Volume 7876

Proceedings of SPIE, 0277-786X, v. 7876

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Committee
ix	Introduction

SESSION 1 INVITED PAPER

7876 02	High dynamic range image sensor architectures (Invited Paper) [7876-01] B. Fowler, Fairchild Imaging (United States)
---------	--

SESSION 2 COMPUTATIONAL PHOTOGRAPHY

7876 03	Bayer and panchromatic color filter array demosaicing by sparse recovery [7876-02] M. Aghagolzadeh, A. Abdolhosseini Moghadam, Michigan State Univ. (United States); M. Kumar, Eastman Kodak Co. (United States); H. Radha, Michigan State Univ. (United States)
7876 04	Improved motion invariant imaging with time varying shutter functions [7876-03] S. Webster, A. Dorrell, Canon Information Systems Research Australia Pty. Ltd. (Australia)
7876 05	Optimal image acquisition by auto-defocusing [7876-04] T. Ma, S. J. Reeves, Auburn Univ. (United States)
7876 06	Mobile phone imaging module with extended depth of focus based on axial irradiance equalization phase coding [7876-05] H.-Y. Sung, National Tsing Hua Univ. (Taiwan) and Industrial Technology Research Institute (Taiwan); P.-C. Chen, C.-C. Chang, C.-W. Chang, Industrial Technology Research Institute (Taiwan); S. S. Yang, National Tsing Hua Univ. (Taiwan); H. Chang, Industrial Technology Research Institute (Taiwan)
7876 07	Performance of extended depth of field systems and theoretical diffraction limit [7876-06] N. Bachelard, F. Guichard, F. Cao, I. Tarchouna, DxO Labs. (France)

SESSION 3 SPECTRAL IMAGING

7876 08	Implementation of a multispectral color imaging device without color filter array [7876-07] G. Langfelder, A. F. Longoni, F. Zaraga, Politecnico di Milano (Italy)
7876 09	One-shot multispectral color imaging with a stereo camera [7876-08] R. Shrestha, J. Y. Hardeberg, Gjøvik Univ. College (Norway); A. Mansouri, Univ. de Bourgogne (France)
7876 0A	Multispectral image invariant to illumination colour, strength, and shading [7876-09] M. S. Drew, A. Yazdani Salekdeh, Simon Fraser Univ. (Canada)

- 7876 0B **Methods for spectral characterization of multispectral cameras** [7876-10]
J. Klein, J. Brauers, T. Aach, RWTH Aachen Univ. (Germany)

SESSION 4 IMAGE PROCESSING

- 7876 0C **Evaluation of a hyperspectral image database for demosaicking purposes** [7876-11]
M.-C. Larabi, XLim Lab., CNRS, Univ. de Poitiers (France); S. Süssstrunk, Ecole Polytechnique Fédérale de Lausanne (Switzerland)
- 7876 0D **Automatic annotation of outdoor photographs** [7876-12]
C. Cusano, R. Schettini, Univ. degli Studi di Milano-Bicocca (Italy)
- 7876 0E **Fast orientation driven multi-structure morphological inpainting** [7876-13]
D. J. Florinabel, S. E. Juliet, V. Sadasivam, Manonmanium Sundaranar Univ. (India)

SESSION 5 SENSORS AND OPTICS

- 7876 0F **How many pixels does it take to make a good 4"×6" print? Pixel count wars revisited** [7876-14]
M. A. Kriss, MAK Consultants (United States)
- 7876 0G **A prototype high-speed CMOS image sensor with 10,000,000 fps burst-frame rate and 10,000 fps continuous-frame rate** [7876-15]
Y. Tochigi, K. Hanzawa, Y. Kato, N. Akahane, R. Kuroda, S. Sugawa, Tohoku Univ. (Japan)
- 7876 0H **Two-dimensional measurement of the lens optical transfer function from a digital image** [7876-16]
D. P. Morgan-Mar, M. R. Arnison, C. A. Deller, P. A. Fletcher, K. G. Larkin, Canon Information Systems Research Australia Pty. Ltd. (Australia)

SESSION 6 IMAGE ENHANCEMENT

- 7876 0I **Efficient defect pixel cluster detection and correction for Bayer CFA image sequences** [7876-17]
T. Tajbakhsh, Dream Chip Technologies GmbH (Germany)
- 7876 0J **Image scaling with aliasing cancellation** [7876-18]
A. Tönnisson, A. Dorrell, N. Mehrseresht, R. Zillman, Canon Information Systems Research Australia Pty. Ltd. (Australia)
- 7876 0K **Random-temporal block selection for video stabilization** [7876-19]
S. Battiato, Univ. degli Studi di Catania (Italy); A. R. Bruna, STMicroelectronics (Italy); G. Puglisi, Univ. degli Studi di Catania (Italy)

SESSION 7 IMAGE QUALITY IN DIGITAL PHOTOGRAPHY: JOINT SESSION WITH CONFERENCE 7867

- 7876 0L **Comparison of objective metrics for image sensor crosstalk characterization** [7876-20]
F. Li, Aptina Imaging, Inc. (United States); H. Eliasson, Sony Ericsson Mobile Communications AB (Sweden); A. Dokoutchaev, Aptina Imaging, Inc. (United States)
- 7876 0M **An image quality evaluation tool simulating image sensors including quantum efficiency off-axis effect** [7876-21]
C. Mornet, STMicroelectronics (France) and Institut de Microélectronique Électromagnétisme et Photonique (France); J. Vaillant, T. Decroux, N. Virollet, D. Herault, STMicroelectronics (France); I. Schanen, Institut de Microélectronique Électromagnétisme et Photonique (France)
- 7876 0N **Image quality assessment based on edge** [7876-22]
X. Mou, M. Zhang, W. Xue, Xi'an Jiaotong Univ. (China); L. Zhang, The Hong Kong Polytechnic Univ. (Hong Kong, China)

SESSION 8 HIGH DYNAMIC RANGE IMAGING: JOINT SESSION WITH CONFERENCE 7867

- 7876 0O **Method for evaluating tone mapping operators for natural high dynamic range images** [7876-23]
M. Kuhna, M. Nuutinen, P. Oittinen, Aalto Univ. School of Science and Technology (Finland)
- 7876 0P **High dynamic range imaging of non-static scenes** [7876-24]
I. Hossain, B. K. Gunturk, Louisiana State Univ. (United States)

INTERACTIVE POSTER SESSION

- 7876 0Q **Toward a quantitative visual noise evaluation of sensors and image processing pipes** [7876-25]
C. Mornet, STMicroelectronics (France) and Institut de Microélectronique Électromagnétisme et Photonique (France); D. Baxter, STMicroelectronics (United Kingdom); J. Vaillant, T. Decroux, D. Herault, STMicroelectronics (France); I. Schanen, STMicroelectronics (United Kingdom)
- 7876 0R **Fidelity tolerance analysis for computational imaging system** [7876-26]
C.-C. Chang, Y.-L. Chen, K.-V. Chen, H.-Y. Tsao, H.-Y. Sung, C.-W. Chang, P.-C Chen, H. Chang, Industrial Technology Research Institute (Taiwan)
- 7876 0S **Noise-robust image deblurring by blending regular- and short-exposure images** [7876-27]
Y. Tsuda, H. Hatanaka, S. Fukumoto, M. Ueda, SANYO Electric Co., Ltd. (Japan); K. Chihara, Nara Institute of Science and Technology (Japan)
- 7876 0T **Improving the sensitometric and OECF standards: recognizing the photosensitive exposure range** [7876-28]
M. G. Prais, Consultant (United States)
- 7876 0U **Image enhancement technique using color and edge features for mobile systems** [7876-29]
W.-H. Cho, T.-C. Kim, SAMSUNG Electronics Co., Ltd. (Korea, Republic of)

- 7876 0V **Rectangular pixels for efficient color image sampling** [7876-30]
T. Singh, M. Singh, Image Algorithmics (United States)
- 7876 0W **A robust color signal processing with wide dynamic range WRGB CMOS image sensor** [7876-31]
S. Kawada, R. Kuroda, S. Sugawa, Tohoku Univ. (Japan)
- 7876 0X **Adaptive contrast enhancement for underexposed images** [7876-32]
S. Corchs, F. Gasparini, R. Schettini, Univ. of Milano-Bicocca (Italy)
- 7876 0Z **Moving refractive optical low-pass filter for digital cameras** [7876-34]
M. Schöberl, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany); J. Ernst, Fraunhofer-Institut für Integrierte Schaltungen (Germany); W. Schnurrer, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany) and Fraunhofer-Institut für Integrierte Schaltungen (Germany); S. Föbel, Fraunhofer-Institut für Integrierte Schaltungen (Germany); A. Kaup, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany)
- 7876 10 **A JPEG-like algorithm for compression of single-sensor camera image** [7876-35]
O. Benahmed Daho, M.-C. Larabi, XLim Lab., CNRS, Univ. de Poitiers (France); J. Mukhopadhyay, Indian Institute of Technology, Kharagpur (India)
- 7876 11 **Reduced reference image quality assessment based on statistics of edge** [7876-36]
M. Zhang, W. Xue, X. Mou, Xi'an Jiaotong Univ. (China)
- 7876 12 **Evaluation of LED flash performance for camera phones** [7876-37]
J. Pinenti, C. Sheldon, B.-H. Richards, G. John, Motorola, Inc. (United States)
- 7876 13 **Characterization of pixel crosstalk and impact of Bayer patterning by quantum efficiency measurement** [7876-39]
J. Vaillant, STMicroelectronics (France); C. Mornet, STMicroelectronics (France) and Institut de Microélectronique, Electromagnétisme et Photonique (France); T. Decroux, D. Hérault, STMicroelectronics (France); I. Schanen, Institut de Microélectronique, Electromagnétisme et Photonique (France)

Author Index

Conference Committee

Symposium Chair

Sabine Süsstrunk, École Polytechnique Fédérale de Lausanne
(Switzerland)

Symposium Cochair

Majid Rabbani, Eastman Kodak Company (United States)

Conference Chairs

Francisco H. Imai, Canon U.S.A., Inc. (United States)
Feng Xiao, Fairchild Imaging (United States)

Conference Cochairs

Jeffrey M. DiCarlo, Intuitive Surgical (United States)
Nitin Sampat, Rochester Institute of Technology (United States)
Sebastiano Battiato, Università degli Studi di Catania (Italy)

Program Committee

Donald J. Baxter, STMicroelectronics (R&D) Ltd. (United Kingdom)
Ajit S. Bopardikar, Samsung Electronics, India Software Operations Ltd.
(India)
Peter B. Catrysse, Stanford University (United States)
Ted J. Cooper, Lens Vector, Inc. (United States)
Alexandru F. Drimbarean, Tessera (FotoNation) Ireland Ltd. (Ireland)
Joyce E. Farrell, Stanford University (United States)
Guotong Feng, Ricoh Innovations, Inc. (United States)
Boyd A. Fowler, Fairchild Imaging (United States)
Sergio R. Goma, Qualcomm Inc. (United States)
Mirko Guarnera, STMicroelectronics (Italy)
Frédéric Guichard, DxO Laboratoires (France)
Xiaoyun Jiang, Qualcomm Inc. (United States)
George John, Motorola, Inc. (United States)
Michael A. Kriss, Consultant (United States)
Jiangtao Kuang, OmniVision Technologies, Inc. (United States)
Feng Li, Aptina Imaging Corporation (United States)
J. Dylan Li, LifeSize Communications (United States)
Kevin J. Matherson, Hewlett-Packard Company (United States)
Jon S. McElvain, Digital Imaging Systems (United States)
Ricardo J. Motta, Consultant (United States)

Seishi Ohmori, Nikon Corporation (Japan)
Manu Parmar, Qualcomm Inc. (United States)
Gloria G. Putnam, Eastman Kodak Company (United States)
John R. Reinert-Nash, Lifetouch, Inc. (United States)
M. Dirk Robinson, Skybox Imaging (United States)
Brian G. Rodricks, Fairchild Imaging (United States)
Todd Sachs, Aptina Imaging Corporation (United States)
Qun Sun, Aptina Imaging Corporation (United States)
Sabine E. Süssstrunk, Ecole Polytechnique Fédérale de Lausanne
 (Switzerland)
Touraj Tajbakhsh, Dream Chip Technologies (Germany)
Radka Tezaur, Nikon Precision Inc. (United States)
Michael Wang, Cisco Systems, Inc. (United States)
Dietmar Wüller, Image Engineering (Germany)
Weihua Xiong, OmniVision Technologies, Inc. (United States)
Alireza Yasan, Foveon Inc. (United States)
Lei Zhang, The Hong Kong Polytechnic University (Hong Kong, China)

Session Chairs

- 1 Invited Paper
Francisco H. Imai, Canon U.S.A., Inc. (United States)
Feng Xiao, Fairchild Imaging (United States)
- 2 Computational Photography
Touraj Tajbakhsh, Technische Universität Hamburg-Harburg (Germany)
- 3 Spectral Imaging
Manu Parmar, Stanford University (United States)
- 4 Image Processing
Ajit S. Bopardikar, Samsung Electronics, India Software Operations Ltd.
 (India)
- 5 Sensors and Optics
Peter B. Catrysse, Stanford University (United States)
- 6 Image Enhancement
Sebastiano Battiato, Università degli Studi di Catania (Italy)
- 7 Image Quality in Digital Photography: Joint Session with Conference 7867
Jon S. McElvain, Digital Imaging Systems (United States)
Peter D. Burns, Carestream Health, Inc. (United States)
- 8 High Dynamic Range Imaging: Joint Session with Conference 7867
Ricardo J. Motta, Attom Research (United States)
Susan P. Farnand, Rochester Institute of Technology (United States)

Introduction

Welcome to the proceedings of the 7th annual Digital Photography Conference that takes place on January 24–25, 2011. The conference is part of the 2011 IS&T/SPIE Electronic Imaging: Science and Technology Symposium, held at the Hyatt Regency Hotel, San Francisco Airport, California, United States. This proceedings volume contains the technical papers in support of the presentations at the conference.

Willard S. Boyle and George E. Smith were awarded the Nobel Prize in Physics in 2009 for the invention of the first successful imaging technology using a digital sensor, a CCD (Charge-Coupled Device) in 1969 while working at Bell Laboratories. The CCD as the digital camera's electronic eye revolutionized photography. Since the pioneering work by Boyle and Smith, digital photography has enjoyed technology advancement and incredible commercial success with new exciting developments and technological challenges in the horizon. The Digital Photography Conference brings together a compilation of the latest development in the field of digital photography by researchers and engineers working in the imaging field.

This volume starts with an invited paper that gives a summary of high dynamic range image sensor architectures by Boyd Fowler. The technical contributions comprise articles about recent progress on digital photography and all its relevant areas, from optics, sensors, processing and reproduction, including advanced applications such as spectral imaging and computational photography.

The Digital Photography Conference has successfully used a peer-review process to select papers for the proceedings. This process ensures quality of the published articles: giving constructive feedback on author's submissions for writing the final manuscript. A single-blind review process was conducted for submitted papers and each submission had at least 4 reviews with an average of 5 reviews per submission. This year we also have two joints sessions with the Conference on Image Quality and System Performance VIII on Image Quality in Digital Photography and High Dynamic Range Imaging.

Thanks to the generous support from our sponsors last year, we started offering two prizes in recognition of outstanding work selected in the proceedings. Based on the very positive feedback we received thereafter, we decided to continue offering these two prizes in this year's Digital Photography VII conference as well. Both awards will be selected by the chairs and program committee and announced during the conference:

- Best Paper – sponsored by Fairchild Imaging
- Best Student Paper – sponsored by Canon U.S.A., Inc.

The conference activities do not stop at the end of the January meeting. The Digital Photography Conference provides a LinkedIn group entitled "Digital Photography Conference (IS&T/SPIE Electronic Imaging Symposium)" that has the objective to create a community to share ideas and post announcements relevant to digital photography. You are encouraged to join this LinkedIn group. Also, if you are interested in participating in the organization of this conference, please contact any of the chairs.

The 2011 Digital Photography Conference at the Electronic Imaging Symposium continues a tradition of presenting the latest knowledge and technologies relevant to digital photography and we are going to continue exploring new endeavors in this field for future editions of this conference.
