Front Matter: Volume 7768

, "Front Matter: Volume 7768," Proc. SPIE 7768, Nanoepitaxy: Homo- and Heterogeneous Synthesis, Characterization, and Device Integration of Nanomaterials II, 776801 (20 September 2010); doi: 10.1117/12.869881

SPIE.

Event: SPIE NanoScience + Engineering, 2010, San Diego, California, United States

PROCEEDINGS OF SPIE

***Nanoepitaxy: Homo- and
Heterogeneous Synthesis,
Characterization, and Device
Integration of Nanomaterials II***

**M. Saif Islam
Nobuhiko P. Kobayashi
A. Alec Talin**
Editors

**1–2 and 4 August 2010
San Diego, California, United States**

SPIE

Volume 7768

Proceedings of SPIE, 0277-786X, v. 7768

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Nanoepitaxy: Homo- and Heterogeneous Synthesis, Characterization, and Device Integration of Nanomaterials II*, edited by M. Saif Islam, Nobuhiko P. Kobayashi, A. Alec Talin, Proceedings of SPIE Vol. 7768 (SPIE, Bellingham, WA, 2010) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/10/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v *Conference Committee*

NANOHETEROEPITAXIAL GROWTH: PROPERTIES AND APPLICATIONS

- 7768 02 **Catalyst-free GaN nanowire growth and optoelectronic characterization (Invited Paper)**
[7768-01]
K. A. Bertness, N. A. Sanford, J. B. Schlager, National Institute of Standards and Technology
(United States)
- 7768 05 **Tensile strained III-V self-assembled nanostructures on a (110) surface (Invited Paper)**
[7768-04]
M. L. Lee, P. J. Simmonds, Yale Univ. (United States)

GROUP IV NANOEPITAXY

- 7768 06 **Group IV nanomembranes and nanoepitaxy: new properties via local and global strain engineering** [7768-05]
F. Cavallo, D. M. Paskiewicz, S. A. Scott, M. Huang, M. G. Lagally, Univ. of Wisconsin-Madison
(United States)

SELECTIVE AREA NANOEPITAXY AND NANOHETEROEPITAXY

- 7768 0A **Dislocation reduction in CdTe epilayers grown on silicon substrates using buffered nanostructures** [7768-09]
S. Shintri, S. Rao, H. Li, I. Bhat, Rensselaer Polytechnic Institute (United States); S. Jha, C. Liu, T. Kuech, Univ. of Wisconsin-Madison (United States); W. Palosz, S. Trivedi, Brimrose Corp. of America (United States); F. Semendy, P. Wijewarnasuriya, Y. Chen, Army Research Lab. (United States)
- 7768 0B **Coulomb staircase in fused semiconducting InP nanowires under light illumination** [7768-10]
H. Yamada, Univ. of California, Berkeley (United States); T. Yamada, Santa Clara Univ. (United States) and Univ. of California, Santa Cruz (United States); A. J. Lohn, N. P. Kobayashi, Univ. of California, Santa Cruz (United States) and NECTAR, Univ. of California, Santa Cruz and NASA Ames Research Ctr. (United States)

NANOEPITAXY/NANOHETEROEPITAXY: NOVEL CHARACTERIZATION OF MATERIALS AND GROWTH PROPERTIES

- 7768 0H **Temperature-dependent structural characterization of silicon <110> nanowires** [7768-16]
M.-K. Kwon, Univ. of California, Davis (United States) and Chosun Univ. (Korea, Republic of); J.-Y. Kim, L. V. J., Y.-J. Teng, H.-L. Hsu, P. A. Baeza, I. Arslan, M. S. Islam, Univ. of California, Davis (United States)

NANOEPITAXIAL MATERIALS: APPLICATIONS IN DEVICES AND SYSTEMS

- 7768 0I **Epitaxial regrowth of silicon for the fabrication of radial junction nanowire solar cells (Invited Paper)** [7768-17]
C. E. Kendrick, S. M. Eichfeld, Y. Ke, X. Weng, X. Wang, T. S. Mayer, J. M. Redwing, The Pennsylvania State Univ. (United States)
- 7768 0J **Tuning of the electronic characteristics of ZnO nanowire transistors and their logic device application (Invited Paper)** [7768-18]
W.-K. Hong, Gwangju Institute of Science and Technology (Korea, Republic of) and Univ. of Cambridge (United Kingdom); G. Jo, M. Choe, W. Park, J. Yoon, T. Lee, Gwangju Institute of Science and Technology (Korea, Republic of)
- 7768 0K **III-nitride nanowires: growth, properties, and applications (Invited Paper)** [7768-19]
G. T. Wang, Q. Li, J. Huang, A. A. Talin, Y. Lin, I. Arslan, A. Armstrong, Sandia National Labs. (United States); P. C. Upadhy, R. P. Prasankumar, Los Alamos National Lab. (United States)
- 7768 0L **Surface modification of metal and metal coated nanoparticles to induce clustering** [7768-20]
M. H. Gowda, O. J. Glembocki, Naval Research Lab. (United States); S. Geng, Univ. of Maryland, College Park (United States); S. M. Prokes, N. Garces, J. D. Caldwell, Naval Research Lab. (United States)
- 7768 0M **Formation and plasmonic properties of silicon nanowire arrays produced by chemical etching** [7768-22]
S. M. Prokes, H. Qi, J. Yung, O. Glembocki, Naval Research Lab. (United States)

POSTER SESSION

- 7768 0R **In situ chlorine passivation to suppress surface-dominant transport in silicon nanowire devices** [7768-26]
J.-Y. Kim, Univ. of California, Davis (United States); M.-K. Kwon, Univ. of California, Davis (United States) and Chosun Univ. (Korea, Republic of); L. V. J., Univ. of California, Davis (United States); S. Grego, Univ. of California, Davis (United States) and RTI International (United States); M. S. Islam, Univ. of California, Davis (United States)
- 7768 0S **Growth of metallic nanowires on nanoporous alumina templates: nanocomb structures** [7768-27]
E. Atar, Gebze Institute of Technology (Turkey) and Ohio Univ. (United States); R. V. Vuppuluri, S. Kaya, Ohio Univ. (United States)

Author Index

Conference Committee

Symposium Chairs

David L. Andrews, University of East Anglia Norwich (United Kingdom)
James G. Grote, Air Force Research Laboratory (United States)

Conference Chairs

M. Saif Islam, University of California, Davis (United States)
Nobuhiko P. Kobayashi, University of California, Santa Cruz
(United States)
A. Alec Talin, National Institute of Standards and Technology
(United States)

Program Committee

Yi Cui, Stanford University (United States)
Ravi Dat, Booz Allen Hamilton (United States)
Albert Davydov, National Institute of Standards and Technology
(United States)
Shadi A. Dayeh, Los Alamos National Laboratory (United States)
Takashi Fuyuki, Nara Institute of Science and Technology (Japan)
Supratik Guha, IBM Thomas J. Watson Research Center (United States)
Jung Han, Yale University (United States)
Muhammad M. Hussain, King Abdullah University of Science and
Technology (Saudi Arabia)
Chennupati Jagadish, The Australian National University (Australia)
Sang-Sig Kim, Korea University (Korea, Republic of)
Mutsumi Kimura, Ryukoku University (Japan)
Min-Ki Kwon, University of California, Davis (United States)
Takhee Lee, Gwangju Institute of Science and Technology (Korea,
Republic of)
Marina S. Leite, California Institute of Technology (United States)
Francois Leonard, Sandia National Laboratories, California (United
States)
Samuel S. Mao, Lawrence Berkeley National Laboratory (United States)
Sanjay Mathur, Universität zu Köln (Germany)
S. Tom Picraux, Los Alamos National Laboratory (United States)
Sharka M. Prokes, Naval Research Laboratory (United States)
Zhifeng Ren, Boston College (United States)
Atsuhito Sawabe, Aoyama Gakuin University (Japan)
A. Fred Semendy, Army Research Laboratory (United States)
Loucas Tsakalakos, GE Global Research (United States)
Emanuel Tutuc, The University of Texas at Austin (United States)

Lionel Vayssieres, National Institute for Materials Science (Japan)
Deli Wang, University of California, San Diego (United States)
Chongwu Zhou, The University of Southern California (United States)

Session Chairs

- 1 Nanoheteroepitaxial Growth: Properties and Applications
Nobuhiko P. Kobayashi, University of California, Santa Cruz (United States)
Marina S. Leite, California Institute of Technology (United States)
- 2 Group IV Nanoepitaxy
A. Alec Talin, National Institute of Standards and Technology (United States)
S. Tom Picraux, Los Alamos National Laboratory (United States)
- 3 Selective Area Nanoepitaxy and Nanoheteroepitaxy
M. Saif Islam, University of California, Davis (United States)
Albert Davydov, National Institute of Standards and Technology (United States)
- 4 Workshop on Nanoepitaxy: Fundamentals and Applications
Kristine Bertness, National Institute of Standards and Technology (United States)
Savas Kaya, Ohio University (United States)
- 5 Nanoepitaxy/Nanoheteroepitaxy: Novel Characterization of Materials and Growth Properties
Shadi A. Dayeh, Los Alamos National Laboratory (United States)
- 6 Nanoepitaxial Materials: Applications in Devices and Systems
Joan M. Redwing, The Pennsylvania State University (United States)
Sharka M. Prokes, Naval Research Laboratory (United States)
