Event: SPIE Optical Engineering + Applications, 2011, San Diego, California, United States

PROCEEDINGS OF SPIE

Optics for EUV, X-Ray, and Gamma-Ray Astronomy V

**Stephen L. O'Dell
Giovanni Pareschi**
Editors

**23–25 August 2011
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 8147

Proceedings of SPIE, 0277-786X, v. 8147

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Optics for EUV, X-Ray, and Gamma-Ray Astronomy V*, edited by Stephen L. O'Dell, Giovanni Pareschi, Proceedings of SPIE Vol. 8147 (SPIE, Bellingham, WA, 2011) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

xiii Conference Committee

xvii Introduction

xxi *The little photometer that could: technical challenges and science results from the Kepler Mission (Plenary Paper) [8146-100]*
J. M. Jenkins, NASA Ames Research Ctr. (United States); J. Dunnuck, Ball Aerospace & Technologies Corp. (United States)

xxxiii *Large Binocular Telescope Adaptive Optics System: new achievements and perspectives in adaptive optics (Plenary Paper) [8149-100]*
S. Esposito, A. Riccardi, E. Pinna, A. Puglisi, F. Quirós-Pacheco, C. Arcidiacono, M. Xompero, R. Briguglio, G. Agapito, L. Busoni, L. Fini, J. Argomedo, A. Gherardi, INAF - Osservatorio Astrofisico di Arcetri (Italy); G. Brusa, D. Miller, J. C. Guerra, Large Binocular Telescope Observatory, The Univ. of Arizona (United States); P. Stefanini, P. Salinari, INAF - Osservatorio Astrofisico di Arcetri (Italy)

SESSION 1 FOIL OPTICS

8147 02 **ASTRO-H Soft X-ray Telescope (SXT) [8147-01]**
Y. Soong, The Ctr. for Research and Exploration in Space Science (United States) and Universities Space Research Association (United States); P. J. Serlemitsos, T. Okajima, NASA Goddard Space Flight Ctr. (United States); D. Hahne, Bastion Technologies, Inc (United States)

8147 03 **The current status of reflector production and hard x-ray characterization for ASTRO-H/HXT [8147-61]**
T. Miyazawa, A. Furuzawa, Y. Kanou, K. Matsuda, M. Sakai, N. Yamane, H. Kato, Y. Miyata, K. Sakanobe, Y. Haba, K. Ishibashi, H. Matsumoto, Y. Tawara, H. Kunieda, Nagoya Univ. (Japan); N. Ishida, A. Suzuki, Tamagawa Engineering Co., Ltd. (Japan); H. Mori, K. Tamura, Y. Maeda, M. Ishida, ISAS, Japan Aerospace Exploration Agency (Japan); H. Awaki, Ehime Univ. (Japan); T. Okajima, NASA Goddard Space Flight Ctr. (United States); K. Uesugi, Y. Suzuki, Japan Synchrotron Radiation Research Institute (Japan)

8147 04 **Development of ultra-thin thermal shield for ASTRO-H x-ray telescopes [8147-02]**
Y. Tawara, S. Sugita, A. Furuzawa, K. Tachibana, Nagoya Univ. (Japan); H. Awaki, Ehime Univ. (Japan); M. Ishida, Y. Maeda, M. Ogawa, Japan Aerospace Exploration Agency (Japan)

SESSION 2 ELECTROFORMED OPTICS

8147 05 **The Focusing Optics X-ray Solar Imager (FOXSI) [8147-03]**
S. Krucker, Univ. of California, Berkeley (United States) and Univ. of Applied Sciences Northwestern Switzerland (Switzerland); S. Christe, NASA Goddard Space Flight Ctr. (United States); L. Glesener, S. Ishikawa, S. McBride, D. Glaser, P. Turin, Univ. of California, Berkeley

(United States); R. P. Lin, Univ. of California, Berkeley (United States) and Kyung Hee Univ. (Korea, Republic of); M. Gubarev, B. Ramsey, NASA Marshall Space Flight Ctr. (United States); S. Saito, Institute of Space and Astronautical Science (Japan) and The Univ. of Tokyo (Japan); Y. Tanaka, Institute of Space and Astronautical Science (United States); T. Takahashi, S. Watanabe, Institute of Space and Astronautical Science (Japan) and The Univ. of Tokyo (Japan); T. Tanaka, KIPAC, Stanford Univ. (United States); H. Tajima, S. Masuda, STEL, Nagoya Univ. (Japan)

- 8147 06 **The ART-XC Instrument on board the SRG Mission** [8147-04]
M. Pavlinsky, V. Akimov, V. Levin, I. Lapshov, A. Tkachenko, N. Semena, V. Arefiev, A. Glushenko, A. Yaskovich, R. Burenin, S. Sazonov, M. Revnivtsev, M. Buntov, S. Grebenev, A. Lutovinov, M. Kudelin, Space Research Institute (Russian Federation); S. Grigorovich, D. Litvin, V. Lazarchuk, I. Roiz, M. Garin, The All-Russian Scientific Research Institute for Experimental Physics (Russian Federation); M. Gubarev, B. Ramsey, K. Kilaru, S. L. O'Dell, R. Elsner, NASA Marshall Space Flight Ctr. (United States)
- 8147 07 **Performance of a mirror shell replicated from a new flight quality mandrel for eROSITA mission** [8147-05]
D. Vernani, G. Borghi, G. Calegari, M. Castelnovo, O. Citterio, I. Ferrario, G. Grisoni, S. Moretti, G. Valsecchi, Media Lario Technologies (Italy); H. Brauninger, V. Burwitz, J. Eder, P. Friedrich, P. Predehl, Max-Planck-Institut für extraterrestrische Physik (Germany)
- 8147 08 **Development and testing of the eROSITA mirror modules** [8147-06]
V. Burwitz, P. Friedrich, H. Bräuninger, B. Budau, W. Burkert, J. Eder, M. Freyberg, G. Hartner, E. Pfeiffermann, P. Predehl, Max-Planck-Institut für extraterrestrische Physik (Germany); L. Arcangeli, G. Borghi, A. Borroni, O. Citterio, I. Ferrario, G. Grisoni, F. Marioni, A. Ritucci, M. Rossi, G. Valsecchi, D. Vernani, Media Lario Technologies (Italy)
- 8147 09 **The optics system of the New Hard X-ray Mission: status report** [8147-07]
S. Basso, G. Pareschi, O. Citterio, D. Spiga, G. Tagliaferri, L. Raimondi, G. Sironi, V. Cotroneo, B. Salmaso, INAF - Osservatorio Astronomico di Brera (Italy); B. Negri, Agenzia Spaziale Italiana (Italy); P. Attinà, Thales Alenia Space (Italy); G. Borghi, A. Orlandi, D. Vernani, G. Valsecchi, R. Binda, F. Marioni, S. Moretti, M. Castelnovo, Media Lario Technologies (Italy); W. Burkert, M. J. Freyberg, V. Burwitz, Max-Planck-Institut für extraterrestrische Physik (Germany)
- 8147 0A **Angular resolution measurements at SPring-8 of a hard x-ray optic for the New Hard X-ray Mission** [8147-08]
D. Spiga, INAF - Osservatorio Astronomico di Brera (Italy); L. Raimondi, INAF - Osservatorio Astronomico di Brera (Italy) and Univ. degli Studi dell' Insubria (Italy); A. Furuzawa, Nagoya Univ. (Japan); S. Basso, INAF - Osservatorio Astronomico di Brera (Italy); R. Binda, G. Borghi, Media Lario Technologies (Italy); V. Cotroneo, Harvard-Smithsonian Ctr. for Astrophysics (United States); G. Grisoni, Media Lario Technologies (Italy); H. Kunieda, Nagoya Univ. (Japan); F. Marioni, Media Lario Technologies (Italy); H. Matsumoto, H. Mori, T. Miyazawa, Nagoya Univ. (Japan); B. Negri, Agenzia Spaziale Italiana (Italy); A. Orlandi, Media Lario Technologies (Italy); G. Pareschi, B. Salmaso, G. Tagliaferri, INAF - Osservatorio Astronomico di Brera (Italy); K. Uesugi, Japan Synchrotron Radiation Research Institute (Japan); G. Valsecchi, D. Vernani, Media Lario Technologies (Italy)

- 8147 0B **From x-ray telescopes to neutron focusing** [8147-09]
M. V. Gubarev, NASA Marshall Space Flight Ctr. (United States); B. Khaykovich, Massachusetts Institute of Technology (United States); B. Ramsey, NASA Marshall Space Flight Ctr. (United States); D. Moncton, Massachusetts Institute of Technology (United States); V. E. Zavlin, Universities Space Research Association (United States); K. Kilaru, NASA Postdoctoral Program (United States); S. Romaine, R. E. Rosati, R. Bruni, Harvard-Smithsonian Ctr. for Astrophysics (United States); L. Robertson, L. Crow, H. Ambaye, V. Lauter, Oak Ridge National Lab. (United States)

SESSION 3 SILICON PORE OPTICS

- 8147 0C **ESA-led ATHENA/IXO optics development status** [8147-10]
M. Bavdaz, N. Rando, E. Wille, K. Wallace, B. Shortt, European Space Agency, ESTEC (Netherlands); M. Collon, cosine Research B.V. (Netherlands); C. van Baren, SRON Nationaal Instituut voor Ruimteonderzoek (Netherlands); G. Pareschi, INAF - Osservatorio Astronomico di Brera (Italy); F. Christensen, DTU Space, Technical Univ. of Denmark (Denmark); M. Krumrey, Physikalisch-Technische Bundesanstalt (Germany); M. Freyberg, Max-Planck-Institut für extraterrestrische Physik (Germany)
- 8147 0D **Design, fabrication, and characterization of silicon pore optics for ATHENA/IXO** [8147-11]
M. J. Collon, R. Günther, M. Ackermann, R. Partapsing, cosine Research B.V. (Netherlands); G. Vacanti, cosine Science & Computing B.V. (Netherlands); M. W. Beijersbergen, cosine Research B.V. (Netherlands); M. Bavdaz, K. Wallace, E. Wille, M. Olde Riekerink, European Space Agency, ESTEC (Netherlands); J. Haneveld, A. Koelewijn, Micronit Microfluidics B.V. (Netherlands); C. van Baren, SRON Nationaal Instituut voor Ruimteonderzoek (Netherlands); P. Müller, M. Krumrey, Physikalisch-Technische Bundesanstalt (Germany); M. Freyberg, Max-Planck-Institut für extraterrestrische Physik (Germany); A. C. Jakobsen, F. Christensen, DTU Space, Technical Univ. of Denmark (Denmark)
- 8147 0E **Mass production of silicon pore optics for IXO and ATHENA** [8147-12]
E. Wille, K. Wallace, M. Bavdaz, European Space Agency, ESTEC (Netherlands)
- 8147 0F **Silicon pore optics for astrophysical missions** [8147-13]
G. Vacanti, cosine Science & Computing B.V. (Netherlands); M. Ackermann, cosine Research B.V. (Netherlands); C. van Baren, SRON Nationaal Instituut voor Ruimteonderzoek (Netherlands); M. W. Beijersbergen, M. J. Collon, cosine Research B.V. (Netherlands); M. Freyberg, Max-Planck Institut für extraterrestrische Physik (Germany); R. Günther, cosine Research B.V. (Netherlands); J. Haneveld, A. Koelewijn, Micronit Microfluidics B.V. (Netherlands); E. Maddox, cosine Research B.V. (Netherlands); M. Olde Riekerink, Micronit Microfluidics B.V. (Netherlands); R. Partapsing, cosine Research B.V. (Netherlands)

SESSION 4 SLUMPED GLASS OPTICS I

- 8147 0H **Fabrication of the NuSTAR flight optics** [8147-15]
W. W. Craig, Lawrence Livermore National Lab. (United States); H. An, K. L. Blaedel, Columbia Univ. (United States); F. E. Christensen, DTU Space, Technical Univ. of Denmark (Denmark); T. A. Decker, A. Fabricant, Columbia Univ. (United States); J. Gum, NASA Goddard Space Flight Ctr. (United States); C. J. Hailey, L. Hale, Columbia Univ. (United States); C. B. Jensen, DTU Space, Technical Univ. of Denmark (Denmark); J. E. Koglin, K. Mori, M. Nynka, Columbia Univ. (United States); M. J. Pivovarov, Lawrence Livermore National

Lab. (United States); M. V. Sharpe, NASA Goddard Space Flight Ctr. (United States); M. Stern, G. Tajiri, Columbia Univ. (United States); W. W. Zhang, NASA Goddard Space Flight Ctr. (United States)

8147 0I **NuSTAR ground calibration: The Rainwater Memorial Calibration Facility (RaMCaF)** [8147-16]
N. F. Brejnholt, F. E. Christensen, A. C. Jakobsen, DTU Space, Technical Univ. of Denmark (Denmark); C. J. Hailey, J. E. Koglin, K. L. Blaedel, M. Stern, D. Thornhill, C. Sleator, S. Zhang, Columbia Univ. (United States); W. W. Craig, Univ. of California, Berkeley (United States); K. K. Madsen, California Institute of Technology (United States); T. Decker, M. J. Pivovarov, J. K. Vogel, Lawrence Livermore National Lab. (United States)

8147 0J **First results from the ground calibration of the NuSTAR flight optics** [8147-17]
J. E. Koglin, H. An, Columbia Univ. (United States); N. Barrière, Univ. of California, Berkeley (United States); N. F. Brejnholt, F. E. Christensen, DTU Space, Technical Univ. of Denmark (Denmark); W. W. Craig, Univ. of California, Berkeley (United States); C. J. Hailey, Columbia Univ. (United States); A. C. Jakobsen, DTU Space, Technical Univ. of Denmark (Denmark); K. K. Madsen, California Institute of Technology (United States); K. Mori, M. Nynka, Columbia Univ. (United States); M. Fernandez-Perea, M. J. Pivovarov, Lawrence Livermore National Lab. (United States); A. Ptak, NASA Goddard Space Flight Ctr. (United States); C. Sleator, D. Thornhill, Columbia Univ. (United States); J. K. Vogel, Lawrence Livermore National Lab. (United States); D. R. Wik, W. W. Zhang, NASA Goddard Space Flight Ctr. (United States)

8147 0K **Lightweight and high angular resolution x-ray optics for astronomical missions** [8147-18]
W. W. Zhang, NASA Goddard Space Flight Ctr. (United States); M. P. Biskach, SGT, Inc. (United States); P. N. Blake, NASA Goddard Space Flight Ctr. (United States); K. W. Chan, Univ. of Maryland, Baltimore County (United States); T. C. Evans, M. L. Hong, SGT, Inc. (United States); W. D. Jones, NASA Marshall Space Flight Ctr. (United States); L. D. Kolos, NASA Goddard Space Flight Ctr. (United States); J. M. Mazarella, R. S. McClelland, SGT, Inc. (United States); S. L. O'Dell, NASA Marshall Space Flight Ctr. (United States); T. T. Saha, NASA Goddard Space Flight Ctr. (United States); M. V. Sharpe, SGT, Inc. (United States)

8147 0L **IXO glass mirrors development in Europe** [8147-19]
G. Pareschi, S. Basso, INAF - Osservatorio Astronomico di Brera (Italy); M. Bavdaz, European Space Agency, ESTEC (Netherlands); O. Citterio, INAF - Osservatorio Astronomico di Brera (Italy); M. M. Civitani, INAF - Osservatorio Astronomico di Brera (Italy) and Univ. degli Studi dell'Insubria (Italy); P. Conconi, INAF - Osservatorio Astronomico di Brera (Italy); D. Gallieni, A.D.S. International S.r.l. (Italy); M. Ghigo, INAF - Osservatorio Astronomico di Brera (Italy); F. Martelli, G. Parodi, BCV Progetti S.r.l. (Italy); L. Proserpio, INAF - Osservatorio Astronomico di Brera (Italy) and Univ. degli Studi dell'Insubria (Italy); G. Sironi, D. Spiga, G. Tagliaferri, INAF - Osservatorio Astronomico di Brera (Italy); M. Tintori, A.D.S. International S.r.l. (Italy); E. Wille, European Space Agency, ESTEC (Netherlands); A. Zambra, INAF - Osservatorio Astronomico di Brera (Italy)

- 8147 OM **Production of the IXO glass segmented mirrors by hot slumping with pressure assistance: tests and results** [8147-20]
L. Proserpio, INAF - Osservatorio Astronomico di Brera (Italy) and Univ. degli Studi dell'Insubria (Italy); M. Ghigo, S. Basso, P. Conconi, O. Citterio, INAF - Osservatorio Astronomico di Brera (Italy); M. Civitani, INAF - Osservatorio Astronomico di Brera (Italy) and Univ. degli Studi dell'Insubria (Italy); R. Negri, G. Pagano, Politecnico di Milano (Italy); G. Pareschi, B. Salmaso, D. Spiga, G. Tagliaferri, INAF - Osservatorio Astronomico di Brera (Italy); L. Terzi, Politecnico di Milano (Italy); A. Zambra, INAF - Osservatorio Astronomico di Brera (Italy); G. Parodi, F. Martelli, BCV Progetti S.r.l. (Italy); M. Bavdaz, E. Wille, European Space Agency, ESTEC (Netherlands)
- 8147 ON **Fabrication update on non-contact mirror slumping technology for the International X-ray Observatory mirrors** [8147-21]
A. M. Al Hussein, R. K. Heilmann, M. L. Schattenburg, Massachusetts Institute of Technology (United States)

SESSION 5 SLUMPED GLASS OPTICS II

- 8147 OO **Design and analysis of mirror modules for IXO and beyond** [8147-22]
R. S. McClelland, SGT, Inc. (United States); C. Powell, T. T. Saha, W. W. Zhang, NASA Goddard Space Flight Ctr. (United States)
- 8147 OP **Alignment and integration of lightweight mirror segments** [8147-23]
T. Evans, M. Biskach, J. Mazzarella, R. McClelland, SGT, Inc. (United States); T. Saha, W. Zhang, NASA Goddard Space Flight Ctr. (United States); K.-W. Chan, Univ. of Maryland, Baltimore County (United States)
- 8147 OQ **Design of the IXO optics based on thin glass plates connected by reinforcing ribs** [8147-24]
G. Parodi, F. Martelli, BCV Progetti S.r.l. (Italy); S. Basso, O. Citterio, INAF - Osservatorio Astronomico di Brera (Italy); M. Civitani, INAF - Osservatorio Astronomico di Brera (Italy) and Univ. degli Studi dell'Insubria (Italy); P. Conconi, M. Ghigo, G. Pareschi, A. Zambra, INAF - Osservatorio Astronomico di Brera (Italy)
- 8147 OR **An integration machine for the assembly of the x-ray optic units based on thin slumped glass foils for the IXO mission** [8147-25]
M. M. Civitani, INAF - Osservatorio Astronomico di Brera (Italy) and Univ. degli Studi dell'Insubria (Italy); S. Basso, INAF - Osservatorio Astronomico di Brera (Italy); M. Bavdaz, European Space Agency, ESTEC (Netherlands); O. Citterio, P. Conconi, INAF - Osservatorio Astronomico di Brera (Italy); D. Gallieni, A.D.S. International S.r.l. (Italy); M. Ghigo, INAF - Osservatorio Astronomico di Brera (Italy); F. Martelli, BCV Progetti S.r.l. (Italy); G. Pareschi, INAF - Osservatorio Astronomico di Brera (Italy); G. Parodi, BCV Progetti S.r.l. (Italy); L. Proserpio, INAF - Osservatorio Astronomico di Brera (Italy) and Univ. degli Studi dell'Insubria (Italy); G. Sironi, D. Spiga, G. Tagliaferri, INAF - Osservatorio Astronomico di Brera (Italy); M. Tintori, A.D.S. International S.r.l. (Italy); E. Wille, Univ. degli Studi dell'Insubria (Italy); A. Zambra, INAF - Osservatorio Astronomico di Brera (Italy)

SESSION 6 COATINGS

- 8147 OT **Preliminary coating design and coating developments for ATHENA** [8147-27]
A. C. Jakobsen, D. Della Monica Ferreira, F. E. Christensen, DTU Space, Technical Univ. of Denmark (Denmark); B. Shortt, European Space Agency, ESTEC (Netherlands); M. Collon, M. D. Ackermann, cosine Research B.V. (Netherlands)
- 8147 OU **Coatings for the NuSTAR mission** [8147-29]
F. E. Christensen, A. C. Jakobsen, N. F. Brejnholt, DTU Space, Technical Univ. of Denmark (Denmark); K. K. Madsen, California Institute of Technology (United States); A. Hornstrup, N. J. Westergaard, J. Momberg, DTU Space, Technical Univ. of Denmark (Denmark); J. Koglin, A. M. Fabricant, M. Stern, Columbia Univ. (United States); W. W. Craig, M. J. Pivovarov, Lawrence Livermore National Lab. (United States); D. Windt, Reflective X-Ray Optics LLC (United States)
- 8147 OV **New multilayer design for ASTRO-H/hard x-ray telescope and missions beyond** [8147-62]
Y. Miyata, Nagoya Univ. (Japan); K. Tamura, Japan Aerospace Exploration Agency (Japan); H. Kunieda, Nagoya Univ. (Japan)
- 8147 OW **Improved release coatings for electroformed x-ray optics** [8147-30]
S. Romaine, Harvard-Smithsonian Ctr. for Astrophysics (United States); J. Boike, Jacobs Technology (United States); R. Bruni, Harvard-Smithsonian Ctr. for Astrophysics (United States); D. Engelhaupt, The Univ. of Alabama in Huntsville (United States); P. Gorenstein, Harvard-Smithsonian Ctr. for Astrophysics (United States); B. Ramsey, National Space Sciences and Technology Ctr. (United States)
- 8147 OX **Differential deposition to correct surface figure deviations in astronomical grazing-incidence x-ray optics** [8147-31]
K. Kilaru, NASA Postdoctoral Program Associate (United States); B. D. Ramsey, M. V. Gubarev, J. A. Gaskin, S. L. O'dell, NASA Marshall Space Flight Ctr. (United States); W. Zhang, NASA Goddard Space Flight Ctr. (United States)

SESSION 7 DESIGN AND ANALYSIS

- 8147 OY **MT_RAYOR: a versatile raytracing tool for x-ray telescopes** [8147-64]
N. J. Westergaard, Technical Univ. of Denmark (Denmark)
- 8147 OZ **Point spread function of real Wolter-I X-ray mirrors: computation by means of the Huygens-Fresnel principle** [8147-33]
L. Raimondi, INAF - Osservatorio Astronomico di Brera (Italy) and Univ. degli Studi dell'Insubria (Italy); D. Spiga, INAF - Osservatorio Astronomico di Brera (Italy)
- 8147 10 **Accurate modeling of periodic and graded multilayer x-ray scattering from surface microroughness characterization** [8147-65]
B. Salmaso, D. Spiga, R. Canestrari, INAF - Osservatorio Astronomico di Brera (Italy); L. Raimondi, INAF - Osservatorio Astronomico di Brera (Italy) and Univ. degli Studi dell'Insubria (Italy)
- 8147 11 **Size optimization for mirror segments for x-ray optics** [8147-34]
M. P. Biskach, R. S. McClelland, SGT, Inc. (United States); T. Saha, W. W. Zhang, NASA Goddard Space Flight Ctr. (United States)

- 8147 12 **Mathematical formalism for designing wide-field x-ray telescopes: mirror nodal positions and detector tilts** [8147-63]
R. F. Elsner, S. L. O'Dell, B. D. Ramsey, M. C. Weisskopf, NASA Marshall Space Flight Ctr. (United States)

SESSION 8 OPTICAL FABRICATION

- 8147 13 **Forming mandrels for making lightweight x-ray mirrors** [8147-35]
P. N. Blake, T. Saha, W. W. Zhang, NASA Goddard Space Flight Ctr. (United States); S. O'Dell, T. Kester, W. Jones, NASA Marshall Space Flight Ctr. (United States)
- 8147 14 **Progress on precise grinding and polishing of thin glass monolithic shell (towards WFXT)** [8147-36]
O. Citterio, INAF - Osservatorio Astronomico di Brera (Italy); M. M. Civitani, INAF - Osservatorio Astronomico di Brera (Italy) and Univ. degli Studi dell'Insubria (Italy); J. Arnold, LT Ultra Precision Technology GmbH (Germany); S. Campana, INAF - Osservatorio Astronomico di Brera (Italy); H. Combrinck, Zeeko Ltd. (United Kingdom); P. Conconi, INAF - Osservatorio Astronomico di Brera (Italy); V. Cotroneo, INAF - Osservatorio Astronomico di Brera (Italy) and Harvard-Smithsonian Ctr. of Astrophysics (United States); R. Freeman, Zeeko Ltd. (United Kingdom); E. Mattaini, INAF - Osservatorio Astronomico di Brera (Italy) and INAF - IASF Milano (Italy); R. Morton, Zeeko Ltd. (United Kingdom); G. Motta, G. Pareschi, INAF - Osservatorio Astronomico di Brera (Italy); G. Parodi, BCV Progetti S.r.l. (Italy); L. Proserpio, INAF - Osservatorio Astronomico di Brera (Italy) and Univ. degli Studi dell'Insubria (Italy); S. Schuler, LT Ultra Precision Technology GmbH (Germany); P. Simpson, Zeeko Ltd. (United Kingdom); G. Tagliaferri, INAF - Osservatorio Astronomico di Brera (Italy); D. Walker, Zeeko Ltd. (United Kingdom)
- 8147 15 **Progress on the magnetic field-assisted finishing of MEMS micropore x-ray optics** [8147-37]
R. E. Riveros, M. A. Tan, H. Yamaguchi, Univ. of Florida (United States); I. Mitsuishi, Japan Aerospace Exploration Agency (Japan); K. Ishizu, T. Moriyama, T. Ogawa, Y. Ezoe, Tokyo Metropolitan Univ. (Japan); M. Horade, S. Sugiyama, Ritsumeikan-Global Innovation Research Organization, Ritsumeikan Univ. (Japan); Y. Kanamori, Tohoku Univ. (Japan); N. Yamasaki, K. Mitsuda, Japan Aerospace Exploration Agency (Japan)

SESSION 9 METROLOGY AND TESTING METHODS

- 8147 16 **Metrology of IXO mirror segments** [8147-38]
K.-W. Chan, Univ. of Maryland, Baltimore County (United States) and NASA Goddard Space Flight Ctr. (United States); M. Hong, SGT, Inc. (United States); T. Saha, W.-W. Zhang, NASA Goddard Space Flight Ctr. (United States)
- 8147 17 **Grazing incidence wavefront sensing and verification of x-ray optics performance** [8147-39]
T. T. Saha, S. Rohrbach, W. W. Zhang, NASA Goddard Space Flight Ctr. (United States); T. C. Evans, M. Hong, SGT, Inc (United States)

- 8147 18 **MPR: innovative 3D free-form optics profilometer** [8147-40]
G. Sironi, O. Citterio, INAF - Osservatorio Astronomico di Brera (Italy) and Media Lario Technologies (Italy); G. Pareschi, INAF - Osservatorio Astronomico di Brera (Italy); B. Negri, Agenzia Spaziale Italiana (Italy); A. Ritucci, R. Subranni, A. Orlandi, G. Borghi, Media Lario Technologies (Italy); M. Stroebe, J. Arnold, R. Widemann, LT Ultra Precision Technology GmbH (Germany)
- 8147 19 **Development of multi-beam long trace profiler** [8147-41]
K. Kilaru, NASA Marshall Space Flight Ctr. (United States); D. J. Merthe, Z. Ali, Lawrence Berkeley National Lab. (United States); M. V. Gubarev, T. Kester, C. M. Benson, NASA Marshall Space Flight Ctr. (United States); W. R. McKinney, Lawrence Berkeley National Lab. (United States); P. Z. Takacs, Brookhaven National Lab. (United States); V. V. Yashchuk, Lawrence Berkeley National Lab. (United States)
- 8147 1A **Development of a EUV test facility at the Marshall Space Flight Center** [8147-68]
E. West, S. Pavelitz, NASA Marshall Space Flight Ctr. (United States); K. Kobayashi, B. Robinson, The Univ. of Alabama in Huntsville (United States); J. Cirtain, J. Gaskin, A. Winebarger, L. Krause, NASA Marshall Space Flight Ctr. (United States); M. McGuirk, MIT Lincoln Lab. (United States); J. Darnel, I. M. Systems Group (United States)

SESSION 11 LAUE LENSES I

- 8147 1B **Laue lenses for hard x-/soft Y-rays: new prototype results** [8147-43]
E. Virgilli, F. Frontera, Univ. degli Studi di Ferrara (Italy); V. Valsan, V. Liccardo, Univ. degli Studi di Ferrara (Italy) and Univ. de Nice Sophia-Antipolis (France); V. Carassiti, F. Evangelisti, S. Squerzanti, Istituto Nazionale di Fisica Nucleare (Italy)
- 8147 1C **The LAUE project for broadband gamma-ray focusing lenses** [8147-44]
E. Virgilli, Univ. degli Studi di Ferrara (Italy); F. Frontera, Univ. degli Studi di Ferrara (Italy) and INAF - IASF Bologna (Italy); V. Valsan, V. Liccardo, Univ. degli Studi di Ferrara (Italy) and Univ. de Nice Sophia Antipolis (France); E. Caroli, J. B. Stephen, INAF - IASF Bologna (Italy); F. Cassese, L. Recanatesi, DTM Technologies (Italy); M. Pecora, S. Mottini, Thales Alenia Space (Italy); P. Attinà, Univ. degli Studi di Ferrara (Italy) and Thales Alenia Space (Italy); B. Negri, Agenzia Spaziale Italiana (Italy)
- 8147 1D **Developing a second generation Laue lens prototype: high-reflectivity crystals and accurate assembly** [8147-67]
N. M. Barrière, J. A. Tomsick, S. E. Boggs, A. Lowell, Univ. of California, Berkeley (United States); P. von Ballmoos, Institut de Recherche en Astrophysique et Planetologie (France)
- 8147 1E **Bent crystals by surface grooving method for high-efficiency concentration of hard x-ray photons by a Laue lens** [8147-50]
V. Guidi, Univ. degli Studi di Ferrara (Italy) and IDASC Sensor Lab., CNR (Italy); N. Barrière, Univ. of California, Berkeley (United States); V. Bellucci, R. Camattari, I. Neri, Univ. degli Studi di Ferrara (Italy) and IDASC Sensor Lab., CNR (Italy)

SESSION 11 LAUE LENSES II

- 8147 1F **High-resolution x-ray characterization of mosaic crystals for hard x-and gamma-ray astronomy** [8147-47]
C. Ferrari, E. Buffagni, L. Marchini, A. Zappettini, Istituto dei Materiali per l' Elettronica ed il Magnetismo, CNR (Italy)
- 8147 1G **Quasi-mosaic crystals for high-resolution focusing of hard x-rays through a Laue lens** [8147-48]
R. Camattari, V. Bellucci, V. Guidi, I. Neri, Univ. degli Studi di Ferrara (Italy) and IDASC Sensor Lab., CNR (Italy)
- 8147 1H **Preparation of bent crystals as high-efficiency optical elements for hard x-ray astronomy** [8147-49]
E. Buffagni, C. Ferrari, F. Rossi, L. Marchini, A. Zappettini, Istituto dei Materiali per l' Elettronica ed il Magnetismo, CNR (Italy)

SESSION 12 SPECTROGRAPHS

- 8147 1J **X-ray optics for WHIMex: the Warm Hot Intergalactic Medium Explorer** [8147-51]
W. Cash, Univ. of Colorado at Boulder (United States); R. McEntaffer, Univ. of Iowa (United States); W. Zhang, NASA Goddard Space Flight Ctr. (United States); S. Casement, C. Lillie, Northrop Grumman Aerospace Systems (United States); M. Schattenburg, M. Bautz, Massachusetts Institute of Technology (United States); A. Holland, Open Univ. (United Kingdom); H. Tsunemi, Osaka Univ. (Japan); S. O'Dell, NASA Marshall Space Flight Ctr. (United States)
- 8147 1K **Development of off-plane gratings for WHIMex and IXO** [8147-53]
R. L. McEntaffer, Univ. of Iowa (United States); W. Cash, Univ. of Colorado at Boulder (United States); C. Lillie, S. Casement, Northrop Grumman Aerospace Systems (United States); W. Zhang, NASA Goddard Space Flight Ctr. (United States); A. Holland, N. Murray, Open Univ. (United Kingdom); S. O'Dell, NASA Marshall Space Flight Ctr. (United States); M. Schattenburg, R. Heilmann, Massachusetts Institute of Technology (United States); H. Tsunemi, Osaka Univ. (Japan)
- 8147 1L **Fabrication update on critical-angle transmission gratings for soft x-ray grating spectrometers** [8147-54]
R. K. Heilmann, A. Bruccoleri, P. Mukherjee, J. Yam, M. L. Schattenburg, MIT Kavli Institute for Astrophysics and Space Research (United States)
- 8147 1M **The Marshall Grazing Incidence X-ray Spectrograph (MaGIXS)** [8147-66]
K. Kobayashi, The Univ. of Alabama in Huntsville (United States); J. Cirtain, NASA Marshall Space Flight Ctr. (United States); L. Golub, Harvard-Smithsonian Ctr. for Astrophysics (United States); A. Winebarger, NASA Marshall Space Flight Ctr. (United States); E. Hertz, P. Cheimets, D. Caldwell, K. Korreck, Harvard-Smithsonian Ctr. for Astrophysics (United States); B. Robinson, P. Reardon, The Univ. of Alabama in Huntsville (United States); T. Kester, C. Griffith, M. Young, NASA Marshall Space Flight Ctr. (United States)

SESSION 13 NOVEL OPTICS

- 8147 1N **The Extreme Physics Explorer and large area micro-channel plate optics** [8147-55]
M. Garcia, M. Elvis, J. Chappell, L. Brennen, D. Patnaude, I. Evans, R. Bruni, S. Romaine, E. Silver, Smithsonian Astrophysical Observatory (United States); R. Willingale, G. Fraser, Univ. of Leicester (United Kingdom); T. J. Turner, Univ. of Maryland, Baltimore County (United States); B. Ramsey, NASA Marshall Space Flight Ctr. (United States)
- 8147 1O **Large-angle observatory with energy resolution for synoptic x-ray studies (LOBSTER-SXS)** [8147-56]
P. Gorenstein, Harvard-Smithsonian Ctr. for Astrophysics (United States)
- 8147 1P **A new x-ray interferometer** [8147-57]
S. Kitamoto, H. Murakami, D. Takei, K. Sakata, Y. Yoshida, Rikkyo Univ. (Japan)
- 8147 1Q **Toward active x-ray telescopes** [8147-58]
S. L. O'Dell, NASA Marshall Space Flight Ctr. (United States); C. Atkins, Univ. College London (United Kingdom) and The Univ. of Alabama in Huntsville (United States); T. W. Button, The Univ. of Birmingham (United Kingdom); V. Cotroneo, W. N. Davis, Harvard-Smithsonian Ctr. for Astrophysics (United States); P. Doel, Univ. College London (United Kingdom); C. H. Feldman, Univ. of Leicester (United Kingdom); M. D. Freeman, Harvard-Smithsonian Ctr. for Astrophysics (United States); M. V. Gubarev, J. J. Kolodziejczak, NASA Marshall Space Flight Ctr. (United States); A. G. Michette, King's College London (United Kingdom); B. D. Ramsey, NASA Marshall Space Flight Ctr. (United States); P. B. Reid, Harvard-Smithsonian Ctr. for Astrophysics (United States); D. Rodriguez Sanmartin, The Univ. of Birmingham (United Kingdom); T. T. Saha, NASA Goddard Space Flight Ctr. (United States); D. A. Schwartz, Harvard-Smithsonian Ctr. for Astrophysics (United States); S. Troler-McKinstry, The Pennsylvania State Univ. (United States); R. H. T. Wilke, The Pennsylvania State Univ. (United States) and Grinnell College (United States); R. Willingale, Univ. of Leicester (United Kingdom); W. W. Zhang, NASA Goddard Space Flight Ctr. (United States)
- 8147 1R **Adjustable grazing incidence x-ray optics: measurement of actuator influence functions and comparison with modeling** [8147-59]
V. Cotroneo, W. N. Davis, P. B. Reid, D. A. Schwartz, Smithsonian Astrophysical Observatory (United States); S. Troler-McKinstry, R. H. T. Wilke, The Pennsylvania State Univ. (United States)
- 8147 1S **Adjustable x-ray optics: correction for gravity-induced figure errors** [8147-60]
D. A. Schwartz, V. Cotroneo, W. Davis, M. Freeman, P. Reid, Harvard-Smithsonian Ctr. for Astrophysics (United States)

Introduction

The conference *Optics for EUV, X-Ray, and Gamma-Ray Astronomy V* met August 23–25 in San Diego, California, as part of the **SPIE Optics + Photonics 2011** international symposium **Optical Engineering + Applications**. As with previous conferences in this series, it provided an effective forum for discussion of recent progress in imaging and spectroscopic optics for EUV, x-ray, and gamma-ray astronomy. With over 60 papers in 13 sessions, this volume attests to the vitality of research in this field. We thank the program committee for helping to organize the technical program and for fostering broad participation, and the session chairs and presenters for a successful and stimulating conference. We also appreciate the efforts of the SPIE staff in organizing and implementing the conference and in publishing these Proceedings.

Currently operating x-ray observatories—*Chandra* (AXAF), *XMM-Newton*, *Suzaku* (Astro-E2), *Swift*, and *Hinode* (Solar-B)—demonstrate the importance of focusing optics to high-energy astronomy. Launching within the next few years, four small-to-medium missions will utilize x-ray focusing optics to advance high-energy astronomy. NASA's NuSTAR (Nuclear Spectroscopic Telescope ARray) and JAXA's Astro-H will extend the power of focused imaging into the hard-x-ray band; Astro-H will also provide soft-x-ray (non-dispersive) high-spectral-resolution imaging. Russia's SRG (Spectrum Röntgen Gamma)—with the German eROSITA and Russian ART-XC telescope arrays—will conduct the most sensitive x-ray all-sky survey. Finally, NASA's GEMS (Gravity and Extreme Magnetism Small Explorer) will employ focusing optics to enhance its sensitivity for x-ray polarimetry. Collectively, these nine missions—all to have been launched in a 15-year period (1999–2014)—significantly advance x-ray technologies for high angular resolution, large collecting areas, high spectral resolution, polarimetry, and lightweight optical components.

While these recent and near-future x-ray missions continue to drive research in high-energy astrophysics, the prospects for new missions and the scientific discoveries they enable are currently unclear. Indeed, this year's conference took place at a particularly delicate moment for the scientific community. Programmatic and budgetary limitations have precluded or delayed advanced development and implementation of additional missions—e.g., NHXM (New Hard-X-ray Mission), which would bring high-resolution imaging to hard-x-ray astronomy. Of special concern is the fate of the next facility-class x-ray mission: After many years of development—first individually as ESA's XEUS (X-ray Evolving Universe Spectroscopy) and NASA's Constellation-X mission concepts—the joint NASA–ESA–JAXA *International X-ray Observatory* (IXO) is being de-scoped as the ESA-led mission ATHENA (Advanced Telescope for High-ENergy Astrophysics), a candidate L-class mission to be considered in early 2012.

Despite such uncertainties, these and other suggested future high-energy-astronomy missions continue to call for technology advances in optics for EUV, x-ray, and gamma-ray astronomy. Accordingly, Conference 8147 addressed all areas of optical science and technology relevant to such optics.

FOIL OPTICS (Session 1) addressed progress in aluminum foil segmented optics. Previously used for the ASCA and *Suzaku* telescopes, such mirror systems provide low-mass, low-cost, high-throughput x-ray imaging at moderate angular resolution. Papers in Session 1 described development and implementation of Astro-H telescopes, including efforts to reduce the imaging half-power diameter to HPD $\approx 60''$.

ELECTROFORMED OPTICS (Session 2) reported on development of x-ray mirror systems employing full-cylinder electroformed nickel shells. Previously used for the Beppo-SAX, *Swift*, and XMM-Newton telescopes, such mirror systems provide moderately low-cost and low-mass moderate-throughput x-ray imaging at good angular resolution (HPD $\approx 15''$). Papers in Session 2 described development, implementation, and testing of the SRG eROSITA and ART-XC telescopes and of the Focussing Optics X-ray Solar Imager (FOXSI) balloon-borne telescopes, as well as research and development of technologies for future electroformed-nickel optics, such as proposed for the NHXM telescope.

SILICON PORE OPTICS (Session 3) covered research, development, fabrication, and testing of mirror modules utilizing Silicon Pore Optics (SPO) technology. With cosine BV as principal industrial partner, ESA initiated SPO technology development for a large-area x-ray telescope aboard a facility-class mission that evolved from XEUS to IXO to ATHENA. Papers in Session 3 described progress in maturing this technology toward constructing and launching a large-area (focusing) x-ray telescope with angular resolution HPD $\leq 10''$.

SLUMPED GLASS OPTICS I and II (Sessions 4 and 5) covered research, development, fabrication, and testing of mirror modules utilizing slumped-glass technology. Session 4 reported on the status of x-ray optics for the NuSTAR mission, which employs thousands of multilayer-coated slumped-glass segments to perform the first satellite-borne focused imaging in the hard-x-ray band. In preparation for an early-2012 launch, the NuSTAR team completed assembly, testing, and calibration of the flight modules, demonstrating an angular resolution HPD $\approx 50''$. Session 4 continued with overviews of progress in the United States and in Italy to develop the next generation of slumped-glass optics with finer angular resolution (HPD $\leq 10''$). Session 4 concluded with reports on approaches for slumping glass segments, while Session 5 addressed issues in alignment and assembly of such mirror pairs into mirror modules.

COATINGS (Session 6) covered a range of topics, beginning with bilayer and graded multilayer x-ray optical coatings, which enhance reflectance at low and at high energies, respectively. The session next reported on the use of a sputtered titanium-nitride coating on mandrels, to serve as a hard release layer for electroforming shells—including the transference of multilayer coatings on the mandrel onto the shell. Session 6 concluded with a description of research in differential deposition as a low-force technique for correction of figure errors.

DESIGN AND ANALYSIS (Session 7) began with a description of a novel semi-analytical computation of the point spread function valid over all spatial wavelengths (figure, slope errors, and microroughness), followed by a report on modeling of x-ray scattering from multilayers. Other papers addressed mathematical and ray-trace tools for optimizing the design of x-ray telescopes and predicting their imaging performance. The final paper of Session 7 addressed optimization of the size of mirror segments for x-ray telescopes.

OPTICAL FABRICATION (Session 8) began with a description of precision figuring of mandrels for slumping glass, followed by a report on progress in direct precision fabrication of full-cylinder glass mirrors that are an order of magnitude thinner than the high-resolution mirrors of *Einstein*, *ROSAT* and *Chandra*. Session 8 concluded with a description of research in magnet-filed assisted polishing of the sidewalls of micropore x-ray optics.

METROLOGY AND TESTING METHODS (Session 9) addressed instrumentation and techniques for precision metrology and for EUV and x-ray testing. The session began with descriptions of full-surface normal-incidence interferometry and of grazing-incidence wave-front sensing. Session 9 also reported on the development of innovative metrology profilers for precision measurements of large mirrors, and on a test facility for EUV optics.

LAUE LENSES I and II (Sessions 10 and 11) covered the use of Laue lenses, based on natural crystals, for gamma-ray telescopes. Session 10 primarily provided overviews of Laue telescope concepts, prototypes, and test results. Session 11 mainly addressed the properties and characterization of mosaic and curved crystals for use in Laue-lens gamma-ray telescopes. The goal of this research is to bring to gamma-ray astronomy the power of focusing, in order to improve greatly the sensitivity for detection and measurement of cosmic gamma-ray sources.

SPECTROGRAPHS (Session 12) reported on instrumentation for high-resolution dispersive spectroscopy of the sun and of cosmic sources—including proposed measurement of the Warm-Hot Intergalactic Medium (WHIM) in x-ray absorption. The papers explored non-traditional grating designs for x-ray grazing-incidence spectrographs: a planar varied-line-spacing reflection grating; an off-plane radial-groove reflection grating; and a critical-angle transmission (CAT) grating.

NOVEL OPTICS (Session 13) concluded the Conference with an assortment of papers on novel concepts for x-ray imaging telescopes: micro-channel plate optics; a hybrid coded-mask lobster-eye wide-field telescope; and a grazing-incidence x-ray interferometer. The final papers of Session 13 reported on technology development for active (adjustable) x-ray telescopes.
