challenges for the $\leq 22\text{nm}$ half-pitch (Invited Paper) [7470-01] S. Wurm, SEMATECH (United States)
7470 03	Mask industry assessment trend analysis (Invited Paper) [7470-02] G. Hughes, H. Yun, SEMATECH (United States)

PLENARY SESSION II

7470 04	Mask salvage in the age of capital contraction (Invited Paper) [7470-03] K. R. Kimmel, Advanced Mask Technology Ctr. GmbH & Co. KG (Germany)
---------	--

MASK BUSINESS AND APPLICATION

7470 05	SEMATECH mask program [7470-04] H. Yun, A. Rastegar, P. Kearney, K. Orvek, SEMATECH (United States)
7470 06	Mask parameter variation in the context of the overall variation budget of an advanced logic wafer Fab (Invited Paper) [7470-05] R. Seltmann, G. Burbach, A. Parge, J. Busch, T. Hertzsch, A. Pooock, F. Weisbuch, A. Holfeld, AMD FAB LLC & Co. KG (Germany)

SIMULATION AND DOUBLE PATTERNING

- 7470 07 **Extended Abbe approach for fast and accurate lithography imaging simulations** [7470-06]
P. Evanschitzky, A. Erdmann, T. Fühner, Fraunhofer Institute of Integrated Systems and Device Technology (Germany)
- 7470 08 **Decomposition algorithm for double patterning of contacts and via layers** [7470-07]
A. El-Gamal, M. Al-Imam, Mentor Graphics Egypt (Egypt)
- 7470 09 **Mask contribution on CD and OVL errors budgets for double patterning lithography** [7470-08]
I. Servin, C. Lapeyre, S. Barnola, CEA-LETI, Minatec (France); B. Connolly, R. Ploss, Toppan Photomasks, Inc. (Germany); K. Nakagawa, P. Buck, Toppan Photomasks, Inc. (United States); M. McCallum, Nikon Corp. (United Kingdom)

MASK CLEANING/HAZE

- 7470 0A **New methods and processes based on advanced vacuum technology for photomask decontamination** [7470-09]
J. M. Foray, B. Bellet, S. HadjRabah, J. Palisson, E. Veran, M. Davenet, A. Favre, Alcatel Vacuum (France); P. Sergent, M. Tissier, Toppan Photomasks, Inc. (France); V. Baudiquez, P. Nesladek, E. Foca, S. Gopalakrishnan, I. Hollein, Advanced Mask Technology Ctr. GmbH & Co. KG (Germany); F. Dufaye, S. Gough, STMicroelectronics (France)
- 7470 0B **Particle transport and reattachment on a mask surface** [7470-10]
P. Nesladek, Advanced Mask Technology Ctr. GmbH & Co. KG (Germany); S. Osborne, Sigmameltec Ltd. (Japan); C. Kohl, Advanced Mask Technology Ctr. GmbH & Co. KG (Germany)
- 7470 0C **Contamination control for ArF photo masks** [7470-11]
J. S. Gordon, Toppan Photomasks, Inc. (United States); M. Silova, ASML Netherlands B.V. (Netherlands); B. Connolly, Toppan Photomasks, Inc. (United States); J. Huijbregtse, N. Maxim, ASML Netherlands B.V. (Netherlands); L. Frisa, C. Chovino, C. Weins, Toppan Photomasks, Inc. (United States)

EUV I

- 7470 0D **Lithography light source challenges for double patterning and EUVL (Invited Paper)** [7470-12]
N. R. Farrar, I. Lalovic, D. Brandt, D. Brown, Cymer, Inc. (United States)
- 7470 0E **The task of EUV reflectometry for HVM of EUV masks: first steps** [7470-13]
A. Farahzadi, C. Wies, R. Lebert, AIXUV GmbH (Germany)
- 7470 0F **EUV and DUV scatterometry for CD and edge profile metrology on EUV masks** [7470-14]
B. Bodermann, M. Wurm, A. Diener, F. Scholze, H. Groß, Physikalisch-Technische Bundesanstalt (Germany)

- 7470 OG **EUV imaging performance: moving towards production** [7470-15]
E. van Setten, S. Lok, J. van Dijk, C. Kaya, K. van Ingen Schenau, K. Feenstra, H. Meiling, C. Wagner, ASML Netherlands B.V. (Netherlands)

NIL

- 7470 OH **Resolution capability of EBM-6000 and EBM-7000 for nano-imprint template** [7470-16]
S. Yoshitake, T. Kamikubo, NuFlare Technology, Inc. (Japan)
- 7470 OI **Electron beam inspection methods for imprint lithography at 32 nm** [7470-17]
K. Selinidis, E. Thompson, S. V. Sreenivasan, D. J. Resnick, Molecular Imprints, Inc. (United States)
- 7470 OJ **UV NIL template making and imprint evaluation** [7470-18]
S. Sasaki, T. Hiraka, J. Mizuochi, Y. Sakai, S. Yusa, Y. Morikawa, H. Mohri, N. Hayashi, Dai Nippon Printing Co., Ltd. (Japan)
- 7470 OK **Residual-free imprint for sensor definition** [7470-19]
A. Mayer, N. Bogdanski, S. Möllenbeck, H.-C. Scheer, Univ. of Wuppertal (Germany)

METROLOGY

- 7470 OL **Monte Carlo simulations of image analysis for flexible and high-resolution registration metrology** [7470-20]
M. Arnz, G. Klose, Carl Zeiss SMT AG (Germany); G. Troll, D. Beyer, A. Mueller, Carl Zeiss SMS GmbH (Germany)
- 7470 OM **SEM image contrast modeling for mask and wafer metrology** [7470-21]
C. G. Frase, Physikalisch-Technische Bundesanstalt (Germany); D. Gnieser, Technische Univ. Braunschweig (Germany); K.-P. Johnsen, W. Häbeler-Grohne, Physikalisch-Technische Bundesanstalt (Germany); R. Tutsch, Technische Univ. Braunschweig (Germany); H. Bosse, Physikalisch-Technische Bundesanstalt (Germany)
- 7470 ON **Registration metrology on double patterning reticles** [7470-22]
K.-H. Schmidt, K.-D. Röth, F. Laske, J. Bender, D. Adam, O. Ache, Vistec Semiconductor Systems GmbH (Germany)
- 7470 OO **Reduced pellicle impact on overlay using high order intrafield grid corrections** [7470-23]
R. de Kruif, T. van Rhee, E. van der Heijden, ASML Netherlands B.V. (Netherlands)

ML2

- 7470 OP **High resolution cell projection** [7470-24]
U. Weidenmueller, P. Hahmann, M. Lemke, B. Schnabel, Vistec Electron Beam GmbH (Germany); L. Pain, S. Manakli, CEA-LETI, Minatec (France)

- 7470 0Q **Mapper: high throughput maskless lithography** [7470-25]
V. Kuiper, B. J. Kampherbeek, M. J. Wieland, G. de Boer, G. F. ten Berge, J. Boers, R. Jager, T. van de Peut, J. J. M. Peijster, E. Slot, S. W. H. K. Steenbrink, T. F. Teepe, A. H. V. van Veen, Mapper Lithography B. V. (Netherlands)
- 7470 0R **New writing strategy in electron beam direct write lithography to improve critical dense lines patterning for sub-45nm nodes** [7470-26]
L. Martin, S. Manakli, B. Icard, J. Pradelles, CEA-LETI, Minatec (France); R. Orobitchouk, A. Poncet, INL, INSA (France); L. Pain, CEA-LETI, Minatec (France)
- 7470 0S **A solution to meet new challenges on EBDW data prep** [7470-27]
R. Galler, D. Melzer, J. Nowotny, K. Kroenert, M. Krueger, M. Suelzle, B. Papenfuss, C. Wagner, EQUIcon Software GmbH Jena (Germany); U. Baetz, B. Buerger, Fraunhofer IPMS (Germany); J. Gramss, M. Lemke, Vistec Electron Beam GmbH Jena (Germany)

INSPECTION AND PATTERN GENERATION

- 7470 0T **Improving yield and cycle time at the inspection process by means of a new defects disposition technique** [7470-28]
E. Villa, L. Sartelli, H. Miyashita, DNP Photomask Europe S.p.A. (Italy); F. Sundermann, S. Gough, F. Dufaye, STMicroelectronics (France); A. Sippel, KLA-Tencor SARL (France)
- 7470 0U **Nuisance event reduction using sensitivity control layers (SCL) for advanced photomask inspection** [7470-29]
S. Hedges, Phontronics nanoFab North America (United States); C. Le, Micron Technology, Inc. (United States); M. Eickhoff, M. Wylie, KLA-Tencor Corp. (United States); T. Simmons, Micron Technology, Inc. (United States); V. Vellanki, KLA-Tencor Corp. (United States); J. McMurran, Phontronics nanoFab North America (United States)
- 7470 0V **Increasing inspection equipment productivity by utilizing factory automation SW on TeraScan 5XX systems** [7470-30]
T. Jakubski, M. Piechoncinski, R. Moses, Advanced Mask Technology Ctr. GmbH & Co. KG (Germany); B. Bugata, H. Schmalfuss, KLA-Tencor Corp. (United States); I. Köhler, J. Lisowski, J. Klobes, R. Fenske, SYSTEMA GmbH (Germany)
- 7470 0W **Error-budget paradigms and laser mask pattern generator evolution** [7470-31]
H. C. Hamaker, M. J. Jolley, A. D. Berwick, Applied Materials Inc. (United States)

EUV II

- 7470 0X **Ion beam deposition for defect-free EUVL mask blanks** [7470-32]
P. Kearney, C. C. Lin, T. Sugiyama, H. Yun, SEMATECH (United States); R. Randive, I. Reiss, A. Hayes, Veeco Instruments Inc. (United States); P. Mirkarimi, E. Spiller, Consultant to Veeco Instruments Inc. (United States)
- 7470 0Y **EUV actinic defect inspection and defect printability at the sub-32-nm half-pitch** [7470-33]
S. Huh, P. Kearney, S. Wurm, F. Goodwin, SEMATECH (United States); H. Han, Samsung Electronics (Korea, Republic of); K. Goldberg, I. Mochi, E. Gullikson, Lawrence Berkeley National Lab. (United States)

- 7470 02 **Sub-30-nm defect removal on EUV substrates** [7470-34]
A. Rastegar, S. Eichenlaub, A. J. Kadaksham, M. House, B. Cha, H. Yun, SEMATECH (United States)

POSTER SESSION

- 7470 10 **Innovative processes investigation for photomask pod conditioning and drying** [7470-35]
J. M. Foray, C. Rude, J. Palisson, M. Davenet, A. Favre, Alcatel Vacuum Technology (France); D. Cheung, Entegris Cleaning Process SAS (France); F. Dufaye, S. Gough, STMicroelectronics (France); P. Richtiger, Dynamic Micro Systems (Germany); V. Baudiquez, E. Foca, P. Nesladek, S. Gopalakrishnan, K. Avary, I. Höllein, Advanced Mask Technology Ctr. GmbH & Co. KG (Germany)
- 7470 11 **High speed (>100 Gbps) key components for a scalable optical data link to be implemented in future maskless lithography applications** [7470-36]
A. Paraskevopoulos, S.-H. Voss, M. Talmi, G. Walf, Fraunhofer-Institute for Telecommunications (Germany)
- 7470 12 **Molecular dynamics study on mold fracture by nanoscale defects in nanoimprint lithography** [7470-37]
K. Tada, M. Yasuda, N. Fujii, H. Kawata, Y. Hirai, Osaka Prefecture Univ. (Japan)
- 7470 13 **Advanced proximity matching with pattern matcher** [7470-38]
A. Serebryakov, L. Brige, ASML Netherlands B.V. (Netherlands); E. Boisseau, E. Peloquin, V. Coutellier, J. Planchot, STMicroelectronics (France)
- 7470 14 **Mounting methodologies to measure EUV reticle nonflatness** [7470-39]
V. S. Battula, J. R. Zeuske, R. L. Engelstad, P. Vukkadala, A. R. Mikkelsen, Univ. of Wisconsin, Madison (United States); C. K. Van Peski, Van Peski Consulting (United States)
- 7470 15 **CDP: application of focus drilling** [7470-40]
S. Geisler, J. Bauer, U. Haak, K. Schulz, IHP (Germany); G. Old, Nikon Precision Europe GmbH (Germany); E. Matthus, IHP (Germany)
- 7470 16 **MeRiT repair verification using in-die phase metrology Phame** [7470-41]
U. Buttgerit, R. Birkner, R. Stelzner, Carl Zeiss SMS GmbH (Germany)
- 7470 17 **Design verification for sub-70-nm DRAM nodes via metal fix using E-beam direct write** [7470-42]
K. Keil, P. Jaschinsky, Fraunhofer CNT (Germany); C. Hohle, K.-H. Choi, Qimonda Dresden GmbH & Co. OHG (Germany); R. Schneider, Qimonda AG (Germany); M. Tesaro, F. Thrum, R. Zimmermann, J. Kretz, Qimonda Dresden GmbH & Co. OHG (Germany)

Foreword

On behalf of VDE/GMM, the sponsors, and the organizing committees, welcome to the 25th European Mask and Lithography Conference, EMLC2009, being held at the Hilton Hotel, Dresden, Germany, 12–15 January 2009. This year the conference celebrates its 25th anniversary!! So I am pleased to give you some information regarding the history of this conference:

The EMLC History

In 1983, the VDI/VDE society decided to organize an annual conference in Munich called "Maskentechnik für Mikroelektronische Bauteile," or in English, "Mask Technology for Microelectronic Components." The first conference had about 40 attendees, and the official language of the conference was German. I gave my first presentation in 1985 on "Silicon stencil mask technology." The conference was held annually in November in connection with the Productronica or Electronica in Munich, Germany.

In 1993, the committee members of the VDI/VDE working group "Maskentechnik" (Mask Technology) elected me as their chair. One of my goals had been that this committee should not create German standards for mask technology, but should concentrate on organizing a mask conference in order to provide the German mask community with global technical information as soon as possible. In 1994, the conference was held for the first time at the Munich Fraunhofer Institute for Reliability and Microintegration on invitation by the German Fraunhofer Society. For the next seven years, Hans Hartmann from the Fraunhofer Institute and I served as conference chairs. In 1996, the committee decided to switch the conference language to English and to rename the conference to Mask Technology for Integrated Circuits and Micro Components.

Three years later, the conference room at the Fraunhofer Institute in Munich could not accommodate the now more than 90 attendees. So in 1997, the 14th conference was held at the Holiday Inn Hotel in Munich Unterhaching. In 1998, we decided to change the conference name to "European Mask Conference, EMC." In the same year, VDE/VDI and SPIE set up a memorandum of understanding which allows SPIE to publish all EMC manuscripts in parallel to the German VDE/VDI publications.

In 2002, Jacques Waelpoel from ASML in the Netherlands started to help me to chair the EMC. Also in 2002 we decided to move the conference from cold November to cold January, in order to gain some distance to the BACUS conference, which is held usually in late September/early October. Why January? Well, for a conference of this scope, there are not many months left: February is the month for Advance Microlithography in Santa Clara, California; April is for Photomask Japan (PMJ) in Yokohama, Japan. At the end of May the EIPBN takes

place somewhere in the USA, and from June to August most Europeans are somewhere on vacation. So there is not much room left to organize the EMC in any other month.

In January 2003, the annual EMC was held probably at the best place for a conference during wintertime, in Sonthofen in the German Alps (buried in 80 cm / 3' of fresh snow). What a great place to be! At this conference the EMC committee was asked by AMD, AMTC, and Infineon to move the EMC for 2004 to Dresden, which we did. In 2005 the conference name was changed to "European Mask and Lithography Conference, EMLC," to demonstrate that lithography as the application of masks has become a centerpiece of interest. Since that conference, Wilhelm Maurer from Infineon supports the EMLC's organisation by coordinating the review of abstracts and manuscripts in a perfect manner.

During EMLC2006, an invitation was received to organize the EMLC2007 in Grenoble, France. The organization of such an event across country borders was quite a challenge, but it turned out as quite a success. In 2008, the EMLC returned to Dresden.

About the EMLC2009

As in past years, the EMLC2009 brings together scientists, researchers, engineers, and technologists from research institutes and companies from around the world to present innovations at the forefront of lithography and mask technology. The technical conference is scheduled from Tuesday through Thursday, and is dedicated to the science, technology, engineering, and application of mask and lithography technologies and associated processes. Presenting an overview of the current status in mask and lithography technologies and of future strategies, this is the place where mask producers and users become acquainted with newest developments and results.

On Monday evening we welcome you to an informal get together at 19:00 at the Hilton Hotel. For the conference opening on Tuesday, we invited Dirk Hilbert, Mayor of Economic Affairs of the city of Dresden, to welcome the conference attendees. After his welcome address, there will be two keynote speakers: Stefan Wurm from SEMATECH, Albany, USA, with his presentation "Lithography development and research for the $\leq 22\text{nm}$ half-pitch," and Dr. Kurt Kimmel from AMTC in Dresden, Germany, with his presentation "Mask salvage in the age of capital contraction."

The keynotes will be followed by the regular sessions: Mask Business and Application, Simulation and Double Patterning, Mask Cleaning/Haze, EUV I, NIL, Metrology, ML2, Inspection and Pattern Generation and EUV II. The poster reception will be held on Wednesday evening. The EMLC2009 will close on Thursday noon, followed by company visits at AMD and Qimonda.

On Tuesday and Wednesday, our traditional technical exhibition will take place. To foster the exchange between the conference attendees and the exhibitors, all coffee and lunch breaks will happen there. So, enjoy the technical sessions, but also enjoy your visit in Dresden, one of the most beautiful cities in Europe!

Uwe F. W. Behringer

COOPERATING PARTNERS OF THE EMLC 2009
