Proceedings of SPIE, 0277-786X, v. 7787

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE
Digital Library

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Committee
ix	Introduction
xi	All reflective 2 mirror unobscured wide field telescope/collimator designs [7733-100] R. F. Horton, T. Peck, A. Colgate, ad hoc Optics LLC (United States)

SESSION 1 OPTICAL DESIGN

7787 02	Conic constant trade-off study in Cassegrain-type telescopes with a field corrector [7787-01] J.-Y. Han, Samsung Thales Co., Ltd. (Korea, Republic of); J. Sasian, College of Optical Sciences, The Univ. of Arizona (United States); J. González, Univ. Nacional Autónoma de México (Mexico)
7787 03	Freeform lens design using a spreadsheet [7787-02] P. Goldstein, Philips Color Kinetics (United States)
7787 04	Novel fast catadioptric objective with wide field of view [7787-03] F. Muñoz, Light Prescriptions Innovators Europe, S. L. (Spain); J. M. Infante Herrero, Univ. Politécnica de Madrid (Spain) and Indra Sistemas SA (Spain); P. Benítez, J. C. Miñano, Light Prescriptions Innovators Europe, S. L. (Spain) and Univ. Politécnica de Madrid (Spain); W. Lin, Univ. Politécnica de Madrid (Spain); J. Vilaplana, Light Prescriptions Innovators Europe, S. L. (Spain); G. Biot, Univ. Politécnica de Madrid (Spain); M. de la Fuente, Indra Sistemas SA (Spain)
7787 05	Process for designing a freeform Fresnel lens (Invited Paper) [7787-04] P. Goldstein, Philips Color Kinetics (United States)
7787 06	Integration of advanced optical functions near the focal plane array: first steps toward the on-chip infrared camera [7787-05] F. de la Barrière, G. Druart, N. Guérineau, ONERA (France); J. Taboury, Lab. Charles Fabry, Institut d'Optique, CNRS (France); M. Fendler, CEA-LETI/MINATEC (France)

SESSION 2 OPTICAL ENCODING: IMAGING AND POLARIZATION

7787 09	Optical micro-satellite telescopes using a synthetic aperture approach for improved resolution [7787-08] I. Glaser, E. Chernyak, Holon Institute of Technology (Israel)
---------	---

- 7787 0A **Single-shot depth camera lens design optimization based on a blur metric (Invited Paper)** [7787-09]
Y.-L. Chen, Industrial Technology Research Institute (Taiwan) and National Chiao Tung Univ. (Taiwan); C.-C. Chang, L. Angot, C.-W. Chang, Industrial Technology Research Institute (Taiwan); C.-H. Tien, National Chiao Tung Univ. (Taiwan)
- 7787 0B **Snapshot Mueller matrix polarimetry by wavelength polarization coding and application to the study of switching dynamics in a ferroelectric liquid crystal cell** [7787-10]
M. Dubreuil, S. Rivet, B. Le Jeune, Lab. de Spectrométrie et Optique Laser, Univ. de Bretagne Occidentale (France)
- 7787 0D **Optimal design of Toraldo super-resolving filters** [7787-12]
L. N. Hazra, N. Reza, Univ. of Calcutta (India)
- 7787 0E **Dual-image guidance system for autonomous vehicle on fast focusing and RGB similarity operation** [7787-13]
A. Akiyama, Kanazawa Technical College (Japan); N. Kobayashi, Kanazawa Institute of Technology (Japan); E. Mutoh, Kawasaki Heavy Industries, Ltd. (Japan); H. Kumagai, Tamagawa Seiki Co., Ltd. (Japan); H. Yamada, Kanazawa Technical College (Japan); H. Ishii, Nihon Univ. (Japan)

SESSION 3 BIO-OPTICS SYSTEMS AND MEASUREMENT

- 7787 0H **Optimization of fingernail sensor design based on fingernail imaging** [7787-16]
J. M. Abu-Khalaf, S. A. Mascaro, The Univ. of Utah (United States)

SESSION 4 LED DISPLAYS

- 7787 0I **Improvement and optimal design of RGB LED backlight unit using a genetic algorithm** [7787-18]
Y.-H. Fan, Y.-T. Lee, Y.-L. Liao, C.-C. Fu, Chung Yuan Christian Univ. (Taiwan)
- 7787 0M **A miniature projecting system for portable devices** [7787-22]
Y.-W. Wang, Y.-C. Lee, M.-H. Lin, H.-C. Wei, National Taiwan Univ. (Taiwan); W.-Y. Hsu, Y.-C. Cheng, Instrument Technology Research Ctr. (Taiwan); G.-D. J. Su, National Taiwan Univ. (Taiwan)

SESSION 5 NOVEL DESIGN AND SYSTEMS

- 7787 0P **An optical induction generator through Crooke's radiometer** [7787-25]
D. A. Delaine, S. Herbert, A. K. Fontecchio, Drexel Univ. (United States)
- 7787 0R **An apertureless near-field scanning optical microscope for imaging surface plasmons in the mid-wave infrared** [7787-27]
J. Kohoutek, D. Dey, R. Gelfand, A. Bonakdar, H. Mohseni, Northwestern Univ. (United States)

POSTER SESSION

- 7787 OS **Small thermal optics design for UAV (unmanned aerial vehicle) system** [7787-28]
S. K. Lee, J. H. Na, C. J. Yoon, S. E. Oh, J. Choi, H. J. Pyo, Samsung Thales Co., Ltd. (Korea, Republic of)
- 7787 OT **Producing superresolved point-spread functions using a phase modulation technique** [7787-29]
M. Soskind, R. Soskind, West Windsor-Plainsboro High School South (United States);
Y. G. Soskind, David H. Pollock Consultants, Inc. (United States)
- 7787 OV **A novel optical design for car-camera lenses** [7787-31]
Y. Zhu, W. Pan, Y. Fan, Zhejiang Univ. of Science and Technology (China)
- 7787 OY **Free space optical coupling to completely embedded fiber Bragg grating sensors** [7787-34]
L. Qiu, K. W. Goossen, D. Heider, Univ. of Delaware (United States); D. J. O'Brien, E. D. Wetzel, Army Research Lab. (United States)

David L. Shealy, The University of Alabama at Birmingham (United States)
Marija Strojnik, Centro de Investigaciones en Óptica, A.C. (Mexico)
Kevin P. Thompson, Optical Research Associates (United States)

Session Chairs

- 1 Optical Design
 Arthur J. Davis, Reflexite Display Optics (United States)
- 2 Optical Encoding: Imaging and Polarization
 Arthur J. Davis, Reflexite Display Optics (United States)
- 3 Bio-Optics Systems and Measurement
 Craig Olson, L-3 Communications Sonoma EO (United States)

- 4 LED Displays
Oliver Dross, Light Prescriptions Innovators Europe, S. L. (Germany)
- 5 Novel Design and Systems
G. Groot Gregory, Optical Research Associates (United States)

Introduction

This year in San Diego, California, we held the thirteenth conference of Novel Optical Systems Design and Optimization, which was well attended. This year there were five oral sessions, one poster session, and a joint Optical Engineering Plenary Session. The primary focus of the conference was the field of optical design for computed imaging sessions. The five oral sessions had titles of: Optical Design, Optical Encoding: Imaging and Polarization, Bio-Optics Systems and Measurement, LED Displays, and Novel Design and Systems. These oral sessions ranged over one and a half days of the entire Optics and Photonics 2010 meeting.

The Optical Design session included papers on layout and the design process along with a couple of papers on specific systems. The Optical Encoding session addressed techniques for optics systems using computerized methods or polarization to address defocus, depth of field, and image artifacts. The Bio-Optics Systems and Measurement session looked into the body using optical detection means. The LED Displays session showed various projection systems with LED sources. The Novel Design and Systems session covered the use of optics to perform a diverse set of applications.

Two invited papers were presented during the conference;

- Peter Goldstein of Cooper Industries shared his process for designing a freeform Fresnel lens that is not dependant of rotational symmetry
- A paper given by Yung-Lin Chen from the National Chiao Tung University used a blur metric to design a phase encoded lens.

Novel Optical Systems Design and Optimization has been capturing and building on themes that illustrate the strength and ingenuity of those working in the fields of optics. The broad set of diverse topics has led to lively and interesting discussions following each paper. Additionally, these discussions were carried into the hallways following each session. Of particular note is one paper presented during the poster session titled "Producing superresolved point-spread functions using a phase modulation technique". The two authors had engaging discussion with several attendees who all were surprised that these knowledgeable students were from Plainsboro High School. This conference will have a bright future with contributors spanning multiple generations.

Our thanks go to those who helped make this conference a success, especially the authors, audience, SPIE staff, and program committee. The authors share the credit for making this conference an unqualified success. The audience built upon this success by being active and asking engaging questions. The program committee provided excellent assistance to ensure the quality of the content

while also presiding over a number of the sessions. It was composed of Dmitry Bakin, Andrew Cheng, Jyh-Long Chern, Arthur Davis, Oliver Drosse, Andrew Harvey, Joseph Howard, Richard Juergens, Scott Lerner, Rongguang Liang, Paul Manhart, Craig Olson, Andrew Rakich, Dirk Robinson, Jose Sasian, David Shealy, Marija Strojnik, Kevin Thompson, and Mary Turner.

Next year we will return for the fourteenth iteration of this conference. The chairs will be G. Groot Gregory and Dirk Robinson. John Koshel will be stepping down to allow a fresh face to contribute to the conference. The planning for Novel Optical Systems Design and Optimization XIV in 2011 is already underway, so please start planning submissions, questions, and attendance. Focus themes are being decided at this time. If you would like to assist with the 2011 or later conference please contact one of us. We look forward to seeing you in 2011!
