SPIE

Volume 7626

Proceedings of SPIE, 1605-7422, v. 7626

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 1605-7422/10/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE
Digital Library

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

xiii	Conference Committee
xv	Introduction

SESSION 1 MRI APPLICATIONS

- 7626 02 **Strain correction in interleaved strain-encoded (SENC) cardiac MR** [7626-01]
A. G. Motaal, Nile Univ. (Egypt); N. F. Osman, Nile Univ. (Egypt) and The Johns Hopkins Univ. (United States)
- 7626 03 **Multi-modal image registration: matching MRI with histology** [7626-02]
L. Alic, J. C. Haeck, S. Klein, K. Bol, S. T. van Tiel, P. A. Wielopolski, M. Bijster, Erasmus MC (Netherlands); W. J. Niessen, Erasmus MC (Netherlands) and Delft Univ. of Technology (Netherlands); M. Bernsen, J. F. Veenland, M. de Jong, Erasmus MC (Netherlands)
- 7626 04 **Evaluation of liver function using gadoxetate disodium (Gd-EOB-DTPA) enhanced MR imaging** [7626-03]
A. Yamada, The Univ. of Chicago (United States) and Shinshu Univ. School of Medicine (Japan); T. Hara, F. Li, K. Doi, The Univ. of Chicago (United States)
- 7626 05 **Development and application of methods to quantify spatial and temporal hyperpolarized ^3He MRI ventilation dynamics: preliminary results in chronic obstructive pulmonary disease** [7626-04]
M. Kirby, Robarts Research Institute (Canada) and The Univ. of Western Ontario (Canada); A. Wheatley, Robarts Research Institute (Canada); D. G. McCormack, The Univ. of Western Ontario (Canada); G. Parraga, Robarts Research Institute (Canada) and The Univ. of Western Ontario (Canada)
- 7626 06 **The improvement of ICA with projection technique in multitask fMRI data analysis** [7626-05]
R. Li, Beijing Normal Univ. (China); K. Chen, Banner Good Samaritan Regional Medical Ctr. (United States); L. Yao, Z. Long, Beijing Normal Univ. (China)

SESSION 2 MRI BRAIN IMAGING

- 7626 07 **Bayesian approach for network modeling of brain structural features** [7626-06]
A. A. Joshi, S. H. Joshi, Lab. of Neuro Imaging, The Univ. of Southern California (United States); R. M. Leahy, Signal and Image Processing Institute, The Univ. of Southern California (United States); D. W. Shattuck, I. Dinov, A. W. Toga, Lab. of Neuro Imaging, The Univ. of Southern California (United States)
- 7626 08 **Magnetic resonance imaging for white matter degradation in fornix following mild traumatic brain injury** [7626-07]
W. Zhan, L. Boreta, G. Gauger, Univ. of California, San Francisco, VA Medical Ctr. (United States)

- 7626 09 **Statistical 3D shape analysis of gender differences in lateral ventricles** [7626-08]
Q. He, D. Karpman, Y. Duan, Univ. of Missouri, Columbia (United States)
- 7626 0A **Shape analysis of corpus callosum in phenylketonuria using a new 3D correspondence algorithm** [7626-09]
Q. He, S. E. Christ, K. Karsch, D. Peck, Y. Duan, Univ. of Missouri, Columbia (United States)
- 7626 0B **Mapping gray matter volume and cortical thickness in Alzheimer's disease** [7626-10]
X. Guo, Z. Li, Beijing Normal Univ. (China); K. Chen, Banner Alzheimer's Institute (United States); L. Yao, Beijing Normal Univ. (China); Z. Wang, K. Li, Xuanwu Hospital, Capital Medical Univ. (China)
- 7626 0C **Consistent pivotal role of posterior cingulate cortex in the default mode network revealed by partial correlation analysis** [7626-11]
R. Li, J. Li, X. Miao, L. Yao, X. Wu, Beijing Normal Univ. (China)

SESSION 3 BRAIN AND CRANIAL IMAGING

- 7626 0D **A review of multivariate methods in brain imaging data fusion** [7626-12]
J. Sui, The Mind Research Network (United States); T. Adali, Univ. of Maryland, Baltimore County (United States); Y. Li, Univ. of California, San Francisco (United States); H. Yang, Univ. of New Mexico (United States) and Northwestern Polytechnical Univ. (China); V. D. Calhoun, The Mind Research Network (United States) and Univ. of New Mexico (United States)
- 7626 0E **Improving visualization of intracranial arteries at the skull base for CT angiography with calcified plaques** [7626-13]
A. Huang, National Central Univ. (Taiwan); C.-W. Lee, C.-Y. Yang, National Taiwan Univ. Hospital (Taiwan); H.-M. Liu, National Taiwan Univ. Hospital (Taiwan) and National Taiwan Univ. (Taiwan)
- 7626 0G **Retrospective analysis of application of compressive sensing to ¹H MR metabolic imaging of the human brain** [7626-15]
S. Geethanath, Biomedical Engineering at Univ. of Texas, Arlington (United States) and Univ. of Texas Southwestern Medical Ctr. at Dallas (United States); H. Baek, The Univ. of Texas Southwestern Medical Ctr. at Dallas (United States); V. D. Kodibagkar, Biomedical Engineering at Univ. of Texas, Arlington (United States) and The Univ. of Texas Southwestern Medical Ctr. at Dallas (United States)
- 7626 0H **Improved estimation of parametric images of cerebral glucose metabolic rate from dynamic FDG-PET using volume-wise principle component analysis** [7626-16]
X. Dai, J. Tian, Z. Chen, Institute of Automation (China)

SESSION 4 HEART AND VASCULAR IMAGING

- 7626 0I **Assessment of contrast flow modification in aneurysms treated with closed-cell self-deploying asymmetric vascular stents (SAVS)** [7626-17]
C. N. Ionita, W. Wang, D. R. Bednarek, S. Rudin, Toshiba Stroke Research Ctr., Univ at Buffalo (United States)

- 7626 OJ **A new image-based process for quantifying hemodynamic contributions to long-term morbidity in a rabbit model of aortic coarctation** [7626-18]
D. C. Wendell, R. J. Dholakia, Marquette Univ. (United States); P. M. Larsen, Tulane Univ. School of Medicine (United States); A. Menon, Marquette Univ. (United States); J. F. LaDisa, Jr., Marquette Univ. (United States), Children's Hospital of Wisconsin (United States), and Medical College of Wisconsin (United States)
- 7626 OK **Computational blood flow and vessel wall modeling in a CT-based thoracic aorta after stent-graft implantation** [7626-19]
D. Hazer, M. Stoll, E. Schmidt, Univ. Karlsruhe (Germany); G. Richter, Katharinenhospital Stuttgart (Germany); R. Dillmann, Univ. Karlsruhe (Germany)
- 7626 OL **Optical imaging of steady flow in a phantom model of iliac artery stenosis: comparison of CFD simulations with PIV measurements** [7626-20]
M. Shakeri, I. Khodarahmi, M. K. Sharp, A. A. Amini, Univ. of Louisville (United States)
- 7626 OM **Accurate 2D cardiac motion tracking using scattered data fitting incorporating phase information from MRI** [7626-21]
H. Wang, A. A. Amini, Univ. of Louisville (United States)
- 7626 ON **Comparison of myocardial motion estimation methods based on simulated echocardiographic B-mode and RF data** [7626-22]
V. Tavakoli, J. Kemp, B. Dawn, M. Stoddard, A. A. Amini, Univ. of Louisville (United States)

SESSION 5 BREAST IMAGING

- 7626 OO **A numerical study of the inverse problem of breast infrared thermography modeling** [7626-23]
L. Jiang, George Washington Univ. (United States); W. Zhan, Univ. of California, San Francisco (United States); M. H. Loew, George Washington Univ. (United States)
- 7626 OP **Microwave imaging of the breast with incorporated structural information** [7626-24]
A. H. Golnabi, P. M. Meaney, S. D. Geimer, K. D. Paulsen, Dartmouth College (United States)
- 7626 OR **A novel and fast method for cluster analysis of DCE-MR image series of breast tumors** [7626-26]
M. Mohajer, Helmholtz Zentrum München GmbH (Germany); G. Brix, Federal Office for Radiation Protection (Germany); K. Englmeier, Helmholtz Zentrum München GmbH (Germany)
- 7626 OS **Modeling bioluminescent photon transport in tissue based on Radiosity-diffusion model** [7626-27]
L. Sun, P. Wang, Beijing Univ. of Technology (China); J. Tian, Institute of Automation (China); B. Zhang, Northwestern Univ. (China); D. Han, X. Yang, Institute of Automation (China)

SESSION 6 OPTICAL IMAGING

- 7626 0U **Automated 3D segmentation of intraretinal layers from optic nerve head optical coherence tomography images** [7626-29]
B. J. Antony, The Univ. of Iowa (United States); M. D. Abramoff, The Univ. of Iowa (United States) and Veterans Administration Medical Ctr., Iowa City (United States); K. Lee, P. Sonkova, P. Gupta, Y. Kwon, The Univ. of Iowa (United States); M. Niemeijer, Univ. Medical Ctr. Utrecht (Netherlands); Z. Hu, M. K. Garvin, The Univ. of Iowa (United States)
- 7626 0V **3-D segmentation of retinal blood vessels in spectral-domain OCT volumes of the optic nerve head** [7626-30]
K. Lee, The Univ. of Iowa (United States); M. D. Abramoff, The Univ. of Iowa (United States) and Veterans Administration Medical Ctr., Iowa City (United States); M. Niemeijer, Univ. Medical Ctr. Utrecht (Netherlands); M. K. Garvin, M. Sonka, The Univ. of Iowa (United States)
- 7626 0X **Cryo-imaging in a toxicological study on mouse fetuses** [7626-32]
D. Roy, M. Gargsha, Case Western Reserve Univ. (United States); E. Slotter, WIL Research Labs., LLC (United States); M. Watanabe, Case Western Reserve Univ. School of Medicine (United States); D. Wilson, Case Western Reserve Univ. (United States) and Univ. Hospitals of Cleveland (United States)
- 7626 0Y **Adhesive improvement in optical coherence tomography combined with confocal microscopy for class V cavities investigations** [7626-33]
M. Rominu, C. Sinescu, M. L. Negrutiu, R. O. Rominu, D. M. Pop, F. Topala, A. Stoia, E. Petrescu, Univ. de Medicina si Farmacie Victor Babes, Timisoara (Romania); A. Bradu, G. Dobre, A. Gh. Podoleanu, Univ. of Kent (United Kingdom)

SESSION 7 LUNG IMAGING

- 7626 0Z **Quantitative evaluation of bronchial enhancement: preliminary observations** [7626-34]
B. L. Odry, A. P. Kiraly, C. L. Novak, Siemens Corporate Research (United States); D. P. Naidich, M. C. B. Godoy, New York Univ. Langone Medical Ctr. (United States); B. Schmidt, Siemens HealthCare (Germany)
- 7626 10 **Microstructural analysis of secondary pulmonary lobule imaged by synchrotron radiation micro CT using offset scan mode** [7626-35]
Y. Kawata, K. Kageyama, N. Niki, Univ. of Tokushima (Japan); K. Umetani, Japan Synchrotron Radiation Research Institute (Japan); K. Yada, Tohken Co., Ltd. (Japan); H. Ohamatsu, National Cancer Ctr. Hospital East (Japan); N. Moriyama, National Cancer Ctr. Research Ctr. for Cancer Prevention and Screening (Japan); H. Itoh, Univ. of Fukui (Japan)
- 7626 11 **Human airway tree structure query atlas** [7626-36]
G. E. Christensen, N. E. Burnette, W. Gao, M. Shaker, J. M. Reinhardt, J. E. Cook-Granroth, G. McLennan, E. A. Hoffman, The Univ. of Iowa (United States)
- 7626 12 **Two-dimensional airway analysis using probabilistic neural networks** [7626-78]
J. Tan, B. Zheng, S. C. Park, J. Pu, F. C. Sciurba, J. K. Leader, Univ. of Pittsburgh (United States)

- 7626 13 **Development of spatial-temporal ventilation heterogeneity and probability analysis tools for hyperpolarized ^3He magnetic resonance imaging** [7626-38]
S. Choy, Robarts Research Institute (Canada); H. Ahmed, Robarts Research Institute (Canada) and The Univ. of Western Ontario (Canada); A. Wheatley, Robarts Research Institute (Canada); D. G. McCormack, The Univ. of Western Ontario (Canada); G. Parraga, Robarts Research Institute (Canada) and The Univ. of Western Ontario (Canada)
- 7626 14 **The effect of ACE inhibition on the pulmonary vasculature in combined models of chronic hypoxia and pulmonary arterial banding in Sprague Dawley rats** [7626-39]
S. Clarke, Medical College of Wisconsin (United States); S. Baumgardt, Zablocki Veteran Affairs Medical Ctr. (United States); R. Molthen, Medical College of Wisconsin (United States), Marquette Univ. (United States), and Zablocki Veteran Affairs Medical Ctr. (United States)
- 7626 15 **Arterial morphology responds differently to Captopril then N-acetylcysteine in a monocrotaline rat model of pulmonary hypertension** [7626-40]
R. Molthen, Medical College of Wisconsin (United States), Zablocki Veteran Affairs Medical Ctr. (United States), and Marquette Univ. (United States); Q. Wu, S. Baumgardt, L. Kohlhepp, Medical College of Wisconsin (United States); R. Shingrani, Marquette Univ. (United States); G. Krenz, Medical College of Wisconsin (United States), Zablocki Veteran Affairs Medical Ctr. (United States), and Marquette Univ. (United States)

SESSION 8 MODELING PHOTONS AND STRUCTURES

- 7626 16 **3D geometry-based quantification of colocalizations in three-channel 3D microscopy images of soft tissue tumors** [7626-41]
S. Wörz, Ruprecht-Karls-Univ. Heidelberg (Germany) and German Cancer Research Ctr. (Germany); P. Sander, German Cancer Research Ctr. (Germany); M. Pfannmöller, Ruprecht-Karls-Univ. Heidelberg (Germany) and German Cancer Research Ctr. (Germany); R. J. Rieker, Univ. Hospital Heidelberg (Germany) and Medical Univ. of Innsbruck (Germany); S. Joos, German Cancer Research Ctr. (Germany); G. Mechttersheimer, Univ. Hospital Heidelberg (Germany); P. Boukamp, P. Lichter, German Cancer Research Ctr. (Germany); K. Rohr, Ruprecht-Karls-Univ. Heidelberg (Germany) and German Cancer Research Ctr. (Germany)
- 7626 17 **Hierarchical patch generation for multilevel statistical shape analysis by principal factor analysis decomposition** [7626-42]
M. Reyes, ARTORG Ctr. for Biomedical Engineering Research, Univ. of Bern (Switzerland); M. A. González Ballester, Alma IT Systems (Spain); N. Kozic, ARTORG Ctr. for Biomedical Engineering Research, Univ. of Bern (Switzerland); R. M. Summers, M. G. Linguraru, National Institutes of Health (United States)
- 7626 18 **A multithread based new sparse matrix method in bioluminescence tomography** [7626-43]
B. Zhang, Northeastern Univ. (China); J. Tian, Northeastern Univ. (China) and Institute of Automation (China); D. Liu, Institute of Automation (China); L. Sun, Beijing Univ. of Technology (China); X. Yang, D. Han, Institute of Automation (China)
- 7626 19 **Limited-memory-BFGS-based iterative algorithm for multispectral bioluminescence tomography with Huber regularization** [7626-44]
J. Feng, K. Jia, Beijing Univ. of Technology (China); J. Tian, Institute of Automation (China) and Xidian Univ. (China); C. Qin, S. Zhu, Institute of Automation (China)

- 7626 1A **Performance evaluation of the non-linear and linear estimation methods for determining kinetic parameters in dynamic FDG-PET study** [7626-45]
X. Dai, J. Tian, Z. Chen, Institute of Automation (China)

SESSION 9 IMAGE-BASED MODELING

- 7626 1C **Left-ventricle segmentation in real-time 3D echocardiography using a hybrid active shape model and optimal graph search approach** [7626-47]
H. Zhang, A. K. Abiose, D. N. Campbell, M. Sonka, J. B. Martins, A. Wahle, The Univ. of Iowa (United States)
- 7626 1D **Image- and model-based analysis of constitutive properties of cellular structures** [7626-48]
E. Gladilin, R. Eils, German Cancer Research Ctr. (Germany)
- 7626 1E **Compartmental model of ^{18}F -choline** [7626-49]
T. Janzen, Helmholtz Zentrum München GmbH (Germany); F. Tavola, Univ. degli Studi di Milano (Italy); A. Giussani, Helmholtz Zentrum München GmbH (Germany); M. C. Cantone, Univ. degli Studi di Milano (Italy); H. Uusijärvi, S. Mattsson, Malmö Univ. Hospital (Sweden); M. Zankl, N. Petoussi-Henß, C. Hoeschen, Helmholtz Zentrum München GmbH (Germany)

SESSION 10 NANOPARTICLE AND MICROENVIRONMENT IMAGING

- 7626 1F **Limitations of measurement-based system functions in magnetic particle imaging** [7626-50]
T. Knopp, T. F. Sattel, S. Biederer, T. M. Buzug, Univ. zu Lübeck (Germany)
- 7626 1G **Arterial double-contrast dual-energy MDCT: in-vivo rabbit atherosclerosis with iodinated nanoparticles and gadolinium agents** [7626-51]
R. Carmi, G. Kafri, A. Altman, L. Goshen, Philips Healthcare (Israel); D. Planer, J. Sosna, Hadassah-Hebrew Univ. Medical Ctr. (Israel)
- 7626 1H **Quantification of fluorescent spots in time series of 3D confocal microscopy images of endoplasmic reticulum exit sites based on the HMAX transform** [7626-52]
P. Matula, Univ. of Heidelberg (Germany), BIOQUANT (Germany), IPMB (Germany), German Cancer Research Ctr. (Germany), and Masaryk Univ. (Czech Republic); F. Verissimo, EMBL Heidelberg (Germany); S. Wörz, R. Eils, Univ. of Heidelberg (Germany), BIOQUANT (Germany), IPMB (Germany), and German Cancer Research Ctr. (Germany); R. Pepperkok, EMBL Heidelberg (Germany); K. Rohr, Univ. of Heidelberg (Germany), BIOQUANT (Germany), IPMB (Germany), and German Cancer Research Ctr. (Germany)
- 7626 1I **Photoreceptor cell counting in adaptive optics retinal images using content-adaptive filtering** [7626-53]
F. Mohammad, R. Ansari, J. Wanek, M. Shahidi, Univ. of Illinois at Chicago (United States)

- 7626 1J **Micro-rheology: evaluating the rigidity of the microenvironment surrounding antibody binding sites** [7626-54]
J. B. Weaver, Dartmouth Medical School (United States), Dartmouth Hitchcock Medical Ctr. (United States), Thayer School of Engineering at Dartmouth (United States), and Norris Cotton Cancer Ctr., Dartmouth Hitchcock Medical Ctr. (United States); A. M. Rauwerdink, Thayer School of Engineering at Dartmouth (United States); I. Perreard, Dartmouth Medical School (United States), Dartmouth Hitchcock Medical Ctr. (United States); R. Kilfoyle, St. Olaf College (United States)

SESSION 11 BONE IMAGING

- 7626 1K **Quantifying mechanical properties in a murine fracture healing system using inverse modeling: preliminary work** [7626-55]
M. I. Miga, Vanderbilt Univ. (United States), Vanderbilt Univ. Medical Ctr. (United States), and Vanderbilt Univ. Institute for Imaging Science (United States); J. A. Weis, Vanderbilt Univ. (United States) and The Univ. of North Carolina at Chapel Hill (United States); F. Granero-Molto, A. Spagnoli, The Univ. of North Carolina at Chapel Hill (United States)
- 7626 1L **Scaling relations between bone volume and bone structure as found using 3D μ CT images of the trabecular bone taken from different skeletal sites** [7626-56]
C. Rth, Max-Planck-Institut fr extraterrestrische Physik (Germany); D. Mller, Technische Univ. Mnchen (Germany); I. Sidorenko, R. Monetti, Max-Planck-Institut fr extraterrestrische Physik (Germany); F. Eckstein, Paracelsus Medizinische Privatuniv. (Austria); M. Matsuura, E.-M. Lochmller, Ludwig-Maximilians-Univ. Mnchen (Germany); P. K. Zysset, Technische Univ. Wien (Austria); J. Bauer, Technische Univ. Mnchen (Germany)
- 7626 1M **Evaluation of trabecular bone patterns on dental radiographic images: influence of cortical bone** [7626-57]
Y. Amouriq, P. Evenou, A. Arlicot, N. Normand, P. Layrolle, P. Weiss, J. Guedon, Univ. de Nantes (France)
- 7626 1N **A non-rigid registration method for mouse whole body skeleton registration** [7626-58]
D. Xiao, The Australian e-Health Research Ctr., CSIRO (Australia); D. Zahra, Radiopharmaceutical Research Institute, ANSTO (Australia); P. Bourgeat, The Australian e-Health Research Ctr., CSIRO (Australia); P. Berghofer, Radiopharmaceutical Research Institute, ANSTO (Australia); O. Acosta Tamayo, The Australian e-Health Research Ctr., CSIRO (Australia); C. Wimberley, M. C. Gregoire, Radiopharmaceutical Research Institute, ANSTO (Australia); O. Salvado, The Australian e-Health Research Ctr., CSIRO (Australia)
- 7626 1O **Prediction of biomechanical trabecular bone properties with geometric features using MR imaging** [7626-59]
M. B. Huber, S. L. Lancianese, I. Ikpot, M. B. Nagarajan, A. L. Lerner, A. Wismller, Univ. of Rochester (United States)
- 7626 1P **Morphological characterization of dental prostheses interfaces using optical coherence tomography** [7626-60]
C. Sinescu, M. L. Negrutiu, Victor Babes Univ. of Medicine and Pharmacy of Timisoara (Romania); C. Ionita, Univ. at Buffalo (United States); L. Marsavina, R. Negru, C. Caplescu, Politehnica Univ. Timisoara (Romania); A. Bradu, Univ. of Kent (United Kingdom); F. Topala, R. O. Rominu, E. Petrescu, M. Leretter, M. Rominu, Victor Babes Univ. of Medicine and Pharmacy of Timisoara (Romania); A. Gh. Podoleanu, Univ. of Kent (United Kingdom)

POSTER SESSION

- 7626 1Q **A microfabricated phantom for diffusion tensor imaging** [7626-61]
B. Ebrahimi, Univ. of Michigan-Ann Arbor (United States); S. P. Nejad Davarani, Univ. of Michigan-Ann Arbor (United States) and Henry Ford Hospital (United States); G. Ding, Henry Ford Hospital (United States); Q. Jiang, Henry Ford Hospital (United States) and Oakland Univ. (United States); T. E. Chupp, Univ. of Michigan-Ann Arbor (United States)
- 7626 1R **Extension of dVCA model and its application in estimating fMRI components** [7626-62]
G. Zhang, J. Zhang, L. Yao, X. Zhao, Beijing Normal Univ. (China)
- 7626 1S **Inferring visual system connectivity using dynamic causal modeling of functional magnetic resonance imaging data** [7626-63]
A. M. Mahroos, Y. M. Kadah, Cairo Univ. (Egypt)
- 7626 1T **fMRI activation patterns in an analytic reasoning task: consistency with EEG source localization** [7626-64]
B. Li, K. C. Vasanta, M. O'Boyle, M. C. Baker, B. Nutter, S. Mitra, Texas Tech Univ. (United States)
- 7626 1U **Simultaneous measures of kinematics and fMRI: relation between movement parameters and activation maps in healthy subjects** [7626-65]
M. Gandolla, C. Casellato, S. Ferrante, G. Ferrigno, G. Baselli, Politecnico di Milano (Italy); F. Molteni, A. Martegani, T. Frattini, Valduce Hospital (Italy); A. Pedrocchi, Politecnico di Milano (Italy)
- 7626 1V **Regional homogeneity changes in prelingually deafened patients: a resting-state fMRI study** [7626-66]
W. Li, H. He, Institute of Automation (China); J. Xian, Capital Medical Univ. (China); B. Lv, M. Li, Institute of Automation (China); Y. Li, Z. Liu, Z. Wang, Capital Medical Univ. (China)
- 7626 1W **Topologic analysis and comparison of brain activation in children with epilepsy versus controls: an fMRI study** [7626-67]
K. J. Oweis, The George Washington Univ. (United States); M. M. Berl, The George Washington Univ. (United States) and Children's National Medical Ctr. (United States); W. D. Gaillard, The George Washington Univ. (United States), Children's National Medical Ctr. (United States), Georgetown Univ. (United States), and National Institute of Health (United States); E. S. Duke, K. Blackstone, Children's National Medical Ctr. (United States); M. H. Loew, J. M. Zara, The George Washington Univ. (United States)
- 7626 1X **Dealing with difficult deformations: construction of a knowledge-based deformation atlas** [7626-68]
S. S. Thorup, Technical Univ. of Denmark (Denmark) and Univ. of Copenhagen (Denmark); T. A. Darvann, N. V. Hermann, P. Larsen, Univ. of Copenhagen (Denmark); H. Ólafsdóttir, R. R. Paulsen, Technical Univ. of Denmark (Denmark); A. A. Kane, D. Govier, Washington Univ. School of Medicine (United States); L.-J. Lo, Chang Gung Memorial Hospital (Taiwan) and Chang Gung Univ. (Taiwan); S. Kreiborg, Univ. of Copenhagen (Denmark); R. Larsen, Technical Univ. of Denmark (Denmark)
- 7626 1Y **Dynamic CT head phantom for perfusion and angiography studies** [7626-69]
K. Russell, A. Blazeski, K. Dannecker, Q. Y. Lee, C. Holscher, C. Donahue, Univ. of Michigan (United States); W. van Kampen, Xoran Technologies, Inc. (United States)

- 7626 12 **International standards for pandemic screening using infrared thermography** [7626-70]
D. D. Pascoe, Auburn Univ. (United States); E. F. Ring, Univ. of Glamorgan (United Kingdom); J. B. Mercer, Univ. of Tromsø (Norway); J. Snell, The Snell Group (United States); D. Osborn, Philips Healthcare (United States); J. Hedley-Whyte, Harvard Univ. (United States)
- 7626 20 **Erode/dilate analysis of micro-CT images of porcine myocardial microvasculature** [7626-71]
T. L. Kline, Y. Dong, Mayo Clinic College of Medicine (United States); M. Zamir, The Univ. of Western Ontario (Canada); E. L. Ritman, Mayo Clinic College of Medicine (United States)
- 7626 21 **Three-dimensional ultrasound-based texture analysis of the effect of atorvastatin on carotid atherosclerosis** [7626-72]
J. Awad, A. Krasinski, D. Spence, Robarts Research Institute (Canada); G. Parraga, A. Fenster, Robarts Research Institute (Canada) and The Univ. of Western Ontario (Canada)
- 7626 22 **A temporally constrained ICA (TCICA) technique for artery-vein separation of cerebral microvasculature** [7626-73]
H. Mehrabian, L. Lindvere, B. Stefanovic, A. L. Martel, Univ. of Toronto (Canada) and Sunnybrook Health Sciences Ctr. (Canada)
- 7626 23 **Tracking planar lung motion in 4D CT with optical flow: validations and comparison of global, local, and local-global methods** [7626-74]
M. Negahdar, A. A. Amini, Univ. of Louisville (United States)
- 7626 24 **Influence of imaging quality on magnetic resonance-based pressure gradient measurements** [7626-75]
M. Delles, Karlsruhe Institute of Technology (Germany); F. Rengier, Univ. Hospital Heidelberg (Germany) and German Cancer Research Ctr. (Germany); S. Ley, Univ. Hospital Heidelberg (Germany); H. von Tengg-Kobligh, Univ. Hospital Heidelberg (Germany) and German Cancer Research Ctr. (Germany); H.-U. Kauczor, Univ. Hospital Heidelberg (Germany); R. Unterhinninghofen, R. Dillmann, Karlsruhe Institute of Technology (Germany)
- 7626 25 **Hardware and software system for automatic microemulsion assay evaluation by analysis of optical properties** [7626-76]
U. Maeder, T. Schmidts, J.-M. Burg, Univ. of Applied Sciences Giessen-Friedberg (Germany); J. T. Heverhagen, Philipps-Univ. Marburg (Germany); F. Runkel, M. Fiebich, Univ. of Applied Sciences Giessen-Friedberg (Germany)
- 7626 27 **The effect of viscosity on the phase of the nanoparticle magnetization induced by a harmonic applied field** [7626-79]
J. B. Weaver, Dartmouth College (United States) and Dartmouth-Hitchcock Medical Ctr. (United States); M. Harding, The Univ. of New Hampshire (United States); A. M. Rauwerdink, E. W. Hansen, Dartmouth College (United States)

- 7626 29 **Advantage of topological texture measures derived from Minkowski functionals (MF) and scaling index method (SIM) in comparison with biomechanical finite elements method (FEM) for the prediction of osteoporosis** [7626-81]
I. Sidorenko, Max-Planck-Institut für extraterrestrische Physik (Germany); J. Bauer, Technische Univ. München (Germany); R. Monetti, Max-Planck-Institut für extraterrestrische Physik (Germany); D. Mueller, E. Rummeny, Technische Univ. München (Germany); F. Eckstein, Paracelsus Medizinische Privatuniv. (Austria); C. Raeth, Max-Planck-Institut für extraterrestrische Physik (Germany)
- 7626 2B **Microscopic resolution imaging and proteomics correlation at histogeographically identical location: point by point correlation between ex vivo tissue imaging with high field MRI and multiplex tissue immunoblotting for proteomics profiling (Cum Laude Poster Award)** [7626-83]
K. M. Matsuda, J. Chung, K. Ylaya, National Cancer Institute, National Institutes of Health (United States); S. Dodd, M. Fukunaga, National Institute of Neurological Disorders and Stroke, National Institutes of Health (United States); S. M. Hewitt, National Cancer Institute, National Institutes of Health (United States)

Author Index

Conference Committee

Symposium Chairs

Kevin Cleary, Georgetown University Medical Center (United States)
Maryellen Giger, The University of Chicago (United States)

Conference Chairs

Robert C. Molthen, Medical College of Wisconsin (United States)
John B. Weaver, Dartmouth Hitchcock Medical Center (United States)

Program Committee

Amir A. Amini, University of Louisville (United States)
Juan R. Cebral, George Mason University (United States)
Yu Chen, University of Maryland, College Park (United States)
Anne V. Clough, Marquette University (United States)
Andreas H. Hielscher, Columbia University (United States)
Eric A. Hoffman, The University of Iowa Hospitals and Clinics (United States)
Xiaoping P. Hu, Emory University (United States)
John F. LaDisa, Jr., Marquette University (United States), Medical College of Wisconsin (United States), and Children's Hospital of Wisconsin (United States)
Armando Manduca, Mayo Clinic College of Medicine (United States)
Erik L. Ritman, Mayo Clinic College of Medicine (United States)
Ronald M. Summers, National Institutes of Health (United States)
Merryn H. Tawhai, The University of Auckland (New Zealand)
Axel Wismueller, University of Rochester Medical Ctr. (United States)

Session Chairs

- 1 MRI Applications
Xiaoping P. Hu, Emory University (United States)
John B. Weaver, Dartmouth Hitchcock Medical Center (United States)
- 2 MRI Brain Imaging
Axel Wismueller, University of Rochester Medical Center (United States)
- 3 Brain and Cranial Imaging
Armando Manduca, Mayo Clinic College of Medicine (United States)
- 4 Heart and Vascular Imaging
Amir A. Amini, University of Louisville (United States)

- 5 Breast Imaging
Armando Manduca, Mayo Clinic College of Medicine (United States)
Axel Wismueller, University of Rochester Medical Center (United States)
 - 6 Optical Imaging
Ronald M. Summers, National Institutes of Health (United States)
 - 7 Lung Imaging
Merryn H. Tawhai, The University of Auckland (New Zealand)
Eric A. Hoffman, The University of Iowa Hospitals and Clinics (United States)
 - 8 Modeling Photons and Structures
Andreas H. Hielscher, Columbia University (United States)
 - 9 Keynote and Image-based Modeling
Robert C. Molthen, Medical College of Wisconsin (United States)
 - 10 Nanoparticle and Microenvironment Imaging
John B. Weaver, Dartmouth Hitchcock Medical Center (United States)
 - 11 Bone Imaging
Erik L. Ritman, Mayo Clinic College of Medicine (United States)
- Poster Session
John F. LaDisa, Jr., Marquette University (United States), Medical College of Wisconsin (United States), and Children's Hospital of Wisconsin (United States)

Introduction

Southern California had perfect weather, not a cloud in site, and a record high temperature in store. The setting and atmosphere at and around the Town and Country Resort & Convention Center was unique and engaging. Outdoors, well-served symposium lunches, stimulating conversations, and an impressive group of papers combined to make the conference an undoubted success. Dr. Roderic Pettigrew, Director of National Institute of Biomedical Imaging and Bioengineering, resounded the importance of biomedical applications in health care and funded research throughout his Symposium Plenary; it was standing room only at the Biomedical Applications Conference Keynote where professor Peter Hunter presented a fascinating review of the Physiome Project and state-of-the-art work on image analysis and computational modeling of physiology in the heart. The Best Student Paper Award for the Biomedical Applications conference went to Tobias Knopp who gave an expert presentation on magnetic particle imaging in the Nanoparticle and Microenvironment Imaging session. The Honorable Mention Poster Awards went to Katelyn Russell for her work entitled "Dynamic ct head phantom for perfusion and angiographic studies" and Michael Delles for "Influence of imaging quality on magnetic resonance-based pressure gradient measurements." The Cum Laude Poster Award was presented to Kant Matsuda for his work entitled "Optical coherence tomography implied in implant bone interface investigation: numerical simulation and tensional stamps as complementary non invasive methods."

Considerable thanks goes to Merryn Tawhai, Eric Hoffman, Ching-Long Lin, and Kim Prisk, who all contributed to provide an informative and insightful workshop on image-based modeling and quantification of the lung and other organ systems. Dr. Tawhai graciously agreed to host the workshop and turned the opportunity into a magnificent interactive didactic tutorial.

Again this year, there were many excellent scientific presentations on various organ systems including brain, heart, lung, breast, bone, and vasculature. In addition, numerous imaging modalities were represented such that most clinical and preclinical techniques were well represented. Historically, one of the strengths of the Biomedical Applications conference is the presentation of direct applications of imaging to specific biomedical problems. The cogency of this is reflected in the following Proceedings.

A special thanks goes to the SPIE staff and the members of the Program Committee, without their efforts the conference and Proceedings would not exist.

We deeply appreciate your interest and support of this conference and look forward to your future involvement and continued outstanding presentations in the years to come.

Robert C. Molthen
John B. Weaver
