SPIE

Volume 8045

Proceedings of SPIE, 0277-786X, v. 8045

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Unmanned Systems Technology XIII*, edited by Douglas W. Gage, Charles M. Shoemaker, Robert E. Karlsen, Grant R. Gerhart, Proceedings of SPIE Vol. 8045 (SPIE, Bellingham, WA, 2011) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii *Conference Committee*

PERCEPTION

- 8045 02 **Safe Operations of Unmanned Systems for Reconnaissance in Complex Environments Army Technology Objective (SOURCE ATO)** [8045-01]
N. J. Kott III, U.S. Army Tank Automotive Research, Development and Engineering Ctr. (United States); M. Wellfare, T. K. van Lierop, E. Mottern, General Dynamics Robotic Systems (United States)
- 8045 03 **Unmanned ground vehicle perception using thermal infrared cameras** [8045-02]
A. Rankin, A. Huertas, L. Matthies, M. Bajracharya, C. Assad, S. Brennan, P. Bellutta, Jet Propulsion Lab. (United States); G. W. Sherwin, General Dynamics Robotic Systems (United States)
- 8045 04 **Robot training through incremental learning** [8045-03]
R. E. Karlsen, S. Hunt, U.S. Army Tank Automotive Research, Development and Engineering Ctr. (United States); G. Witus, Turing Associates (United States)
- 8045 05 **Safeguarding teleoperation using automotive radar sensors** [8045-04]
J. Giesbrecht, B. Fairbrother, Defence Research and Development Canada (Canada)
- 8045 06 **High-frequency imaging radar for robotic navigation and situational awareness** [8045-05]
D. J. Thomas, U.S. Army Tank-Automotive and Armaments Command (United States); C. Luo, R. Knox, Epsilon Lambda Electronics Corp. (United States)
- 8045 07 **Pedestrian and car detection and classification for unmanned ground vehicle using 3D lidar and monocular camera** [8045-06]
K. Cho, Univ. of Science & Technology (Korea, Republic of) and Korea Institute of Industrial Technology (Korea, Republic of); S.-H. Baeg, Korea Institute of Industrial Technology (Korea, Republic of); K. Lee, H. S. Lee, LG Innotek (Korea, Republic of); S. Park, Korea Institute of Industrial Technology (Korea, Republic of)

ARTICULATION AND MANIPULATION

- 8045 09 **Aladdin: a semi-autonomous door opening system for EOD-class robots** [8045-08]
J. Craft, J. Wilson, Honeybee Robotics (United States); W. H. Huang, M. R. Claffee, E. A. Phillips, iRobot Corp. (United States)
- 8045 0A **Human-like characteristics for high degree of freedom robotic door-opening end-effector** [8045-10]
J. P. Gray, U.S. Army Tank Automotive Research, Development and Engineering Ctr. (United States); F. Campagna, RE2, Inc. (United States)

- 8045 0C **Intuitive control of robotic manipulators** [8045-14]
D. Rusbarsky, RE2, Inc. (United States); J. Gray, U.S. Army Tank Automotive Research, Development and Engineering Ctr. (United States); D. Peters, RE2, Inc. (United States)

SELF-ORGANIZING, COLLABORATIVE, AND UNMANNED ISR ROBOTS: JOINT SESSION WITH CONFERENCE 8062

- 8045 0E **JEFX 10 demonstration of Cooperative Hunter Killer UAS and upstream data fusion** [8045-09]
B. K. Funk, J. C. Castelli, A. S. Watkins, C. B. McCubbin, S. J. Marshall, J. D. Barton, A. J. Newman, C. K. Peterson, J. T. DeSena, D. A. Dutrow, P. A. Rodriguez, The Johns Hopkins Univ. (United States)
- 8045 0F **Dynamic replanning on demand of UAS constellations performing ISR missions** [8045-11]
D. W. Stouch, E. Zeidman, W. Callahan, Charles River Analytics, Inc. (United States); K. McGraw, U.S. Army Engineer Research and Development Ctr. (United States)
- 8045 0G **All weather sense and avoid system (AWSAS) for all UAS and manned platforms** [8045-13]
V. M. Contarino, R. Healing, R. Contarino, M. R. Contarino, P. Molchanov, T. Curran, T. Keck, J. Keck, S. Allen, R-Cubed Engineering, LLC (United States); S. Shubert, R. Wienmann, Appareo Systems, LLC (United States)

NAVIGATION AND MOBILITY I

- 8045 0I **Little Dog learning of tractive and compressive terrain characteristics** [8045-17]
B. L. Digney, Defence Research and Development Canada (Canada)
- 8045 0J **Driver assist behaviors for high-speed small UGVs** [8045-18]
B. Yamauchi, iRobot Corp. (United States)
- 8045 0K **Fusion of visual odometry and inertial data for enhanced real-time egomotion estimation** [8045-19]
V. E. Perlin, D. B. Johnson, M. M. Rohde, Quantum Signal LLC (United States); R. E. Karlsen, U.S. Army Tank Automotive Research, Development and Engineering Ctr. (United States)
- 8045 0L **Design, modelling, implementation, and intelligent fuzzy control of a hovercraft** [8045-20]
M. M. El-khatib, W. M. Hussein, Egyptian Armed Forces (Egypt)

NAVIGATION AND MOBILITY II

- 8045 0N **Methods for UGV teleoperation with high latency communications** [8045-22]
G. Witus, Turing Associates, Inc. (United States); S. Hunt, U.S. Army Tank Automotive Research, Development and Engineering Ctr. (United States); P. Janicki, Signature Research, Inc. (United States)
- 8045 0O **SUGV baseline autonomy using ROS** [8045-24]
E. Stump, L. Sadler, D. Baran, U.S. Army Research Lab. (United States)

- 8045 OP **Energy efficient path planning for skid-steered autonomous ground vehicles** [8045-25]
A. Sharma, N. Gupta, E. G. Collins, Jr., Florida A&M Univ.--The Florida State Univ. College of Engineering (United States)
- 8045 OQ **Lessons from risk assessment of countermine robotic systems** [8045-26]
I. Chappell, F. L. Moses, Institute for Defense Analyses (United States); M. P. Aeillo, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

INTELLIGENT BEHAVIORS

- 8045 OS **Trust dynamics in multi-agent coalition formation** [8045-28]
D. G. Mikulski, U.S. Army Tank Automotive Research, Development and Engineering Ctr. (United States) and Oakland Univ. (United States); F. L. Lewis, The Univ. of Texas at Arlington (United States); E. Y. Gu, Oakland Univ. (United States); G. R. Hudas, U.S. Army Tank Automotive Research, Development and Engineering Ctr. (United States)
- 8045 OT **An information potential approach for tracking and surveilling multiple moving targets using mobile sensor agents** [8045-16]
W. Lu, G. Zhang, S. Ferrari, Duke Univ. (United States); R. Fierro, I. Palunko, The Univ. of New Mexico (United States)
- 8045 OU **UAV-borne X-band radar for MAV collision avoidance** [8045-30]
A. A. Moses, M. J. Rutherford, M. Kontitsis, K. P. Valavanis, Univ. of Denver (United States)
- 8045 OV **Building entity models through observation and learning** [8045-31]
R. Garcia, Motile Robotics Inc. (United States); R. Kania, U.S. Army Tank Automotive Research, Development and Engineering Ctr. (United States); M. Fields, U.S. Army Research Lab. (United States); L. Barnes, Univ. of South Florida (United States)
- 8045 OW **Neuro-optimal control of helicopter UAVs** [8045-32]
D. Nodland, Missouri Univ. of Science and Technology (United States); A. Ghosh, National Metallurgical Lab. (India); H. Zargarzadeh, S. Jagannathan, Missouri Univ. of Science and Technology (United States)

SPECIAL TOPICS

- 8045 OX **High-fidelity physics-based simulation of a UGV reconnaissance mission in a complex urban environment** [8045-33]
C. Goodin, B. Q. Gates, C. L. Cummins, T. R. George, P. J. Durst, J. D. Priddy, U.S. Army Engineer Research and Development Ctr. (United States)
- 8045 OY **Light weight portable operator control unit using an Android-enabled mobile phone** [8045-34]
N. Fung, U.S. Army Research Lab. (United States)
- 8045 OZ **Practical robotic self-awareness and self-knowledge** [8045-35]
D. W. Gage, XPM Technologies (United States)
- 8045 IO **Microrobotics surveillance: discrete and continuous starbot** [8045-36]
M. Mayyas, W. H. Lee, H. Stephanou, The Univ. of Texas at Arlington (United States)

- 8045 11 **Novel locomotion via biological inspiration** [8045-37]
R. D. Quinn, A. Boxerbaum, L. Palmer, H. Chiel, E. Diller, A. Hunt, R. Bachmann, Case Western Reserve Univ. (United States)
- 8045 12 **Zipper mast for enhanced communications and surveillance** [8045-38]
G. Woodruff, Geo Systems, Inc. (United States); P. Muench, U.S. Army Tank Automotive Research, Development and Engineering Ctr. (United States); G. Witus, Turing Associates, Inc. (United States)
- 8045 13 **Small unmanned aerial platform for geospatial data collection and analysis** [8045-39]
E. Levin, A. Sergeyev, Michigan Technological Univ. (United States)
- 8045 14 **Laser power beaming for defense and security applications** [8045-40]
T. J. Nugent, Jr., J. T. Kare, LaserMotive (United States)
- 8045 16 **Taking on the tall poles of autonomous robot navigation** [8045-45]
M. Rosenblum, V. Rajagopalan, J. Steinbis, J. Haddon, P. Cannon, Lockheed Martin Autonomous Systems (United States)

Author Index

Conference Committee

Symposium Chair

William Jeffrey, HRL Laboratories, LLC (United States)

Symposium Cochair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Conference Chairs

Douglas W. Gage, XPM Technologies (United States)

Charles M. Shoemaker, General Dynamics Robotic Systems (United States)

Robert E. Karlsen, U.S. Army Tank Automotive Research, Development and Engineering Center (United States)

Grant R. Gerhart, U.S. Army Tank Automotive Research, Development and Engineering Center-Retired (United States)

Program Committee

Stephen Balakirsky, National Institute of Standards and Technology (United States)

Johann Borenstein, University of Michigan (United States)

Jonathan A. Bornstein, U.S. Army Research Laboratory (United States)

Rajiv V. Dubey, University of South Florida (United States)

Hobart R. Everett, Space and Naval Warfare Systems Center Pacific (United States)

Jared Giesbrecht, Defence Research and Development Canada (Canada)

David Gorsich, U.S. Army Tank Automotive Research, Development and Engineering Center (United States)

Susan G. Hill, U.S. Army Aberdeen Test Center (United States)

Karl D. Iagnemma, Massachusetts Institute of Technology (United States)

Gene A. Klager, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

Andreas F. Koschan, The University of Tennessee (United States)

James H. Lever, U.S. Army Corps of Engineers (United States)

Larry H. Matthies, Jet Propulsion Laboratory (United States)

Kevin L. Moore, Colorado School of Mines (United States)

Hoa G. Nguyen, Space and Naval Warfare Systems Command (United States)

James L. Overholt, U.S. Army Tank Automotive Research, Development and Engineering Center (United States)
Marc Raibert, Boston Dynamics (United States)
Klaus-Juergen Schilling, Julius-Maximilians-Universität Würzburg (Germany)
Nahid N. Sidki, SAIC (United States)
Harpreet Singh, Wayne State University (United States)
Magnús S. H. Snorrason, Charles River Analytics, Inc. (United States)
Anthony Stentz, Carnegie Mellon University (United States)
David L. Stone, Mechatron Consulting (United States)
Venkataraman Sundareswaran, Teledyne Scientific Company (United States)
Brian H. Wilcox, Jet Propulsion Laboratory (United States)
Gary Witus, Turing Associates, Inc. (United States)
Brian M. Yamauchi, iRobot Corporation (United States)

Session Chairs

- 1 MAST-Navigation: Joint Session with Conference 8031
Larry H. Matthies, Jet Propulsion Laboratory (United States)
Joseph N. Mait, U.S. Army Research Laboratory (United States)
- 2 MAST-Communication: Joint Session with Conference 8031
William Nothwang, U.S. Army Research Laboratory (United States)
Joseph N. Mait, U.S. Army Research Laboratory (United States)
- 3 Perception
Larry H. Matthies, Jet Propulsion Laboratory (United States)
Magnús S. H. Snorrason, Charles River Analytics, Inc. (United States)
- 4 Articulation and Manipulation
Paul Muench, U.S. Army Tank Automotive Research, Development and Engineering Center (United States)
Mike Perschbacher, RovnoTech (United States)
- 5 Self-Organizing, Collaborative, and Unmanned ISR Robots: Joint Session with Conference 8062
Raja Suresh, Defense Advanced Research Projects Agency (United States)
Grant R. Gerhart, U.S. Army Tank Automotive Research, Development and Engineering Center-Retired (United States)
- 6 Navigation and Mobility I
Robert E. Karlsen, U.S. Army Tank Automotive Research, Development and Engineering Center (United States)
Brian M. Yamauchi, iRobot Corporation (United States)

- 7 Navigation and Mobility II
 Robert E. Karlsen, U.S. Army Tank Automotive Research, Development
 and Engineering Center (United States)
 Brian M. Yamauchi, iRobot Corporation (United States)
- 8 Intelligent Behaviors
 Dariusz G. Mikulski, U.S. Army Tank Automotive Research,
 Development and Engineering Center (United States)
 Frank L. Lewis, The University of Texas at Arlington (United States)
- 9 Special Topics
 Douglas W. Gage, XPM Technologies (United States)
 Charles M. Shoemaker, General Dynamics Robotic Systems
 (United States)
