PROCEEDINGS OF SPIE

Atmospheric and Oceanic Propagation of Electromagnetic Waves IV

Olga Korotkova
Editor

**25–26 January 2010
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 7588

Proceedings of SPIE, 0277-786X, v. 7588

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Atmospheric and Oceanic Propagation of Electromagnetic Waves IV*, edited by Olga Korotkova, Proceedings of SPIE Vol. 7588 (SPIE, Bellingham, WA, 2010) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/10/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii Conference Committee

ix *Ultrafast fiber laser technology: status and prospects (Plenary Paper) [7579-102]*
A. Tünnermann, J. Limpert, Friedrich-Schiller-Univ. Jena (Germany) and Fraunhofer-Institute for Applied Optics and Precision Engineering (Germany)

SESSION 1 MITIGATION OF ATMOSPHERIC EFFECTS AND ADAPTIVE OPTICS

- 7588 02 **Understanding the performance of atmospheric free-space laser communications systems using coherent detection (Invited Paper) [7588-01]**
A. Belmonte, Technical Univ. of Catalonia (Spain); J. M. Kahn, Stanford Univ. (United States)
- 7588 03 **Multi-beam transmitter geometries for free-space optical communications [7588-02]**
J. A. Tellez, J. D. Schmidt, Air Force Institute of Technology (United States)
- 7588 04 **The effects of phase diffuser on scintillations of laser radiation for long-distance propagation in the atmosphere [7588-03]**
G. P. Berman, A. R. Bishop, B. M. Chernobrod, Los Alamos National Lab. (United States); O. O. Chumak, National Technical Univ. of Ukraine (Ukraine); V. N. Gorshkov, Los Alamos National Lab. (United States) and National Technical Univ. of Ukraine (Ukraine) and Institute of Physics (Ukraine); S. V. Torous, National Technical Univ. of Ukraine (Ukraine)
- 7588 05 **Adaptive control of laser beam with sensing of reference source channel (Invited Paper) [7588-04]**
V. P. Lukin, Zuev Institute of Atmospheric Optics (Russian Federation)
- 7588 06 **Improved iteratively weighted centroiding for accurate spot detection in laser guide star based Shack Hartmann sensor [7588-05]**
V. Akondi, Indian Institute of Astrophysics (India) and Indian Institute of Science (India); M. B. Roopashree, R. P. Budihala, Indian Institute of Astrophysics (India)
- 7588 07 **Novel approach for beacon formation through simulated turbulence: initial lab-test results [7588-06]**
A. Khizhnyak, V. Markov, I. Tomov, F. Wu, MetroLaser, Inc. (United States)

SESSION 2 MODELING OF ATMOSPHERIC CHANNELS AND EXPERIMENTS

- 7588 08 **Generalized atmospheric turbulence: implications regarding imaging and communications (Invited Paper) [7588-07]**
N. S. Kopeika, A. Zilberman, E. Golbraikh, Ben-Gurion Univ. of the Negev (Israel)
- 7588 09 **Atmospheric channel characterization for ORCA testing at NTR [7588-08]**
L. C. Andrews, R. L. Phillips, R. Crabbs, D. Wayne, T. Leclerc, P. Sauer, Univ. of Central Florida (United States)

- 7588 0A **Real-time wind speed measurement using wavefront sensor data** [7588-09]
M. B. Roopashree, Indian Institute of Astrophysics (India); V. Akondi, Indian Institute of Astrophysics (India) and Indian Institute of Science (India); R. P. Budihala, Indian Institute of Astrophysics (India)

SESSION 3 SCATTERING AND ABSORPTION IN ATMOSPHERE AND OCEAN AND IMAGING TECHNIQUES

- 7588 0C **Review of selected oceanic EM/EO scattering problems (Invited Paper)** [7588-11]
M. C. Haller, Oregon State Univ. (United States)
- 7588 0D **Inverse near-critical-angle scattering as a tool to characterize bubble clouds** [7588-12]
F. R. A. Onofri, M. Krzysiek, S. Barbosa, M. Wozniak, IUSTI, CNRS, Univ. Provence (France); J. Mroczka, Wroclaw Univ. of Technology (Poland); Y. Yuan, K.-F. Ren, CORIA, CNRS, Univ. de Rouen (France)
- 7588 0E **Characterization of aerosol scattering and spectral absorption by unique methods: a polar/imaging nephelometer and spectral reflectance measurements of aerosol samples collected on filters** [7588-13]
G. Dolgos, J. V. Martins, Univ. of Maryland, Baltimore County (United States); L. A. Remer, A. L. Correia, NASA Goddard Space Flight Ctr. (United States); M. Tabacniks, A. R. Lima, Univ. of Maryland, Baltimore County (United States)
- 7588 0F **Ghost imaging with partially coherent light in turbulent atmosphere** [7588-15]
F. Wang, Y. Cai, Soochow Univ. (China); O. Korotkova, Univ. of Miami (United States)

SESSION 4 STUDIES OF EM BEAM PROPAGATION IN THE ATMOSPHERE

- 7588 0H **Intensity fluctuations of incoherently superposed Gaussian beams in atmospheric turbulence** [7588-17]
Y. Baykal, Çankaya Univ. (Turkey)
- 7588 0I **Propagation of elegant higher-order Gaussian beams in turbulent atmosphere** [7588-18]
F. Wang, Y. Cai, Soochow Univ. (China); H. T. Eyyuboğlu, Y. Baykal, Çankaya Univ. (Turkey)
- 7588 0J **Impact of ground profile on scintillation: 50km and 200km slant paths from airplane to Antelope Peak** [7588-19]
I. Toselli, Naval Postgraduate School (United States); R. L. Phillips, L. C. Andrews, D. T. Wayne, Univ. of Central Florida (United States)
- 7588 0N **Beam wander characteristics of flat-topped, dark hollow, cos and cosh-Gaussian, J_0 - and I_0 - Bessel Gaussian beams propagating in turbulent atmosphere: a review** [7588-23]
H. T. Eyyuboğlu, Y. Baykal, C. Z. Çil, Çankaya Univ. (Turkey); O. Korotkova, Univ. of Miami (United States); Y. Cai, Soochow Univ. (China)
- 7588 0O **Propagation factor of a radial laser array beam in turbulent atmosphere** [7588-24]
C. Zhao, Y. Cai, Y. Yuan, Soochow Univ. (China)

- 7588 OP **Wave optics simulation of Gaussian Schell-model vortex beam propagation in turbulence: intensity and scintillation analysis** [7588-25]
X. Xiao, D. Voelz, New Mexico State Univ. (United States)

POSTER SESSION

- 7588 OS **Polarization changes in stochastic electromagnetic beams propagating in the oceanic turbulence** [7588-29]
O. Korotkova, N. Farwell, Univ. of Miami (United States)

Author Index

Conference Committee

Symposium Chairs

Donald J. Harter, IMRA America, Inc. (United States)
Peter R. Herman, University of Toronto (Canada)

Symposium Cochairs

Alberto Piqué, Naval Research Laboratory (United States)
Friedhelm Dorsch, TRUMPF Photonics (United States)

Conference Chair

Olga Korotkova, University of Miami (United States)

Program Committee

Larry C. Andrews, University of Central Florida (United States)
Yahya K. Baykal, Çankaya University (Turkey)
Yangjian Cai, Soochow University (China)
Frank D. Eaton, Air Force Research Laboratory (United States)
Greg Gbur, The University of North Carolina at Charlotte (United States)
G. Charmaine Gilbreath, Naval Research Laboratory (United States)
Merrick C. Haller, Oregon State University (United States)
Alex S. Mahalov, Arizona State University (United States)
Ronald L. Phillips, Florida Space Institute (United States)
Jixiong Pu, Huaqiao University (China)
Robert K. Tyson, The University of North Carolina at Charlotte (United States)
Daomu Zhao, Zhejiang University (China)

Session Chairs

- 1 Mitigation of Atmospheric Effects and Adaptive Optics
Olga Korotkova, University of Miami (United States)
- 2 Modeling of Atmospheric Channels and Experiments
Olga Korotkova, University of Miami (United States)
- 3 Scattering and Absorption in Atmosphere and Ocean and Imaging Techniques
Olga Korotkova, University of Miami (United States)

- 4 Studies of EM Beam Propagation in the Atmosphere
 Olga Korořkova, University of Miami (United States)
