Volume 8172

Proceedings of SPIE, 0277-786X, v. 8172

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

xiii	Introduction

BIOPHOTONICS AND BIOMEDICAL OPTICS

8172 03	Micrometer scale resolution images of human corneal graft using full-field optical coherence tomography (FF-OCT)-link to polarimetric study of scattered field [8172-02] G. Georges, L. Siozade-Lamoine, O. Casadessus, C. Deumié, Institut Fresnel, CNRS, Univ. Aix-Marseille (France); L. Hoffart, J. Conrath, Univ. Aix-Marseille (France)
8172 04	Optical system for monitoring the internal image of foods and the human body [8172-03] N. Aisha, L. Fugang, T. Genta, Toyohashi Univ. of Technology (Japan); K. Yamaguchi, Kagawa Univ. (Japan); M. Fukuda, Toyohashi Univ. of Technology (Japan)
8172 05	Depth selectivity in biological tissues by polarization analysis of backscattered light [8172-04] A. da Silva, Institut Fresnel, CNRS, Aix-Marseille Univ. (France); P. Stahl, Institut de Neurosciences Cognitives, CNRS, Aix-Marseille Univ. (France); S. Rehn, Institut Fresnel, CNRS, Aix-Marseille Univ. (France); I. Vanzetta, Institut de Neurosciences Cognitives, CNRS, Aix-Marseille Univ. (France); C. Deumié, Institut Fresnel, CNRS, Aix-Marseille Univ. (France)
8172 06	Snapshot Mueller polarimetry for biomedical diagnostic related to human liver fibrosis: evaluation of the method for biomedical assessments [8172-05] P. Babilotte, M. Dubreuil, S. Rivet, Univ. de Bretagne Occidentale (France) and Univ. Europeenne de Bretagne (France); Y. Lijour, Univ. de Bretagne Occidentale (France) and Univ. Europeenne de Bretagne (France); D. Sevrain, L. Martin, G. Le Brun, Y. Le Grand, B. Le Jeune, Univ. de Bretagne Occidentale (France) and Univ. Europeenne de Bretagne (France)
8172 07	Biomedical implications of dental-ceramic defects investigated by numerical simulation, radiographic, microcomputer tomography, and time-domain optical coherence tomography [8172-06] C. Sinescu, M. L. Negrutiu, Victor Babes Univ. of Medicine and Pharmacy of Timisoara (Romania); C. Ionita, State Univ. of New York at Buffalo (United States); L. Marsavina, R. Negru, Politehnica Univ. of Timisoara (Romania); F. Topala, E. Petrescu, R. Rominu, M. Fabriky, Victor Babes Univ. of Medicine and Pharmacy of Timisoara (Romania); A. Bradu, Univ. of Kent (United Kingdom); M. Rominu, Victor Babes Univ. of Medicine and Pharmacy of Timisoara (Romania); A. Gh. Podoleanu, Univ. of Kent (United Kingdom)

- 8172 08 **Ceramic and polymeric dental onlays evaluated by photo-elasticity, optical coherence tomography, and micro-computed tomography** [8172-07]
C. Sinescu, M. Negrutiu, F. Topala, Victor Babes Univ. of Medicine and Pharmacy of Timisoara (Romania); C. Ionita, State Univ. of New York at Buffalo (United States); R. Negru, Politehnica Univ. Timisoara (Romania); M. Fabriky, C. Marcautuanu, Victor Babes Univ. of Medicine and Pharmacy of Timisoara (Romania); A. Bradu, G. Dobre, Univ. of Kent (United Kingdom); L. Marsavina, M. Romînu, Victor Babes Univ. of Medicine and Pharmacy of Timisoara (Romania); A. Podoleanu, Univ. of Kent (United Kingdom)

PHOTONICS FOR SAFETY, SECURITY, AND ENVIRONMENT: MODELING AND SIMULATION

- 8172 09 **The scattering of light from two-dimensional randomly rough surfaces (Keynote Paper)** [8172-08]
T. A. Leskova, Univ. of California, Irvine (United States); P. A. Letnes, Norwegian Univ. of Science and Technology (Norway); A. A. Maradudin, Univ. of California, Irvine (United States); T. Nordam, I. Simonsen, Norwegian Univ. of Science and Technology (Norway)
- 8172 0A **Non-linear modeling of active or passive optical lamellar nanostructures (Invited Paper)** [8172-09]
A. V. Kildishev, X. Ni, Purdue Univ. (United States)
- 8172 0B **Numerical modeling of active plasmonic metamaterials** [8172-10]
L. J. Prokopenko, Purdue Univ. (United States) and Institute of Computational Technologies (Russian Federation); J. Trieschmann, Purdue Univ. (United States) and Ruhr-Univ. Bochum (Germany); T. A. Klar, Johannes-Kepler Univ. Linz (Austria); A. V. Kildishev, Purdue Univ. (United States)

PHOTONICS FOR SAFETY, SECURITY AND ENVIRONMENT: NANO- AND METAMATERIALS

- 8172 0F **Tunneling of ultrashort EM wave pulses in gradient metamaterials: paradoxes and perspectives (Keynote Paper)** [8172-14]
A. B. Shvartsburg, Joint Institute for High Temperatures (Russian Federation)
- 8172 0G **Surface plasmon effect on metallic nanoparticles integrated in organic solar cells** [8172-15]
S. Vedraïne, Institut Matériaux Microélectronique Nanosciences de Provence, CNRS, Aix-Marseille Univ. (France); V. Gernigon, Institut d'Electronique du Solide et des Systèmes, CNRS (France); P. Torchio, Institut Matériaux Microélectronique Nanosciences de Provence, CNRS, Aix-Marseille Univ. (France); F. Flory, Institut Matériaux Microélectronique Nanosciences de Provence, CNRS, Aix-Marseille Univ.; T. Heiser, P. Leveque, Institut d'Electronique du Solide et des Systèmes (France); L. Escoubas, Institut Matériaux Microélectronique Nanosciences de Provence, CNRS, Aix-Marseille Univ. (France)
- 8172 0H **Random rough surface photofabrication** [8172-16]
V. Brissonneau, Thales Optronique S.A. (France) and Institut Matériaux Microélectronique Nanosciences de Provence, CNRS, Aix Marseille Univ. (France); L. Escoubas, Institut Matériaux Microélectronique Nanosciences de Provence, CNRS, Aix Marseille Univ. (France); F. Flory, Institut Matériaux Microélectronique Nanosciences de Provence, CNRS, Ecole Centrale Marseille (France); G. Berginc, Thales Optronique S.A. (France)

- 8172 0I **Wavelength and temperature dispersion of refractive index of thin films** [8172-17]
T. M. Wood, J. Le Rouzo, Institut Matériaux Microélectronique Nanosciences de Provence, CNRS (France); F. R. Flory, Ecole Centrale Marseille (France); L. Escoubas, Institut Matériaux Microélectronique Nanosciences de Provence, CNRS (France); P. Coudray, Kloé SA, Montpellier (France)
- 8172 0K **Polarized light in nanogradient metamaterials** [8172-51]
A. I. Kuzmichev, National Technical Univ. of Ukraine (Ukraine); A. B. Shvartsburg, Joint Institute for High Temperatures (Russian Federation); O. D. Volpian, Yu. A. Obod, P. P. Yakovlev, M.F. Stelmakh Polyus Research and Development Institute (Russian Federation)

QUANTUM COMMUNICATION AND PROCESSING, SYSTEMS AND COMPONENTS

- 8172 0M **Enabling quantum communication using integrated nonlinear optics (Invited Paper)** [8172-20]
V. D'Auria, F. Kaiser, A. Martin, L. Labonté, M. P. De Micheli, D. B. Ostrowsky, O. Alibart, S. Tanzilli, Lab. de Physique de la Matière Condensée, CNRS, Univ. de Nice Sophia Antipoli (France)
- 8172 0P **Development of superconducting single-photon detectors for integrated quantum photonics applications (Invited Paper)** [8172-23]
R. Leonì, A. Gaggero, Istituto di Fotonica e Nanotecnologie, CNR (Italy); J. P. Sprengers, Eindhoven Univ. of Technology (Netherlands); F. Mattioli, Istituto di Fotonica e Nanotecnologie, CNR (Italy); D. Sahin, S. J. Nejad, Eindhoven Univ. of Technology (Netherlands); J. Beetz, M. Lerner, M. Kamp, S. Höfling, Julius-Maximilians-Univ. Würzburg (Germany); A. Fiore, Eindhoven Univ. of Technology (Netherlands)

OPTICAL SYSTEMS FOR SCIENCES OF THE UNIVERSE: NEW CONCEPTS FOR SPECTRO-IMAGING

- 8172 0U **MAIA: a multispectral instrument for asteroseismology observations of hot subdwarf stars** [8172-28]
J. Vandersteen, G. Raskin, J. Morren, R. H. Østensen, W. Pessemier, S. Prins, J. Swevers, H. Van Winckel, C. Aerts, Katholieke Univ. Leuven (Belgium)
- 8172 0V **Echoes: a new instrumental concept of Doppler Spectro-Imager for the ESA mission project JUICE** [8172-29]
L. Soulat, F.-X. Schmider, S. Robbe-Dubois, Lab. H. Fizeau, CNRS, Univ. de Nice Sophia Antipolis (France); T. Appourchaux, Institut d'Astrophysique Spatiale, CNRS, Univ. Paris XI (France); Y. Bresson, J.-B. Daban, Lab. H. Fizeau, CNRS, Univ. de Nice Sophia Antipolis (France); P. Gaulme, Institut d'Astrophysique Spatiale, CNRS, Univ. Paris XI (France); J. Gay, C. Gouvret, Lab. H. Fizeau, CNRS, Univ. de Nice Sophia Antipolis (France)
- 8172 0W **Direct imaging with a dense aperture masking in comparison with a telescope or a hypertelescope** [8172-30]
F. Patru, European Southern Observatory (Chile) and Observatoire de la Côte d'Azur (France); J. Antichi, Osservatorio Astronomico di Padova (Italy) and Institut de Planétologie et d'Astrophysique de Grenoble (France); J. Girard, European Southern Observatory (Chile)

- 8172 0X **The hypertelescope at work with a BIGRE integral field unit** [8172-31]
J. Antichi, Osservatorio Astronomico di Padova (Italy) and Institute de Planétologie et d'Astrophysique Grenoble (France); P. Rabou, Institute de Planétologie et d'Astrophysique Grenoble (France); F. Patru, European Southern Observatory (Chile); E. Giro, Osservatorio Astronomico di Padova (Italy); J. Girard, European Southern Observatory (Chile); D. Mourard, Observatoire de la Côte d'Azur (France)

PHOTONICS FOR SAFETY, SECURITY AND ENVIRONMENT: APPLICATIONS, OPTICAL COATINGS, THIN FILMS

- 8172 0Y **Reflection coefficients and optical admittances loci monitoring for thin film coatings and its applications to optical systems (Keynote Paper)** [8172-32]
C.-C. Lee, K. Wu, Y.-J. Chen, National Central Univ. (Taiwan)

PHOTONICS FOR SAFETY, SECURITY AND ENVIRONMENT: APPLICATIONS, IDENTIFICATION, DETECTION

- 8172 0Z **Advanced algorithms for identifying targets from a three-dimensional reconstruction of sparse 3D ladar data** [8172-33]
I. Berechet, SISPIA SARL (France); G. Berginc, Thales Optronique S.A. (France)
- 8172 10 **Wide field-of-view all-reflective objectives designed for multispectral image acquisition in photogrammetric applications** [8172-34]
K. Seidl, Technische Univ. Dresden (Germany) and Fraunhofer Institute for Photonic Microsystems (Germany); K. Richter, Technische Univ. Dresden (Germany); J. Knobbe, Fraunhofer Institute for Photonic Microsystems (Germany); H.-G. Maas, Technische Univ. Dresden (Germany)

PHOTONICS FOR SAFETY, SECURITY AND ENVIRONMENT: APPLICATIONS OF PHOTONICS

- 8172 11 **A study of blue-ray pickup head optical system with liquid crystal optics module** [8172-35]
C.-T. Yen, National Formosa Univ. (Taiwan); Y.-C. Fang, National Kaohsiung First Univ. of Science and Technology (Taiwan); C.-M. Tsai, Kun Shan Univ. (Taiwan)
- 8172 12 **Application of visible spectroscopy in waste sorting** [8172-36]
P. Spiga, A. Bourely, Pellenc Selective Technologies (France)

POSTER SESSION

- 8172 13 **OCT and RX validation of metal-ceramic crowns repaired with ceramic material** [8172-39]
E. Petrescu, C. Sinescu, M. L. Negrutiu, D. Pop, R. Rominu, M. Enescu, M. Rominu, A. Bradu, G. Dobre, Victor Babes Univ. of Medicine and Pharmacy (Romania); A. Gh. Podoleanu, Univ. of Kent (United Kingdom)
- 8172 14 **The assessment of orthodontic bonding defects: optical coherence tomography followed by three-dimensional reconstruction** [8172-40]
R. Romînu, C. Sinescu, M. Romînu, M. Negruțiu, E. Petrescu, D. Pop, Victor Babes Univ. of Medicine and Pharmacy (Romania); A. Gh. Podoleanu, Univ. of Kent (United Kingdom)

- 8172 16 **Optical investigations of various polymeric materials used in dental technology** [8172-42]
M. L. Negrutiu, C. Sinescu, F. I. Topală, Victor Babes Univ. of Medicine and Pharmacy (Romania); C. Ionita, State Univ. of New York at Buffalo (United States); L. Goguță, C. Mărcăușeanu, M. Romînu, Victor Babes Univ. of Medicine and Pharmacy (Romania); A. Gh. Podoleanu, Univ. of Kent (United Kingdom)
- 8172 17 **A new basis of polynomials for off-axis highly aspheric optical surfaces** [8172-43]
M. Gray, M. Ferrari, S. Vives, Lab. d'Astrophysique de Marseille, CNRS, Univ. de Provence (France)
- 8172 18 **Fast catadioptric telescopes for CCD observation of transient events and space surveillance** [8172-44]
A. N. Yudin, A. V. Sankovitch, Keldysh Institute for Applied Mathematics (Russian Federation)
- 8172 19 **Design of the optics for an imaging classic mount multi-étalon spectro-polarimeter for the next generation of ground-based solar telescopes** [8172-45]
V. Greco, Istituto Nazionale di Ottica, CNR (Italy); F. Cavallini, INAF - Osservatorio Astrofisico di Arcetri (Italy)
- 8172 1A **Active optics: variable curvature mirrors for ELT laser guide star refocusing systems** [8172-46]
Z. Challita, E. Hugot, F. Madec, M. Ferrari, D. Le Mignant, S. Vivès, J.-G. Cuby, Lab. d'Astrophysique de Marseille (France)
- 8172 1B **Compact imaging spectrometer with visible-infrared variable filters for Earth and planet observation** [8172-47]
A. Piegari, A. Sytchkova, Optical Coatings Lab., ENEA (Italy); J. Bulir, Optical Coatings Lab., ENEA (Italy) and Institute of Physics of the ASCR, v.v.i. (Czech Republic); M. Dami, G. Aroldi, SELEX Galileo S.p.A. (Italy); B. Harnisch, ESA-ESTEC (Netherlands)
- 8172 1C **Numerical atmospheric turbulence models and LQG control for adaptive optics system** [8172-48]
J.-P. Folcher, M. Carillet, Lab. H. Fizeau, CNRS, Univ. de Nice Sophia Antipolis (France)
- 8172 1D **Optical system to extract reflection coefficients and optical admittances of a thin film stack and its application in coating monitoring** [8172-49]
C.-C. Lee, K. Wu, Y.-J. Chen, C.-C. Kuo, National Central Univ. (Taiwan)

- 10 Photonics for Safety, Security, and Environment: Applications of
Photonics
François R. Flory, Institut Matériaux Microélectronique Nanosciences
de Provence (France)

Introduction

Light and photonics can influence our lives today in several ways that we could never have imagined a few decades ago. Light will play an even more significant role in the future, enabling a revolution in communications, nanophotonics, biophotonics, biotechnology, optical sensing, and lighting. Photonics is the field of science and engineering encompassing the physical phenomena and technologies associated with the generation, transmission, manipulation, detection, and utilization of light. Areas of major importance in photonics for the future are optics in information technology and telecommunications, optics in health care and life sciences, optical sensing, lighting, energy and optical systems for sciences.

Applications include adaptive optics for earth-based astronomy, infrared sensors for remote controls, to night-vision equipment. In the area of military applications, optical and photonic technology is ubiquitous, from photonic components to complex systems. Lasers are used for targeting, range finding, navigation and imaging. Infrared cameras provide satellite pictures of clouds. Infrared detectors are used for home security, real-time measurements of industrial emissions, on-line industrial process control, and global environmental monitoring. In biophotonics, optical techniques are under investigation for non-invasive diagnostics such as for example early detection of breast cancer. Optics is providing new biological research tools for visualization, analysis and measurement. Innovative optical sensors are augmenting human vision, revealing details and information never seen before. Improvements in photovoltaic cells will affect energy and environmental concerns on an international scale.

With a highlighted focus on scientific and engineering challenges in modeling, plasmonics materials, biophotonics optics, quantum communications and complex systems for sciences of the universe, OCS 2011 was held in Marseilles in September 2011. Outstanding keynote speakers were invited in four areas in which photonic and optical technologies are applied to innovate and enhance the future: biophotonics and biomedical optics, photonics for safety, security and environment, quantum communication and processing, and optical systems for sciences of the universe. The main purpose of this symposium was to bring together researchers involved in various experimental and theoretical studies on photonics and optics.

These proceedings comprise the refereed papers presented at this very stimulating meeting and present an up-to-date survey of many aspects of photonics. The contributions contained in these proceedings include those from leading experts on modeling of the optical properties of randomly rough surfaces, metamaterial, inhomogeneous, and plasmonics materials, and quantum communication. It is interesting to note that the first rigorous resolution

of the reduced Rayleigh equation for two-dimensional randomly rough surfaces is described. Recent applications of nanostructured materials, thin films, and advanced algorithms for complex optical systems for safety, security, and environment are also given in these proceedings.

We hope that these papers on very fascinating phenomena written by those involved today in the different subjects presented during the symposium will encourage other researchers to tackle these stimulating theoretical and experimental problems, and these proceedings will be of interest and a valuable reference for those studying photonics and optics.

I wish to thank the authors for the care they have put into the preparation of their contributions.

Grard Berginc
