Front Matter: Volume 7751

, "Front Matter: Volume 7751," Proc. SPIE 7751, XVIII International Symposium on Gas Flow, Chemical Lasers, and High-Power Lasers, 775101 (20 December 2010); doi: 10.1117/12.886322

SPIE.

Event: 18th International Symposium on Gas Flow and Chemical Lasers and High Power Lasers, 2010, Sofia, Bulgaria

PROCEEDINGS OF SPIE

XVIII International Symposium on

Gas Flow, Chemical Lasers, and High-Power Lasers

Tanja Dreischuh
Petar A. Atanasov
Nikola V. Sabotinov
Editors

30 August–3 September 2010
Sofia, Bulgaria

Organized by
Institute of Electronics (Bulgaria)
Bulgarian Academy of Sciences (Bulgaria)

Sponsored by
EOARD—European Office of Aerospace Research and Development, Air Force Office of
Scientific Research, United States Air Force Research Laboratory (United Kingdom)
Bulgarian Academy of Sciences (Bulgaria)
Institute of Electronics (Bulgaria)
National Science Fund of Bulgaria (Bulgaria)

Cosponsored and Published by
SPIE

Volume 7751

Proceedings of SPIE, 0277-786X, v. 7751

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *XVIII International Symposium on Gas Flow, Chemical Lasers, and High-Power Lasers*, edited by Tanja Dreischuh, Petar A. Atanasov, Nikola V. Sabotinov, Proceedings of SPIE Vol. 7751 (SPIE, Bellingham, WA, 2010) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/10/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

xi	<i>Symposium Committees</i>
xv	<i>Introduction</i>

KEYNOTE PAPER

7751 02	Developments and applications of high power and high repetition lasers: from the laser fusion to the industrial neutron sources (Keynote Paper) [7751-52] K. Mima, Graduate School for the Creation of New Photonics Industries (Japan); K. Kasuya, Institute of Applied Flow (Japan) and Institute of Laser Technology (Japan)

GAS AND CHEMICAL LASERS

7751 03	Optically based diagnostics for gas-phase laser development (Invited Paper) [7751-91] W. T. Rawlins, S. Lee, K. L. Galbally-Kinney, W. J. Kessler, A. J. Hicks, I. M. Konen, E. P. Plumb, S. J. Davis, Physical Sciences Inc. (United States)
7751 04	Efficient discharge lasers pumped by double-discharge circuits with semiconductor opening switch (Invited Paper) [7751-10] A. N. Panchenko, Institute of High Current Electronics (Russian Federation)
7751 05	COIL operation with iodine atoms generated in a glow discharge (Invited Paper) [7751-45] P. A. Mikheyev, M. V. Zagidullin, N. I. Ufimtsev, N. A. Khvatov, A. I. Voronov, V. N. Azyazov, P.N. Lebedev Physical Institute (Russian Federation)
7751 06	A historical overview on the mechanism of the COIL kinetics (Invited Paper) [7751-14] S. Rosenwaks, B. D. Barmashenko, Ben-Gurion Univ. of the Negev (Israel); K. Waichman, NRCN (Israel)
7751 07	Lasing in supersonic chemical oxygen-iodine lasers: recent modeling and comparison with experiment [7751-15] B. D. Barmashenko, Ben-Gurion Univ. of the Negev (Israel); K. Waichman, NRCN (Israel); S. Rosenwaks, Ben-Gurion Univ. of the Negev (Israel)
7751 08	Evolution of the electric discharge oxygen-iodine laser [7751-50] D. L. Carroll, G. F. Benavides, CU Aerospace LLC (United States); J. W. Zimmerman, B. S. Woodard, Univ. of Illinois at Urbana-Champaign (United States); A. D. Palla, CU Aerospace LLC (United States); M. T. Day, Univ. of Illinois at Urbana-Champaign (United States); J. T. Verderyn, CU Aerospace LLC (United States); W. C. Solomon, Univ. of Illinois at Urbana-Champaign (United States)

- 7751 09 **Development of a hybrid (solid state/gas) femtosecond laser system of multiterawatt peak power** [7751-18]
V. Losev, S. Alekseev, N. Ivanov, B. Kovalchuk, Institute of High Current Electronics (Russian Federation); L. Mikheev, G. Mesyats, P.N. Lebedev Physical Institute (Russian Federation); Yu. Panchenko, N. Ratakhin, A. Yastremsky, Institute of High Current Electronics (Russian Federation)
- 7751 0A **Runaway electrons preionized diffuse discharges at high pressure** [7751-68]
V. F. Tarasenko, M. I. Lomaev, D. A. Sorokin, Institute of High Current Electronics (Russian Federation)
- 7751 0B **Advances in the RF atomic iodine generator for oxygen-iodine laser** [7751-61]
V. Jirásek, J. Schmiedberger, M. Čenský, J. Kodymová, Institute of Physics (Czech Republic)
- 7751 0C **Multiple-wavelength nanosecond gas-vapor lasers: experiments and applications** [7751-83]
A. N. Soldatov, Tomsk State Univ. (Russian Federation)
- 7751 0D **An all gas-phase iodine laser using molecular iodine as atomic iodine donor** [7751-48]
T. Masuda, Keio Univ. (Japan); T. Nakamura, M. Endo, Tokai Univ. (Japan)
- 7751 0E **On the $O_2(\alpha^1\Delta)$ quenching by vibrationally excited ozone** [7751-44]
V. N. Azyazov, P. A. Mikheyev, P.N. Lebedev Physical Institute (Russian Federation); M. C. Heaven, Emory Univ. (United States)
- 7751 0F **Exciplex pumped alkali laser (XPAL) modeling and theory** [7751-82]
A. D. Palla, J. T. Verdeyen, D. L. Carroll, CU Aerospace LLC (United States)
- 7751 0G **Hybrid RF/DC plasma torch for generation of singlet oxygen in discharge oxygen-iodine laser** [7751-73]
J. Schmiedberger, K. Rohlena, Institute of Physics (Czech Republic); J. Gregor, P. Křenek, Institute of Plasma Physics (Czech Republic); V. Jirásek, M. Čenský, J. Kodymová, Institute of Physics (Czech Republic)
- 7751 0H **Chemical oxygen-iodine laser with a centrifugal spray generator of singlet oxygen** [7751-62]
O. Špalek, V. Jirásek, M. Čenský, J. Kodymová, Institute of Physics (Czech Republic)
- 7751 0I **COIL operation with a gas-phase chemical generation of molecular iodine** [7751-86]
V. Jirásek, O. Špalek, M. Čenský, J. Kodymová, Institute of Physics (Czech Republic)
- 7751 0J **Research on a new type eject singlet oxygen generator** [7751-54]
Z. Liu, W. Chen, X. Xu, J. Wang, Y. Liu, Y. Ma, G. Lv, Y. Jin, F. Sang, Dalian Institute of Chemical Physics (China); R. Bi, Y. Yao, F. Guo, Qingdao Univ. of Science and Technology (China)
- 7751 0K **Research on centrifugal flow singlet oxygen generator** [7751-53]
X. Xu, W. Chen, Z. Liu, Y. Liu, J. Wang, Y. Ma, G. Lv, M. Shao, Y. Jin, F. Sang, Dalian Institute of Chemical Physics (China)
- 7751 0L **Magnetic modulation of subsonic COIL** [7751-80]
J. Beránek, K. Rohlena, Institute of Physics (Czech Republic)

- 7751 OM **Gain measurement of TEA-CO₂ laser with supersonic gas flow** [7751-43]
G. Imada, Niigata Institute of Technology (Japan) and Nagaoka Univ. of Technology (Japan); H. Saitou, M. Suzuki, W. Masuda, Nagaoka Univ. of Technology (Japan)
- 7751 ON **Results of measurements of the absolute spectral irradiance from O₂(a)-O₂-H₂O gas produced by chemical singlet oxygen generator** [7751-09]
M. V. Zagidullin, N. A. Khvatov, P. A. Mikheyev, P.N. Lebedev Physical Institute (Russian Federation)
- 7751 OO **Post discharge kinetics of iodine atoms produced by a pulsed electric discharge in an oxygen-iodide (CF₃I, CH₃I) mixture** [7751-42]
N. P. Vagin, N. N. Yuryshv, P.N. Lebedev Physical Institute (Russian Federation)
- 7751 OP **Determination of gas and electron temperatures for a powerful MIR He-SrBr₂ laser excited in nanosecond pulsed longitudinal discharge** [7751-08]
K. A. Temelkov, S. I. Slaveeva, N. K. Vuchkov, Institute of Solid State Physics (Bulgaria); L. Lyutov, Sofia Univ. (Bulgaria); N. V. Sabotinov, Institute of Solid State Physics (Bulgaria)
- 7751 OQ **Improving of flow optical quality in COIL resonator cavity as result of operation of pressure recovery system developed on base of active diffuser** [7751-39]
V. M. Malkov, I. A. Kiselev, A. E. Orlov, I. V. Shatalov, Laser Systems Ltd. (Russian Federation)
- 7751 OR **Study on the spectral narrowing technology of an optically pumped XeF(C-A) laser** [7751-36]
L. Yu, F. Zhu, Y. Shen, X. An, C. Huang, L. Ma, A. Yi, J. Liu, Northwest Institute of Nuclear Technology (China)
- 7751 OS **Modeling of transverse-flow singlet oxygen generators and its experimental verification** [7751-59]
T. Nojiri, M. Endo, Tokai Univ. (Japan)
- 7751 OT **Output power enhancement of an amine-based all gas-phase iodine laser by addition of methane gas** [7751-49]
T. Masuda, Keio Univ. (Japan); T. Nakamura, M. Endo, Tokai Univ. (Japan)
- 7751 OU **Development of a strontium vapor laser with pulse repetition frequency up to 1 MHz** [7751-84]
A. N. Soldatov, N. A. Yudin, Yu. P. Polunin, A. V. Vasilieva, Tomsk State Univ. (Russian Federation); G. D. Chebotarev, E. L. Latush, A. A. Fesenko, Southern Federal Univ. (Russian Federation)
- 7751 OV **Discharge characteristics and laser performance of non-chain HF laser** [7751-32]
K. Huang, A. Yi, Y. Tang, F. Zhu, L. Yu, L. Ma, X. Huang, C. Huang, Y. Shen, J. Liu, Northwest Institute of Nuclear Technology (China)
- 7751 OW **Preliminary studies of atomic iodine generation via nitrogen trichloride** [7751-57]
L. Li, L. Duo, Y. Jin, F. Sang, Dalian Institute of Chemical Physics (China)

SOLID STATE, DISK, AND FIBER LASERS

- 7751 0X **The latest progress of high-average-power diode-pumped solid-state lasers (Invited Paper)** [7751-64]
C. Tang, Institute of Applied Electronics (China)
- 7751 0Y **High power Raman lasers at 1.6 μm** [7751-06]
O. Lux, H. Rhee, H. J. Eichler, Technische Univ. Berlin (Germany); R. V. Chulkov, B. I. Stepanov
Institute of Physics (Belarus)
- 7751 0Z **Volume Bragg lasers** [7751-79]
I. Divliansky, A. Jain, D. Drachenberg, CREOL, The College of Optics and Photonics, Univ. of
Central Florida (United States); A. Podvyaznyy, V. Smirnov, OptiGrate Corp. (United States);
G. Venus, L. Glebov, CREOL, The College of Optics and Photonics, Univ. of Central Florida
(United States)
- 7751 10 **Experimental and theoretical characterization of ceramic slab DPSSLs with different formats
and resonators** [7751-03]
A. Lapucci, M. Ciofini, Istituto Nazionale di Ottica Applicata, CNR (Italy)

UV AND VUV LASERS

- 7751 11 **New powerful metal vapor lasers oscillating in deep ultraviolet and middle infrared spectral
ranges (Invited Paper)** [7751-07]
K. A. Temelkov, N. K. Vuchkov, N. V. Sabotinov, Institute of Solid State Physics (Bulgaria)
- 7751 12 **Issues for the development of solid state lasers for VUV, UV, and visible regions and possible
solutions** [7751-25]
V. V. Apollonov, T. V. Uvarova, A. M. Prokhorov General Physics Institute (Russian Federation)
- 7751 13 **Vacuum ultraviolet argon excimer laser at 126 nm excited by a high intensity laser** [7751-65]
M. Kaku, S. Harano, M. Katto, S. Kubodera, Univ. of Miyazaki (Japan)
- 7751 14 **UV lasing in nitrogen pumped by a runaway electron preionised diffuse discharge** [7751-26]
V. F. Tarasenko, E. Kh. Baksht, A. G. Burachenko, Institute of High Current Electronics (Russian
Federation)

RESONATORS AND ACTIVE OPTICS

- 7751 15 **Off-axis negative-branch unstable resonator with rectangular cross-section** [7751-75]
C. Pargmann, T. Hall, F. Duschek, K. M. Grünewald, J. Handke, Deutsches Zentrum für Luft-
und Raumfahrt e.V. (Germany)
- 7751 16 **Parametric study of a hybrid stable unstable resonator (HSUR) for slab lasers in strongly
non-confocal configuration** [7751-02]
A. Lapucci, M. Ciofini, Istituto Nazionale di Ottica Applicata, CNR (Italy)

NOVEL APPROACHES

- 7751 17 **Phased multichannel laser systems with high spatial emission brightness (Invited Paper)** [7751-88]
A. V. Fedin, Laser Systems Ltd. (Russian Federation) and V. A. Kovrov State Technological Academy (Russian Federation); T. T. Basiev, A. M. Prokhorov General Physics Institute (Russian Federation); A. V. Gavrilov, V. A. Kovrov State Technological Academy (Russian Federation); S. N. Smetanin, Laser Systems Ltd. (Russian Federation) and V. A. Kovrov State Technological Academy (Russian Federation); A. S. Boreysho, V. F. Lebedev, Laser Systems Ltd. (Russian Federation)
- 7751 18 **Super-long conductive canal for energy delivery from space: experimental and theoretical modeling (Invited Paper)** [7751-90]
V. Apollonov, N. Pletnev, A. M. Prokhorov General Physics Institute (Russian Federation)
- 7751 19 **Laser surface inspections: fundamentals and applications to monitor inner surface conditions of nuclear fusion reactor chambers** [7751-12]
K. Kasuya, Institute of Applied Flow (Japan) and Institute of Laser Technology (Japan); S. Ozawa, Toshiba Co. Ltd. (Japan); T. Norimatsu, H. Azechi, Osaka Univ. (Japan); K. Mima, Osaka Univ. (Japan) and Graduate School for the Creation of New Photonics Industries (Japan); S. Nakai, Osaka Univ. (Japan); S. Suzuki, Japan Atomic Energy Agency (Japan); B. Budner, W. Mroz, Military Univ. of Technology (Poland); N. Kasuya, W. Kasuya, K. Kasuya, Institute of Applied Flow (Japan); Y. Izawa, H. Furukawa, Y. Shimada, Institute of Laser Technology (Japan); T. Yamanaka, M. Nakai, K. Nagai, Osaka Univ. (Japan); K. Yokoyama, K. Ezato, M. Enoda, M. Akiba, Japan Atomic Energy Agency (Japan); A. Prokopiuk, Military Univ. of Technology (Poland)
- 7751 1A **Mode control of random microresonators consisting of scattering particles** [7751-74]
S. Takeda, S. Hamada, M. Terakawa, T. Saiki, M. Obara, Keio Univ. (Japan)
- 7751 1B **Sheet metal cutting with a 2 kW radially polarized CO₂ laser** [7751-58]
M. Endo, Tokai Univ. (Japan)
- 7751 1C **CARS measurement of vibrational and rotational temperature with high power laser and high speed visualization of total radiation behind hypervelocity shock waves of 5-7km/s** [7751-97]
K. Sakurai, V. H. Bindu, S. Niinomi, M. Ota, K. Maeno, Chiba Univ. (Japan)
- 7751 1D **Novel analysis system using surface desorption stimulated by VUV photons from laser-produced plasma** [7751-51]
M. Katto, M. Kaku, S. Kubodera, A. Yokotani, Univ. of Miyazaki (Japan); N. Miyabayashi, ESCO, Ltd. (Japan); W. Sasaki, NTP, Inc. (Japan)
- 7751 1E **Numerical analysis of high power gas laser accelerated by Xgrid computing technology** [7751-01]
M. Taniwaki, Tokyo Electric Power Co. (Japan); S. Sato, National Defense Medical College Research Institute (Japan); H. Katagiri, Y. Maekawa, M. Iyoda, Chiba Institute of Technology (Japan)
- 7751 1F **Photoluminescence and optical transmission of diamond and its imitators** [7751-22]
V. F. Tarasenko, E. I. Lipatov, S. M. Avdeev, Institute of High Current Electronics (Russian Federation)

LASER MATTER INTERACTIONS

- 7751 1G **1 GeV/cm electron acceleration by a petawatt OPCPA laser (Invited Paper)** [7751-85]
A. Soloviev, E. Khazanov, Institute of Applied Physics (Russian Federation)
- 7751 1H **LBDE: Laser Beam Drilling Efficiency unit: the Daud** [7751-77]
G. Daurelio, Univ. degli Studi di Bari (Italy) and Politecnico de Bari (Italy)
- 7751 1I **Numerical evaluation of hard x-ray line yield emitted from aluminum plasma produced by high power sub-nanosecond laser pulses** [7751-19]
M. H. Mahdih, S. Hosseini, A. Daei A., Iran Univ. of Science and Technology (Iran, Islamic Republic of)
- 7751 1J **Carrier dynamics-induced transient photoexcitation and energy deposition in femtosecond-laser irradiated GaAs** [7751-81]
T. Apostolova, Institute for Nuclear Research and Nuclear Energy (Bulgaria); A. Ionin, S. Kudryashov, L. Seleznev, D. Sinitsyn, P.N. Lebedev Physical Institute (Russian Federation)
- 7751 1K **Optical breakdown in dielectrics induced by high intensity femtosecond laser pulse and simulation of breakdown footprint** [7751-30]
M. H. Mahdih, M. Gharibzadeh, Iran Univ. of Science and Technology (Iran, Islamic Republic of)
- 7751 1L **Laser plasma of poly (methyl methacrylate) in air: modeling and experiment** [7751-93]
L. A. Zakharov, Novosibirsk State Univ. (Russian Federation) and Institute of Thermophysics (Russian Federation); N. M. Bulgakova, Institute of Thermophysics (Russian Federation); A. E. Tel'minov, A. N. Panchenko, M. A. Shulepov, Institute of High Current Electronics (Russian Federation)
- 7751 1M **Laser ablation of maskant used in chemical milling process for aerospace applications** [7751-05]
C. Leone, V. Lopresto, F. Memola Capece Minutolo, I. De Iorio, Univ. degli Studi di Napoli Federico II (Italy); N. Rinaldi, CMS Industries (Italy)
- 7751 1N **Calculation of the radiative opacity for some low Z plasmas produced by high power pulsed lasers** [7751-27]
M. H. Mahdih, S. Hosseinzadeh, Iran Univ. of Science and Technology (Iran, Islamic Republic of)
- 7751 1O **Velocity distribution function of electrons plasma produced by high power laser pulse interacting aluminum target** [7751-37]
M. H. Mahdih, E. M. Razi, Iran Univ. of Science and Technology (Iran, Islamic Republic of)
- 7751 1P **Optical opacity and reflectivity of plasma produced by irradiation of aluminum thin film by nanosecond pulsed laser** [7751-35]
M. H. Mahdih, H. Hosseini Shokoh, Iran Univ. of Science and Technology (Iran, Islamic Republic of)
- 7751 1Q **Microstructure formation on the surface of aluminum target by a nanosecond pulsed laser** [7751-23]
M. H. Mahdih, S. H. Mahmoudi, Iran Univ. of Science and Technology (Iran, Islamic Republic of)

- 7751 1R **Experimental characterization of shock wave driven by high power nanosecond pulsed laser in water** [7751-38]
M. H. Mahdiah, M. Nikbakht, S. Yazdani, Iran Univ. of Science and Technology (Iran, Islamic Republic of)
- 7751 1S **Laser paint removal on the outside walls of the Church Abbey Saint Adoeno in Bisceglie (BAT), Italy: a case study** [7751-41]
G. Daurelio, I. M. Catalano, Univ. degli Studi di Bari (Italy) and Politecnico di Bari (Italy); P. Bassi, Church Abbey Saint Adoeno (Italy)
- 7751 1T **Paint ablation process vs. different laser wavelengths for 18 diverse spray paints used for graffiti on the monuments and historical mansions** [7751-56]
G. Daurelio, Univ. degli Studi di Bari (Italy) and Politecnico di Bari (Italy); R. Comparelli, CNR, Univ. degli Studi di Bari (Italy); I. M. Catalano, S. E. Andriani, Univ. degli Studi di Bari (Italy) and Politecnico di Bari (Italy)
- 7751 1U **Coloring on transparent resin materials using waveguide CO₂ laser and thermal analysis on processing surface with thermography (Best Student Paper Award, Third Prize)** [7751-71]
M. Kaneko, Y. Ishii, Soka Univ. (Japan)

MICRO- AND NANOFABRICATION

- 7751 1V **Efficient femtosecond laser surface patterning using high dielectric constant particles with small size parameter (Invited Paper)** [7751-89]
M. Obara, Y. Tanaka, G. Obara, A. Zenidaka, M. Terakawa, Keio Univ. (Japan)
- 7751 1W **Formation of microstructure on liquid metal surface under nanosecond laser ablation** [7751-111]
A. N. Panchenko, Institute of High Current Electronics (Russian Federation); N. M. Bulgakova, Institute of Thermophysics (Russian Federation); A. E. Tel'minov, M. A. Shulepov, Institute of High Current Electronics (Russian Federation)
- 7751 1X **Directionally controlled plasmon excitation in gold nanoparticles for near-field nanopatterning by femtosecond laser (Best Student Paper Award, Second Prize)** [7751-60]
T. Miyanishi, M. Terakawa, M. Obara, Keio Univ. (Japan); N. N. Nedyalkov, P. A. Atanasov, Institute of Electronics (Bulgaria)
- 7751 1Y **Nano-surface patterning by femtosecond laser for plasmonic surface optical applications** [7751-92]
G. Obara, T. Miyanishi, Y. Tanaka, M. Terakawa, M. Obara, Keio Univ. (Japan)
- 7751 1Z **Investigation of micro laser drilling on thin glass fibers by femtosecond laser** [7751-69]
T. Suzuki, D. Tokita, K. Watanabe, Soka Univ. (Japan)
- 7751 20 **Silver nanoparticles produced by PLD in vacuum** [7751-94]
A. Og. Dikovska, I. G. Dimitrov, Institute of Electronics (Bulgaria); M. T. Alexandrov, Institute of Experimental Pathology and Parasitology (Bulgaria); N. N. Nedyalkov, P. A. Atanasov, Institute of Electronics (Bulgaria)

NOVEL MACROPROCESSING AND APPROACHES

- 7751 21 **Reinforcement of titanium by laser metal deposition (Best Student Paper Award, First Prize)** [7751-33]
J. Sampedro, I. Pérez, B. Cárcel, AIDO (Spain) V. Amigó, Instituto de Tecnología de Materiales (Spain); J. M. Sánchez, Univ. de Cádiz (Spain)
- 7751 22 **Hot bending with a fiber coupled solid state laser** [7751-55]
F. Bammer, T. Schumi, D. Schuöcker, Technische Univ. Wien (Austria)
- 7751 23 **Improved laser metal deposition (LMD) of nickel base superalloys by pyrometry process control** [7751-17]
B. Carcel, J. Sampedro, I. Perez, E. Fernandez, J. A. Ramos, AIDO (Spain)
- 7751 24 **Optical breakdown and absorption of radiation of powerful pulse-periodic CO₂ laser in a supersonic air stream** [7751-95]
A. N. Malov, A. M. Orishich, T. A. Bobarykina, V. F. Chirkashenko, Khristianovich Institute of Theoretical and Applied Mechanics (Russian Federation)
- 7751 25 **Development of a laser-based hybrid drill for concrete and rocks** [7751-76]
S. Muto, H. Kato, K. Masuda, Sankyo Seisakusho Co. (Japan); K. Tei, Tokai Univ. (Japan); T. Fujioka, Institute for Applied Optics (Japan)
- 7751 26 **Promising technological and medical applications of strontium vapor lasers** [7751-66]
A. N. Soldatov, N. A. Yudin, Yu. P. Polunin, A. V. Vasilieva, Tomsk State Univ. (Russian Federation); O. A. Romanovskii, V.E. Zuev Institute of Atmospheric Optics (Russian Federation)

PROPAGATION, SPACE, AND SENSING

- 7751 27 **Long range laser propagation: power scaling and beam quality issues (Invited Paper)** [7751-16]
W. L. Bohn, BohnLaser Consult (Germany)
- 7751 28 **Ionization-free filamentation in gases: soliton regime** [7751-31]
L. M. Kovachev, K. L. Kovachev, Institute of Electronics (Bulgaria)
- 7751 29 **Femtosecond laser microprocessing for implanting sensor function into optical fibers** [7751-67]
K. Goya, D. Tokita, K. Watanabe, Soka Univ. (Japan)

Author Index

Symposium Committees

Symposium Chairs

Nikola V. Sabotinov, Institute of Solid State Physics of the Bulgarian Academy of Sciences (Bulgaria)

Petar A. Atanasov, Institute of Electronics of the Bulgarian Academy of Sciences (Bulgaria)

Organizing Committee

Anna Dikovska, Institute of Electronics of the Bulgarian Academy of Sciences (Bulgaria)

Tanja Dreischuh, Institute of Electronics of the Bulgarian Academy of Sciences (Bulgaria)

Ivan Grigorov, Institute of Electronics of the Bulgarian Academy of Sciences (Bulgaria)

Nikolay Nedyalkov, Institute of Electronics of the Bulgarian Academy of Sciences (Bulgaria)

Symposium Secretary

Elena Krasteva, Institute of Electronics of the Bulgarian Academy of Sciences (Bulgaria)

International Advisory Committee

Krzysztof M. Abramski (Poland)

Richard A. Ackerman (United States)

Victor V. Appollonov (Russian Federation)

Petar A. Atanasov (Bulgaria)

Michel Autric (France)

Howard J. Baker (United Kingdom)

Boris D. Barmashenko (Israel)

D. D. Bhawalkar (India)

Willy L. Bohn (Germany)

Anatoly S. Boreysho (Russian Federation)

David L. Carroll (United States)

Robert L. Cook (United Kingdom)

Paolo Di Lazzaro (Italy)

Hans J. Eichler (Germany)

Maria Farsari (Greece)

Session Chairs

Victor V. Apollonov, A.M. Prokhorov General Physics Institute (Russian Federation)
Petar A. Atanasov, Institute of Electronics (Bulgaria)
Willy L. Bohn, BohnLaser Consult (Germany)
David L. Carroll, CU Aerospace, LLC (United States)
Giuseppe Daurelio, University and Polytechnic of Bari (Italy)
Koichi Kasuya, Institute of Applied Flow (Japan) and Institute of Laser Technology (Japan)
Jarmila Kodymová, Institute of Physics of the ASCR (Czech Republic)
Timothy Madden, Air Force Research Laboratory (United States)
Pavel A. Mikheyev, P.N. Lebedev Physical Institute (Russian Federation)
Tomáš Mocek, Institute of Physics of the ASCR (Czech Republic)
Alexei N. Panchenko, Institute of High Current Electronics SB RAS (Russian Federation)
Wilson T. Rawlins, Physical Sciences Inc. (United States)

Salman Rosenwaks, Ben-Gurion University of the Negev (Israel)
Nikola V. Sabotinov, Institute of Solid State Physics (Bulgaria)
Chun Tang, Institute of Applied Electronics (China)
Ilya S. Tarasov, Ioffe Physico-Technical Institute (Russian Federation)

Introduction

This volume is a collection of papers presented at the XVIII International Symposium on Gas Flow and Chemical Lasers and High-Power Lasers (GCL-HPL 2010) held in Sofia, Bulgaria from 30 August–3 September 2010. This edition of the traditional biennial symposium was organized by the Institute of Electronics at the Bulgarian Academy of Sciences and was dedicated to the 50th anniversary of the laser invention. The event was financially supported by EOARD, SPIE, the Bulgarian Academy of Sciences and the National Science Fund of Bulgaria, to which the organizing committee expresses deep gratitude.

This was the 18th in a series of symposiums to focus on gas flow, chemical and high power lasers. The scope of the GCL-HPL is broad, including fundamental research, laser development and systems engineering (gas and chemical lasers, solid state, disk and fiber lasers, lasers emitting in UV & VUV region of the spectrum), short pulse amplification, resonators and active optics as well as gas, chemical and high power laser applications in a wide range of fields – laser matter interaction, nanophotonics and microprocessing, propagation, space and sensing. GCL-HPL 2010 brought together scientists and engineers from all over the world to create an event where members of the laser community can meet to exchange ideas, review the latest technologies and achievements, discuss the future directions, and initiate new collaborations and joint research projects. Over 110 scientists from Austria, Canada, China, Czech Republic, France, Germany, Iran, Israel, Italy, Japan, Portugal, Russia, Spain, South Africa, United Kingdom, the United States of America and Bulgaria participated in this edition. The choice of Sofia, one of the oldest cities in Europe, strongly enhanced the friendly and stimulating atmosphere of the symposium.

The GCL-HPL 2010 symposium also provided a meeting place for discussion of senior scientists and young researchers. To encourage and acknowledge excellence in oral and poster student paper presentations, SPIE sponsored three best student paper awards.

The editors of the volume would like to thank the members of the international advisory committee for their great support, as well as the authors and reviewers for their contribution to these proceedings. Thanks also go to the SPIE staff for their invaluable assistance. We hope that readers will find this volume useful and informative and we would like to invite them to take part in the XIX GCL-HPL, which will be held in 2012.
