Volume 8099

Proceedings of SPIE, 0277-786X, v. 8099

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Committee
ix	Introduction

NEW HORIZONS IN IMAGING

8099 03	Long-range mechanical force in colony branching and tumor invasion (Invited Paper) [8099-35] C.-L. Guo, M. Ouyang, J.-Y. Yu, A. Price, J. Maslov, California Institute of Technology (United States)
---------	--

BIOSENSING AND TELE-HEALTH

8099 0E	Mobilis in mobili: wireless health solutions for a morphing medical challenge (Invited Paper) [8099-43] E. Saldivar, West Wireless Health Institute (United States)
8099 0F	Optofluidic biosensors: miniaturized multi-color flow cytometer and fluorescence-activated cell sorter (microFACS) (Invited Paper) [8099-44] S. H. Cho, C.-H. Chen, Y.-H. Lo, Univ. of California, San Diego (United States)

BIOSENSORS FOR DIAGNOSTIC AND THERANOSTICS

8099 0H	Carbon nanotube-mediated siRNA delivery for gene silencing in cancer cells (Invited Paper) [8099-01] T. Hong, H. Guo, Y. Xu, Vanderbilt Univ. (United States)
8099 0J	Novel, rapid DNA-based on-chip bacterial identification system combining dielectrophoresis and amplification-free fluorescent resonance energy transfer assisted in-situ hybridization (FRET-ISH) [8099-03] M. M. Packard, Michigan State Univ. (United States) and Lawrence Livermore National Lab. (United States); M. Shusteff, Lawrence Livermore National Lab. (United States); E. C. Alocilja, Michigan State Univ. (United States)
8099 0K	Localized drugs delivery hydroxyapatite microspheres for osteoporosis therapy [8099-04] J. H. Lee, I. H. Ko, Korea Institute of Ceramic Engineering and Technology (Korea, Republic of); S.-H. Jeon, J. H. Chae, E. J. Lee, Hans Biomed Corp. (Korea, Republic of); J. H. Chang, Korea Institute of Ceramic Engineering and Technology (Korea, Republic of)
8099 0L	Highly efficient antibody immobilization with multimeric protein Gs coupled magnetic silica nanoparticles [8099-05] J. H. Lee, H. K. Choi, J. H. Chang, Korea Institute of Ceramic Engineering and Technology (Korea, Republic of)

BIOMOLECULE DETECTION AND SENSING

- 8099 OM **Recyclable optical microcavities for label-free sensing (Invited Paper)** [8099-06]
H. K. Hunt, The Univ. of Southern California (United States) and Univ. of Missouri, Columbia (United States); A. M. Armani, The Univ. of Southern California (United States)
- 8099 ON **Surface enhanced Raman scattering (SERS)-based next generation commercially available substrate: physical characterization and biological application** [8099-07]
M. E. Hankus, D. N. Stratis-Cullum, P. M. Pellegrino, U.S. Army Research Lab. (United States)
- 8099 OO **Bioconjugation strategies for improved optical sensor performance** [8099-08]
C. E. Soteropoulos, H. K. Hunt, The Univ. of Southern California (United States) and Univ. of Missouri, Columbia (United States); A. M. Armani, The Univ. of Southern California (United States)
- 8099 OP **Plasmonic biosensing with nanoimprint binary grating using ellipsometry** [8099-09]
R. S. Moirangthem, M. T. Yaseen, Academia Sinica (Taiwan) and National Tsing Hua Univ. (Taiwan); Y.-C. Chang, P.-K. Wei, Academia Sinica (Taiwan)

BIOSENSING I

- 8099 OQ **CdSe/ZnS quantum dots with interface states as biosensors (Invited Paper)** [8099-10]
T. V. Torchynska, Instituto Politécnico Nacional (Mexico)
- 8099 OR **Vernier-cascade silicon photonic label-free biosensor with very large sensitivity and low-cost interrogation** [8099-11]
T. Claes, W. Bogaerts, P. Bienstman, Ghent Univ. (Belgium)
- 8099 OT **Nanoplasmon coupled intracellular optical resonance excitation for ultrasensitive 3D fluorescence cell imaging (Invited Paper)** [8099-13]
M. R. Gartia, A. Hsiao, M. Sivaguru, Y. Chen, G. L. Liu, Univ. of Illinois at Urbana-Champaign (United States)
- 8099 OU **Kinetic analysis of biomolecular interactions by surface plasmon enhanced ellipsometry** [8099-15]
H. M. Cho, W. Chegal, Y. J. Cho, J. M. Won, H. M. Lee, Korea Research Institute of Standards and Science (Korea, Republic of); J. H. Jo, Hannam Univ. (Korea, Republic of)

BIOSENSING II

- 8099 OV **Nanobarcoding: a novel method of single nanoparticle detection in cells and tissues for nanomedical biodistribution studies (Invited Paper)** [8099-16]
T. Eustaquio, J. F. Leary, Purdue Univ. (United States)
- 8099 OW **Surface enhanced Raman spectroscopy and fluorescence based on black silver (Invited Paper)** [8099-17]
Z. Xu, J. Jiang, Y. Chen, M. R. Gartia, G. L. Liu, Univ. of Illinois at Urbana-Champaign (United States)

- 8099 0Y **Noble metal nanoparticles for LSPR-based optical sensing** [8099-19]
T. Schneider, O. Stranik, A. Csáki, W. Fritzsche, Institut für Photonische Technologien e.V.
(Germany)

POSTER SESSION

- 8099 14 **Gold @ silica core-shell nanoparticle for enhanced surface plasmon resonance detection of DNA hybridization in combination with gold nanowire gratings** [8099-24]
S. Moon, Y. Oh, D. Kim, H. Lee, H. C. Kim, K. Lee, Yonsei Univ. (Korea, Republic of)
- 8099 15 **Silver doped nanomaterials and their possible use for antibacterial photodynamic activity** [8099-27]
K. Wysocka-Król, Wrocław Univ. of Technology (Poland); A. Wieliczko, Wrocław Univ. of Environmental and Life Sciences (Poland); H. Podbielska, Wrocław Univ. of Technology (Poland)
- 8099 17 **Nanotechnology in cancer treatment** [8099-31]
M. Mironidou-Tzouveleki, K. Imprialos, A. Kintsakis, Aristotle Univ. of Thessaloniki (Greece)
- 8099 18 **Optical immunosensor for endocrine disruptor nanolayer detection by surface plasmon resonance imaging** [8099-32]
A. Karabchevsky, L. Tsapovsky, R. S. Marks, I. Abdulhalim, Ben-Gurion Univ. of the Negev (Israel)

Author Index

Conference Committee

Symposium Chairs

David L. Andrews, University of East Anglia Norwich (United Kingdom)
James G. Grote, Air Force Research Laboratory (United States)

Conference Chairs

Hooman Mohseni, Northwestern University (United States)
Massoud H. Agahi, Harbor-UCLA Medical Center (United States) and
Cedars-Sinai Medical Center (United States)
Manijeh Razeghi, Northwestern University (United States)

Program Committee

Gert Cauwenberghs, University of California, San Diego (United States)
Philippe M. Fauchet, University of Rochester (United States)
David H. Gracias, The Johns Hopkins University (United States)
Kimberly S. Hamad-Schifferli, Massachusetts Institute of Technology
(United States)
James Sean Humbert, University of Maryland, College Park (United
States)
Giacomo Indiveri, ETH Zürich (Switzerland)
Eric Lagally, The University of British Columbia (Canada)
Yu-Hwa Lo, University of California, San Diego (United States)
Ryan P. McClintock, Northwestern University (United States)
Omer G. Memis, Northwestern University (United States)
Masoud Panjehpour, Thompson Cancer Survival Center (United States)
Adam T. Woolley, Brigham Young University (United States)
John M. Zavada, National Science Foundation (United States)

Session Chairs

New Horizons in Imaging
Massoud H. Agahi, Harbor-UCLA Medical Center (United States)
Hooman Mohseni, Northwestern University (United States)

Targeted Delivery of Diagnostic and Therapeutic Agents
Massoud H. Agahi, Harbor-UCLA Medical Center (United States)
Hooman Mohseni, Northwestern University (United States)

Biosensing and Tele-health
Massoud H. Agahi, Harbor-UCLA Medical Center (United States)
Hooman Mohseni, Northwestern University (United States)

Biosensors for Diagnostic and Theranostics

Mikella E. Hankus, U.S. Army Research Laboratory (United States)

Andrea M. Armani, The University of Southern California (United States)

Biomolecule Detection and Sensing

Hatice Altug, Boston University (United States)

Biosensing I

Trisha V. Eustaquio, Purdue University (United States)

Patrick Chin, TNO (Netherlands)

Biosensing II

Omer Golkap Memis, Northwestern University (United States)

Introduction

Since its debut in 2008, the "Biosensing" conference track quite naturally provided a forum for not only the latest research in this rapidly developing field of nanoscience, but also an opportunity for the biomedical- and engineer-researchers to interface directly. The potential was recognized by the conference organizers that by serving as a bridge between these dynamic scientific communities, it can be a catalyst for fruitful collaborations.

It was toward optimizing this potential for promoting innovative solutions to important healthcare problems that the 2011 conference marks the implementation of some related measures. A number of invited lectures were included in the program that were selected for the clinical relevance of the technology and their significant potential impact in the healthcare community. Indeed, the first day's program was tightly packed with lectures and speakers that would appeal to a mixed audience of engineers, physicians, and other interested scientists and clinicians. Our aim is to address a wide range of topics and issues of interest to the biomedical applications of nanotechnology, such as imaging, drug delivery, diagnostics, toxicity, ethics, economics, and regulatory matters.

To further emphasize this aspect of the mission of the conference to promote a forum for collaboration among the scientific, technical, clinical, and industrial communities, the official title was changed to "Biosensing & Nanomedicine", a physician co-chair was added, and the conference was evaluated and approved as a provider of Continuing Medical Education (CME) credits. To qualify for the latter, the first day's program was planned and implemented in accordance with the Institute for Medical Quality and the California Medical Association's CME Accreditation Standards (IMQ/CMA). Thus we are proud to be able to offer up to 9 hours of AMA PRA Category 1 Credits to our qualifying attendees.

Despite these measures to enhance the clinical relevance of "Biosensing", it remains dedicated to its core mission of bringing the highest level of quality research and development in nanoscience and engineering to the world stage. The "Diagnostic and Theronostics", "Biomolecule Detection," and the general "Biosensing" sessions were again held with a number of dynamic topics and discussions which will surely continue to be areas of intense research in the coming years.

We are excited about the potential contributions of these investigators to their respective fields and will continue to bring their important work to the attention of our conference attendees and readership of the Proceedings.
