Proceedings of SPIE, 0277-786X, v. 8062

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Committee
ix	Introduction

SESSION 1 NET-CENTRIC ARCHITECTURES AND INFORMATION MANAGEMENT SERVICES

8062 02	VFILM: a value function driven approach to information lifecycle management [8062-01] J. Cleveland, J. P. Loyall, J. Webb, BBN Technologies (United States); J. Hanna, Air Force Research Lab. (United States); S. Clark, Univ. of Massachusetts Amherst (United States)
8062 03	Evaluating QoS-enabled information management services in a Navy operational context [8062-02] A. M. Paulos, BBN Technologies (United States); A. Sinclair, Air Force Research Lab. (United States); J. P. Loyall, BBN Technologies (United States)
8062 06	SMASHUP: secure mashup for defense transformation and net-centric systems [8062-05] M. D. Heileman, Modus Operandi, Inc. (United States); G. L. Heileman, The Univ. of New Mexico (United States); M. P. Shaver, Air Force Research Lab. (United States); M. Gilger, Modus Operandi, Inc. (United States); P. A. Jamkhedkar, The Univ. of New Mexico (United States)

SESSION 2 ISR SYSTEMS AND FUSION

8062 0B	Improving network utilization over heterogeneous airborne networks [8062-10] P. H. Griffin, B. L. Rickenbach, J. A. Rush, General Dynamics Advanced Information Systems (United States)
8062 0C	Vision and critical challenges in exploiting distributed data for distributed decision making [8062-11] G. Pearson, Defence Science and Technology Lab. (United Kingdom); J. Lemon, Ministry of Defence (United Kingdom)
8062 0D	A multi-agent infrastructure for hard and soft information fusion [8062-12] J. C. Rimland, D. L. Hall, The Pennsylvania State Univ. (United States)
8062 0E	3DSF: three-dimensional spatiotemporal fusion [8062-13] M. S. Baran, R. L. Tutwiler, D. L. Hall, D. J. Natale, The Pennsylvania State Univ. (United States)
8062 0F	A synthetic dataset for evaluating soft and hard fusion algorithms [8062-14] J. L. Graham, D. L. Hall, J. Rimland, The Pennsylvania State Univ. (United States)
8062 0G	JDL level 0 and 1 algorithms for processing and fusion of hard sensor data [8062-15] J. C. Rimland, G. M. Iyer, R. R. Agumamidi, S. V. Pisupati, J. Graham, The Pennsylvania State Univ. (United States)

**SESSION 3 SELF-ORGANIZING, COLLABORATIVE, AND UNMANNED ISR ROBOTS: JOINT SESSION WITH
CONFERENCE 8045**

8062 OH **Biologically-inspired approaches for self-organization, adaptation, and collaboration of heterogeneous autonomous systems** [8062-16]
M. Steinberg, Office of Naval Research (United States)

8062 OI **Migration strategies for service-enabling ground control stations for unmanned systems** [8062-17]
J. B. Kroclic, Winifred Associates (United States)

**SESSION 4 SENSOR NETWORKS AND WIDE-AREA PERSISTENT SURVEILLANCE: JOINT SESSION WITH
CONFERENCE 8047**

8062 OJ **Trident Spectre 2010: agile integration and demonstration of a multi-sensor airborne pod** [8062-18]
G. Twaites, B. Rickenbach, J. Bevington, G. Garceau, P. Griffin, J. Rush, General Dynamics Advanced Information Systems (United States)

8062 OK **Discovering geospatial networks from ambiguous track data** [8062-19]
J. E. Bevington, General Dynamics Advanced Information Systems (United States);
M. R. Evans, S. Shekhar, Univ. of Minnesota, Twin Cities (United States)

8062 OL **Network exploitation using WAMI tracks** [8062-20]
R. Rimey, J. Record, D. Keefe, Lockheed Martin Corp. (United States); L. Kennedy,
C. Cramer, Signal Innovations Group, Inc. (United States)

SESSION 5 COMMUNICATIONS AND NETWORKS

8062 OM **The effects of synthetically augmented training data on parameter tuning for anomaly detection algorithms** [8062-21]
L. Lightfoot, E. Laubie, J. Natarian, Air Force Research Lab. (United States)

8062 ON **Strategy for tactical cellular connectivity** [8062-22]
F. R. Carlson, U.S. Army Signal Ctr. of Excellence (United States)

8062 OP **Fast detection of network intrusion** [8062-24]
X. Chen, E. Walker, Southern Univ. and A&M College (United States)

8062 OQ **Analyzing the requirements for a robust security criteria and management of multi-level security in the clouds** [8062-25]
B. S. Farroha, D. L. Farroha, U.S. Dept. of Defense (United States)

8062 OR **A novel approach to implementing digital policy management as an enabler for a dynamic secure information sharing in a cloud environment** [8062-26]
B. S. Farroha, K. R. Essman, D. L. Farroha, A. Cohen, U.S. Dept. of Defense (United States)

8062 OS **Agile enterprise development framework utilizing services principles for building pervasive security** [8062-27]
D. Farroha, B. Farroha, U.S. Dept. of Defense (United States)

8062 OT **A single-ended IP roaming solution for dynamic network reconstruction** [8062-28]
J. S. White, A. W. Pilbeam, J. R. McCoy, Everis Inc. (United States)

Guy Vézina, Defence Research and Development Canada (Canada)

Session Chairs

- 1 Net-Centric Architectures and Information Management Services
James R. Milligan, Air Force Research Laboratory (United States)
- 2 ISR Systems and Fusion
Raja Suresh, General Dynamics Advanced Information Systems (United States)

- 3 Self-Organizing, Collaborative, and Unmanned ISR Robots: Joint Session with Conference 8045
Raja Suresh, General Dynamics Advanced Information Systems (United States)
Grant R. Gerhart, U.S. Army Tank Automotive Research, Development and Engineering Center (United States)
- 4 Sensor Networks and Wide-Area Persistent Surveillance: Joint Session with Conference 8047
Raja Suresh, General Dynamics Advanced Information Systems (United States)
Tien Pham, U.S. Army Research Laboratory (United States)
- 5 Communications and Networks
James R. Milligan, Air Force Research Laboratory (United States)

Introduction

These are the proceedings of the sixteenth Defense Transformation and Net-Centric Systems conference. The papers presented at the conference strongly reflected the inexorable trend towards net-centric systems and multi-INT layered sensing architectures. The conference included the following special sessions:

Self-Organizing, Collaborative, and Unmanned ISR Robots, held jointly with the Unmanned Systems Technology conference. Collaborative autonomous systems portend the increasing use of autonomic sensor and shooter platforms to perform the D3 (Dirty, Dull, and Dangerous) missions in an era of declining force structures.

Sensor Networks and Wide-Area Persistent Surveillance, held jointly with the Ground/Air Multisensor Interoperability, Integration, and Networking for Persistent ISR conference.

The conference also included invited papers by Dr. Jagadeesh Pamulapati (White House Office of S&T Policy) on national policies for stimulating technological innovation and Dr. Muralidhar Rangaswamy (Technical Advisor, AFRL) on a vision for fully adaptive Radar.

Looking ahead, we expect net-centric systems to be increasingly deployed in the field as C4ISR systems undergo their own "revolution." We expect to focus in the future on the networking of sensors and shooters from space to the mud to provide ubiquitously persistent surveillance, as well as distributed collaborative teams of robotic platforms.

It is gratifying to see the high level of audience interest in this conference. Particularly gratifying is the fact that this conference has resulted in the "spin-off" of several new conferences at SPIE. My sincere thanks to the distinguished invited speakers, authors, attendees, and my associates on the program committee for another successful conference.

Raja Suresh
