Event: SPIE Defense, Security, and Sensing, 2011, Orlando, Florida, United States

PROCEEDINGS OF SPIE

Enabling Photonics Technologies for Defense, Security, and Aerospace Applications VII

**Michael J. Hayduk
Peter J. Delfyett, Jr.**
Editors

**25–26 April 2011
Orlando, Florida, United States**

Sponsored and Published by
SPIE

Volume 8054

Proceedings of SPIE, 0277-786X, v. 8054

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Enabling Photonics Technologies for Defense, Security, and Aerospace Applications VII*, edited by Michael J. Hayduk, Peter J. Delfyett, Jr., Proceedings of SPIE Vol. 8054 (SPIE, Bellingham, WA, 2011) Article CID Number.

ISSN 0277-786X

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v *Conference Committee*

PHOTONIC DEVICES AND COMPONENTS

- 8054 04 **Theoretical study of spur-free dynamic range of a semiconductor resonant cavity linear interferometric intensity modulator (Invited Paper)** [8054-02]
N. Hoghooghi, P. J. Delfyett, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States)
- 8054 06 **Large scale micro-Fabry-Perot optical filter arrays** [8054-04]
A. A. Abtahi, Aerospace Missions Corp. (United States); P. B. Griffin, Stanford Univ. (United States); R. J. Morgan, U. Raghuram, F. S. Vetelino, Aerospace Missions Corp. (United States); F. Tejada, Sensing Machines (United States)

VCSELS AND QUANTUM DOTS

- 8054 0A **New VCSEL technology with scalability for single mode operation and densely integrated arrays** [8054-08]
G. Zhao, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States); A. Demir, S. Freisem, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States) and sdPhotonics LLC (United States); Y. Zhang, X. Liu, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States); D. G. Deppe, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States) and sdPhotonics LLC (United States)

ULTRASHORT PULSED LASERS AND OPTICAL SWITCHING

- 8054 0C **Injection locked coupled opto-electronic oscillator for optical frequency comb generation** [8054-10]
C. Williams, D. Mandridis, J. Davila-Rodriguez, P. J. Delfyett, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States)
- 8054 0E **Design of cascaded plasmon resonances for ultrafast nonlinear optical switching** [8054-12]
S. Toroghi, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States); P. G. Kik, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States) and Univ. of Central Florida (United States)

EMITTER AND DETECTOR TECHNOLOGY

- 8054 0G **An etalon stabilized 10-GHz comb source using a slab coupled waveguide amplifier** [8054-14]
J. Davila-Rodriguez, I. T. Ozdur, D. Mandridis, C. Williams, P. J. Delfyett, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States); J. J. Plant, P. W. Juodawlkis, MIT Lincoln Lab. (United States)

- 8054 0I **Semiconductor-based low-noise 100 MHz chirped pulse laser source based on a theta cavity design with an intra-cavity etalon and long-term stabilization (Invited Paper)** [8054-16]
D. Mandridis, C. Williams, I. Ozdur, A. Klee, P. J. Delfyett, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States)
- 8054 0K **25 Gbps 850 nm photodiode for emerging 100 Gb ethernet applications (Invited Paper)** [8054-18]
A. Joshi, J. Rue, D. Becker, S. Datta, W. McFaul, Discovery Semiconductors, Inc. (United States)

OPTICAL COMMUNICATION SYSTEMS AND TECHNOLOGY I

- 8054 0L **Free-space optical communication link using spatial optical encryption** [8054-20]
S. H. Murshid, W. Howard, Florida Institute of Technology (United States); N. R. Murshid, Sebastian River Medical Ctr. (United States); A. Chakravarty, Florida Institute of Technology (United States)
- 8054 0M **Optical encryption as a function of polarization in optical fiber communications** [8054-21]
S. H. Murshid, H. P. Muralikrishnan, J. Tamlaras, A. Chakravarty, Florida Institute of Technology (United States); H. J. Caulfield, Alabama A&M Univ. (United States) and Diversified Research Corp. (United States)
- 8054 0N **A method of hardware support for high-speed data capture at 40 Gbps and beyond** [8054-22]
J. S. White, Secure Mind Research Lab. (United States); A. W. Pilbeam, Pilbeam Engineering (United States)

OPTICAL COMMUNICATION SYSTEMS AND TECHNOLOGY II

- 8054 0O **An analysis of coupling attacks in high-speed fiber optic networks** [8054-23]
J. S. White, Secure Mind Research Lab. (United States); A. W. Pilbeam, Pilbeam Engineering (United States)
- 8054 0P **Attenuation and bit error rate for four co-propagating spatially multiplexed optical communication channels of exactly same wavelength in step index multimode fibers** [8054-24]
S. H. Murshid, A. Chakravarty, Florida Institute of Technology (United States)

POSTER SESSION

- 8054 0R **Mode-locked fiber laser using SU8 resist incorporating carbon nanotubes** [8054-26]
I. Hernandez-Romano, Instituto Nacional de Astrofísica, Óptica y Electrónica (Mexico); D. Mandridis, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States); D. A. May-Arriola, Univ. Autónoma de Tamaulipas (Mexico); J. J. Sanchez-Mondragon, Instituto Nacional de Astrofísica, Óptica y Electrónica (Mexico); P. J. Delfyett, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States)

- 8054 OS **Impairment compensation for unrepeated fiber transmission with distributed Raman amplification** [8054-27]
L. Zhu, G. Li, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States)
- 8054 OT **Description of various test scenarios for temporary blinding of pilots by means of bright optical radiation during darkness** [8054-28]
H.-D. Reidenbach, Cologne Univ. of Applied Sciences (Germany)

Author Index

Conference Committee

Symposium Chair

William Jeffrey, HRL Laboratories, LLC (United States)

Symposium Cochair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Conference Chairs

Michael J. Hayduk, Air Force Research Laboratory (United States)

Peter J. Delfyett, Jr., CREOL, The College of Optics and Photonics,
University of Central Florida (United States)

Conference Cochairs

Andrew R. Pirich, ACP Consulting (United States)

Eric Donkor, University of Connecticut (United States)

Program Committee

H. John Caulfield, Diversified Research Corporation (United States)

Reinhard K. Erdmann, Air Force Research Laboratory (United States)

Michael L. Fanto, Air Force Research Laboratory (United States)

Sangyoun Gee, Gwangju Institute of Science and Technology (Korea,
Republic of)

Bahram Javidi, University of Connecticut (United States)

Robert L. Kaminski, Air Force Research Laboratory (United States)

Guifang Li, CREOL, The College of Optics and Photonics, University of
Central Florida (United States)

Joseph M. Osman, Air Force Research Laboratory (United States)

Edward W. Taylor, International Photonics Consultants, Inc. (United
States)

Henry Zmuda, University of Florida (United States)

Session Chairs

Keynote Session

Eric Donkor, University of Connecticut (United States)

Photonic Devices and Components

Michael J. Hayduk, Air Force Research Laboratory (United States)

VCSELS and Quantum Dots

Peter J. Delfyett, Jr., CREOL, The College of Optics and Photonics,
University of Central Florida (United States)

Ultrashort Pulsed Lasers and Optical Switching

Michael L. Fanto, Air Force Research Laboratory (United States)

Emitter and Detector Technology

Guifang Li, CREOL, The College of Optics and Photonics, University of
Central Florida (United States)

Optical Communication Systems and Technology I

Peter J. Delfyett, Jr., CREOL, The College of Optics and Photonics,
University of Central Florida (United States)

Optical Communication Systems and Technology II

Michael J. Hayduk, Air Force Research Laboratory (United States)
