Volume 8061

Proceedings of SPIE, 0277-786X, v. 8061

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Wireless Sensing, Localization, and Processing VI*, edited by Sohail A. Dianat, Michael David Zoltowski, Proceedings of SPIE Vol. 8061 (SPIE, Bellingham, WA, 2011) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v *Conference Committee*

SESSION 1 SENSOR NETWORKS

- 8061 04 **Ant-based power efficient, adaptive, reliable, and load balanced (A-PEARL) routing for smart metering networks** [8061-02]
R. Muraleedharan, Syracuse Univ. (United States)
- 8061 05 **Worst-case optimization of relay position in cooperative broadcast wireless networks** [8061-03]
Y. Jin, Y. D. Zhang, Villanova Univ. (United States)
- 8061 06 **Adaptive beamforming and rate control in real-time wireless sensor networks for QoS optimization** [8061-04]
W. S. Hortos, Associates in Communications Engineering Research and Technology (United States)
- 8061 07 **Sensor deployment optimization based on optimal recovery interpolation** [8061-05]
S. D. Cabrera, V. Moram, J. G. Rosiles, The Univ. of Texas at El Paso (United States)

SESSION 2 MODULATION AND CHANNEL ESTIMATION

- 8061 08 **Performance evaluation of CCI on the reverse CDMA channel** [8061-06]
M. S. Alam, S. Alsharif, A. H. M. Z. Hossain, Univ. of South Alabama (United States)
- 8061 09 **Equalisation for continuous phase modulation using basis functions** [8061-07]
C. Brown, P. J. Vigneron, Communications Research Ctr. Canada (Canada)
- 8061 0A **Iterative detection of continuous phase modulation on multipath channels** [8061-08]
J. W. Nieto, Harris Corp. (United States)
- 8061 0B **Application and analysis of rake receiver to hybrid CPM modulation** [8061-09]
J. A. Norris, J. W. Nieto, Harris Corp. (United States)

SESSION 3 DETECTION AND LOCALIZATION I

- 8061 0C **Location-dependent RF geotags for positioning and security** [8061-10]
D. Qiu, Sigtem Technology, Inc. (United States); R. Lynch, Naval Undersea Warfare Ctr. (United States); C. Yang, Sigtem Technology, Inc. (United States)
- 8061 0D **Single-node MMSE for MMSE cooperative positioning** [8061-11]
S. Xi, M. D. Zoltowski, Purdue Univ. (United States); Y. Zhao, L. Dong, Western Michigan Univ. (United States)

- 8061 OE **A novel density-based geolocation algorithm for a non-cooperative radio emitter using power difference of arrival** [8061-12]
S. Guo, B. Jackson, S. Wang, R. Inkol, Defence Research and Development Canada (Canada); W. Arnold, Univ. of Waterloo (Canada)
- 8061 OF **Low-complexity narrowband adaptive beamforming based on symmetrically distributed arrays** [8061-13]
L. Zhang, W. Liu, R. J. Langley, The Univ. of Sheffield (United Kingdom)
- 8061 OG **A spatial filtering approach to electronic wideband beam steering** [8061-14]
W. Liu, The Univ. of Sheffield (United States); D. R. Morgan, Alcatel-Lucent Bell Labs. (United States)

SESSION 4 DETECTION AND LOCALIZATION II

- 8061 OI **Accurate position service based on interacting multiple model (IMM) with unscented Kalman filter** [8061-16]
J. Li, Y. Cao, N. Wu, Nanjing Univ. (China); X. Li, The City Univ. of New York (United States)

SESSION 5 IMPLEMENTATION AND APPLICATION

- 8061 OJ **Navigation of robotic system using cricket notes** [8061-17]
Y. J. Patil, N. A. Baine, K. S. Rattan, Wright State Univ. (United States)
- 8061 OK **An improved chip antenna circuit model for wideband matching** [8061-18]
A. Hollister, Physical Optics Corp. (United States); J. T. Armstrong, Probe Science, Inc. (United States)
- 8061 OL **Robust visible light communication links using filter-based sensor array** [8061-19]
C.-C. Chang, Y.-J. Su, National Taipei Univ. of Technology (Taiwan); U. Kurokawa, B. I. Choi, NanoLambda (United States)
- 8061 OM **INS aided by an acoustic wireless sensor network and magnetometer** [8061-20]
N. A. Baine, P. Desai, K. S. Rattan, Wright State Univ. (United States)
- 8061 ON **Performance of concatenated convolutional codes: coherent vs. non-coherent** [8061-21]
F. C. Kellerman, J. W. Nieto, Harris Corp. (United States)

SESSION 6 DIVERSITY AND MULTICARRIER TECHNIQUES

- 8061 OO **Sensing using eigenchannels in radio-frequency multiple-input, multiple-output communication systems** [8061-22]
N. Bikhazi, W. F. Young, H. Nguyen, Sandia National Labs. (United States)
- 8061 OP **Computation-efficient blind estimation of OFDM signal parameters for interception and data recovery** [8061-23]
Q. Chen, X. Wang, D. Fan, The Univ. of Western Ontario (Canada); S. Guo, Defence Research and Development Canada (Canada)

Author Index

Conference Committee

Symposium Chair

William Jeffrey, HRL Laboratories, LLC (United States)

Symposium Cochair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Conference Chairs

Sohail A. Dianat, Rochester Institute of Technology (United States)

Michael David Zoltowski, Purdue University (United States)

Program Committee

Moeness G. Amin, Villanova University (United States)

John W. Nieto, Harris Corporation (United States)

Raghuvveer M. Rao, Rochester Institute of Technology (United States)

Yimin D. Zhang, Villanova University (United States)

Session Chairs

- 1 Sensor Networks
 John W. Nieto, Harris Corporation (United States)
- 2 Modulation and Channel Estimation
 Yimin D. Zhang, Villanova University (United States)
- 3 Detection and Localization I
 Sohail A. Dianat, Rochester Institute of Technology (United States)
- 4 Detection and Localization II
 Sohail A. Dianat, Rochester Institute of Technology (United States)
- 5 Implementation and Application
 Fred C. Kellerman, Harris Corporation (United States)
- 6 Diversity and Multicarrier Techniques
 Michael David Zoltowski, Purdue University (United States)
