Volume 7615

Proceedings of SPIE, 0277-786X, v. 7615

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/10/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Committee
ix	Introduction

SESSION 1 COMMERCIAL VCSEL DEVELOPMENT

- 7615 02 **Experimental demonstration of low jitter performance and high reliable 1060nm VCSEL arrays for 10Gbpsx12ch optical interconnection (Invited Paper)** [7615-01]
K. Takaki, N. Iwai, Furukawa Electric Co., Ltd. (Japan); S. Kamiya, Reliability First Group (Japan); H. Shimizu, K. Hiraiwa, S. Imai, Y. Kawakita, T. Takagi, Furukawa Electric Co., Ltd. (Japan); T. Ishikawa, Reliability First Group (Japan); N. Tsukiji, A. Kasukawa, Furukawa Electric Co., Ltd. (Japan)
- 7615 03 **Manufacturability of 850nm data communication VCSELs in high volume (Invited Paper)** [7615-02]
T. E. Sale, C. Chu, J.-K. Hwang, G.-H. Koh, R. Nabiev, J. L.-C. Tan, Avago Technologies (Singapore); L. M. Giovane, R. M. V. Murty, Avago Technologies (United States)
- 7615 04 **Emcore VCSEL failure mechanism and resolution (Invited Paper)** [7615-03]
C. Lei, N. Li, C. Xie, R. Carson, X. Sun, W. Luo, L. Zhao, C. Helms, D. Jensen, C. Liu, Emcore Corp. (United States)

SESSION 2 HIGH-SPEED 850NM VCSELS

- 7615 05 **High-speed low-current-density 850nm VCSELS (Invited Paper)** [7615-04]
A. Larsson, P. Westbergh, J. Gustavsson, Å. Haglund, Chalmers Univ. of Technology (Sweden)
- 7615 06 **Emerging VCSEL technologies at Finisar** [7615-05]
D. Gazula, J. K. Guenter, R. H. Johnson, G. D. Landry, A. N. MacInnes, G. Park, J. K. Wade, J. R. Biard, J. A. Tatum, Finisar Corp. (United States)
- 7615 07 **120 Gbps VCSEL arrays: fabrication and quality aspects** [7615-06]
M. Grabherr, S. Intemann, Philips Technologie GmbH U-L-M Photonics (Germany); C. Wimmer, Philips Technologie GmbH ULM Photonics (Germany); L. R. Borowski, R. King, D. Wiedenmann, R. Jäger, Philips Technologie GmbH U-L-M Photonics (Germany)
- 7615 08 **Optimizing 10Gbps VCSEL for real world laser driver in parallel optical transceiver** [7615-07]
C. Xie, N. Li, C. Lei, X. Sun, W. Luo, Emcore Corp. (United States)

SESSION 3 VCSEL SENSORS AND APPLICATIONS

- 7615 09 **VCSEL based Faraday rotation spectroscopy at 762nm for battery powered trace molecular oxygen detection** [7615-08]
S. So, G. Wysocki, Princeton Univ. (United States)

- 7615 0A **Polymer-coated vertical-cavity surface-emitting laser diode vapor sensor** [7615-09]
T. Ansbaek, DTU Fotonik (Denmark); C. H. Nielsen, N. B. Larsen, S. Dohn, A. Boisen, DTU Nanotech (Denmark); I.-S. Chung, D. Larsson, K. Yvind, DTU Fotonik (Denmark)
- 7615 0B **Non-mechanical beam steering of high speed VCSEL arrays** [7615-10]
J. R. Joseph, R. Safaisini, Colorado State Univ. (United States); G. Dang, Army Research Lab. (United States); K. L. Lear, Colorado State Univ. (United States)
- 7615 0C **Position sensing using an integrated VCSEL and PIN photodetector microsystem** [7615-11]
A. V. Giannopolous, A. M. Kasten, N. Hardy, T. Jefvert, K. D. Choquette, Univ. of Illinois at Urbana-Champaign (United States)
- 7615 0D **Fabrication of an integrated 670nm VCSEL-based sensor for miniaturized fluorescence sensing** [7615-12]
T. D. O'Sullivan, Stanford Univ. (United States); E. Munro, Univ. of Toronto (Canada); J. S. Harris, Stanford Univ. (United States); O. Levi, Univ. of Toronto (Canada)

SESSION 4 HIGH-OUTPUT POWER VCSELS

- 7615 0E **High power VCSELS for miniature optical sensors (Invited Paper)** [7615-13]
J. Geske, C. Wang, M. MacDougall, R. Stahl, D. Follman, H. Garrett, T. Meyrath, Aerius Photonics, LLC (United States); D. Snyder, E. Golden, AFRL/RWGG (United States); J. Wagener, AFRL/RWAV (United States); J. Foley, AFRL/RWGG (United States)
- 7615 0F **High-brightness pump sources using 2D VCSEL arrays** [7615-14]
J.-F. Seurin, G. Xu, Q. Wang, B. Guo, R. Van Leeuwen, A. Miglo, P. Pradhan, J. D. Wynn, V. Khalfin, C. Ghosh, Princeton Optronics (United States)
- 7615 0G **Advanced characterization techniques for high power VCSELS** [7615-15]
H. Moench, J. Baier, S. Gronenborn, J. Kolb, Philips Research Labs. (Germany); M. Miller, Philips Technologie GmbH U-L-M Photonics (Germany); P. Pekarski, M. Schemmann, Philips Research Labs. (Germany); A. Valster, Philips Lighting B.V. (Netherlands)
- 7615 0H **High-power low-noise VCSEL seed laser for fiber laser applications** [7615-16]
B. Guo, Q. Wang, B. Xu, R. van Leeuwen, J. F. Seurin, G. Xu, C. Ghosh, Princeton Optronics, Inc. (United States)
- 7615 0I **Dynamics of the angular emission spectrum of large-area VCSELS** [7615-17]
S. Gronenborn, RWTH Aachen Univ. (Germany); H. Moench, Philips Research Labs. (Germany); M. Miller, P. Gerlach, Philips Technologie GmbH U-L-M Photonics (Germany); J. Kolb, Philips Research Labs. (Germany); P. Loosen, RWTH Aachen Univ. (Germany)

SESSION 5 INNOVATIVE VCSEL STRUCTURES

- 7615 0J **High-index-contrast subwavelength grating VCSEL** [7615-18]
P. Gilet, N. Olivier, P. Grosse, K. Gilbert, A. Chelnokov, CEA, LETI, Minatec (France); I.-S. Chung, J. Mørk, Technical Univ. of Denmark (Denmark)

- 7615 0K **80-nm-tunable high-index-contrast subwavelength grating long-wavelength VCSEL: proposal and numerical simulations** [7615-19]
I.-S. Chung, J. Mørk, Technical Univ. of Denmark (Denmark); A. Sirbu, Ecole Polytechnique Fédérale de Lausanne (Switzerland); V. Iakovlev, Beam Express S.A. (Switzerland); A. Mereuta, A. Caliman, K. Elyahou, Ecole Polytechnique Fédérale de Lausanne (Switzerland)
- 7615 0L **Thermal resistance reduction in 670nm vertical-cavity surface-emitting lasers** [7615-20]
R. Safaisini, Colorado State Univ. (United States); K. Johnson, Vixar (United States); K. L. Lear, Colorado State Univ. (United States)
- 7615 0M **Proton-implanted red photonic crystal VCSELs with high quality output beam** [7615-21]
A. M. Kasten, H. Cha, L. Naden, Univ. of Illinois at Urbana-Champaign (United States); M. K. Hibbs-Brenner, K. Johnson, Vixar Inc. (United States); K. D. Choquette, Univ. of Illinois at Urbana-Champaign (United States)

SESSION 6 NOVEL HIGH SPEED VCSEL MODULATION

- 7615 0N **High-speed 850nm oxide-confined VCSELs for DATACOM applications (Invited Paper)** [7615-22]
A. Mutig, S. Blokhin, A. M. Nadtochiy, G. Fiol, Technische Univ. Berlin (Germany); J. A. Lott, V. A. Shchukin, N. N. Ledenstov, VI Systems GmbH (Germany); D. Bimberg, Technische Univ. Berlin (Germany)
- 7615 0O **Development of high-speed VCSELs beyond 10 Gb/s at Emcore** [7615-23]
N. Li, C. Xie, C. Lei, W. Luo, X. Sun, Emcore Corp. (United States); D. Kuchta, C. Schow, F. Doany, IBM Thomas J. Watson Research Ctr. (United States)
- 7615 0P **High-speed 980nm VCSELs with integrated distributed losses for mode control** [7615-24]
A. N. Al-Omari, Yarmouk Univ. (Jordan); K. L. Lear, Colorado State Univ. (United States); H. Hamad, Yarmouk Univ. (Jordan)
- 7615 0Q **Dynamics of 1.55 μm Buried Tunnel Junction VCSELs under optical injection around threshold** [7615-25]
A. Daly, B. Roycroft, F. H. Peters, Univ. College Cork (Ireland); M. Ortsiefer, Vertilas GmbH (Germany); B. Corbett, Univ. College Cork (Ireland)

Author Index

Conference Committee

Symposium Chair

E. Fred Schubert, Rensselaer Polytechnic Institute (United States)

Symposium Cochairs

Liang-Chy Chien, Kent State University (United States)

James G. Grote, Air Force Research Laboratory (United States)

Program Track Chair

Klaus P. Streubel, OSRAM Semiconductors GmbH (Germany)

Conference Chairs

James K. Guenter, Finisar Corporation (United States)

Kent D. Choquette, University of Illinois at Urbana-Champaign (United States)

Program Committee

Kent M. Geib, Sandia National Laboratories (United States)

Martin Grabherr, Philips Technologie GmbH U-L-M Photonics (Germany)

Luke A. Graham, JDSU (United States)

Jeong-Ki Hwang, Avago Technologies, Ltd. (United States)

Fumio Koyama, Tokyo Institute of Technology (Japan)

Kevin L. Lear, Colorado State University (United States)

Chun Lei, Emcore Corporation (United States)

James A. Lott, VI Systems GmbH (Germany) and Technische Universität Berlin (Germany)

Krassimir Panayotov, Vrije Universiteit Brussel (Belgium)

Jean-Francois Seurin, Princeton Optronics, Inc. (United States)

Noriyuki Yokouchi, The Furukawa Electric Company, Ltd. (Japan)

Session Chairs

- 1 Commercial VCSEL Development
Kent D. Choquette, University of Illinois at Urbana-Champaign (United States)
- 2 High-Speed 850nm VCSELs
Kevin L. Lear, Colorado State University (United States)

- 3 VCSEL Sensors and Applications
James K. Guenter, Finisar Corporation (United States)
- 4 High-Output Power VCSELs
James A. Loff, VI Systems GmbH (Germany) and Technische Universität
Berlin (Germany)
- 5 Innovative VCSEL Structures
Martin Grabherr, Philips Technologie GmbH U-L-M Photonics
(Germany)
- 6 Novel High Speed VCSEL Modulation
Chun Lei, Emcore Corporation (United States)

Introduction

On 27–28 January 2010 the Vertical-Cavity Surface Emitting-Lasers XIV conference was held for the first time in San Francisco as part of the SPIE Photonics West symposium. This volume contains the manuscripts written by the conference presenters who discussed their research and development activities to an audience that consistently over-filled the room during six sessions. It is clear from the topics and attendance that applications of VCSELs have robust markets which continue to grow and that VCSEL development continues to mature. In fact, the majority of reports focus on new applications of VCSELs.

Data communication applications were reviewed by several companies. The 10 Gb/s market for VCSELs seems to be well established, and efforts to extend to 14 and eventually 25 Gb/s devices were discussed. Reducing the operation power for VCSEL-based optical links has become important. In addition, new applications in sensing, high power, environmental monitoring were reported. Perhaps most noteworthy are several companies who are exploring and exploiting the high brightness and high power performance that now can be achieved using VCSEL arrays. Not so long ago such applications would have been considered not possible using a microcavity laser. The development of the VCSEL device structure and emission wavelength continues, with reports on high contrast grating VCSELs, photonic crystal VCSELs, and low noise lasers.

The papers presented at the 2010 Vertical-Cavity Surface Emitting-Lasers XIV conference included in these proceedings show the advancement of VCSEL optoelectronic technology.
