Volume 7674

Proceedings of SPIE, 1605-7422, v. 7674

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 1605-7422/10/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v Conference Committee

SESSION 1 NOVEL MATERIALS FOR SENSING AND IMAGING

- 7674 02 **Development of SAM-based multi-layer SERS substrates for intracellular analyses** [7674-01]
C. K. Klutse, B. M. Cullum, Univ. of Maryland, Baltimore County (United States)
- 7674 03 **Semiconductor CdS:Mn/ZnS quantum dots for sensing applications** [7674-02]
S. Banerjee, S. Santra, Univ. of Central Florida (United States)
- 7674 04 **Gadolinium-labeled dendronized gold nanoparticles as new targeted MRI contrast agent**
[7674-03]
H. Pan, M.-C. Daniel, Univ. of Maryland, Baltimore County (United States)
- 7674 05 **Using llama derived single domain antibodies to target botulinum neurotoxins** [7674-04]
M. D. Swain, G. P. Anderson, U.S. Naval Research Lab. (United States); R. D. Bernstein, Nova
Research, Inc. (United States); J. L. Liu, E. R. Goldman, U.S. Naval Research Lab. (United
States)
- 7674 06 **Novel probes for visualizing reactive oxygen species in lipid membranes** [7674-05]
K. Krumova, G. Cosa, McGill Univ. (Canada)

SESSION 2 BIOSENSING AND DIAGNOSTIC PLATFORMS AND TECHNOLOGIES

- 7674 07 **Frequency domain fluorescence lifetime microwell-plate platform for respirometry
measurements** [7674-06]
M. R. Chatni, G. Yale, Purdue Univ. (United States); A. Van Ryckeghem, Fumigation Services
and Supply (United States); D. M. Porterfield, Purdue Univ. (United States)
- 7674 08 **NanoDLSay: a new platform technology for biomolecular detection and analysis using gold
nanoparticle probes coupled with dynamic light scattering** [7674-07]
J. Bogdanovic, Q. Huo, Univ. of Central Florida (United States)
- 7674 09 **Excimer laser-induced perturbation spectroscopy: an approach to biosensing** [7674-08]
S. E. Smith, K. D. Buchanan, D. W. Hahn, Univ. of Florida (United States)
- 7674 0A **Chemically responsive hydrogel with nanoparticle enhanced detection for small
biomolecules** [7674-09]
S. Banerji, W. Peng, Y.-C. Kim, K. S. Booksh, Univ. of Delaware (United States)
- 7674 0B **FPAAs suitability as analog front-end for biosignals** [7674-10]
D. P. Morales, A. García, A. J. Palma, Univ. de Granada (Spain); U. Meyer-Baese, The Florida
State Univ. (United States)

SESSION 3 HYPERSPECTRAL/MULTISPECTRAL IMAGING FOR PHYSIOLOGICAL MONITORING

- 7674 0D **Optical cross-talk and surface characterization of SERS nanoimaging bundle substrates**
[7674-12]
J. B. Kiser, B. M. Cullum, Univ. of Maryland, Baltimore County (United States)
- 7674 0E **High-sensitivity hyperspectral imager for biomedical video diagnostic applications**
[7674-13]
R. Leitner, T. Arnold, M. De Biasio, Carinthian Tech Research AG (Austria)
- 7674 0F **A difference imaging technique for monitoring real-time changes in morphology within the cell, tissue, or whole organism spatial domain** [7674-14]
E. S. McLamore, M. Stensberg, G. Yale, H. Ochoa-Acuna, M. Sepulveda, X. Sun, O. Akkus, D. M. Porterfield, Purdue Univ. (United States)

SESSION 4 IN-VIVO MONITORING

- 7674 0G **Wearable sensors for skin heating and electric field strength in harsh environments** [7674-15]
J. Lewis, E. Klem, G. Cunningham, A. Dummer, RTI International (United States)
- 7674 0H **High reliability, miniature personal hypoxia monitoring system** [7674-16]
R. Gurjar, M. Seetamraju, D. E. Wolf, Radiation Monitoring Devices, Inc. (United States); J. Hastings, Consultant (United States)
- 7674 0I **In-vitro micro-Raman study of tissue samples for detecting cervical and ovarian cancer with 785-nm laser excitation** [7674-17]
S. K. Sharma, Univ. of Hawaii (United States); L. E. Kamemoto, Univ. of Hawaii (United States) and John A. Burns School of Medicine, Univ. of Hawaii (United States); A. K. Misra, Univ. of Hawaii (United States); M. T. Goodman, H. W. Luk, Cancer Research Ctr. of Hawaii (United States); J. L. Killeen, Clinical Labs. of Hawaii (United States)
- 7674 0J **Targeted in-vivo computed tomography (CT) imaging of tissue ACE using concentrated lisinopril-capped gold nanoparticle solutions** [7674-18]
M.-C. Daniel, Univ. of Maryland, Baltimore County (United States); O. Aras, M. F. Smith, Univ. of Maryland Hospital and School of Medicine (United States); A. Nan, Univ. of Maryland School of Pharmacy (United States); T. Fleiter, Univ. of Maryland Hospital and School of Medicine (United States)

POSTER SESSION

- 7674 0K **Biometric study using hyperspectral imaging during stress** [7674-20]
S. Nagaraj, S. Quoraishee, G. Chan, U.S. Army RDECOM ARDEC (United States); K. R. Short, Target Behavioral Response Lab., U.S. Army ARDEC (United States)

Author Index

Conference Committee

Symposium Chair

Michael T. Eismann, Air Force Research Laboratory (United States)

Symposium Cochair

William Jeffrey, HRL Laboratory, LLC (United States)

Conference Chairs

Brian M. Cullum, University of Maryland, Baltimore County (United States)

D. Marshall Porterfield, Purdue University (United States)

Karl S. Booksh, University of Delaware (United States)

Program Committee

Marie-Christine F. Daniel, University of Maryland, Baltimore County (United States)

Andre J. Gesquiere, University of Central Florida (United States)

David A. Heaps, AstraZeneca (United States)

Ilko K. Ilev, U.S. Food and Drug Administration (United States)

Chang-Soo Kim, Missouri University of Science and Technology (United States)

Joel Mobley, The University of Mississippi (United States)

W. Todd Monroe, Louisiana State University (United States)

Joshua Pfefer, U.S. Food and Drug Administration (United States)

Shiv K. Sharma, University of Hawai'i at Manoa (United States)

Brian S. Sorg, University of Florida (United States)

Liju Yang, North Carolina Central University (United States)

Jeong-Yeol Yoon, The University of Arizona (United States)

Anhong Zhou, Utah State University (United States)

Session Chairs

- 1 Novel Materials for Sensing and Imaging

Andre J. Gesquiere, University of Central Florida (United States)

Marie-Christine F. Daniel, University of Maryland, Baltimore County (United States)

- 2 Biosensing and Diagnostic Platforms and Technologies
 Brian S. Sorg, University of Florida (United States)
 Ilko K. Ilev, U.S. Food and Drug Administration (United States)
- 3 Hyperspectral/Multispectral Imaging for Physiological Monitoring
 Eric S. McLamore, Purdue University (United States)
 Shiv K. Sharma, University of Hawai'i at Manoa (United States)
- 4 In-Vivo Monitoring
 Shiv K. Sharma, University of Hawai'i at Manoa (United States)
 Karl S. Booksh, University of Delaware (United States)
