Volume 8063

Proceedings of SPIE, 0277-786X, v. 8063

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Committee
ix	Introduction

SESSION 1 INFORMATION/IMAGE SECURITY I

- 8063 02 **Video scrambling for privacy protection in video surveillance: recent results and validation framework (Invited Paper)** [8063-01]
F. Dufaux, Lab. de Traitement et Communication de l'Information, CNRS, Télécom ParisTech (France)
- 8063 03 **Ensuring security of H.264 videos by using watermarking (Invited Paper)** [8063-02]
M. Chaumont, Univ. of Nîmes (France) and Lab. LIRMM, CNRS, Univ. of Montpellier II (France)
- 8063 04 **Novel technology for enhanced security and trust in communication networks** [8063-03]
A. Milovanov, L. Bukshpun, R. Pradhan, T. Jansson, Physical Optics Corp. (United States)
- 8063 05 **System for non-disruptive high-capacity indexed data embedding and recovery using multimedia signal covers** [8063-04]
J. C. Collins, S. S. Agaian, The Univ. of Texas at San Antonio (United States)
- 8063 06 **Establishing trust in decentralized smart sensor networks** [8063-05]
H. Vagts, Karlsruhe Institute of Technology (Germany) and Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany); T. Cosar, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany); J. Beyerer, Karlsruhe Institute of Technology (Germany) and Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

SESSION 2 MULTIMEDIA SIGNAL PROCESSING ALGORITHMS AND SYSTEMS

- 8063 07 **The effects of uncommon time constraints to stopping criteria for managing human-machine interactive decision-making (Invited Paper)** [8063-47]
H. Sasaki, Ritsumeikan Univ. (Japan)
- 8063 08 **An adaptive LMS technique for wavelet polynomial threshold denoising** [8063-06]
S. Sathyanarayana, D. Akopian, S. S. Agaian, The Univ. of Texas at San Antonio (United States)
- 8063 09 **Accuracy, security, and processing time comparisons of biometric fingerprint recognition system using digital and optical enhancements** [8063-07]
S. Alsharif, A. El-Saba, R. Jagapathi, Univ. of South Alabama (United States)
- 8063 0B **Remote object authentication against counterfeiting using elliptic curves** [8063-09]
J. Lancrenon, R. Gillard, Univ. Joseph Fourier (France); T. Fournel, Lab. H. Curien, CNRS, Univ. Jean Monnet Saint-Etienne (France)

SESSION 3 MOBILE APPLICATIONS

- 8063 0C **Smart compression using high-dimensional imagery (Invited Paper)** [8063-10]
D. Rosario, U.S. Army Research Lab. (United States)
- 8063 0D **Multi-template image matching using alpha-rooted biquaternion phase correlation with application to logo recognition** [8063-11]
S. DelMarco, BAE Systems (United States)
- 8063 0E **Parallel design patterns for a low-power, software-defined compressed video encoder** [8063-12]
M. W. Bruns, M. A. Hunt, Coherent Logix, Inc. (United States); D. Prasad, N. R. Gunupudi, S. Sonachalam, Parallel Prisms (United States)
- 8063 0F **A fast, efficiency-preserving system for simultaneous compression & encryption** [8063-13]
R. E. L. Metzler, S. S. Agaian, The Univ. of Texas at San Antonio (United States)

SESSION 4 BIOMETRICS I

- 8063 0G **Privacy preserving, real-time and location secured biometrics for mCommerce authentication** [8063-14]
T. Kuseler, H. Al-Assam, S. A. Jassim, I. A. Lami, Univ. of Buckingham (United Kingdom)
- 8063 0H **Block error correction codes for face recognition** [8063-15]
W. R. Hussein, H. Sellahewa, S. A. Jassim, Univ. of Buckingham (United Kingdom)
- 8063 0I **An approach for fast human head pose estimation** [8063-16]
Y. Yari, J. Scharcanski, Univ. Federal do Rio Grande do Sul (Brazil)
- 8063 0J **A new approach for skin recognition in near-infrared images** [8063-17]
Z. Zhou, Y. Du, Indiana Univ.-Purdue Univ. Indianapolis (United States); E. J. Delp, Purdue Univ. (United States)
- 8063 0K **A new approach for willingness test in biometric systems** [8063-18]
K. Yang, Y. Du, Z. Zhou, Indiana Univ.-Purdue Univ. Indianapolis (United States)
- 8063 0L **Unsupervised tattoo segmentation combining bottom-up and top-down cues** [8063-19]
J. D. Allen, Oak Ridge National Lab. (United States) and Florida State Univ. (United States); N. Zhao, J. Yuan, X. Liu, Florida State Univ. (United States)

SESSION 5 IMAGE/INFORMATION SECURITY II

- 8063 0M **iPhone forensics: a practical overview with certain commercial software (Invited Paper)** [8063-20]
T. Höne, R. Creutzburg, Fachhochschule Brandenburg (Germany)
- 8063 0O **Rapid prototyping of an automated video surveillance system: a hardware-software co-design approach** [8063-22]
H. T. Ngo, R. N. Rakvic, R. P. Broussard, R. W. Ives, U.S. Naval Academy (United States)

- 8063 OP **System approach to steganalysis** [8063-23]
J. D. Allen, Oak Ridge National Lab. (United States) and The Florida State Univ. (United States); S. Ty, X. Liu, The Florida State Univ. (United States)
- 8063 OQ **Examination of mobile phones in a university forensic lab environment** [8063-24]
S. Luttenberger, K. Kröger, R. Creutzburg, Fachhochschule Brandenburg (Germany)
- 8063 OS **On the novel space-time duality language of the latency information theory revolution, part I: the time-dislocation of the information-space uncertainty outputs of sources** [8063-26]
E. H. Fera, College of Staten Island, CUNY (United States)

SESSION 6 BIOMETRICS II

- 8063 OT **Palmpoint identification using FRIT** [8063-27]
D. R. Kisku, Asansol Engineering College (India); A. Rattani, Univ. degli Studi di Cagliari (Italy); P. Gupta, Indian Institute of Technology Kanpur (India); C. J. Hwang, Texas State Univ. San Marcos (United States); J. K. Sing, Jadavpur Univ. (India)
- 8063 OU **Secure wavelet-based isometric projection for face recognition** [8063-28]
H. Al-Assam, H. Sellahewa, S. Jassim, Univ. of Buckingham (United Kingdom)
- 8063 OV **Multi-factor challenge/response approach for remote biometric authentication** [8063-29]
H. Al-Assam, S. A. Jassim, Univ. of Buckingham (United Kingdom)
- 8063 OW **Palmpoint verification using Lagrangian decomposition and invariant interest points** [8063-30]
P. Gupta, Indian Institute of Technology Kanpur (India); A. Rattani, Univ. degli Studi di Cagliari (Italy); D. R. Kisku, Asansol Engineering College (India); C. J. Hwang, Texas State Univ. San Marcos (United States); J. K. Sing, Jadavpur Univ. (India)

POSTER SESSION

- 8063 OY **Multiple user access and testing for PreNotIS: a fast mobile event reporting solution** [8063-32]
M. Chan, A. Kumar, D. Akopian, S. S. Agaian, The Univ. of Texas at San Antonio (United States)
- 8063 OZ **Application of wavelet polynomial threshold for interpolation and denoising in bioimaging** [8063-33]
M. Chan, S. Sathyanarayana, D. Akopian, S. S. Agaian, The Univ. of Texas at San Antonio (United States)
- 8063 10 **An image similarity measure using enhanced human visual system characteristics** [8063-34]
S. Nercessian, Tufts Univ. (United States); S. S. Agaian, The Univ. of Texas at San Antonio (United States); K. A. Panetta, Tufts Univ. (United States)
- 8063 11 **eComLab: remote laboratory platform** [8063-35]
M. Pontual, A. Melkonyan, A. Gampe, G. Huang, D. Akopian, The Univ. of Texas at San Antonio (United States)

- 8063 13 **Complex ensemble empirical mode decomposition and alpha-rooting for image contrast enhancement** [8063-37]
S. Bakhtiari, S. S. Agaian, M. Jamshidi, The Univ. of Texas at San Antonio (United States)
- 8063 16 **Comparative study of color image enhancement techniques** [8063-40]
J. Xia, K. Panetta, Tufts Univ. (United States); S. S. Agaian, The Univ. of Texas at San Antonio (United States)
- 8063 17 **Using fuzzy data mining to diagnose patients' degrees of melancholia** [8063-41]
Y.-P. Huang, W.-L. Kuo, National Taipei Univ. of Technology (Taiwan)
- 8063 18 **Detection of modified matrix encoding using machine learning and compressed sensing** [8063-42]
S. Ty, Florida State Univ. (United States); J. D. Allen, Florida State Univ. (United States) and Oak Ridge National Lab. (United States); X. Liu, Florida State Univ. (United States)
- 8063 19 **On the novel space-time duality language of the latency information theory revolution, part II: the space-dislocation of the latency-time certainty inputs of movers** [8063-43]
E. H. Fera, College of Staten Island, CUNY (United States)
- 8063 1A **On the novel space-time duality language of the latency information theory revolution, part III: the time-dislocation of the information-space uncertainty outputs of retainers** [8063-44]
E. H. Fera, College of Staten Island, CUNY (United States)
- 8063 1B **On the novel space-time duality language of the latency information theory revolution, part IV: the space-dislocation of the latency-time certainty inputs of processors** [8063-45]
E. H. Fera, College of Staten Island, CUNY (United States)
- 8063 1D **Possibilities of forensic investigation of CD, DVD and Blu-ray disc** [8063-48]
F. Irmier, R. Creutzburg, Fachhochschule Brandenburg (Germany)

Conference Committee

Symposium Chair

William Jeffrey, HRL Laboratories, LLC (United States)

Symposium Cochair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Conference Chairs

Sos S. Agaian, The University of Texas at San Antonio (United States)

Sabah A. Jassim, University of Buckingham (United Kingdom)

Yingzi Du, Indiana University-Purdue University Indianapolis (United States)

Program Committee

Farid Ahmed, The Johns Hopkins University (United States)

David Akopian, The University of Texas at San Antonio (United States)

Salim Alsharif, University of South Alabama (United States)

Cesar Bandera, BanDeMar Networks (United States)

Chang Wen Chen, University at Buffalo (United States)

Reiner Creutzburg, Fachhochschule Brandenburg (Germany)

Stephen P. DelMarco, BAE Systems (United States)

Martin Dietze, Consultant (Germany)

Frederic Dufaux, Ecole Polytechnique Fédérale de Lausanne
(Switzerland)

Touradj Ebrahimi, Ecole Polytechnique Fédérale de Lausanne
(Switzerland)

Erlan H. FERIA, College of Staten Island, The City University of New York
(United States)

Sonia Garcia-Salicetti, Telecom ParisTech (France)

Phalguni Gupta, Indian Institute of Technology Kanpur (India)

Yo-Ping Huang, National Taipei University of Technology (Taiwan)

Jacques Koreman, Norwegian University of Science and Technology
(Norway)

Maryline Maknavicius, TELECOM & Management SudParis (France)

Alessandro Neri, Università degli Studi di Roma Tre (Italy)

Salil Prabhakar, DigitalPersona, Inc. (United States)

Cheryl L. Resch, The Johns Hopkins University (United States)

Harin Sellaheewa, University of Buckingham (United Kingdom)

Xiyu Shi, University of Surrey (United Kingdom)

Yuri Shukuryan, National Academy of Sciences of Armenia (Armenia)

Session Chairs

- 1 Information/Image Security I
Sabah A. Jassim, University of Buckingham (United Kingdom)
Reiner Creutzburg, Fachhochschule Brandenburg (Germany)
- 2 Multimedia Signal Processing Algorithms and Systems
Sos S. Agaian, The University of Texas at San Antonio (United States)
Salim Alsharif, University of South Alabama (United States)
- 3 Mobile Applications
Sos S. Agaian, The University of Texas at San Antonio (United States)
Dalton S. Rosario, U.S. Army Research Laboratory (United States)
- 4 Biometrics I
Yingzi Du, Indiana University-Purdue University Indianapolis (United States)
Jacob Scharcanski, Universidade Federal do Rio Grande do Sul (Brazil)
- 5 Image/Information Security II
Sos S. Agaian, The University of Texas at San Antonio (United States)
Erlan H. Feria, College of Staten Island, The City University of New York (United States)
- 6 Biometrics II
Sabah A. Jassim, University of Buckingham (United Kingdom)
Stephen P. DelMarco, BAE Systems (United States)

Introduction

Research activities in the area of Defense and Security over the first decade of the 21st century has been, and continues to be, mainly influenced by three factors: mass deployment of a variety of sensors and sensor networks for surveillance and remote sensing; exponentially growing use of audiovisual and multispectral high-dimensional images/signals in communication over open networks and pervasive computing environments; the rise of international terrorism and the rapid growth in cybercrime and identity theft. While technological advances provide new and exciting opportunities for a wide range of applications, they also present the research community with numerous challenges that are exacerbated by growing security concerns. The most significant challenges in this respect include: efficient and secure processing of image/video processing suitable for implementation on constrained mobile devices, developing innovative security mechanism for complex multi-media signals that preserve privacy to fully exploit the capabilities of; and developing proactive security solutions to protect computing infrastructures and sensitive information systems while preserving the privacy of the citizens.

Many of the research papers and posters reported in this proceeding and presented in this conference attempt to make important contributions towards meeting some of the challenges listed above, as well as advancing the basic research in the field of mobile multimedia. Several papers propose novel secure and efficient algorithms for image/video compression, encryption, and steganographic tasks. In this respect, efficient simultaneous compression and encryption of multimedia objects was proposed. Steganographic systems and techniques presented included an innovative content-based retrieval of features in audio signals using non-disruptive indexed data embedding. The conference attracted high quality invited papers. These papers reported on recent advances in surveillance video scrambling for privacy protection; smart compression using high dimensional imagery for improved sensing in surveillance-aided operations; using watermarking to secure H.264 videos; and an innovative multi-template image matching using alpha-rooted biquaternion phase correlation with application to logo recognition.

The security and performance of single and multimodal biometrics are covered by a number of papers with focus on improved performance. Various aspects of face, palm print and fingerprint identification schemes are tackled with emphasis on the effect of image quality on template representation and performance, as well as the use of multifactor authentication schemes that incorporate challenge and response and/or location information.

Feature enhancement, detection and extractions in images/videos are dealt with in a number of papers and complemented by the poster session which

included numerous posters addressing enhancement tasks with emphasis on using wavelet polynomial threshold filters. Several conference presentations and posters addressed forensic techniques for various devices including iPhones, mobile phones, and Blu-ray discs.

The various presentations attracted interesting and high quality questions and interactions among the researchers attending the conference. This has demonstrated the importance of all the tackled issues and their strong relevance to the current challenges in mobile multimedia processing and security of wireless technologies. An interesting feature of this conference was the active participation of researchers from all over the world including Europe, South-East Asia, Japan, and the US. This feature helps fostering genuine international research collaboration.
