SPIE

Volume 7573

Proceedings of SPIE, 1605-7422, v. 7573

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Biomedical Applications of Light Scattering IV*, edited by Adam P. Wax, Vadim Backman, Proceedings of SPIE Vol. 7573 (SPIE, Bellingham, WA, 2010) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 1605-7422/10/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE
Digital Library

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii Conference Committee

SESSION 1 THEORY I

7573 02 **Simulating the optical phase conjugation phenomenon of light multiply scattered through a macroscopic random medium** [7573-01]
S. H. Tseng, National Taiwan Univ. (Taiwan) and California Institute of Technology (United States); M. Cui, C. Yang, California Institute of Technology (United States)

7573 04 **Measuring distance through turbid media: a simple frequency domain approach** [7573-03]
A. L. Dayton, N. Choudhury, S. A. Prahl, Oregon Health & Science Univ. (United States)

SESSION 2 DYNAMIC LIGHT SCATTERING AND SPECKLE IMAGING

7573 09 **Effects of spatial and spectral frequencies on wide-field functional imaging (wifi) characterization of preclinical breast cancer models** [7573-08]
A. Moy, Beckman Laser Institute and Medical Clinic (United States) and Univ. of California, Irvine (United States); J. G. Kim, Beckman Laser Institute and Medical Clinic (United States); E. Y. H. P. Lee, Univ. of California, Irvine (United States); B. Choi, Beckman Laser Institute and Medical Clinic (United States) and Univ. of California, Irvine (United States)

7573 0A **Fluctuation spectroscopy in low-coherence dynamic light scattering of tissue responding to pharmacologicals** [7573-09]
D. D. Nolte, Purdue Univ. (United States); K. Jeong, Purdue Univ. (United States) and Korea Military Academy (Korea, Republic of); J. Turek, Purdue Univ. (United States)

SESSION 3 THEORY II

7573 0B **A statistical model of light scattering in biological continuous random media based on the Born approximation (Invited Paper)** [7573-10]
İ. R. Çapoğlu, J. D. Rogers, A. Taflove, V. Backman, Northwestern Univ. (United States)

7573 0D **Stochastic Huygens and partial coherence propagation through thin tissues** [7573-12]
S. A. Prahl, Providence St. Vincent Medical Ctr. (United States) and Oregon Health & Science Univ. (United States); D. D. Duncan, Oregon Health & Science Univ. (United States); D. G. Fischer, NASA Glenn Research Ctr. (United States)

7573 0E **Investigating the spectral characteristics of backscattering from heterogeneous spheroidal nuclei using broadband finite-difference time-domain simulations** [7573-13]
G.-S. Chao, K.-B. Sung, National Taiwan Univ. (Taiwan)

SESSION 4 NOVEL APPROACHES

- 7573 OG **Tomographic imaging of fluorescence resonance energy transfer in highly light scattering media** [7573-15]
V. Y. Soloviev, Univ. College London (United Kingdom); J. McGinty, K. B. Tahir, R. Laine, D. W. Stuckey, Imperial College London (United Kingdom); P. S. Mohan, Univ. College London (United Kingdom); J. V. Hajnal, A. Sardini, P. M. W. French, Imperial College London (United Kingdom); S. R. Arridge, Univ. College London (United Kingdom)
- 7573 OH **Optical narrow band frequency analysis of polystyrene bead mixtures** [7573-16]
K. A. Popov, T. P. Kurzweg, Drexel Univ. (United States)
- 7573 OJ **Scanning fiber system for angle-resolved low coherence interferometry (Invited Paper)** [7573-18]
Y. Zhu, N. G. Terry, M. G. Giacomelli, A. Wax, Duke Univ. (United States)

SESSION 5 NANOSCALE MEASUREMENTS

- 7573 OK **A fiber-coupled microfluidic cytometer for the obtaining of nanostructural mitochondria information in single cells** [7573-19]
X. Su, W. Rozmus, Y. Y. Tsui, Univ. of Alberta (Canada)
- 7573 OL **Quantification of colloidal and intracellular gold nanomarkers down to the single particle level using confocal microscopy** [7573-20]
S. Klein, Friedrich-Loeffler-Institut (Germany); S. Petersen, Laser Zentrum Hannover e.V. (Germany) and Excellence Cluster Rebirth (Germany); U. Taylor, D. Rath, Friedrich-Loeffler-Institut (Germany); S. Barcikowski, Laser Zentrum Hannover e.V. (Germany) and Excellence Cluster Rebirth (Germany)

SESSION 6 CLINICAL STUDIES

- 7573 OO **Assessment of breast tumor margins via quantitative diffuse reflectance imaging (Invited Paper)** [7573-23]
J. Q. Brown, T. M. Bydlon, S. A. Kennedy, Duke Univ. (United States); J. Geradts, L. G. Wilke, W. Barry, Duke Univ. Medical Ctr. (United States); L. M. Richards, M. Junker, Duke Univ. (United States); J. Gallagher, Duke Univ. Medical Ctr. (United States); N. Ramanujam, Duke Univ. (United States)
- 7573 OP **Fourier-domain angle-resolved low coherence interferometry for clinical detection of dysplasia** [7573-24]
N. G. Terry, Y. Zhu, A. Wax, Duke Univ. (United States)

SESSION 7 PRE-CLINICAL AND ANIMAL STUDIES

- 7573 OS **Micro-tattoo guided OCT imaging of site specific inflammation** [7573-27]
K. G. Phillips, N. Choudhury, R. Samatham, Oregon Health & Science Univ. (United States); H. Singh, Texas Tech Univ. (United States); S. L. Jacques, Oregon Health & Science Univ. (United States)

- 7573 0U **Correlation between light scattering signal and tissue reversibility in rat brain exposed to hypoxia** [7573-29]
S. Kawauchi, S. Sato, Y. Uozumi, H. Nawashiro, M. Ishihara, M. Kikuchi, National Defense Medical College (Japan)
- 7573 0V **Detection of precancerous cervical conditions using elastic light single-scattering spectroscopy** [7573-31]
M. Canpolat, T. Denkçeken, Ş. Karaveli, E. Peştereli, G. Erdoğan, D. Özel, U. Bilge, T. Şimşek, Akdeniz Univ. (Turkey)

SESSION 8 ENHANCED BACKSCATTERING

- 7573 0W **High anisotropy utilized diffuse light suppression for large area spectroscopic imaging** [7573-32]
Z. Xu, J. Liu, Y. L. Kim, Purdue Univ. (United States)
- 7573 0X **Probing turbid medium structure using ultra-low coherence enhanced backscattering spectroscopy** [7573-33]
B. DeAngelo, G. Arzumanov, C. Matovu, P. Shanley, Fairfield Univ. (United States); J. Zeylikovich, The City College of New York (United States); M. Xu, Fairfield Univ. (United States)
- 7573 0Z **Helicity flip of the backscattered circular polarized light** [7573-35]
V. Kuzmin, St. Petersburg Institute of Commerce and Economics (Russian Federation); I. Meglinski, Cranfield Univ. (United Kingdom) and Univ. of Otago (New Zealand)

SESSION 9 LOW-COHERENCE INTERFEROMETRY

- 7573 10 **Measuring structural features using a dual window method for light scattering spectroscopy and Fourier-domain low coherence interferometry** [7573-36]
F. E. Robles, A. Wax, Duke Univ. (United States)

POSTER SESSION

- 7573 12 **Anisotropic optical property of a bio-medium with highly photon-scattering anisotropic bio-molecules** [7573-40]
T.-W. Nee, S.-M. F. Nee, National Yang Ming Univ. (Taiwan)
- 7573 13 **Spatially resolved 2D attenuation image of a semi-infinite non-homogeneous tissue from diffuse reflectance** [7573-41]
J. Tse, L.-K. Chen, The Chinese Univ. of Hong Kong (Hong Kong, China)
- 7573 14 **Non-negative matrix factorization: a blind sources separation method applied to optical fluorescence spectroscopy and multiplexing** [7573-42]
A.-S. Montcuquet, Lab. d'Electronique de Technologie de l'Information, CEA (France) and GIPSA-Lab., DIS (France); L. Hervé, J.-M. Dinten, Lab. d'Electronique de Technologie de l'Information, CEA (France); J. I. Mars, GIPSA-Lab., DIS (France)

- 7573 16 **Photon-cell interactive monte carlo (pciMC) model to describe both intracellular and extracellular optical pathways for biconcave red blood cells: phase function and albedo** [7573-44]
D. Sakōta, S. Takatani, Tokyo Medical and Dental Univ. (Japan)
- 7573 17 **Comparison of the performance of two depth-resolved optical imaging systems: laminar optical tomography and spatially modulated imaging** [7573-45]
E. Guevara, M. Abran, S. Bélanger, N. Ouakli, Ecole Polytechnique de Montréal (Canada); F. Lesage, Ecole Polytechnique de Montréal (Canada) and Institut de Cardiologie de Montréal (Canada)
- 7573 18 **Surface effect measurement of a small scattering object in highly scattering medium by use of diffuse photon-pairs density wave** [7573-46]
L.-P. Yu, National Yang Ming Univ. (Taiwan); H.-M. Wu, K.-j. Huang, Chung-shan Institute of Science & Technology (Taiwan); J.-S. Wu, National Central Univ. (Taiwan); Y.-P. Lan, Chang Gung Univ. (Taiwan); C. Chou, Chang Gung Univ. (Taiwan) and National Central Univ. (Taiwan) and National Yang Ming Univ. (Taiwan)
- 7573 19 **Study on dynamics of photon migration in human breast based on three-dimensional Monte Carlo modeling** [7573-47]
C.-C. Chuang, C.-M. Chen, C.-Y. Lee, J.-C. Tsai, National Taiwan Univ. (Taiwan); C.-W. Lu, Industrial Technology Research Institute (Taiwan); C.-W. Sun, National Yang-Ming Univ. (Taiwan) and National Chiao Tung Univ. (Taiwan)

Author Index

Conference Committee

Symposium Chairs

James G. Fujimoto, Massachusetts Institute of Technology (United States)
R. Rox Anderson, Wellman Center for Photomedicine, Massachusetts General Hospital (United States) and Harvard School of Medicine (United States)

Program Track Chairs

Ammasi Periasamy, University of Virginia (United States)
Daniel L. Farkas, Cedars-Sinai Medical Center (United States)

Conference Chairs

Adam P. Wax, Duke University (United States)
Vadim Backman, Northwestern University (United States)

Program Committee

Irving J. Bigio, Boston University (United States)
Stephen A. Boppart, University of Illinois at Urbana-Champaign (United States)
Bernard Choi, Beckman Laser Institute, University of California, Irvine (United States)
Steven L. Jacques, Oregon Health & Science University (United States)
Lev T. Perelman, Harvard Medical School (United States)
Brian W. Pogue, Dartmouth College (United States)
Bruce J. Tromberg, Beckman Laser Institute and Medical Center, University of California, Irvine (United States)

Session Chairs

- 1 Theory I
Vadim Backman, Northwestern University (United States)
- 2 Dynamic Light Scattering and Speckle Imaging
Bernard Choi, Beckman Laser Institute, University of California, Irvine (United States)
- 3 Theory II
Lev T. Perelman, Harvard Medical School (United States)

- 4 Novel Approaches
Adam P. Wax, Duke University (United States)
- 5 Nanoscale Measurements
Vadim Backman, Northwestern University (United States)
- 6 Clinical Studies
Adam P. Wax, Duke University (United States)
- 7 Pre-clinical and Animal Studies
Irving J. Bigio, Boston University (United States)
- 8 Enhanced Backscattering
Vadim Backman, Northwestern University (United States)
- 9 Low-Coherence Interferometry
Stephen A. Boppart, University of Illinois at Urbana-Champaign
(United States)
