Event: SPIE Optical Engineering + Applications, 2011, San Diego, California, United States

PROCEEDINGS OF SPIE

Optomechanics 2011: Innovations and Solutions

Alson E. Hatheway
Editor

22–25 August 2011
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 8125

Proceedings of SPIE, 0277-786X, v. 8125

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Optomechanics 2011: Innovations and Solutions*, edited by Alson E. Hatheway, Proceedings of SPIE Vol. 8125 (SPIE, Bellingham, WA, 2011) Article CID Number.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

- vii *Conference Committee*
- ix *The history of telescopes and binoculars: an engineering perspective (Plenary Paper)*
[8129-100]
J. E. Greivenkamp, D. L. Steed, College of Optical Sciences, The Univ. of Arizona (United States)

SESSION 1 SUBSYSTEM ENGINEERING

- 8125 02 **Optomechanical design for cost-effective DEMVAL systems** [8125-01]
A. M. Ison, R. M. Sanchez, M. A. Kumpunen, S. G. Dilworth, J. W. Martin, P. M. Chaplya,
J. W. Franklin, Sandia National Labs. (United States)
- 8125 03 **A tip/tilt mirror with large dynamic range for the ESO VLT Four Laser Guide Star Facility**
[8125-02]
N. Rijnveld, R. Henselmans, B. Nijland, TNO Science and Industry (Netherlands)
- 8125 04 **Design and development of the fibre cable and fore optics of the HERMES Spectrograph for the Anglo-Australian Telescope (AAT)** [8125-03]
J. Brzeski, S. Case, L. Gers, Australian Astronomical Observatory (Australia)
- 8125 05 **Design and development of a fast-steering secondary mirror for the Giant Magellan Telescope** [8125-04]
M. Cho, National Optical Astronomy Observatory (United States); A. Corredor, C. Dribusch, The Univ. of Arizona (United States); K. Park, Y.-S. Kim, Korea Astronomy and Space Science Institute (Korea, Republic of); I.-K. Moon, Korea Research Institute of Standards and Science (Korea, Republic of)

SESSION 2 PROFESSIONAL DEVELOPMENT

- 8125 06 **Training of optomechanical engineers at the University of Rochester** [8125-05]
V. Genberg, J. D. Ellis, Univ. of Rochester (United States)

SESSION 3 SYSTEMS

- 8125 07 **Optomechanical design of ultrahigh-resolution monochromator and analyzer for inelastic x-ray scattering spectrometer at the advanced photon source** [8125-06]
D. Shu, S. Stoupin, R. Khachatryan, K. Goetze, T. Roberts, Yu. Shvyd'ko, Argonne National Lab. (United States)
- 8125 09 **High-precision optical systems with inexpensive hardware: a unified alignment and structural design approach** [8125-08]
E. G. Winrow, V. H. Chavez, Sandia National Labs. (United States)

- 8125 0A **RF-mechanical performance for the Haystack radio telescope** [8125-09]
K. B. Doyle, MIT Lincoln Lab. (United States); M. Brenner, Engineering Metrology Services (United States); J. Antebi, F. W. Kan, D. P. Valentine, A. T. Sarawit, Simpson Gumpertz & Heger Inc. (United States)
- 8125 0B **Optomechanical tolerancing with Monte Carlo techniques** [8125-10]
V. Genberg, G. Michels, G. Bisson, Sigmadyne, Inc. (United States)

SESSION 4 ANALYSIS I

- 8125 0C **Deformation analysis of tilted primary mirror for an off-axis beam compressor** [8125-12]
J. H. Clark III, U.S. Naval Research Lab. (United States); F. E. Penado, Northern Arizona Univ. (United States); J. Dugdale, Lowell Observatory (United States)
- 8125 0D **Vibration analysis using digital image processing for in vitro imaging systems** [8125-13]
Z. Wang, S. Wang, C. Gonzalez, Abbott Point of Care Inc. (United States)
- 8125 0E **Strength of glass from Hertzian line contact** [8125-14]
W. Cai, B. Cuerden, R. E. Parks, J. H. Burge, College of Optical Sciences, The Univ. of Arizona (United States)

SESSION 5 ANALYSIS II

- 8125 0F **Analysis of lens mount interfaces** [8125-15]
K. A. Chase, J. H. Burge, College of Optical Sciences, The Univ. of Arizona (United States)
- 8125 0G **Analytic results for high-precision and cryogenic lens holders** [8125-16]
A. Boesz, Kayser-Threde GmbH (Germany); F. Grupp, Max-Planck-Institut für extraterrestrische Physik (Germany) and Univ.-Sternwarte München (Germany); A. Mottaghionab, T. Zeh, Kayser-Threde GmbH (Germany); N. Geis, Max-Planck-Institut für extraterrestrische Physik (Germany); R. Bender, Max-Planck-Institut für extraterrestrische Physik (Germany) and Univ.-Sternwarte München (Germany)
- 8125 0H **A parametric finite-element model for evaluating segmented mirrors with discrete edgewise connectivity** [8125-17]
J. A. Gersh-Range, Cornell Univ. (United States); W. R. Arnold, Jacobs ESTS Group (United States); M. A. Peck, Cornell Univ. (United States); H. P. Stahl, NASA Marshall Space Flight Ctr. (United States)
- 8125 0I **Tool for bonded optical element thermal stability analysis** [8125-18]
G. L. Klotz, Klotz Optical/Mechanical Engineering and Technologies (United States)

SESSION 6 MEASURING, TESTING, AND VERIFICATION

- 8125 0J **Application of modal testing to characterize ground based telescope elastic motion and its effect on image quality** [8125-19]
J. Lukens, Quartus Engineering Inc. (United States); G. Gates, N. Kaiser, J. Morgan, Pan-STARRS, Institute for Astronomy (United States); B. Steele, Quartus Engineering Inc. (United States)

- 8125 OK **Thermal stress failure criteria for a structural epoxy** [8125-20]
P. Côté, N. Desnoyers, INO (Canada)
- 8125 OL **Acquisition, simulation, and test replication of weapon firing shock applied to optical sights** [8125-21]
K. D. Ball, D. Gardner, Qioptiq Ltd. (United Kingdom)
- 8125 OM **Novel optical refraction index sensor** [8125-22]
H. S. de los Reyes-Cruz, E. S. Arroyo-Rivera, A. Castillo-Guzman, M. S. Lopez-Cueva, R. Selvas, Univ. Autónoma de Nuevo León (Mexico)
- 8125 ON **Adhesive bond cryogenic lens cell margin of safety test** [8125-23]
D. M. Stubbs, C. L. Hom, H. C. Holmes, J. C. Cannon-Morret, O. F. Lindstrom, J. W. Irwin, L. A. Ryder, T. T. Hix, J. A. Bonvallet, H.-K. S. Hu, I. V. Chapman, C. Lomax, E. T. Kvamme, G. S. Feller, Lockheed Martin Space Systems Co. (United States); M. M. Haynes, Composite Technology Development, Inc. (United States)

SESSION 7 MOUNTS AND MECHANISMS

- 8125 OO **A few observations about mounting moderately sized mirrors** [8125-24]
M. Kaufman, National Security Technologies, LLC (United States)
- 8125 OP **Lens mount with ring-flexures for athermalization** [8125-25]
H. Kihm, H.-S. Yang, Y.-W. Lee, Korea Research Institute of Standards and Science (Korea, Republic of); J.-U. Lee, Cheongju Univ. (Korea, Republic of)
- 8125 OQ **Mounting small optics for cryogenic space missions** [8125-26]
P. V. Mammini, H. C. Holmes, M. S. Jacoby, E. T. Kvamme, Lockheed Martin Space Systems Co. (United States)
- 8125 OR **Design considerations of a slit diaphragm flexure used in a precision mirror gimbal** [8125-27]
B. Cox, M. Kaufman, National Security Technologies, LLC (United States)

SESSION 8 OPTICAL ELEMENTS

- 8125 OT **Large stable aluminum optics for aerospace applications** [8125-29]
D. Vukobratovich, Raytheon Missile Systems (United States); J. P. Schaefer, Raytheon Network Centric Systems (United States)
- 8125 OU **Game-changing approaches to affordable advanced lightweight mirrors: extreme Zerodur lightweighting and relief from the classical polishing parameter constraint** [8125-30]
T. Hull, A. Clarkson, G. Gardopee, L-3 Integrated Optical Systems (United States); R. Jedamzik, A. Leys, SCHOTT AG (Germany); J. Pepi, F. Piché, L-3 Integrated Optical Systems (United States); M. Schäfer, V. Seibert, A. Thomas, T. Werner, T. Westerhoff, SCHOTT AG (Germany)
- 8125 OV **Controlling lines of sight and lines of propagation in stable systems** [8125-31]
A. E. Hatheway, Alson E. Hatheway Inc. (United States)

POSTER SESSION

- 8125 0W **Automated semi-spherical irradiance meter** [8125-32]
M. Tecpoyotl-Torres, J. G. Vera-Dimas, J. Escobedo-Alatorre, R. Cabello-Ruiz, Univ. Autónoma del Estado de Morelos (Mexico); J. Varona, Univ. Panamericana, Campus Bonaterra (Mexico)
- 8125 0X **Alignment protocol for effective use of hard x-ray quad collimator for micro-crystallography** [8125-33]
S. Xu, V. Nagarajan, R. Sanishvili, R. F. Fischetti, Argonne National Lab. (United States)
- 8125 0Y **Stably joined optical tables** [8125-34]
R. J. Medina Lopez, S. C. Corzo-Garcia, S. Anderson, R. Carriles, A. Ruiz-Marquez, E. Castro-Camus, Ctr. de Investigaciones en Óptica, A.C. (Mexico)
- 8125 0Z **Compact dynamic microfluidic iris array** [8125-35]
C. Kimmle, C. Doering, A. Steuer, H. Fouckhardt, Technische Univ. Kaiserslautern (Germany)
- 8125 10 **Thermo-opto-mechanical analysis of a cubesat lens mount** [8125-36]
J. A. Champagne, Space Dynamics Lab. (United States) and College of Optical Sciences, The Univ. of Arizona (United States); J. H. Burge, College of Optical Sciences, The Univ. of Arizona (United States); B. G. Crowther, Space Dynamics Lab. (United States)
- 8125 11 **Design and verification of a robust secondary mirror adjustable supporting mechanism for airborne optical remote sensing instruments** [8125-37]
P.-H. Huang, Y.-C. Cheng, S.-T. Chang, Instrument Technology Research Ctr. (Taiwan)
- 8125 12 **Role of mirror dynamics in determining the accuracy of framing rate in an ultra high speed rotating mirror camera** [8125-38]
M. Conneely, H. O. Rolfsnes, D. McGloin, C. Main, P. A. Campbell, Univ. of Dundee (United Kingdom)

Author Index

Conference Committee

Program Track Chair

H. Philip Stahl, NASA Marshall Space Flight Center (United States)

Conference Chair

Alson E. Hatheway, Alson E. Hatheway Inc. (United States)

Program Committee

Anees Ahmad, Raytheon Missile Systems (United States)
Joseph Antebi, Simpson Gumpertz & Heger Inc. (United States)
Patrick A. Bournes, MicroMeasure, Inc. (United States)
James H. Burge, College of Optical Sciences, The University of Arizona (United States)
John M. Casstevens, Dallas Optical Systems, Inc. (United States)
Robert Gifford Chave, RCAP Inc. (United States)
Patrick A. Coronato, Raytheon Missile Systems (United States)
John G. Daly, Vector Engineering (United States)
Keith B. Doyle, MIT Lincoln Laboratory (United States)
Robert C. Guyer, BAE Systems (United States)
Mark J. Hegge, Ball Aerospace & Technologies Corporation (United States)
Tony B. Hull, L-3 Integrated Optical Systems (United States)
William Jeffrey Lees, The Johns Hopkins University (United States)
John J. Polizotti, BAE Systems (United States)
Santiago Royo, Universitat Politècnica de Catalunya (Spain)
Ann F. Shipley, University of Colorado at Boulder (United States)
Deming Shu, Argonne National Laboratory (United States)
David M. Stubbs, Lockheed Martin Space Systems Company (United States)
Linda Usher, Executive Search Group (United States)
Daniel Vukobratovich, Raytheon Missile Systems (United States)
Paul R. Yoder, Jr., Consultant (United States)
Carl H. Zweben, Consultant (United States)

Session Chairs

- 1 Subsystem Engineering
Alson E. Hatheway, Alson E. Hatheway Inc. (United States)
- 2 Professional Development
Alson E. Hatheway, Alson E. Hatheway Inc. (United States)

- 3 Systems
Alson E. Hatheway, Alson E. Hatheway Inc. (United States)
- 4 Analysis I
David M. Stubbs, Lockheed Martin Space Systems Company (United States)
- 5 Analysis II
David M. Stubbs, Lockheed Martin Space Systems Company (United States)
- 6 Measuring, Testing, and Verification
Mark J. Hegge, Ball Aerospace & Technologies Corporation (United States)
- 7 Mounts and Mechanisms
Alson E. Hatheway, Alson E. Hatheway Inc. (United States)
- 8 Optical Elements
Anees Ahmad, Raytheon Missile Systems (United States)
