Volume 7785

Proceedings of SPIE, 0277-786X, v. 7785

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Nonimaging Optics: Efficient Design for Illumination and Solar Concentration VII*, edited by Roland Winston, Jeffrey M. Gordon, Proceedings of SPIE Vol. 7785 (SPIE, Bellingham, WA, 2010) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/10/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE
Digital Library

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v	Conference Committee
vii	Introduction

SESSION 1 TAILORED AND OPTIMIZED OPTICS AT THE ÉTENDUE LIMIT

- 7785 02 **Mathematical relationships between the generalized functional, edge-ray, aplanatic, and SMS design methods (Invited Paper)** [7785-01]
J. Bortz, N. Shatz, SAIC (United States)
- 7785 03 **Quasi-lambertian radiative transfer: exact analytic solutions** [7785-03]
A. Braun, J. M. Gordon, Ben-Gurion Univ. of the Negev (Israel)
- 7785 04 **High performance Fresnel-based photovoltaic concentrator (Invited Paper)** [7785-04]
P. Zamora, Univ. Politécnica de Madrid (Spain); P. Benítez, J. C. Miñano, Univ. Politécnica de Madrid (Spain) and Light Prescriptions Innovators, LLC (United States); R. Mohedano, A. Cvetkovic, Light Prescriptions Innovators, LLC (United States); M. Buljan, Univ. Politécnica de Madrid (Spain); J. Chaves, Light Prescriptions Innovators, LLC (United States)

SESSION 2 MAXIMUM PERFORMANCE CONCENTRATION I

- 7785 05 **Dielectric optical antenna transmitters and receivers (Invited Paper)** [7785-05]
J. A. Schuller, Columbia Univ. (United States)
- 7785 06 **Double-tailored dual-mirror nonimaging concentrators for maximum-performance solar concentration** [7785-06]
A. Goldstein, J. M. Gordon, Ben-Gurion Univ. of the Negev (Israel)
- 7785 07 **Modeling of building integrated low concentration photovoltaic glazing windows** [7785-07]
I. Baruchi, M. Ben Chorin, B. Freedman, I. Sovran, Pythagoras Solar (Israel)

SESSION 3 MAXIMUM PERFORMANCE CONCENTRATION II

- 7785 08 **Performance comparison of Fresnel-based concentrator arrays** [7785-08]
R. Mohedano, A. Cvetković, Light Prescriptions Innovators Europe, S. L. (Spain); P. Benítez, Univ. Politécnica de Madrid (Spain) and Light Prescriptions Innovators, LLC (United States); P. Zamora, Univ. Politécnica de Madrid (Spain); J. C. Miñano, Univ. Politécnica de Madrid (Spain) and Light Prescriptions Innovators, LLC (United States); J. Chaves, M. Hernandez, Light Prescriptions Innovators Europe, S. L. (Spain); M. Buljan, Univ. Politécnica de Madrid (Spain); J. Vilaplana, Light Prescriptions Innovators Europe, S. L. (Spain)
- 7785 09 **Secondary optics for Fresnel lens solar concentrators** [7785-09]
L. Fu, R. Leutz, H. P. Annen, Concentrator Optics GmbH (Germany)

- 7785 0A **CPV and illumination systems based on XR-Köhler devices** [7785-10]
M. Hernandez, A. Cvetkovic, Light Prescriptions Innovators Europe, S. L. (Spain); P. Benitez, J. C. Miñano, Light Prescriptions Innovators Europe, S. L. (Spain) and Univ. Politécnica de Madrid (Spain); W. Falicoff, Y. Sun, Light Prescriptions Innovators, LLC (United States); J. Chaves, R. Mohedano, Light Prescriptions Innovators Europe, S. L. (Spain)
- 7785 0B **Design principles of the first 4x fixed solar concentrator** [7785-11]
R. Winston, W. Zhang, Univ. of California, Merced (United States)

SESSION 4 ADVANCED SOLAR OPTICS

- 7785 0C **Stationary SMS lenses for concentrating photovoltaics** [7785-12]
P. Kotsidas, Columbia Univ. (United States); E. Chatzi, ETH Zurich (United States); V. Modi, Columbia Univ. (United States)
- 7785 0D **Optical enhancement for luminescent solar concentrators** [7785-13]
C. Wang, R. Winston, W. Zhang, Univ. of California, Merced (United States); D. Pelka, Pelka & Associate Inc. (United States); S. Carter, Univ. of California, Santa Cruz (United States)
- 7785 0E **Simple Köhler homogenizers for image-forming solar concentrators** [7785-14]
W. Zhang, R. Winston, Univ. of California, Merced (United States)

SESSION 5 LED AND ILLUMINATION OPTICS

- 7785 0F **A solar simulator design for concentrating photovoltaics** [7785-15]
H. Rehn, U. Hartwig, OSRAM GmbH (Germany)
- 7785 0G **LED camera light with a compact wide-range zoom** [7785-16]
U. Hartwig, H. Rehn, OSRAM GmbH (Germany)
- 7785 0H **High throughput illumination systems for solar simulators and photoresist exposure** [7785-17]
A. Feldman, Newport Corp. (United States)
- 7785 0I **Anamorphic illuminator** [7785-18]
S. Magarill, iToolS Consulting LLC (United States)

POSTER SESSION

- 7785 0K **Design of compound Fresnel-R lenses for new high-efficient concentrator** [7785-21]
L. Jing, Changchun Institute of Optics, Fine Mechanics and Physics (China) and Graduate School of the Chinese Academy of Sciences (China); H. Liu, Z. Lu, H. Zhao, Changchun Institute of Optics, Fine Mechanics and Physics (China)

Author Index

Conference Committee

Program Track Chair

Ian Ferguson, The University of North Carolina at Charlotte (United States)

Conference Chairs

Roland Winston, University of California, Merced (United States)
Jeffrey M. Gordon, Ben-Gurion University of the Negev (Israel)

Program Committee

Pablo Benitez, Universidad Politécnica de Madrid (Spain) and Light Prescriptions Innovators LLC (Spain)
William J. Cassarly, Optical Research Associates (United States)
Daniel Feuermann, Ben-Gurion University of the Negev (Israel)
Philip L. Gleckman, eSolar Inc. (United States)
R. John Koschel, Photon Engineering LLC (United States) and College of Optical Sciences/The University of Arizona (United States)
Ralf Leutz, Concentrator Optics GmbH (Germany)
Kenneth K. Li, Wavien, Inc. (United States)
Juan C. Miñano, Universidad Politécnica de Madrid (Spain) and Light Prescriptions Innovators LLC (Spain)
Narkis E. Shatz, SAIC (United States)

Session Chairs

- 1 Tailored and Optimized Optics at the Étendue Limit
Roland Winston, University of California, Merced (United States)
- 2 Maximum Performance Concentration I
Ralf Leutz, Concentrator Optics GmbH (Germany)
- 3 Maximum Performance Concentration II
Narkis E. Shatz, SAIC (United States)
- 4 Advanced Solar Optics
Jeffrey M. Gordon, Ben-Gurion University of the Negev (Israel)
- 5 LED and Illumination Optics
William J. Cassarly, Optical Research Associates (United States)

Introduction

Those familiar with this conference recognize the pivotal role of thermodynamics in the development of Nonimaging Optics. Recent discoveries in science suggest that thermodynamics may even be pivotal in understanding Newton's laws of motion and even gravity. Erik Verlinde, (Institute for Theoretical Physics, University of Amsterdam) has shown that gravity is explained as an entropic force caused by changes in the information associated with the positions of material bodies. It is encouraging that our subject has been at the forefront of taking its guidance from thermodynamics. Indeed, 2010 may become known as the year of thermodynamics!

In 2009 we wrote that there was renewed respect for the power of thermodynamics to illuminate optical design and performance. And finally, the recognition of Nonimaging Optics with the A. E. Conrady Award is evidence that the field is growing up. Entirely similar remarks apply this year, since once again, Nonimaging Optics has been recognized by the Conrady Award of SPIE.
