SPIE

Part One of Two Parts

Volume 7981

Proceedings of SPIE, 0277-786X, v. 7981

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

xix	Conference Committee
xxv	Introduction

Part 1

SESSION 1 KEYNOTE SESSION

- 7981 03 **Development of multifunctional materials exhibiting distributed sensing and actuation inspired by fish (Keynote Paper)** [7981-02]
M. Philen, Virginia Polytechnic Institute and State Univ. (United States)

SESSION 2A EMERGING SENSING SYSTEMS FOR SHM I

- 7981 04 **An implementation of a data-transmission pipelining algorithm on Imote2 platforms** [7981-03]
X. Li, S. Dorvash, L. Cheng, S. Pakzad, Lehigh Univ. (United States)
- 7981 05 **Hybrid wireless smart sensor network for full-scale structural health monitoring of a cable-stayed bridge** [7981-04]
H. Jo, S.-H. Sim, K. A. Mechitov, R. Kim, J. Li, P. Moynzadeh, B. F. Spencer, Jr., Univ. of Illinois at Urbana-Champaign (United States); J. W. Park, S. Cho, H.-J. Jung, C.-B. Yun, KAIST (Korea, Republic of); J. A. Rice, Texas Tech Univ. (United States); T. Nagayama, The Univ. of Tokyo (Japan)
- 7981 06 **Comparison study of feature extraction methods in structural damage pattern recognition** [7981-05]
W. Liu, B. Chen, R. A. Swartz, Michigan Technological Univ. (United States)
- 7981 07 **Embedding empirical mode decomposition within an FPGA-based design: challenges and progress** [7981-06]
J. D. Jones, J.-S. Pei, The Univ. of Oklahoma (United States); J. P. Wright, Weidlinger Associates, Inc. (United States)
- 7981 08 **Static and dynamic strain monitoring of GFRP composites using carbon nanotube thin films** [7981-07]
B. R. Loyola, K. J. Loh, V. La Saponara, Univ. of California, Davis (United States)

SESSION 2B WIRELESS SENSORS FOR SHM

- 7981 09 **Ultra-low power wireless sensing for long-term structural health monitoring** [7981-08]
A. Bilbao, D. Hoover, J. Rice, J. Chapman, Texas Tech Univ. (United States)

- 7981 0A **Leveraging real-time hydrologic data for the control of large-scale water distribution systems in the Sierra Nevada** [7981-09]
B. Kerkez, S. Glaser, Univ. of California, Berkeley (United States); C. Grosse, Technische Univ. München (Germany)
- 7981 0C **Relative-story displacement sensor for measuring five-degree-of-freedom movement of building layers** [7981-180]
I. Matsuya, Waseda Univ. (Japan); R. Katamura, Kajima Corp. (Japan); M. Sato, M. Iba, H. Kondo, K. Kanekawa, Waseda Univ. (Japan); M. Takahashi, T. Hatada, Kajima Corp. (Japan); Y. Nitta, Ashikaga Institute of Technology (Japan); T. Tanii, S. Shoji, A. Nishitani, I. Ohdomari, Waseda Univ. (Japan)
- 7981 0D **An equivalent circuit model of supercapacitors for applications in wireless sensor networks** [7981-111]
H. Yang, Y. Zhang, Georgia Institute of Technology (United States)
- 7981 0E **Multi-scale hybrid sensor nodes for acceleration-impedance monitoring for steel structural connections** [7981-12]
J.-H. Park, D.-D. Ho, K.-D. Nguyen, J.-T. Kim, Pukyong National Univ. (Korea, Republic of)

SESSION 3A EMERGING SENSING SYSTEMS FOR SHM II

- 7981 0F **A structural health monitoring system with ultrasonic MEMS transducers** [7981-13]
R. O. Guldiken, O. Onen, Univ. of South Florida (United States); M. Gul, F. N. Catbas, Univ. of Central Florida (United States)
- 7981 0G **Validation of photocurrent-based strain sensing using a P3HT-based nanocomposite** [7981-14]
D. Ryu, K. J. Loh, Univ. of California, Davis (United States); F. Yaghmaie, Northern California Nanotechnology Ctr. (United States)
- 7981 0H **Field investigation of a vibration monitoring wireless sensor network on a huge cantilever structure** [7981-15]
H. F. Zhou, PolyU Technology & Consultancy Co., Ltd. (Hong Kong, China); J. L. Liu, Y. Q. Ni, The Hong Kong Polytechnic Univ. (Hong Kong, China); D. P. Zhu, Georgia Institute of Technology (United States)
- 7981 0J **Toward triboluminescent sensor realization for SHM: statistical modeling of triboluminescent composites** [7981-17]
T. J. Dickens, D. Olawale, G. Sullivan, J. Breaux, O. O. I. Okoli, B. Wang, The Florida State Univ. (United States)
- 7981 0K **A wireless multifunctional radar-based displacement sensor for structural health monitoring** [7981-18]
J. A. Rice, C. Li, C. Gu, J. C. Hernandez, Texas Tech Univ. (United States)

SESSION 3B ULTRASONICS METHODS

- 7981 0L **Nonlinear ultrasonic guided waves for prestress level monitoring in prestressing strands for post-tensioned concrete structures** [7981-19]
C. Nucera, F. Lanza di Scalea, Univ. of California, San Diego (United States)
- 7981 0M **Enabling techniques for secure fibre positioning in ultrasonic consolidation for the production of smart material structures** [7981-20]
S. Masurtschak, R. A. Harris, Loughborough Univ. (United Kingdom)
- 7981 0N **Effect of decay on ultrasonic velocity and attenuation measurements in wood** [7981-21]
M. McGovern, A. Senalik, Univ. of Illinois at Urbana-Champaign (United States); G. Chen, USDA Forest Products Lab. (United States); F. C. Beall, Univ. of California, Berkeley (United States); H. Reis, Univ. of Illinois at Urbana-Champaign (United States)
- 7981 0O **Planar rotary motor using ultrasonic horns** [7981-22]
S. Sherit, X. Bao, M. Badescu, Z. Chang, D. Geiyer, P. Allen, P. Ostlund, Y. Bar-Cohen, Jet Propulsion Lab. (United States)
- 7981 0P **Aircraft components structural health monitoring using flexible ultrasonic transducer arrays** [7981-23]
W.-L. Liu, McGill Univ. (Canada); C.-K. Jen, M. Kobayashi, National Research Council Canada (Canada); N. Mrad, Defence Research and Development Canada (Canada)

SESSION 4A MEMS AND NANOTECHNOLOGY I

- 7981 0Q **New materials for isolators in civil infrastructures: stainless steel-metallic pseudo rubber and SMA-metallic pseudo rubber** [7981-24]
C. Mao, China Earthquake Administration (China); S. Li, Harbin Institute of Technology (China); Y. Zhao, Northeast Forestry Univ. (China); H. Li, Harbin Institute of Technology (China); J. Ou, Dalian Univ. of Technology (China)
- 7981 0R **Design of the thermal insulating test system for doors and windows of buildings** [7981-25]
Y. Yu, J. Qi, Dalian Univ. of Technology (China); Y. Xu, Dalian Research & Design Institute (China); H. Wu, J. Ou, Dalian Univ. of Technology (China)
- 7981 0S **Accelerating the self-repair rate of a polymer via acoustic energy** [7981-26]
A. J. Cushman, B. C. Fehrman, U. A. Korde, South Dakota School of Mines and Technology (United States)

SESSION 4B IMPACT DAMAGE DETECTION

- 7981 0T **Impact damage detection in composites using an active nonlinear acousto-ultrasonic piezoceramic sensor** [7981-27]
N. A. Chrysochoidis, A. K. Toulitsis, D. A. Saravanos, Univ. of Patras (Greece)
- 7981 0U **Detecting the point of impact on a cylindrical plate by the acoustic emission technique** [7981-28]
T. Hajzargarbashi, The Univ. of Arizona (United States); H. Nakatani, Univ. of Tokyo (Japan); T. Kundu, The Univ. of Arizona (United States); N. Takeda, Univ. of Tokyo (Japan)

- 7981 0V **Wavelet aided multivariate outlier analysis to enhance defect contrast in thermal images** [7981-29]
A. Manohar, F. Lanza di Scalea, Univ. of California, San Diego (United States)

SESSION 5A MEMS AND NANOTECHNOLOGY II

- 7981 0Y **Laboratory validation of MEMS-based sensors for post-earthquake damage assessment** [7981-32]
M. Pozzi, D. Zonta, Univ. degli Studi di Trento (Italy); J. Santana, Imec-Holst Ctr. (Netherlands); M. Colin, MEMSCAP (France); N. Saillen, Thermo Fisher Scientific (Netherlands); T. Torfs, IMEC (Belgium); A. Amditis, M. Bimpas, National Technical Univ. of Athens (Greece); Y. Stratakis, Advanced Microwave Systems, Ltd. (Greece); D. Ulieru, SITEX 45 SRL (Romania); D. Bairaktaris, Bairaktaris and Associates Ltd. (Greece); S. Frondistou-Yannas, RISA Sicherheitsanalysen GmbH (Germany); V. Kalidromitis, TECNIC S.p.A (Italy)
- 7981 0Z **On electrostatically actuated NEMS/MEMS circular plates** [7981-33]
D. I. Caruntu, I. Alvarado, The Univ. of Texas-Pan American (United States)

SESSION 5B FATIGUE ASSESSMENT IN METALLIC STRUCTURES

- 7981 10 **Detection of cracks on a plate by piezoelectric interdigital transducers** [7981-34]
Y. Roh, J. Kim, Kyungpook National Univ. (Korea, Republic of)
- 7981 13 **UCSD/FRA non-contact ultrasonic guided-wave system for rail inspection: an update** [7981-36]
S. Coccia, R. Phillips, C. Nucera, Univ. of California, San Diego (United States); I. Bartoli, Drexel Univ. (United States); S. Salamone, Univ. at Buffalo (United States); F. Lanza di Scalea, Univ. of California, San Diego (United States); M. Fateh, G. Carr, Federal Railroad Administration (United States)

SESSION 6A NANOSTRUCTURES FOR SENSING

- 7981 16 **On carbon nanotube resonators** [7981-39]
D. I. Caruntu, C. S. Salinas Trevino, The Univ. of Texas-Pan American (United States)
- 7981 18 **Fiber optics photoacoustic generation using gold nanoparticles as target** [7981-41]
N. Wu, K. Sun, X. Wang, Univ. of Massachusetts Lowell (United States)

SESSION 6B PIEZOELECTRIC SENSORS FOR SHM

- 7981 1A **Development of a non-contact PZT excitation and sensing technology via laser** [7981-43]
H.-J. Park, H. Sohn, C.-B. Yun, KAIST (Korea, Republic of); J. Chung, M. Lee, CyTroniQ Co., Ltd., Hoseo Univ. (Korea, Republic of)
- 7981 1B **Impedance-based non-destructive evaluation of the FRP adhesive joints in corrosive environment with re-usable technique** [7981-44]
S. Na, KAIST (Korea, Republic of); R. Tawie, Univ. Teknologi Mara, Sarawak (Korea, Republic of); H. K. Lee, KAIST (Korea, Republic of)

- 7981 1C **Impedance-based damage assessment using piezoelectric sensors** [7981-45]
M.-S. Rim, S.-J. Yoo, I. Lee, KAIST (Korea, Republic of); J.-H. Song, Korea Aerospace Research Institute (Korea, Republic of); J.-W. Yang, Danamsystems Inc. (Korea, Republic of)
- 7981 1E **Active carbon filter health condition detection with piezoelectric wafer active sensors** [7981-47]
J. Bao, V. Giurgiutiu, Univ. of South Carolina (United States); G. O. Rubel, G. W. Peterson, Edgewood Chemical Biological Ctr. (United States); T. M. Ball, Univ. of South Carolina (United States)

SESSION 7A EMERGING SENSING SYSTEMS FOR SHM III

- 7981 1F **Temperature and stiffness correction of SAW devices for wireless strain sensing** [7981-48]
I. J. Oppenheim, N. S. Carey, T.-L. Chin, P. Zheng, D. W. Greve, Carnegie Mellon Univ. (United States)
- 7981 1H **Thickness variation study of RFID-based folded patch antennas for strain sensing** [7981-50]
X. Yi, T. Wu, G. Lantz, Y. Wang, R. T. Leon, M. M. Tentzeris, Georgia Institute of Technology (United States)
- 7981 1I **Carbon nanotube sensors integrated inside a microfluidic channel for water quality monitoring** [7981-51]
Y. Liu, X. Li, M. R. Dokmeci, M. L. Wang, Northeastern Univ. (United States)
- 7981 1J **Monitoring of vehicle-bridge interaction using mobile and static wireless sensor networks** [7981-52]
J. Kim, J. P. Lynch, Univ. of Michigan (United States); J.-J. Lee, Sejong Univ. (Korea, Republic of); C.-G. Lee, Korea Expressway Corp. (Korea, Republic of)

SESSION 7B ADVANCE SENSORS FOR CIVIL STRUCTURES

- 7981 1K **Assessment of corrosion rate in prestressed concrete with acoustic emission** [7981-53]
J. Mangual, M. K. ElBatanouny, W. Vélez, P. Ziehl, F. Matta, Univ. of South Carolina (United States); M. González, Mistras Group, Inc. (United States)
- 7981 1L **Steel reinforcement corrosion detection with coaxial cable sensors** [7981-54]
I. Muchaidze, D. Pommerenke, G. Chen, Missouri Univ. of Science and Technology (United States)
- 7981 1N **Development of fast wireless detection system for fixed offshore platform** [7981-56]
Z. Li, Offshore Oil Engineering Co., Ltd. (China); Y. Yu, D. Jiao, J. Wang, Z. Li, J. Ou, Dalian Univ. of Technology (China)
- 7981 1O **Wireless monitoring of the longitudinal displacement of the Tamar Suspension Bridge deck under changing environmental conditions** [7981-57]
N. de Battista, R. Westgate, K. Y. Koo, J. Brownjohn, The Univ. of Sheffield (United Kingdom)
- 7981 1P **Imote2-based multi-channel wireless impedance sensor nodes for local SHM of structural connections** [7981-58]
K.-D. Nguyen, J.-H. Park, J.-T. Kim, Pukyong National Univ. (Korea, Republic of)

SESSION 8A MODELING OF GUIDED WAVES

- 7981 1Q **Integrated impedance and guided wave based damage detection under temperature variation** [7981-59]
Y.-K. An, H. Sohn, KAIST (Korea, Republic of)
- 7981 1R **Defect imaging using time-reversal technique** [7981-60]
S. T. Liu, L. Liu, F. G. Yuan, North Carolina State Univ. (United States)

SESSION 8B BIO-INSPIRED SENSORS I

- 7981 1T **Biofied building: interactive and adaptive building using sensor agent robots** [7981-62]
A. Mita, Keio Univ. (Japan)
- 7981 1U **Distributed neural computations for embedded sensor networks** [7981-63]
C. A. Peckens, J. P. Lynch, Univ. of Michigan (United States); J.-S. Pei, The Univ. of Oklahoma (United States)
- 7981 1V **Effects of air cavity on fly-ear inspired directional microphones: a numerical study** [7981-64]
H. Liu, M. Yu, Univ. of Maryland, College Park (United States)

SESSION 8C FINITE ELEMENT UPDATING FOR SHM

- 7981 1W **Finite element modeling of an optical fiber photoacoustic generator performance** [7981-65]
K. Sun, N. Wu, Y. Tian, X. Wang, Univ. of Massachusetts Lowell (United States)
- 7981 1X **Long term seismic response monitoring and finite element modeling of a concrete building considering soil flexibility and non-structural components** [7981-66]
F. Butt, P. Omenzetter, The Univ. of Auckland (New Zealand)

SESSION 9A BRIDGE MONITORING TECHNOLOGIES I

- 7981 1Z **Modal analysis of Dongying Yellow River Bridge for long term monitoring** [7981-68]
L. Wang, Harbin Institute of Technology (China); B. Li, J. Hou, Dalian Univ. of Technology (China); J. Ou, Harbin Institute of Technology (China) and Dalian Univ. of Technology (China)
- 7981 20 **Monitoring system for bolt joints on steel structures** [7981-69]
K.-T. Park, Y.-J. Yu, H. Shin, J.-H. Lee, Korea Institute of Construction Technology (Korea, Republic of); W.-S. Lee, Smart Control & Sensing, Korea Research Institute of Standards and Science (Korea, Republic of)
- 7981 22 **Health monitoring of prestressing tendons in post-tensioned concrete structures** [7981-71]
S. Salamone, Univ. at Buffalo, SUNY (United States); I. Bartoli, Drexel Intelligent Infrastructure Institute (United States); C. Nucera, R. Phillips, F. Lanza di Scalea, Univ. of California, San Diego (United States)

SESSION 9B BIO-INSPIRED SENSORS II

- 7981 23 **Biomimetic ears for a sensor agent robot to localize sound sources** [7981-72]
D. J. Marin, A. Mita, Keio Univ. (Japan)
- 7981 24 **Biofied room integrated with sensor agent robots to interact with residents and acquire environmental information** [7981-73]
F. Sakurai, A. Mita, Keio Univ. (Japan)
- 7981 25 **Mimicking the human nervous system with a triboluminescence sensory receptor for the structural health monitoring of composite structures** [7981-74]
D. O. Olawale, W. Sullivan, T. Dickens, O. Okoli, B. Wang, The Florida State Univ. (United States)
- 7981 26 **Decentralized multi-robot simultaneous localization and mapping** [7981-75]
R. Jaci, N. Chopra, B. Balachandran, Univ. of Maryland, College Park (United States);
H. Karki, The Petroleum Institute (United Arab Emirates)

SESSION 9C PATTERN CLASSIFICATION METHODS IN SHM

- 7981 27 **Adaptive measurement selection for progressive damage estimation** [7981-76]
W. Zhou, N. Kovvali, A. Papandreou-Suppappola, A. Chattopadhyay, P. Peralta, Arizona State Univ. (United States)
- 7981 28 **Damage detection for plate-like structure using matching pursuits with chirplet atom** [7981-77]
Y. Feng, L. Zhou, Z. Li, Nanjing Univ. of Aeronautics and Astronautics (China)
- 7981 29 **The use of matching pursuit decomposition for damage detection and localization in complex structures** [7981-78]
S. B. Kim, A. Chattopadhyay, Arizona State Univ. (United States); A. D. Nguyen, Los Gatos Research, Inc. (United States)
- 7981 2A **Damage classification using Adaboost machine learning for structural health monitoring** [7981-79]
D. Kim, M. Philen, Virginia Polytechnic Institute and State Univ. (United States)

SESSION 10A BRIDGE MONITORING TECHNOLOGIES II

- 7981 2C **Streicker Bridge: a comparison between Bragg-grating long-gauge strain and temperature sensors and Brillouin scattering-based distributed strain and temperature sensors** [7981-81]
B. Glisic, J. Chen, D. Hubbell, Princeton Univ. (United States)
- 7981 2D **Development of structural health monitoring systems for railroad bridge testbeds** [7981-82]
H.-J. Park, J. Min, C.-B. Yun, KAIST (Korea, Republic of); M.-H. Shin, Korea Railroad Research Institute (Korea, Republic of); Y.-S. Kim, Korea Infrastructure Safety and Technology Corp. (Korea, Republic of); S.-Y. Park, Korea Maintenance Co. Ltd. (Korea, Republic of)
- 7981 2E **Bridge condition assessment based on long-term strain monitoring** [7981-83]
L. Sun, S. Sun, Tongji Univ. (China)

SESSION 10B FIBER OPTIC SENSORS I

- 7981 2G **Pipeline monitoring using an integrated MFC/FBG system** [7981-85]
H. Lee, H. Sohn, Korea Advanced Institute of Science and Technology (Korea, Republic of);
H. W. Park, Dong-A Univ. (Korea, Republic of)
- 7981 2H **Structural health monitoring of wind turbines using fiber Bragg grating based sensing system**
[7981-86]
H. Bang, M. Jang, H. Shin, Korea Institute of Energy Research (Korea, Republic of)
- 7981 2I **Cable stretching construction monitoring based on FBG sensor** [7981-87]
Z. Jia, L. Ren, D. Li, H. Li, Dalian Univ. of Technology (China)
- 7981 2J **Lamb wave detection in prepreg composite materials with fibre Bragg grating sensors**
[7981-88]
N. Miesen, Delft Univ. of Technology (Netherlands) and National Aerospace Lab.
(Netherlands); Y. Mizutani, Delft Univ. of Technology (Netherlands) and Tokyo Institute of
Technology (Japan); R. M. Groves, J. Sinke, R. Benedictus, Delft Univ. of Technology
(Netherlands)
- 7981 2K **Life cycle strain mapping of composite airframe structures by using FBG sensors** [7981-89]
K. Sekine, I. Takahashi, M. Kume, H. Takeya, Mitsubishi Electric Corp. (Japan); Y. Iwahori,
Japan Aerospace Exploration Agency (Japan); S. Minakuchi, N. Takeda, The Univ. of Tokyo
(Japan); Y. Koshioka, The Materials Process Technology Ctr. (Japan)

SESSION 10C DAMAGE DETECTION IN CONCRETE

- 7981 2L **Highly nonlinear solitary waves-based sensor for monitoring concrete** [7981-90]
X. Ni, S. Nassiri, P. Rizzo, J. Vandenbossche, Univ. of Pittsburgh (United States)
- 7981 2N **Piezoceramic-based smart aggregates for seismic stress monitoring of RC building**
[7981-92]
S. Hou, H. Zhang, S. Yu, Dalian Univ. of Technology (China)
- 7981 2O **Detection of damages in nonlinear reinforced concrete frames** [7981-93]
A.-L. Wu, J. N. Yang, Univ. of California, Irvine (United States); C.-H. Loh, National Taiwan Univ.
(Taiwan)
- 7981 2P **Experimental demonstration of a damage detection technique for nonlinear hysteretic
structures** [7981-94]
J. N. Yang, Y. Xia, Univ. of California, Irvine (United States); C.-H. Loh, National Taiwan Univ.
(Taiwan)

Part Two

SESSION 11A PIEZOELECTRIC SENSORS: THEORY AND APPLICATIONS

- 7981 2Q **Structural integrity design for an active helicopter rotor blade with piezoelectric flap actuators** [7981-95]
J. Lee, S. Shin, Seoul National Univ. (Korea, Republic of)
- 7981 2R **Simplified 2D modeling of power and energy transduction of piezoelectric wafer active sensors for structural health monitoring** [7981-96]
B. Lin, V. Giurgiutiu, Univ. of South Carolina (United States)
- 7981 2S **Embedded piezoelectric sensor-based real-time strength monitoring during curing process of concrete** [7981-97]
D.-J. Kim, C. Lee, H. Chang, S. Park, Sungkyunkwan Univ. (Korea, Republic of)
- 7981 2T **Piezoelectric sensor for in situ measurement of stress intensity factors** [7981-98]
D. Bäcker, C. Häusler, M. Kuna, Technische Univ. Bergakademie Freiberg (Germany)
- 7981 2U **Development of sol-gel derived lead zirconate titanate (PZT) thin films with a nonporous Pt/Ti bottom electrode** [7981-99]
Q. Guo, G. Z. Cao, I. Y. Shen, Univ. of Washington (United States)

SESSION 11B FIBER OPTIC SENSORS II

- 7981 2W **A monitoring of breathing using a hetero-core optical fiber sensor** [7981-101]
S. Akita, A. Seki, K. Watanabe, Soka Univ. (Japan)
- 7981 2X **Investigation of miniature fiber optic surface-mountable Fabry-Perot pressure sensor built on 45° angled fiber** [7981-102]
H. Bae, M. Yu, Univ. of Maryland, College Park (United States)
- 7981 2Y **Transformer winding temperature estimation based on tank surface temperature** [7981-103]
W. Guo, J. Wijaya, D. Martin, N. Lelekakis, Monash Univ. (Australia)
- 7981 2Z **Measurement of a tree growth condition by the hetero-core optical fiber sensor** [7981-104]
H. Uchida, S. Akita, M. Nishiyama, N. Kumekawa, K. Watanabe, Soka Univ. (Japan)

SESSION 11C POLYMER BASED SENSORS

- 7981 31 **Regularization of pattern formation in metal/SMP bi-layer structures** [7981-106]
Z. Chen, Y. Y. Kim, Q. Huang, S. Krishnaswamy, Northwestern Univ. (United States)
- 7981 32 **Sensing performance of electrically conductive fabrics and dielectric electro-active polymers for parachutes** [7981-108]
E. Favini, C. Niezrecki, S. K. Manohar, D. Willis, J. Chen, E. Niemi, Univ. of Massachusetts Lowell (United States); K. Desabrais, C. Charette, U.S. Army Natick Soldier Research, Development and Engineering Ctr. (United States)

SESSION 12A ACOUSTIC AND ULTRASONIC SENSORS

- 7981 34 **Characterising fatigue crack in an aluminium plate using guided elastic waves** [7981-110]
C. Zhou, Z. Su, L. Cheng, The Hong Kong Polytechnic Univ. (Hong Kong, China)
- 7981 35 **A PZT nanofiber composites sensor for structure health monitoring** [7981-111]
X. Chen, Y. Shi, Stevens Institute of Technology (United States)
- 7981 36 **A spiral frequency steerable acoustic transducer for SHM** [7981-112]
M. Senesi, M. Ruzzene, Georgia Institute of Technology (United States)

SESSION 12B POWER HARVESTING

- 7981 38 **A tele-gait monitoring system with an inertial measurement unit and smart shoes** [7981-162]
J. Bae, Univ. of California, Berkeley (United States); K. Kong, Sogang Univ. (Korea, Republic of); M. Tomizuka, Univ. of California, Berkeley (United States)
- 7981 39 **Temperature compensation in piezoelectric energy harvesters using shape memory alloys** [7981-114]
M. Rhimi, N. Lajnef, Michigan State Univ. (United States)

SESSION 12C DECENTRALIZED ALGORITHMS

- 7981 3B **Decentralized SHM method based on substructure parameter identification** [7981-116]
M. Shiraishi, Shimizu Corp. (Japan); A. Mita, Keio Univ. (Japan)

SESSION 12D WIND TURBINE STRUCTURES

- 7981 3E **Physics-based model for predicting the performance of a miniature wind turbine** [7981-119]
F. J. Xu, Donghua Univ. (China) and North Carolina State Univ. (United States); J. Z. Hu, North Carolina State Univ. (United States); Y. P. Qiu, Donghua Univ. (China); F. G. Yuan, North Carolina State Univ. (United States)
- 7981 3F **Smart actuation of inlet guide vanes for small turbine engine** [7981-120]
R. Rusovici, S. T.-C. Kwok Choon, P. Sepri, J. Feys, Florida Institute of Technology (United States)
- 7981 3G **Wind turbine gearbox health monitoring using time-frequency features from multiple sensors** [7981-121]
Y. Lu, J. Tang, Univ. of Connecticut (United States)

SESSION 13A VIBRATION AND CONTROL

- 7981 3H **Development of hybrid type pneumatic vibration isolation table by piezo-stack actuator and filtered-X LMS algorithm** [7981-122]
Y. Shin, Korea Institute of Machinery & Materials (Korea, Republic of); D. Jang, KAIST (Korea, Republic of); S. Moon, Korea Institute of Machinery & Materials (Korea, Republic of); H. Jung, KAIST (Korea, Republic of); Y. Moon, Samsung Electronics Co., Ltd. (Korea, Republic of); C. Song, Korea Institute of Machinery & Materials (Korea, Republic of)
- 7981 3I **Semi-softening and hardening mechanical system for smart vibration generators** [7981-123]
J. W. Deng, Z. You, Univ. of Oxford (United Kingdom)
- 7981 3J **Sensitivity vector fields in embedded coordinates** [7981-124]
A. R. Sloboda, B. I. Epureanu, Univ. of Michigan (United States)

SESSION 13B SHM OF COMPOSITE STRUCTURES

- 7981 3M **A nondestructive experimental study on damage progression in woven glass-epoxy composites** [7981-127]
P. Pollock, L. Yu, S. Guo, M. Sutton, Univ. of South Carolina (United States)
- 7981 3N **Damage detection in composite structures using Lamb wave analysis and time-frequency approach** [7981-128]
Y. Liu, M. Yekani Fard, S. B. Kim, A. Chattopadhyay, Arizona State Univ. (United States); D. Doyle, Air Force Research Lab. (United States)
- 7981 3O **Optimal sensor placement for active guided wave interrogation of complex metallic components** [7981-129]
C. K. Coelho, S. B. Kim, A. Chattopadhyay, Arizona State Univ. (United States)

SESSION 13C DAMAGE DETECTION METHODS I

- 7981 3P **Damage detection for health monitoring of ground vehicle through active probing of vehicle response** [7981-130]
A. A. Meyer, D. E. Adams, Purdue Univ. (United States)
- 7981 3Q **Localized damage detection in a large-scale moment connection using a strain gauge sensor network** [7981-131]
E. Labuz, S. Pakzad, Lehigh Univ. (United States); D. Wurst, Rowan Univ. (United States)
- 7981 3R **Comparison and improvements of two damage identification methods based on modal strain energy** [7981-132]
H. S. Wu, Tongji Univ. (China) and East-China Jiaotong Univ. (China); L. M. Sun, Tongji Univ. (China)

SESSION 13D ULTRASONIC METHODS FOR DAMAGE DETECTION

- 7981 3T **Monitoring thermal stresses and incipient buckling of continuous-welded rails: results from the UCSD/BNSF/FRA large-scale laboratory test track** [7981-134]
R. Phillips, C. Nucera, S. Coccia, F. Lanza di Scalea, Univ. of California, San Diego (United States); I. Bartoli, Drexel Univ. (United States); M. Fateh, G. Carr, Federal Railroad Administration (United States)
- 7981 3U **Auto-Gopher: a wireline rotary-hammer ultrasonic drill** [7981-135]
M. Badescu, S. Sherit, X. Bao, Y. Bar-Cohen, B. Chen, Jet Propulsion Lab. (United States)
- 7981 3V **Experimental analysis of fretting related acoustic emission signals** [7981-136]
K. Asamene, W. Williams, M. Sundaresan, North Carolina A&T State Univ. (United States)
- 7981 3W **Modified Brinson model as an equivalent one-dimensional constitutive equation of SMA spring** [7981-137]
J. Ryu, S. Ahn, J. Koh, K.-J. Cho, M. Cho, Seoul National Univ. (Korea, Republic of)

SESSION 14A NOVEL SENSORS I

- 7981 3Y **Data acquisition and interpretation in order to anticipate the behavior of a resident for biofication of living spaces** [7981-139]
K. Ohashi, A. Mita, Keio Univ. (Japan)
- 7981 3Z **Initial design and validation of packaging directional antennas for structural health and road condition monitoring** [7981-140]
R. A. Akkari, J.-S. Pei, The Univ. of Oklahoma (United States); T. S. Ibrahim, Univ. of Pittsburgh (United States); M. M. Zaman, P. F. Tang, L. Tang, M. H. Breidy, K. R. Hurdelbrink, II, The Univ. of Oklahoma (United States)
- 7981 40 **Optimal design of MPD based fiber optic strain sensors and comparison of power meter and CCD camera based architectures** [7981-141]
O. Toker, H. S. Efendioglu, M. E. Esen, K. Fidanboyu, Fatih Univ. (Turkey)

SESSION 14B CRACK DETECTION IN STRUCTURES

- 7981 42 **A miniature batteryless health and usage monitoring system based on hybrid energy harvesting** [7981-143]
C. Huang, S. Chakrabartty, Michigan State Univ. (United States)
- 7981 43 **Monitoring fatigue crack growth in narrow structural components using Lamb wave technique** [7981-144]
S. I. Lim, L. Cui, Y. Liu, C. K. Soh, Nanyang Technological Univ. (Singapore)
- 7981 44 **Multiplexing wireless antenna sensors for crack growth monitoring** [7981-145]
X. Xu, H. Huang, The Univ. of Texas at Arlington (United States)
- 7981 45 **Detecting crack orientation using antenna sensors** [7981-146]
I. Mohammad, V. Gowda, The Univ. of Texas at Arlington (United States); H. Zhai, Xidian Univ. (China); H. Huang, The Univ. of Texas at Arlington (United States)

SESSION 14C DAMAGE DETECTION METHODS II

- 7981 47 **Structural damage detection with insufficient data using transfer learning techniques** [7981-148]
D. Chakraborty, General Motors Corp. (United States); N. Kovvali, B. Chakraborty,
A. Papandreou-Suppappola, A. Chattopadhyay, Arizona State Univ. (United States)
- 7981 48 **Bayesian anomaly detection in monitoring data applying relevance vector machine**
[7981-149]
T. Saito, Shimizu Corp. (Japan)
- 7981 49 **Stochastic subspace identification for output-only modal analysis: accuracy and sensitivity
on modal parameter estimation** [7981-150]
Y.-C. Liu, C.-H. Loh, National Taiwan Univ. (Taiwan)
- 7981 4A **Damage identification of full scale four-story steel building using multi-input multi-output
models** [7981-151]
H. Hien, A. Mita, Keio Univ. (Japan)

SESSION 14D CONTROL OF SMART SYSTEMS

- 7981 4D **Estimation of dynamic characteristics of a medium height office building with passive
dampers considering vertical seismic response** [7981-154]
M. Ishikawa, A. Mita, Keio Univ. (Japan)
- 7981 4E **Design of modern monitoring systems for efficient control and management of technological
processes** [7981-155]
G. Abitova, M. Beisenbi, L. N. Gumilev Eurasian National Univ. (Kazakhstan); V. Nikulin,
Binghamton Univ. (United States)
- 7981 4F **Theoretical and experimental study of vibration suppression for stayed cable** [7981-157]
S.-K. Huang, P.-Y. Lin, National Ctr. for Research on Earthquake Engineering (Taiwan);
C.-H. Loh, National Taiwan Univ. (Taiwan)

SESSION 15A NOVEL SENSORS II

- 7981 4G **Sensor for direct measurement of the boundary shear stress in fluid flow** [7981-158]
X. Bao, M. Badescu, Y. Bar-Cohen, S.-S. Lih, S. Sherrit, Z. Chang, B. Chen, S. Widholm,
P. Ostlund, Jet Propulsion Lab. (United States)
- 7981 4H **A self-sensing structure with printed sensors** [7981-159]
B. Thompson, H.-S. Yoon, Tennessee Technological Univ. (United States)
- 7981 4I **Photonic crystal fiber heat sensors** [7981-160]
S. Twigg, J. Coomson, A. Colalillo, R. Wynne, Villanova Univ. (United States)

- 7981 4J **Low frequency, high sensitive tunable mechanical monolithic horizontal sensors** [7981-161]
F. Acernese, Univ. degli Studi di Salerno (Italy) and INFN sez. di Napoli (Italy); R. De Rosa, INFN sez. di Napoli (Italy) and Univ. degli Studi di Napoli Federico II (Italy); G. Giordano, Univ. degli Studi di Salerno (Italy); R. Romano, S. Vilasi, F. Barone, Univ. degli Studi di Salerno (Italy) and INFN sez. di Napoli (Italy)
- 7981 4K **Multicore photonic crystal fiber force meters** [7981-215]
M. Reimlinger, A. Colalillo, J. Coompsen, R. Wynne, Villanova Univ. (United States)

SESSION 15B SHM OF CIVIL INFRASTRUCTURES

- 7981 4M **Evaluating the performance of distributed approaches for modal identification** [7981-164]
S. S. Krishnan, Z. Sun, A. Irfanoglu, S. J. Dyke, Purdue Univ. (United States); G. Yan, Univ. of Western Sydney (Australia)
- 7981 4N **Application of a sparse representation method using K-SVD to data compression of experimental ambient vibration data for SHM** [7981-165]
H. Y. Noh, A. S. Kiremidjian, Stanford Univ. (United States)

SESSION 15C VIBRATION CONTROL OF STRUCTURES

- 7981 4Q **Structural vibration control by tuned mass damper using central pattern generator** [7981-169]
D. Iba, J. Hongu, Kyoto Institute of Technology (Japan)
- 7981 4R **Low frequency seismic noise acquisition and analysis with tunable monolithic horizontal sensors** [7981-170]
F. Acernese, Univ. degli Studi di Salerno (Italy) and INFN sez. di Napoli (Italy); R. De Rosa, INFN sez. di Napoli (Italy) and Univ. degli Studi di Napoli Federico II (Italy); G. Giordano, Univ. degli Studi di Salerno (Italy); R. Romano, S. Vilasi, F. Barone, Univ. degli Studi di Salerno (Italy) and INFN sez. di Napoli (Italy)

SESSION 15D ADVANCES IN SHM

- 7981 4U **Model-free modal flexibility-based damage detection strategy for in-service highway bridges** [7981-173]
A. Scianna, S. Jang, Univ. of Connecticut (United States)
- 7981 4V **Material property assessment and crack identification of recycled concrete with embedded smart cement modules** [7981-174]
P. Qiao, W. Fan, F. Chen, Washington State Univ. (United States)
- 7981 4W **Full-scale decentralized damage identification using wireless smart sensors** [7981-175]
S. Jang, Univ. of Connecticut (United States); S.-H. Sim, H. Jo, B. F. Spencer, Jr., Univ. of Illinois at Urbana-Champaign (United States)
- 7981 4X **Real-time health monitoring of bridge structures using a reference-free damage detection algorithm** [7981-176]
S. G. Lee, G. J. Yun, The Univ. of Akron (United States)

- 7981 4Y **Stochastic Galerkin model updating of randomly distributed parameters** [7981-177]
G.-J. Yun, K. Nizamiev, S. I. Hariharan, The Univ. of Akron (United States)

POSTER SESSION

- 7981 51 **Comparison of embedded, surface bonded and reusable piezoelectric transducers for monitoring of concrete structures** [7981-181]
B. Sabet Divsholi, Y. Yang, Nanyang Technological Univ. (Singapore)
- 7981 52 **Development of micro-pump for bio-MEMS by using new bio-compatible piezoelectric material MgSiO_3** [7981-182]
N. Okamoto, H. Hwang, Y. Morita, E. Nakamachi, Doshisha Univ. (Japan)
- 7981 54 **Vibration-based structural health monitoring of harbor caisson structure** [7981-184]
S.-Y. Lee, S.-R. Lee, J.-T. Kim, Pukyong National Univ. (Korea, Republic of)
- 7981 55 **Mechanical monolithic tiltmeter for low frequency measurements** [7981-185]
F. Acernese, Univ. degli Studi di Salerno (Italy) and INFN sez. di Napoli (Italy); R. De Rosa, INFN sez. di Napoli (Italy) and Univ. degli Studi di Napoli Federico II (Italy); G. Giordano, Univ. degli Studi di Salerno (Italy); R. Romano, S. Vilasi, F. Barone, Univ. degli Studi di Salerno (Italy) and INFN sez. di Napoli (Italy)
- 7981 56 **Mechanical monolithic sensors for mechanical damping of a suspended mass** [7981-186]
F. Acernese, Univ. degli Studi di Salerno (Italy) and INFN sez. di Napoli (Italy); R. De Rosa, INFN sez. di Napoli (Italy) and Univ. degli Studi di Napoli Federico II (Italy); G. Giordano, Univ. degli Studi di Salerno (Italy); R. Romano, S. Vilasi, F. Barone, Univ. degli Studi di Salerno (Italy) and INFN sez. di Napoli (Italy)
- 7981 57 **Development of a tilt meter based on a hetero-core fiber optic sensor** [7981-187]
Y. Honda, S. Akita, M. Nishiyama, K. Watanabe, Soka Univ. (Japan)
- 7981 59 **Damage detection in prestressed pile to bent cap connections** [7981-189]
A. Larosche, J. Mangual, P. Ziehl, Univ. of South Carolina (United States)
- 7981 5A **Structural damage identification using adaptive immune clonal selection algorithm and acceleration data** [7981-191]
R. Li, A. Mita, Keio Univ. (Japan)
- 7981 5C **Recognition of flow in everyday life using sensor agent robot with laser range finder** [7981-194]
M. Goshima, A. Mita, Keio Univ. (Japan)
- 7981 5D **Recognition of human emotion using sensor agent robot for interactive and adaptive living spaces** [7981-195]
S. Murata, A. Mita, Keio Univ. (Japan)
- 7981 5F **Real-time soil compaction monitoring through pad strain measurements: modeling to inform strain gage placement** [7981-197]
S. C. Kimmel, M. A. Mooney, Colorado School of Mines (United States)

- 7981 5G **An application of a decentralized damage detection method to a shake-table experiment** [7981-199]
Z. Xing, A. Mita, Keio Univ. (Japan)
- 7981 5H **Asset health monitors: development, sustainment, advancement** [7981-200]
F. J. Mauss, Pacific Northwest National Lab. (United States)
- 7981 5I **The eigenvalue problem associated with the nonlinear buckling of a shear bending column** [7981-201]
I. Nishimura, Tokyo City Univ. (Japan)
- 7981 5K **Piezoelectric composite morphing control surfaces for unmanned aerial vehicles** [7981-203]
O. J. Ohanian III, E. D. Karni, C. C. Olien, AVID LLC (United States); E. A. Gustafson, K. B. Kochersberger, Virginia Polytechnic Institute and State Univ. (United States); P. A. Gelhausen, AVID LLC (United States); B. L. Brown, Air Force Research Lab. (United States)
- 7981 5L **A basic approach for wing leading deicing by smart structures** [7981-204]
S. Struggl, J. Korak, C. Feyrer, PROFACTOR GmbH (Austria)
- 7981 5N **Structural health monitoring (SHM) needs S³ (sensor-structure-system) logic for efficient product development** [7981-206]
C. Peters, Faserinstitut Bremen e.V. (FIBRE) (Germany); P. Zahlen, Composite Technology Ctr. GmbH (CTC) (Germany); C. Bockenheimer, Airbus Operations GmbH (Germany); A. S. Herrmann, Univ. of Bremen (Germany)
- 7981 5R **Subsurface geo-applications of wireless signal networks** [7981-210]
S.-U. Yoon, E. Ghazanfari, L. Cheng, M. T. Suleiman, S. Pamukcu, Lehigh Univ. (United States)
- 7981 5T **Enhancing sensitivity of semiconductor-based gas sensors on nanostructured surfaces** [7981-212]
H. Huo, H. Ren, C. Wang, M. Shen, Univ. of Massachusetts Lowell (United States)
- 7981 5U **Advanced sensor-computer technology for urban runoff monitoring** [7981-213]
B. Yu, P. K. Behera, J. F. Ramirez Rochac, Univ. of the District of Columbia (United States)
- 7981 5V **Dynamic strain measurements with a luminescent photoelastic coating** [7981-214]
D. R. Gerber, H. K. Ali, J. P. Hubner, The Univ. of Alabama (United States)

Author Index

Conference Committee

Symposium Chairs

Donald J. Leo, Virginia Polytechnic Institute and State University (United States)

Kara J. Peters, North Carolina State University (United States)

Symposium Cochairs

Norbert G. Meyendorf, Fraunhofer-Institut für Zerstörungsfreie Prüfverfahren (Germany) and University of Dayton (United States)

Norman M. Wereley, University of Maryland, College Park (United States)

Conference Chair

Masayoshi Tomizuka, University of California, Berkeley (United States)

Conference Cochairs

Chung-Bang Yun, KAIST (Korea, Republic of)

Victor Giurgiutiu, University of South Carolina (United States)

Jerome P. Lynch, University of Michigan (United States)

Program Committee

Yoshio Akimune, National Institute of Advanced Industrial Science and Technology (Japan)

Amr M. Baz, University of Maryland, College Park (United States)

Dumitru Caruntu, The University of Texas-Pan American (United States)

Fabio Casciati, Università degli Studi di Pavia (Italy)

Chih-Chen Chang, Hong Kong University of Science and Technology (Hong Kong, China)

Genda Chen, Missouri University of Science and Technology (United States)

Shirley J. Dyke, Purdue University (United States)

Alison B. Flatau, University of Maryland, College Park (United States)

Yozo Fujino, The University of Tokyo (Japan)

Robert X. Gao, University of Connecticut (United States)

Steven D. Glaser, University of California, Berkeley (United States)

Faramarz Gordaninejad, University of Nevada, Reno (United States)

Xiaoyan Han, Wayne State University (United States)

Benjamin Kyle Henderson, Air Force Research Laboratory (United States)

Haiying Huang, The University of Texas at Arlington (United States)
Jerry Q. Huang, The Boeing Company (United States)
Kumar V. Jata, Asian Office of Aerospace Research and Development (United States)
Jeong-Tae Kim, Pukyong National University (Korea, Republic of)
Ki-Soo Kim, Hongik University (Korea, Republic of)
Jan-Ming Ko, The Hong Kong Polytechnic University (Hong Kong, China)
Francesco Lanza di Scalea, University of California, San Diego (United States)
Yingzi Lin, Northeastern University (United States)
Shih-Chi Liu, National Science Foundation (United States)
Chin-Hsiung Loh, National Taiwan University (Taiwan)
Kenneth J. Loh, University of California, Davis (United States)
Sami F. Masri, The University of Southern California (United States)
Eduardo Misawa, National Science Foundation (United States)
Akira Mita, Keio University (Japan)
Satish Nagarajaiah, Rice University (United States)
Yi-Qing Ni, The Hong Kong Polytechnic University (Hong Kong, China)
Irving J. Oppenheim, Carnegie Mellon University (United States)
Jinping Ou, Harbin Institute of Technology (China)
Jin-Song Pei, The University of Oklahoma (United States)
Ser-Tong Quek, National University of Singapore (Singapore)
Rahmat A. Shoureshi, University of Denver (United States)
Gangbing Song, University of Houston (United States)
Hoon Sohn, KAIST (Korea, Republic of)
Billie F. Spencer, Jr., University of Illinois at Urbana-Champaign (United States)
Lizhi Sun, University of California, Irvine (United States)
Tsu-Chin Tsao, University of California, Los Angeles (United States)
Ming L. Wang, Northeastern University (United States)
Yang Wang, Georgia Institute of Technology (United States)
Zhishen Wu, Ibaraki University (Japan)
Chengying Xu, University of Central Florida (United States)
Li Zhou, Nanjing University of Aeronautics and Astronautics (China)
Hong Susan Zhou, Worcester Polytechnic Institute (United States)

Session Chairs

- 1 Keynote Session
 - Chung-Bang Yun**, KAIST (Korea, Republic of)
 - Victor Giurgiutiu**, University of South Carolina (United States)
- 2a Emerging Sensing Systems for SHM I
 - Kenneth J. Loh**, University of California, Davis (United States)
 - Yang Wang**, Georgia Institute of Technology (United States)

- 2b Wireless Sensors for SHM
Jennifer A. Rice, Texas Tech University (United States)
- 3a Emerging Sensing Systems for SHM II
Kenneth J. Loh, University of California, Davis (United States)
Yang Wang, Georgia Institute of Technology (United States)
- 3b Ultrasonics Methods
Henrique L. Reis, University of Illinois at Urbana-Champaign (United States)
Francesco Lanza di Scalea, University of California, San Diego (United States)
- 4a MEMS and Nanotechnology I
Hui Li, Harbin Institute of Technology (China)
Ming L. Wang, Northeastern University (United States)
- 4b Impact Damage Detection
Tribikram Kundu, The University of Arizona (United States)
Francesco Lanza di Scalea, University of California, San Diego (United States)
- 5a MEMS and Nanotechnology II
Jian Zhang, Drexel University (United States)
- 5b Fatigue Assessment in Metallic Structures
Ser-Tong Quek, National University of Singapore (Singapore)
Xiaoyan Han, Wayne State University (United States)
- 6a Nanostructures for Sensing
Hong Susan Zhou, Worcester Polytechnic Institute (United States)
Fuh-Gwo Yuan, North Carolina State University (United States)
- 6b Piezoelectric Sensors for SHM
Victor Giurgiutiu, University of South Carolina (United States)
Henrique L. Reis, University of Illinois at Urbana-Champaign (United States)
- 7a Emerging Sensing Systems for SHM III
Kenneth J. Loh, University of California, Davis (United States)
Yang Wang, Georgia Institute of Technology (United States)
- 7b Advance Sensors for Civil Structures
Jennifer A. Rice, Texas Tech University (United States)
John S. Popovics, University of Illinois at Urbana-Champaign (United States)

- 8a Modeling of Guided Waves
Kumar V. Jata, Asian Office of Aerospace Research and Development
 (United States)
Victor Giurgiutiu, University of South Carolina (United States)
- 8b Bio-inspired Sensors I
Akira Mita, Keio University (Japan)
Jin-Song Pei, The University of Oklahoma (United States)
- 8c Finite Element Updating for SHM
Xingwei Wang, University of Massachusetts Lowell (United States)
- 9a Bridge Monitoring Technologies I
Branko Glisic, Princeton University (United States)
- 9b Bio-inspired Sensors II
Akira Mita, Keio University (Japan)
Jin-Song Pei, The University of Oklahoma (United States)
- 9c Pattern Classification Methods in SHM
Michael K. Philen, Virginia Polytechnic Institute and State University
 (United States)
Aditi Chattopadhyay, Arizona State University (United States)
- 10a Bridge Monitoring Technologies II
Branko Glisic, Princeton University (United States)
Genda Chen, Missouri University of Science and Technology
 (United States)
- 10b Fiber Optic Sensors I
Gangbing Song, University of Houston (United States)
Hoon Sohn, KAIST (Korea, Republic of)
- 10c Damage Detection in Concrete
Zhishen Wu, Ibaraki University (Japan)
Chin-Hsiung Loh, National Taiwan University (Taiwan)
- 11a Piezoelectric Sensors: Theory and Applications
Bin Lin, University of South Carolina (United States)
Cliff J. Lissenden, The Pennsylvania State University (United States)
- 11b Fiber Optic Sensors II
Zhishen Wu, Ibaraki University (Japan)
Branko Glisic, Princeton University (United States)

- 11c Polymer Based Sensors
Sridhar Krishnaswamy, Northwestern University (United States)
Satish Nagarajaiah, Rice University (United States)
- 12a Acoustic and Ultrasonic Sensors
Massimo Ruzzene, Georgia Institute of Technology (United States)
Yong Shi, Stevens Institute of Technology (United States)
- 12b Power Harvesting
Shantanu Chakrabartty, Michigan State University (United States)
- 12d Wind Turbine Structures
Fuh-Gwo Yuan, North Carolina State University (United States)
Razvan Rusovici, Florida Institute of Technology (United States)
- 13a Vibration and Control
Hyung-Jo Jung, KAIST (Korea, Republic of)
Bogdan I. Epureanu, University of Michigan (United States)
- 13b SHM of Composite Structures
Aditi Chattopadhyay, Arizona State University (United States)
- 13c Damage Detection Methods I
Shamim N. Pakzad, Lehigh University (United States)
Alan Meyer, Purdue University (United States)
- 13d Ultrasonic Methods for Damage Detection
Ivan Bartoli, Drexel University (United States)
Mircea Badescu, Jet Propulsion Laboratory (United States)
- 14a Novel Sensors I
Yingzi Lin, Northeastern University (United States)
Hong Susan Zhou, Worcester Polytechnic Institute (United States)
- 14b Crack Detection in Structures
Jerry Q. Huang, The Boeing Company (United States)
- 14c Damage Detection Methods II
Gangbing Song, University of Houston (United States)
Hoon Sohn, KAIST (Korea, Republic of)
- 14d Control of Smart Systems
Genda Chen, Missouri University of Science and Technology (United States)

- 15a Novel Sensors II
Haiying Huang, The University of Texas at Arlington (United States)
Daniele Zonta, Università degli Studi di Trento (Italy)
- 15b SHM of Civil Infrastructures
Richard Christenson, University of Connecticut (United States)
Shirley J. Dyke, Washington University in St. Louis (United States)
- 15c Vibration Control of Structures
Chin-Hsiung Loh, National Taiwan University (Taiwan)
Shirley J. Dyke, Washington University in St. Louis (United States)
- 15d Advances in SHM
Gun-Jin Yun, The University of Akron (United States)
Shinae Jang, University of Connecticut (United States)

Introduction

This volume is a collection of technical papers presented at the 2011 SPIE Conference held in San Diego, California, on Sensors and Smart Structures Technologies for Civil, Mechanical, and Aerospace Systems. This conference is unique in the emerging area of sensors and smart structures technologies because of its multidisciplinary representations from the aerospace, civil, and mechanical engineering communities. Participants were from more than 23 countries over the globe. The conference also served as the *de facto* grantees' conference of the Sensors and Sensing Systems (SSS) program of the Civil, Mechanical and Manufacturing Innovation (CMMI) Division of the National Science Foundation (NSF). The participation of the Asian-Pacific Network of Centers for Research in Smart Structure Technology (ANCRiSST) as the conference co-sponsor strengthened international participations. As you find in the roster of the program committee, members of the program committee represented almost all the sub-disciplines of the engineering field. The conference showed approximately 20% growth from the previous year in terms of the number of papers accepted. The conference started with a keynote session with two excellent keynote presentations: "Bio-inspired sensing technologies for structural health monitoring" by Professor Jerome P. Lynch, University of Michigan, and "Multifunctional materials exhibiting distributed actuation, sensing, and control: uncovering the hierarchical control of fish for developing smarter materials" by Professor Michael K. Philen, Virginia Polytechnic Institute and State University. The opening plenary session was followed by 40 topical sessions and one poster session. The papers in these sessions covered a wide range of topics in: fiber optics and other novel sensors, structural health monitoring, signal processing, damage detection and assessment, wireless technologies, modeling and analysis of smart systems and applications to civil, mechanical, and aerospace systems. Research papers supported by the NSF SSS program were presented at both respective topical sessions and the NSF poster session. Lively discussions among Dr. Shih-Chi Liu, CMMI Program Director in charge of the SSS program, principal investigators of the NSF projects, and other participants took place during the poster session.

In conjunction with the broad technical base of the current conference program and its objectives, it is apparent that we must continue to develop and build a large, diverse constituency. In light of the increased number of submissions to this conference that we witnessed in recent years, we are optimistic in this regard. We would like to thank authors and presenters of this year's conference for their contributions. The outstanding conference program was put together by the fine effort of the program committee, and we are thankful to the members of the program committee for their unyielding commitment to making the conference a great success.

We trust that readers will find this conference volume useful and informative.
