Volume 8124

Proceedings of SPIE, 0277-786X, v. 8124

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Committee
ix	Introduction

SESSION 1 ILLUMINATION OPTICS

- 8124 02 **Illumination devices for uniform delivery of light to the oral cavity for photodynamic therapy** [8124-01]
C. Canavesi, Institute of Optics, Univ. of Rochester (United States); W. J. Cassarly, Synopsys, Inc. (United States); T. H. Foster, Univ. of Rochester Medical Ctr. (United States) and Institute of Optics, Univ. of Rochester (United States); J. P. Rolland, Institute of Optics, Univ. of Rochester (United States)
- 8124 03 **Construction of freeforms in illumination systems via generalized Cartesian oval representation** [8124-02]
D. Michaelis, P. Schreiber, C. Li, A. Bräuer, Fraunhofer Institute for Applied Optics and Precision Engineering (Germany)
- 8124 04 **Design, manufacturing, and measurements of a metal-less V-groove RXI collimator** [8124-03]
D. Grabovičkić, Univ. Politécnica de Madrid (Spain); J. C. Miñano, P. Benítez, Univ. Politécnica de Madrid (Spain) and Light Prescriptions Innovators, LLC (United States); C. Cocho, M. Buljan, Univ. Politécnica de Madrid (Spain)
- 8124 05 **Uniform light distribution by using microlenses with various focal lengths** [8124-04]
I.-C. Hsu, G.-D. J. Su, National Taiwan Univ. (Taiwan)

SESSION 2 NOVEL APPLICATIONS AND FUNDAMENTAL LIMITS I

- 8124 06 **Improved hybrid SMS-DSF method of nonimaging optical design (Invited Paper)** [8124-05]
J. Bortz, N. Shatz, SAIC (United States)
- 8124 07 **Fundamental bounds for harvesting sunlight with aperture antennae** [8124-06]
H. Mashaal, J. M. Gordon, Ben-Gurion Univ. of the Negev (Israel)

SESSION 3 NOVEL APPLICATIONS AND FUNDAMENTAL LIMITS II

- 8124 09 **Thermodynamically efficient solar concentrators** [8124-08]
R. Winston, Univ. of California, Merced (United States)
- 8124 0A **New vistas in solar concentration with gradient-index optics (Invited Paper)** [8124-09]
P. Kotsidas, V. Modi, Columbia Univ. (United States); J. M. Gordon, Ben-Gurion Univ. of the Negev (Israel)

- 8124 0B **Solar thermal system for lunar ISRU applications: development and field operation at Mauna Kea, HI** [8124-10]
T. Nakamura, B. K. Smith, Physical Sciences Inc. (United States)
- 8124 0C **Spiral nonimaging optical designs** [8124-11]
P. Zamora, Univ. Politécnica de Madrid (Spain); P. Benítez, J. C. Miñano, Univ. Politécnica de Madrid (Spain) and Light Prescriptions Innovators, LLC (United States); J. Vilaplana, Light Prescriptions Innovators, LLC (United States)

SESSION 4 MATERIALS AND OPTICAL SURFACES FOR SOLAR APPLICATIONS

- 8124 0D **Angular dependence of surface-relief gratings for solar and lighting applications** [8124-12]
T. M. de Jong, Eindhoven Univ. of Technology (Netherlands); D. K. G. de Boer, Philips Research Europe (Netherlands); C. W. M. Bastiaansen, Eindhoven Univ. of Technology (Netherlands) and Queen Mary Univ. of London (United Kingdom)
- 8124 0E **Evaluation and comparison of different designs and materials for Fresnel lens-based solar concentrators** [8124-13]
L. Fu, Shanghai Advanced Research Institute (China) and Concentrator Optics GmbH (Germany); R. Leutz, H. P. Annen, Concentrator Optics GmbH (Germany)
- 8124 0F **Limiting acceptance angle to maximize efficiency in solar cells** [8124-14]
E. D. Kosten, H. A. Atwater, California Institute of Technology (United States)
- 8124 0G **Investigation of scattering profiles for passive solar light collectors** [8124-15]
A. N. Bharathwaj, B. Srinivasan, Indian Institute of Technology Madras (India)

SESSION 5 NONIMAGING OPTICS IN CONCENTRATOR PHOTOVOLTAICS I

- 8124 0H **Free-form Fresnel RXI-RR Köhler design for high-concentration photovoltaics with spectrum-splitting (Invited Paper)** [8124-16]
M. Buljan, Univ. Politécnica de Madrid (Spain); P. Benítez, Univ. Politécnica de Madrid (Spain) and Light Prescriptions Innovators, LLC (United States); R. Mohedano, Light Prescriptions Innovators Europe, S. L. (Spain); J. C. Miñano, Univ. Politécnica de Madrid (Spain) and Light Prescriptions Innovators, LLC (United States); Y. Sun, W. Falicoff, Light Prescriptions Innovators, LLC (United States); J. Vilaplana, J. Chaves, Light Prescriptions Innovators Europe, S. L. (Spain); G. Biot, J. López, Univ. Politécnica de Madrid (Spain)
- 8124 0I **Static high-irradiance solar concentration by gradient-index optics** [8124-17]
P. Kotsidas, V. Modi, Columbia Univ. (United States); J. M. Gordon, Ben-Gurion Univ. of the Negev (Israel)
- 8124 0J **High-efficiency Köhler photovoltaic concentrators with external light confinement** [8124-18]
P. Zamora, Univ. Politécnica de Madrid (Spain); P. Benítez, J. C. Miñano, Univ. Politécnica de Madrid (Spain) and Light Prescriptions Innovators, LLC (United States); Y. Li, Zhejiang Univ. (China); M. Buljan, Univ. Politécnica de Madrid (Spain)

SESSION 6 NONIMAGING OPTICS IN CONCENTRATOR PHOTOVOLTAICS II

- 8124 0L **Nested aplanatic optics** [8124-20]
A. Goldstein, D. Feuermann, Ben-Gurion Univ. of the Negev (Israel); G. D. Conley, H2Go, Inc. (United States); J. M. Gordon, Ben-Gurion Univ. of the Negev (Israel)
- 8124 0M **Integrating tracking in concentrating photovoltaics using non-rotational symmetric laterally moving optics** [8124-21]
F. Duerr, Vrije Univ. Brussel (Belgium); P. Benítez, J. C. Miñano, Univ. Politécnica de Madrid (Spain) and Light Prescriptions Innovators, LLC (United States); Y. Meuret, H. Thienpont, Vrije Univ. Brussel (Belgium)
- 8124 0N **Optical characterization of nonimaging focusing heliostat** [8124-22]
K.-K. Chong, Univ. Tunku Abdul Rahman (Malaysia)
- 8124 0O **Optical design and efficiency improvement for organic luminescent solar concentrators** [8124-23]
C. Wang, L. S. Hirst, R. Winston, Univ. of California, Merced (United States)

POSTER SESSION

- 8124 0P **Optical characterization of solar furnace system using fixed geometry nonimaging focusing heliostat and secondary parabolic concentrator** [8124-24]
K.-K. Chong, C.-Y. Lim, W.-L. Keh, J.-H. Fan, F. A. Rahman, Univ. Tunku Abdul Rahman (Malaysia)
- 8124 0Q **A hemispherical static concentrator with double aspheric compensated lens array for continued collecting sunlight** [8124-25]
W.-A. Chen, Y.-Y. Chen, A. J.-W. Whang, C.-T. Ma, National Taiwan Univ. of Science and Technology (Taiwan)
- 8124 0R **Effect of scattering of cover glass for silicon and dye-sensitized solar cells** [8124-26]
H.-C. Chen, W.-J. Lu, Y.-M. Lo, S.-S. You, National Yunlin Univ. of Science and Technology (Taiwan)

Author Index

Conference Committee

Program Track Chair

Ian T. Ferguson, The University of North Carolina at Charlotte (United States)

Conference Chairs

Roland Winston, University of California, Merced (United States)
Jeffrey M. Gordon, Ben-Gurion University of the Negev (Israel)

Program Committee

Pablo Benítez, Universidad Politécnica de Madrid (Spain) and Light Prescriptions Innovators LLC (United States)
William J. Cassarly, Optical Research Associates (United States)
Daniel Feuermann, Ben-Gurion University of the Negev (Israel)
Ralf Leutz, Concentrator Optics GmbH (Germany)
Juan Carlos Miñano, Universidad Politécnica de Madrid (Spain) and Light Prescriptions Innovators LLC (United States)
Narkis E. Shatz, SAIC (United States)

Session Chairs

- 1 Illumination Optics
Narkis E. Shatz, SAIC (United States)
- 2 Novel Applications and Fundamental Limits I
William J. Cassarly, Synopsys, Inc. (United States)
- 3 Novel Applications and Fundamental Limits II
Ralf Leutz, Concentrator Optics GmbH (Germany)
- 4 Materials and Optical Surfaces for Solar Applications
Jeffrey M. Gordon, Ben-Gurion University of the Negev (Israel)
- 5 Nonimaging Optics in Concentrator Photovoltaics I
Daniel Feuermann, Ben-Gurion University of the Negev (Israel)
- 6 Nonimaging Optics in Concentrator Photovoltaics II
Pablo Benítez, Universidad Politécnica de Madrid (Spain) and Light Prescriptions Innovators, LLC (United States)

Introduction

Welcome to the 2011 Nonimaging Optics Conference Proceedings. The first conference convened in 1991, so this represents the 20th anniversary.

From the beginning, the subject was differentiated from classical optics. In the first book on nonimaging optics in 1978, the great Walter T. Welford of Imperial College, London inserted the Stefan-Boltzmann law of radiation by a black body on page 1. When an optics book starts with a thermodynamic relation, you know something interesting is happening. From the beginning, concepts like maximum étendue, concentration, and thermodynamic efficiency are common themes. And that is why the fusion of the science of light (optics) with the science of heat (thermodynamics), is where much of the excitement is today.

On behalf of Jeffrey Gordon and Roland Winston, please enjoy the exciting new contributions to this vibrant field of nonimaging optics from this two-day conference.

Roland Winston
Jeffrey M. Gordon
