(POEM) 2011*

Laser and Terahertz Science and Technology

Jianquan Yao
X. C. Zhang
Dapeng Yan
Jinsong Liu
Editors

2–5 November 2011
Wuhan, China

Organized by
Wuhan National Laboratory for Optoelectronics (China)

Sponsored by
Huazhong University of Science and Technology (China) • China Hubei Provincial Science and
Technology Department • Wuhan East Lake National Innovation Model Zone (Optics Valley
of China, OVC) • The Optical Society • Hubei Provincial Foreign Experts Affairs Bureau

Supported by
Ministry of Education (China) • State Administration of Foreign Experts Affairs (China) • National
Natural Science Foundation Committee of China

Cooperating Organizations
IOP—Institute of Physics • The Laser Institute of America (United States) • IET—The Institution of
Engineering and Technology • International Biomedical Optics Society • IEEE Photonics Society
(Singapore and Hong Kong Chapters) • Chinese Optical Society

Volume 8330

Proceedings of SPIE, 0277-786X, v. 8330

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	<i>Symposium Committees</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

PLENARY SESSION

8330 02	Nonlinear optical THz generation and sensing applications (Plenary Paper) [8330-54] K. Kawase, Nagoya Univ. (Japan) and RIKEN (Japan)
---------	---

TERAHERTZ GENERATION AND DETECTION

8330 03	Terahertz digital holography [8330-51] X. Wang, Y. Cui, W. Sun, Y. Zhang, Capital Normal Univ. (China)
8330 04	Quantitative measurement of a three-component mixture based on THz spectra [8330-57] Z. Li, Z. Zhang, X. Zhao, H. Su, F. Yan, Univ. of Science and Technology Beijing (China); K. Dunn, M. B. Johnston, Univ. of Oxford (United Kingdom)
8330 05	Cancellation of a deviation in pulses of THz-TDS [8330-63] H. Su, Z. Zhang, X. Zhao, Z. Li, F. Yan, Univ. of Science and Technology Beijing (China)
8330 06	Terahertz wave filter based on photonic crystal [8330-15] Y. Liu, J. Li, China Jiliang Univ. (China)

LASERS AND APPLICATIONS

8330 07	Technology and applications of ultrafast fiber lasers (Invited Paper) [8330-62] M. Lang, T. Hellerer, J. Stuhler, TOPTICA Photonics AG (Germany)
---------	--

TERAHERTZ IMAGING AND SPECTROSCOPY

8330 09	Tunable high-efficient pulsed NH₃ terahertz lasers [8330-21] Z.-X. Jiu, Wuhan Polytechnic Univ. (China); Q. Li, Hubei Aerospace Technology Institute (China); D.-L. Zuo, L. Miao, Z.-H. Cheng, Huazhong Univ. of Science and Technology (China)
---------	--

POSTER SESSION

8330 0A	Theoretical investigation on breaking plant cell wall by laser [8330-02] L. Chen, J. Wang, P. Ma, D. Zuo, X. Wang, Z. Cheng, Huazhong Univ. of Science and Technology (China)
---------	---

- 8330 OB **Polarimetric terahertz time-domain spectroscopy** [8330-03]
Y. Gong, H. Dong, A*STAR Institute for Infocomm Research (Singapore)
- 8330 OD **Switchable multiwavelength erbium-doped photonic crystal fiber ring laser based on a length of polarization-maintaining photonic crystal fiber** [8330-06]
J. Cheng, S. Ruan, Shenzhen Univ. (China)
- 8330 OE **Polarizing beam splitter in terahertz regime** [8330-07]
C. Sun, J. Li, China Jiliang Univ. (China)
- 8330 OF **Terahertz wave filter based on cinquefoil photonic crystal** [8330-08]
C. Sun, J. Li, China Jiliang Univ. (China)
- 8330 OG **Terahertz wave filter based on frequency-selective surface structure** [8330-09]
C. Sun, J. Li, China Jiliang Univ. (China)
- 8330 OH **Terahertz spectroscopic investigations of leather in terahertz wave range** [8330-11]
M. Song, J. Li, China Jiliang Univ. (China)
- 8330 OI **Terahertz wave spectrum analysis of microstrip structure** [8330-12]
M. Song, J. Li, China Jiliang Univ. (China)
- 8330 OJ **Dual-band bandpass terahertz wave filter based on microstrip resonant structure** [8330-13]
Y. Liu, J. Li, China Jiliang Univ. (China)
- 8330 OK **Transmission characteristic of panda eyes fiber in terahertz regime** [8330-14]
Y. Liu, J. Li, China Jiliang Univ. (China)
- 8330 OL **Technological study on reducing blast-hole rate during laser cutting oil pipe** [8330-17]
Q. Deng, W. Yang, X. Tang, H. Peng, Y. Qin, Huazhong Univ. of Science and Technology (China)
- 8330 OM **Numerical simulation of temperature at drilling micro-hole on moving CO₂ laser irradiated sticking plaster** [8330-18]
Z. Rao, Jiangxi Univ. of Traditional Chinese Medicine (China) and Huazhong Univ. of Science and Technology (China); Z. He, J. Du, X. Zhang, G. Ai, C. Zhang, Jiangxi Univ. of Traditional Chinese Medicine (China); T. Wu, Wuhan Institute of Technology (China)
- 8330 ON **Optical modulation of permittivity for different doped near stoichiometric lithium niobate in the terahertz range** [8330-19]
L. Wu, F. Ling, J. Liu, Huazhong Univ. of Science and Technology (China); J. Yao, Tianjin Univ. (China) and Huazhong Univ. of Science and Technology (China)
- 8330 OO **Ion energy spectrum and magnetic foil trap debris mitigation efficiency of the laser produced plasma sources for extreme ultraviolet lithography** [8330-23]
T. Wu, Wuhan Institute of Technology (China) and Huazhong Univ. of Science and Technology (China); S. Wang, Hubei Univ. of Education (China); Z. Rao, Jiangxi Univ. of Traditional Chinese Medicine (China)

- 8330 OP **Improved two-temperature model including electron density of states effect for Ni during femtosecond laser pulses** [8330-24]
R. Fang, Chongqing Univ. of Posts and Telecommunicatio (China); H. Wei, Chongqing Univ. (China); X. Gui, Chongqing Univ. of Posts and Telecommunications (China)
- 8330 OQ **The scheme of efficient terahertz difference frequency generation in two-dimensional periodical crystals by CO₂ laser** [8330-25]
Z. Rao, Jiangxi Univ. of Traditional Chinese Medicine (China) and Huazhong Univ. of Science and Technology (China); T. Wu, Wuhan Institute of Technology (China); Y. He, Q. Ye, K. Xiong, L. Zhou, Jiangxi Univ. of Traditional Chinese Medicine (China)
- 8330 OR **UV-visible spectroscopic study of CO₂ laser produced tin plasma** [8330-26]
T. Wu, Wuhan Institute of Technology (China) and Huazhong Univ. of Science and Technology (China); S. Wang, Hubei Univ. of Education (China); Z. Rao, Jiangxi Univ. of Traditional Chinese Medicine (China)
- 8330 OS **Approximate analytical expression of flattened Gaussian beams passing through a paraxial optical system with an annular aperture** [8330-28]
L. Xiao, Y. Qin, X. Tang, Huazhong Univ. of Science and Technology (China)
- 8330 OT **Terahertz tunable narrow bandpass filter based on photonic crystal cavity** [8330-29]
J. He, P. Liu, Y. He, Z. Hong, China Jiliang Univ. (China)
- 8330 OU **The competition between two lasing modes in one-dimensional active random media** [8330-30]
H. Liu, Y. Wang, Y. Zhao, S. Jing, Z. Ren, China Univ. of Mining and Technology (China)
- 8330 OV **Wavelength switchable terahertz filter based on photonic crystal with liquid-crystal defect layer** [8330-31]
J. He, Huazhong Univ. of Science and Technology (China); J. Novak, Rensselaer Polytechnic Institute (United States); Y. Jiang, Z. Li, Huazhong Univ. of Science and Technology (China); R. Huang, Rensselaer Polytechnic Institute (United States)
- 8330 OW **Numerical simulation for the influence of laser-induced plasmas addition on air mass capture of hypersonic inlet** [8330-32]
W. Zhao, Z. Dou, Q. Li, Academy of Equipment (China)
- 8330 OX **Conformational characteristics of chiral and racemic naproxen molecules investigated by terahertz time-domain spectroscopy** [8330-33]
Y. Du, R. Zhao, G. Hao, C. Guo, Z. Hong, China Jiliang Univ. (China)
- 8330 OY **Investigating the position isomerism effect of dihydroxybenzoic acid compounds by terahertz time-domain spectroscopy** [8330-36]
Y. Du, G. Hao, R. Zhao, Z. Hong, China Jiliang Univ. (China)
- 8330 OZ **Terahertz spectral study of L- and DL-fudosteine** [8330-37]
J.-L. He, R.-J. Zhao, J. Li, Y. Du, Z. Hong, China Jiliang Univ. (China)
- 8330 IO **Numerical study on deceleration of type IV shock interaction thermal ablating effect by laser energy injection** [8330-38]
W. Wu, Y. Hong, J. Fang, Academy of Equipment (China)

- 8330 11 **THz gas sensor based on one-dimensional photonic crystal** [8330-42]
P. Liu, J. He, Y. He, Z. Hong, China Jiliang Univ. (China)
- 8330 12 **Research of THz wave detector based on bi-material microcantilever arrays** [8330-43]
B. Su, Beijing Key Lab. for Terahertz Spectroscopy and Imaging (China) and Capital Normal Univ. (China); G. Duan, Beijing Key Lab. for Terahertz Spectroscopy and Imaging (China), Capital Normal Univ. (China), and Beijing Institute of Technology (China); C. Zhang, Beijing Key Lab. for Terahertz Spectroscopy and Imaging (China) and Capital Normal Univ. (China)
- 8330 13 **Numerical analysis and prediction of laser forming of thin plate** [8330-45]
T. Tamsaout, E.-H. Amara, Ctr. of Development of Advanced Technologies (Algeria)
- 8330 14 **Numerical simulation of assisting gas flow for laser cutting process** [8330-46]
T. Tamsaout, E.-H. Amara, Ctr. of Development of Advanced Technologies (Algeria)
- 8330 15 **THz time-domain spectroscopy of selected molecular sieves and their related compounds** [8330-49]
T. Li, C. Dai, L. Tian, Q. Miao, K. Zhao, China Univ. of Petroleum (China)
- 8330 16 **Effecting factor of peak frequency of THz wave from photoconductive antennas** [8330-53]
S. Chen, Xi'an Univ. of Technology (China); W. Shi, Xi'an Univ. of Technology (China) and Xi'an Jiaotong Univ. (China); L. Hou, R. Dai, Xi'an Univ. of Technology (China)
- 8330 17 **Detection of POPs in soil by using terahertz time-domain spectroscopy** [8330-56]
M. Song, J. Li, China Jiliang Univ. (China)
- 8330 18 **A novel method for the synthesis of Ag/ZnO nanorods film** [8330-58]
S. Jing, Z. Sun, H. Liu, M. Tong, China Univ. of Mining and Technology (China)
- 8330 19 **Mid-infrared supercontinuum generation in single mode fluoride fiber** [8330-59]
L. Liu, G. Qin, Q. Tian, W. Qin, Jilin Univ. (China)
- 8330 1A **Terahertz grayscale imaging using spatial frequency domain analysis** [8330-61]
Z. Lv, L. Sun, D. Zhang, J. Yuan, National Univ. of Defense Technology (China)

Dapeng Yan, Raycus Fiber Laser Technologies Company Ltd. (China)
Jianquan Yao, Tianjin University (China) and Wuhan National Laboratory for Optoelectronics (China)

Introduction

The 4th International Photonics and Optoelectronics Meetings (POEM 2011) combined with the 10th International Conference on Photonics and Imaging in Biology and Medicine (PIBM 2011) was held during 2–5 November 2011 at Wuhan Science & Technology Convention & Exhibition Center, Wuhan, P.R. China. This volume contains manuscripts of a selection from the invited talks delivered at the conference and the poster presentations.

The POEM is an international conference of broad scale and multidiscipline, which is extended over a large area of optoelectronics, initiated by WNLO. Aimed at giving full play to the industrial advantage of Wuhan Optics Valley of China, building an independent brand for our international conference, facilitating the regional economic development, promoting the academic reputation and international status of WNL), domestic and internationally renowned academic institutes and organizations in the area of optoelectronics were invited to provide professional support. On such an international platform, POEM was built into a high-level academic conference that integrates academia and industry with the support from Wuhan Optics Valley of China.

POEM 2011 broadened the themes, conducting extensive discussions on four major areas including biomedical photonics, industrial photonics, information photonics and photonics for energy.

POEM 2011 was open to all individuals and entities, domestic and international, which have interest in our four technical areas. The six sub conferences of POEM 2011 were: (1) 10th International Conference on Photonics and Imaging in Biology and Medicine (PIBM 2011); (2) Laser and Tera-Hertz Science and Technology (LTST); (3) Optoelectronic Sensing and Imaging (OSI); (4) Optoelectronic Devices and Integration (OEDI); (5) Optical Communication Systems and Networking (OCSN); and (6) Solar Cells, Solid State Lighting and Information Display Technologies (SSID).

Besides the six sub conferences in four major areas, POEM was organized along with symposiums and workshops including: Workshop on Technology Transfer Models, Sino-Russia Symposium on Biophotonics and Biomedical Photonic, the China-Australia Symposium on Optoelectronic Materials and Devices, 1st Workshop on International Laser Technology and Industrialization, 5th Sino-Russian Laser Technology Forum, 2nd International Workshop on Nanomaterials and Nanosystems (INN 2011). The 40th anniversary of the College of Optoelectronic Science and Engineering at HUST was also celebrated at the same time. Activities such as the Workshop on Immunophotonics, the Workshop on Optical Imaging in Brain Connectivity, the Workshop on Organic Spin Optoelectronics, as well as training courses in Optoelectronic Devices and Integration, and courses given by

travelogue scholars from OSA were arranged to provide a variety of choices for the attendees.

POEM owes its distinguished features to its wide-ranging topics and contents, highly professional delegates, and a strong academic atmosphere. Presentations given by experts worldwide demonstrated previously unpublished cutting-edge scientific achievements. Popular activities such as speeches and posters were intensively organized to provide a unique and immediate access for scientists, entrepreneurs, and students all over the world.

We gratefully thank the financial support by 111 Project (B07038), the National Natural Science Foundation Committee of China (NNSFC)'s funding support. We would like to thank all the authors for their contributions to POEM 2011 and all the members of the committees for their cooperation and time spent reviewing submissions. We would like to extend our sincere thanks for your attendance, support, and contributions at POEM 2011 in Wuhan.

According to different technical areas, the proceedings were divided into six topical volumes:

- 10th International Conference on Photonics and Imaging in Biology and Medicine (PIBM 2011),
- Laser and Tera-Hertz Science and Technology (LTST),
- Optoelectronic Sensing and Imaging (OSI),
- Optoelectronic Devices and Integration (OEDI),
- Optical Communication Systems and Networking (OCSN), and
- Solar Cells, Solid State Lighting and Information Display Technologies (SSID).
